

CCAMLR *Statistical Bulletin*

Volume 35 published in August 2023

The *Statistical Bulletin* is published annually and contains catch and effort statistics and trade statistics

Catch and effort statistics

The *Statistical Bulletin* contains aggregated catch and effort data for fisheries in CCAMLR's Convention Area from 1970 onward. The catch and effort subfolder contains the catch and effort data files and associated documentation.

Trade statistics

The *Statistical Bulletin* contains aggregated trade statistics for toothfish (*Dissostichus eleginoides* and *Dissostichus mawsoni*). Trade statistics are derived from the landings and exports of toothfish as reported in CCAMLR's [Catch Documentation Scheme \(CDS\)](#). The CDS data covers landings and exports of catches taken from inside and outside the CAMLR Convention Area since 2000. The trade statistics subfolder contains the landings and exports data files and associated documentation.

Notes

Catch, effort and trade data from fishing for *Dissostichus eleginoides* in Subarea 48.3 for 2022 were received by the Secretariat. Said fishing was carried out in the absence of a CCAMLR Conservation Measure for 48.3, since Conservation Measure 41-02 was not readopted for the 2021/22 fishing season.

Security classification

The data published in the *Statistical Bulletin* are in the public domain. Users are requested to acknowledge the source of these data as follows:
