

**SCHEDULE OF
CONSERVATION MEASURES
IN FORCE
2008/09 SEASON**

(As amended by the Commission at the Twenty-seventh Meeting,
27 October to 7 November 2008)

This schedule lists conservation measures adopted by the Commission in accordance with Article IX of the Convention on the Conservation of Antarctic Marine Living Resources.

Each conservation measure is identified by a numeric code consisting of a leading 2-digit code designating the category to which the measure belongs, and a trailing 2-digit code uniquely identifying the measure within that category; the year in which the latest version of the measure was adopted or revised follows in brackets. Each resolution is identified by a consecutive number followed by the number (Roman numeral) of the meeting when the latest version of the resolution was adopted or revised.

All cross references to conservation measures in this publication refer to measures in force unless clearly specified otherwise.

The texts of the CCAMLR System of Inspection and the CCAMLR Scheme of International Scientific Observation are appended.

CONTENTS

	Page
Map of the Convention Area	(xi)
Categories and Codes used to Classify Conservation Measures	(xii)
Scientific and Alternate Names of Species where Limits Apply in the Conservation Measures	(xiii)
Summary of Current Conservation Measures and Resolutions	(xiv)
Map of Fishing Areas in the Convention Area	(xxiv)
Application of Conservation Measures to Fisheries in the Convention Area	(xxv)
History of Conservation Measures and Resolutions	(xxix)
Summary of Conservation Measures Adopted Each Year	(xxxviii)
CONSERVATION MEASURE 10-01 (1998)	
Marking of fishing vessels and fishing gear	1
CONSERVATION MEASURE 10-02 (2008)	
Licensing and inspection obligations of Contracting Parties with regard to their flag vessels operating in the Convention Area	1
Annex 10-02/A	4
CONSERVATION MEASURE 10-03 (2008)	
Port inspections of vessels carrying toothfish	5
CONSERVATION MEASURE 10-04 (2007)	
Automated satellite-linked Vessel Monitoring Systems (VMS)	6
Annex 10-04/A	11
Annex 10-04/B	13
CONSERVATION MEASURE 10-05 (2008)	
Catch Documentation Scheme for <i>Dissostichus</i> spp.	16
Annex 10-05/A	21
Attachment 1: <i>Dissostichus</i> Catch Document (until 31 May 2009)	26
<i>Dissostichus</i> Re-export Document (until 31 May 2009)	27
Attachment 2: <i>Dissostichus</i> Catch Document (from 1 June 2009)	29
<i>Dissostichus</i> Re-export Document (from 1 June 2009)	30
Annex 10-05/B	31
Annex 10-05/C	32

CONSERVATION MEASURE 10-06 (2008)	
Scheme to promote compliance by Contracting Party vessels with CCAMLR conservation measures	34
CONSERVATION MEASURE 10-07 (2008)	
Scheme to promote compliance by non-Contracting Party vessels with CCAMLR conservation measures	41
CONSERVATION MEASURE 10-08 (2006)	
Scheme to promote compliance by Contracting Party nationals with CCAMLR conservation measures	48
CONSERVATION MEASURE 10-09 (2008)	
Notification system for transshipments within the Convention Area	50
Annex 10-09/A	51
CONSERVATION MEASURE 21-01 (2008)	
Notification that Members are considering initiating a new fishery	51
Annex 21-01/A	54
CONSERVATION MEASURE 21-02 (2006)	
Exploratory fisheries	54
CONSERVATION MEASURE 21-03 (2008)	
Notifications of intent to participate in a fishery for <i>Euphausia superba</i>	57
Annex 21-03/A	58
Annex 21-03/B	60
CONSERVATION MEASURE 22-01 (1986)	
Regulation on mesh size measurement	61
CONSERVATION MEASURE 22-02 (1984)	
Mesh size	63
CONSERVATION MEASURE 22-03 (1990)	
Mesh size for <i>Champsoccephalus gunnari</i>	64
CONSERVATION MEASURE 22-04 (2006)	
Interim prohibition of deep-sea gillnetting	64
CONSERVATION MEASURE 22-05 (2008)	
Restrictions on the use of bottom trawling gear in high-seas areas of the Convention Area	65
CONSERVATION MEASURE 22-06 (2008)	
Bottom fishing in the Convention Area	66
Annex 22-06/A	70
Annex 22-06/B	72

CONSERVATION MEASURE 22-07 (2008)	
Interim measure for bottom fishing activities subject to Conservation Measure 22-06 encountering potential vulnerable marine ecosystems in the Convention Area	73
CONSERVATION MEASURE 23-01 (2005)	
Five-day Catch and Effort Reporting System	75
CONSERVATION MEASURE 23-02 (1993)	
Ten-day Catch and Effort Reporting System.....	76
CONSERVATION MEASURE 23-03 (1991)	
Monthly Catch and Effort Reporting System	77
CONSERVATION MEASURE 23-04 (2000)	
Monthly Fine-Scale Catch and Effort Data Reporting System for Trawl, Longline and Pot Fisheries	78
CONSERVATION MEASURE 23-05 (2000)	
Monthly Fine-Scale Biological Data Reporting System for Trawl, Longline and Pot Fisheries	79
CONSERVATION MEASURE 23-06 (2007)	
Data Reporting System for <i>Euphausia superba</i> Fisheries.....	79
CONSERVATION MEASURE 24-01 (2008)	
The application of conservation measures to scientific research	80
Annex 24-01/A	82
Annex 24-01/B	85
CONSERVATION MEASURE 24-02 (2008)	
Longline weighting for seabird conservation	86
CONSERVATION MEASURE 25-02 (2008)	
Minimisation of the incidental mortality of seabirds in the course of longline fishing or longline fishing research in the Convention Area.....	91
Annex 25-02/A	93
Annex 25-02/B	94
CONSERVATION MEASURE 25-03 (2003)	
Minimisation of the incidental mortality of seabirds and marine mammals in the course of trawl fishing in the Convention Area	95
CONSERVATION MEASURE 26-01 (2008)	
General environmental protection during fishing	95
CONSERVATION MEASURE 31-01 (1986)	
Regulation of fishing around South Georgia (Statistical Subarea 48.3)	97
CONSERVATION MEASURE 31-02 (2007)	
General measure for the closure of all fisheries.....	97

CONSERVATION MEASURE 32-01 (2001)	
Fishing seasons	99
CONSERVATION MEASURE 32-02 (1998)	
Prohibition of directed fishing for finfish in Statistical Subarea 48.1	99
CONSERVATION MEASURE 32-03 (1998)	
Prohibition of directed fishing for finfish in Statistical Subarea 48.2	99
CONSERVATION MEASURE 32-04 (1986)	
Prohibition of directed fishery on <i>Notothenia rossii</i> in the Peninsula area (Statistical Subarea 48.1)	99
CONSERVATION MEASURE 32-05 (1986)	
Prohibition of directed fishery on <i>Notothenia rossii</i> around South Orkneys (Statistical Subarea 48.2)	100
CONSERVATION MEASURE 32-06 (1985)	
Prohibition of directed fishery on <i>Notothenia rossii</i> around South Georgia (Statistical Subarea 48.3)	100
CONSERVATION MEASURE 32-07 (1999)	
Prohibition of directed fishery on <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Lepidonotothen squamifrons</i> and <i>Patagonotothen guntheri</i> in Statistical Subarea 48.3	100
CONSERVATION MEASURE 32-08 (1997)	
Prohibition of directed fishing for <i>Lepidonotothen squamifrons</i> in Statistical Division 58.4.4 (Ob and Lena Banks)	101
CONSERVATION MEASURE 32-09 (2008)	
Prohibition of directed fishing for <i>Dissostichus</i> spp. except in accordance with specific conservation measures in the 2008/09 season	101
CONSERVATION MEASURE 32-10 (2002)	
Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Division 58.4.4 outside areas of national jurisdiction	101
CONSERVATION MEASURE 32-11 (2002)	
Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Subarea 58.6	101
CONSERVATION MEASURE 32-12 (1998)	
Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Subarea 58.7	102
CONSERVATION MEASURE 32-13 (2003)	
Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.1 outside areas of national jurisdiction	102

CONSERVATION MEASURE 32-14 (2003) Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.2 east of 79°20'E and outside the EEZ to the west of 79°20'E	102
CONSERVATION MEASURE 32-15 (2003) Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Subarea 88.2 north of 65°S	103
CONSERVATION MEASURE 32-16 (2003) Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Subarea 88.3	103
CONSERVATION MEASURE 32-17 (2003) Prohibition of directed fishing for <i>Electrona carlsbergi</i> in Statistical Subarea 48.3	103
CONSERVATION MEASURE 32-18 (2006) Conservation of sharks	103
CONSERVATION MEASURE 33-01 (1995) Limitation of the by-catch of <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Notothenia rossii</i> and <i>Lepidonotothen squamifrons</i> in Statistical Subarea 48.3.....	104
CONSERVATION MEASURE 33-02 (2008) Limitation of by-catch in Statistical Division 58.5.2 in the 2008/09 season.....	105
CONSERVATION MEASURE 33-03 (2008) Limitation of by-catch in new and exploratory fisheries in the 2008/09 season	106
Annex 33-03/A	107
CONSERVATION MEASURE 41-01 (2008) General measures for exploratory fisheries for <i>Dissostichus</i> spp. in the Convention Area in the 2008/09 season	107
Annex 41-01/A	109
Annex 41-01/B	109
Annex 41-01/C	113
CONSERVATION MEASURE 41-02 (2008) Limits on the fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3 in the 2007/08 and 2008/09 seasons	114
Annex 41-02/A	117
CONSERVATION MEASURE 41-03 (2008) Limits on the fishery for <i>Dissostichus</i> spp. in Statistical Subarea 48.4 in the 2008/09 fishing season.....	117
Annex 41-03/A	120
CONSERVATION MEASURE 41-04 (2008) Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 48.6 in the 2008/09 season	120

CONSERVATION MEASURE 41-05 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Division 58.4.2 in the 2008/09 season	122
CONSERVATION MEASURE 41-06 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction in the 2008/09 season	124
CONSERVATION MEASURE 41-07 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction in the 2008/09 season	125
CONSERVATION MEASURE 41-08 (2008)	
Limits on the fishery for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.2 in the 2007/08 and 2008/09 seasons	127
Annex 41-08/A	129
CONSERVATION MEASURE 41-09 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 88.1 in the 2008/09 season	130
CONSERVATION MEASURE 41-10 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 88.2 in the 2008/09 season	133
CONSERVATION MEASURE 41-11 (2008)	
Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Division 58.4.1 in the 2008/09 season	135
CONSERVATION MEASURE 42-01 (2008)	
Limits on the fishery for <i>Champscephalus gunnari</i> in Statistical Subarea 48.3 in the 2008/09 season	137
CONSERVATION MEASURE 42-02 (2008)	
Limits on the fishery for <i>Champscephalus gunnari</i> in Statistical Division 58.5.2 in the 2008/09 season	139
Annex 42-02/A	141
Annex 42-02/B	142
CONSERVATION MEASURE 51-01 (2008)	
Precautionary catch limitations on <i>Euphausia superba</i> in Statistical Subareas 48.1, 48.2, 48.3 and 48.4	143
CONSERVATION MEASURE 51-02 (2008)	
Precautionary catch limitation on <i>Euphausia superba</i> in Statistical Division 58.4.1	144

CONSERVATION MEASURE 51-03 (2008)	
Precautionary catch limitation on <i>Euphausia superba</i> in Statistical Division 58.4.2.....	145
CONSERVATION MEASURE 51-04 (2008)	
General measure for exploratory fisheries for <i>Euphausia superba</i> in the Convention Area in the 2008/09 season	146
Annex 51-04/A	147
Annex 51-04/B	148
CONSERVATION MEASURE 51-05 (2008)	
Limits on the exploratory fishery for <i>Euphausia superba</i> in Statistical Subarea 48.6 in the 2008/09 season	151
CONSERVATION MEASURE 52-01 (2008)	
Limits on the fishery for crab in Statistical Subarea 48.3 in the 2008/09 season	152
Annex 52-01/A	153
Annex 52-01/B	154
Annex 52-01/C	156
CONSERVATION MEASURE 52-02 (2008)	
Limits on the exploratory fishery for crab in Statistical Subarea 48.2 in the 2008/09 season	156
Annex 52-02/A	158
Annex 52-02/B	159
Annex 52-02/C	160
CONSERVATION MEASURE 52-03 (2008)	
Limits on the exploratory fishery for crab in Statistical Subarea 48.4 in the 2008/09 season	160
Annex 52-03/A	162
Annex 52-03/B	163
Annex 52-03/C	164
CONSERVATION MEASURE 61-01 (2008)	
Limits on the exploratory fishery for <i>Martialia hyadesi</i> in Statistical Subarea 48.3 in the 2008/09season.....	164
Annex 61-01/A	165
CONSERVATION MEASURE 91-01 (2004)	
Procedure for according protection to CEMP sites	166
Annex 91-01/A	168
CONSERVATION MEASURE 91-02 (2004)	
Protection of the Cape Shirreff CEMP site	171
Annex 91-02/A	171
RESOLUTION 7/IX	
Driftnet fishing in the Convention Area	185

RESOLUTION 10/XII	
Resolution on harvesting of stocks occurring both within and outside the Convention Area.....	185
RESOLUTION 14/XIX	
Catch Documentation Scheme: implementation by Acceding States and non-Contracting Parties	186
RESOLUTION 15/XXII	
Use of ports not implementing the Catch Documentation Scheme for <i>Dissostichus</i> spp.	187
RESOLUTION 16/XIX	
Application of VMS in the Catch Documentation Scheme	187
RESOLUTION 17/XX	
Use of VMS and other measures for the verification of CDS catch data for areas outside the Convention Area, in particular, in FAO Statistical Area 51	187
RESOLUTION 18/XXI	
Harvesting of <i>Dissostichus eleginoides</i> in areas outside of Coastal State jurisdiction adjacent to the CCAMLR Area in FAO Statistical Areas 51 and 57	188
RESOLUTION 19/XXI	
Flags of non-compliance	189
RESOLUTION 20/XXII	
Ice-strengthening standards in high-latitude fisheries	190
RESOLUTION 21/XXIII	
Electronic Catch Documentation Scheme for <i>Dissostichus</i> spp.	191
RESOLUTION 22/XXV	
International actions to reduce the incidental mortality of seabirds arising from fishing	191
Appendix 1	194
RESOLUTION 23/XXIII	
Safety on board vessels fishing in the Convention Area	194
RESOLUTION 25/XXV	
Combating illegal, unreported and unregulated fishing in the Convention Area by the flag vessels of non-Contracting Parties	195
RESOLUTION 26/XXVI	
International Polar Year/Census of Antarctic Marine Life	196
RESOLUTION 27/XXVII	
Use of a specific tariff classification for Antarctic krill	197

RESOLUTION 28/XXVII	
Ballast water exchange in the Convention Area	197
Annex	198
Policy to Enhance Cooperation between CCAMLR and non-Contracting Parties	201
Text of the CCAMLR System of Inspection	209
Text of the CCAMLR Scheme of International Scientific Observation	219

CATEGORIES AND CODES USED TO CLASSIFY CONSERVATION MEASURES

Category	2-digit Code
Compliance	10
General Fishery Matters	
Notifications	21
Gear regulations	22
Data reporting	23
Research and experiments	24
Minimisation of incidental mortality	25
Environmental protection	26
Fishery Regulations	
General measures	31
Fishing seasons, closed areas and prohibition of fishing	32
By-catch limits	33
Finfish Fisheries	
Toothfish	41
Icefish	42
Other finfish	43
Crustacean Fisheries	
Krill	51
Crab	52
Mollusc Fisheries	
Squid	61
Protected Areas	
CEMP sites	91

SCIENTIFIC AND ALTERNATE NAMES OF SPECIES WHERE LIMITS APPLY IN THE CONSERVATION MEASURES

Species name	Alternate names	Common name	Nom vernaculaire	Обычное название	Nombre Común
Rajiiiformes*		Skates and rays	Raies	Скатообразные	Rayas
Sharks*		Sharks	Requins	Акулы	Tiburones
Squalidae					
<i>Somniosus</i> spp.		Sleeper sharks	Requins dormeurs	Полярные акулы	Tollo de Groenlandia
Myctophidae					
<i>Electrona carlsbergi</i>		Lanternfish	Lanternule	Электрона карлсберга	Linternilla subantártica
Macrouridae					
<i>Macrourus</i> spp.		Rattails, grenadiers	Grenadiers	Макрурусы	Granaderos, colas de rata
Nototheniidae					
<i>Dissostichus eleginoides</i>	<i>D. amissus</i>	Patagonian toothfish	Lépine australe	Патагонский клыкач	Austromerluza negra
<i>Dissostichus mawsoni</i>		Antarctic toothfish	Lépine antarctique	Антарктический клыкач	Austromerluza antártica
<i>Dissostichus</i> spp.		Toothfish	Lépine	клыкач	Austromerluza
<i>Notothenia gibberifrons</i>	<i>Gobionotothen gibberifrons</i>	Humped rockcod	Bocasse bossue	Зеленая нототения	Trama jorobada
<i>Notothenia kempfi</i>		Striped-eyed rockcod	Bocasse aux yeux rayés	Чешуеглазая нототения, кемпи	Trama ojirayada
<i>Notothenia rossii</i>	<i>N. rossii marmorata</i>	Marbled rockcod	Bocasse marbrée	Мраморная нототения	Trama jaspeada
<i>Notothenia squamifrons</i>	<i>N. brevipectoralis,</i> <i>Lepidonotothen squamifrons</i>	Grey rockcod	Bocasse grise	Серая нототения	Trama gris
<i>Patagonotothen brevicauda</i>	<i>P. guntheri,</i> <i>Notothenia guntheri</i>	Patagonian rockcod	Bocasse de Patagonie	Короткохвостая патагонская нототения	Trama patagonica
Channichthyidae					
<i>Chaenocephalus aceratus</i>	<i>C. bouvetensis</i>	Blackfin icefish	Grande-gueule antarctique	Крокодиловая белокровка	Draco antártico
<i>Champscephalus gunnari</i>		Mackerel icefish	Poisson des glaces	Ледяная рыба	Draco rayado
<i>Channichthys rhinoceratus</i>	<i>C. rugosus,</i> <i>Chaenichthys rhinoceratus</i>	Unicorn icefish	Grande-gueule	Носорожья белокровка	Draco rinoceronte
<i>Pseudochaenichthys georgianus</i>		South Georgia icefish	Crocodile de Géorgie	Темная белокровка	Draco cocodrilo
Euphausiidae					
<i>Euphausia superba</i>		Antarctic krill	Krill antarctique	Антарктический криль	Kril antártico
Lithodidae					
<i>Paralomis formosa</i>		Antarctic king crab	Crabe royal de l'Antarctique	Антарктический краб	Centolla antártica
<i>Paralomis spinosissima</i>		Antarctic king crab	Crabe royal de l'Antarctique	Антарктический краб	Centolla antártica
Ommastrephidae					
<i>Martialia hyadesi</i>		Sevenstar flying squid	Encornet étoile	Кальмар мартиалия	Pota festoneada
Seabirds*		Seabirds	Oiseaux de mer	Морские птицы	Aves marinas

* All species caught

SUMMARY OF CONSERVATION MEASURES AND RESOLUTIONS IN FORCE

This summary is provided as a general guide. For details please refer to relevant conservation measures.

(Except for waters adjacent to: ¹ the Kerguelen Islands; ² the Crozet Islands; ³ the Prince Edward Islands)

Fishing may take place outside the prescribed season subject to demonstration of full compliance with Conservation Measure 25-02

* Or until the catch limit or the by-catch limit of any species is reached, whichever is sooner

No.	Conservation Measure Title	Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
COMPLIANCE				
10-01 (1998) ^{1,2}	Marking of fishing vessels and fishing gear	All areas	All fisheries	All seasons
10-02 (2008) ^{1,2,3}	Licensing and inspection obligations of Contracting Parties with regard to their flag vessels operating in the Convention Area	All areas	All fisheries	All seasons
10-03 (2008) ^{1,2,3}	Port inspections of vessels carrying toothfish	All areas	<i>Dissostichus</i> spp.	All seasons
10-04 (2007)	Automated satellite-linked Vessel Monitoring Systems (VMS)	All areas	All fisheries	All seasons
10-05 (2008)	Catch Documentation Scheme for <i>Dissostichus</i> spp.	All areas	<i>Dissostichus</i> spp.	All seasons
10-06 (2008)	Scheme to promote compliance by Contracting Party vessels with CCAMLR conservation measures	All areas	All fisheries	All seasons
10-07 (2008)	Scheme to promote compliance by non-Contracting Party vessels with CCAMLR conservation measures	All areas	All fisheries	All seasons
10-08 (2006)	Scheme to promote compliance by Contracting Party nationals with CCAMLR conservation measures	All areas	All fisheries	All seasons
10-09 (2008)	Notification system for transhipments within the Convention Area	Various	Various fisheries	All seasons

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
GENERAL FISHERY MATTERS					
Notifications					
21-01 (2008) ^{1,2,3}	Notification that Members are considering initiating a new fishery		All areas	All new fisheries	All seasons
21-02 (2006) ^{1,2,3}	Exploratory fisheries		All areas	All exploratory fisheries	All seasons
21-03 (2008)	Notifications of intent to participate in a fishery for <i>Euphausia superba</i>		All areas	Krill fisheries	All seasons
Gear Regulations					
22-01 (1986)	Regulation on mesh size measurement		All areas	Supplements Conservation Measure 22-02	All seasons
22-02 (1984)	Mesh size		All areas	<i>Dissostichus eleginoides</i> , <i>Gobionotothen gibberifrons</i> , <i>Lepidonotothen squamifrons</i> , <i>Notothenia kempfi</i> , <i>Notothenia rossii</i>	All seasons
22-03 (1990) ^{1,2}	Mesh size for <i>Champtocephalus gunnari</i>		All areas	<i>Champtocephalus gunnari</i>	All seasons
22-04 (2006)	Interim prohibition of deep-sea gillnetting		All areas	Gillnet fisheries	All seasons
22-05 (2008)	Restrictions on the use of bottom trawling gear in high-seas areas of the Convention Area		High seas	Bottom trawl fisheries	All seasons
22-06 (2008) ^{1,2,3}	Bottom fishing in the Convention Area		High seas generally south of 60°S	Bottom fisheries	All seasons
22-07 (2008) ^{1,2,3}	Interim measure for bottom fishing activities subject to Conservation Measure 22-06 encountering potential vulnerable marine ecosystems in the Convention Area		High seas generally south of 60°S	Bottom fisheries	All seasons

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
Data Reporting					
23-01 (2005)	Five-day catch and effort reporting system		Various	Various fisheries	All seasons
23-02 (1993)	Ten-day catch and effort reporting system		Various	Various fisheries	All seasons
23-03 (1991)	Monthly catch and effort reporting system		Various	Various fisheries	All seasons
23-04 (2000) ^{1,2,3}	Monthly fine-scale catch and effort data reporting system for trawl, longline and pot fisheries		All areas	All except krill fisheries	All seasons
23-05 (2000) ^{1,2,3}	Monthly fine-scale biological data reporting system for trawl, longline and pot fisheries		All areas	All except krill fisheries	All seasons
23-06 (2007)	Data reporting system for <i>Euphausia superba</i> fisheries		All areas	All krill fisheries	All seasons
Research and Experiments					
24-01 (2008) ^{1,2,3}	The application of conservation measures to scientific research		All areas	All fisheries	All seasons
24-02 (2008)	Longline weighting for seabird conservation		48.4, 48.6, 58.4.1, 58.4.2, 58.4.3a, 58.4.3b, 58.5.2, 88.1, 88.2	Longline fisheries	All seasons
Minimisation of Incidental Mortality					
25-02 (2008) ^{1,2,3}	Minimisation of the incidental mortality of seabirds in the course of longline fishing or longline fishing research in the Convention Area		All areas	All longline fisheries	All seasons
25-03 (2003) ^{1,2}	Minimisation of the incidental mortality of seabirds and marine mammals in the course of trawl fishing in the Convention Area		All areas	All trawl fisheries	All seasons

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
Environmental Protection					
26-01 (2008) ^{1,2,3}	General environmental protection during fishing		All areas	All fisheries	All seasons
FISHERY REGULATIONS					
General Measures					
31-01 (1986)	Regulation of fishing around South Georgia (Statistical Subarea 48.3)		48.3	All species on which fisheries are permitted	All seasons
31-02 (2007) ^{1,2,3}	General measure for the closure of all fisheries		All areas	All fisheries	All seasons
Fishing Seasons, Closed Areas and Prohibition of Fishing					
32-01 (2001)	Fishing seasons		All areas	All fisheries	All seasons
32-02 (1998)	Prohibition of directed fishing for finfish in Statistical Subarea 48.1		48.1	Finfish fisheries	All seasons
32-03 (1998)	Prohibition of directed fishing for finfish in Statistical Subarea 48.2		48.2	Finfish fisheries	All seasons
32-04 (1986)	Prohibition of directed fishery on <i>Notothenia rossii</i> in the Peninsula Area (Statistical Subarea 48.1)		48.1	<i>Notothenia rossii</i>	All seasons
32-05 (1986)	Prohibition of directed fishery on <i>Notothenia rossii</i> around South Orkneys (Statistical Subarea 48.2)		48.2	<i>Notothenia rossii</i>	All seasons
32-06 (1985)	Prohibition of directed fishery on <i>Notothenia rossii</i> around South Georgia (Statistical Subarea 48.3)		48.3	<i>Notothenia rossii</i>	All seasons
32-07 (1999)	Prohibition of directed fishery on <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Lepidonotothen squamifrons</i> and <i>Patagonotothen guntheri</i> in Statistical Subarea 48.3		48.3	<i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Lepidonotothen squamifrons</i> , <i>Patagonotothen guntheri</i>	All seasons
32-08 (1997)	Prohibition of directed fishing for <i>Lepidonotothen squamifrons</i> in Statistical Division 58.4.4 (Ob and Lena Banks)		58.4.4	<i>Lepidonotothen squamifrons</i>	All seasons

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
Fishing Seasons, Closed Areas and Prohibition of Fishing (continued)					
32-09 (2008)	Prohibition of directed fishing for <i>Dissostichus</i> spp. except in accordance with specific conservation measures in the 2008/09 season		48.5	<i>Dissostichus</i> spp.	2008/09 season
32-10 (2002)	Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Division 58.4.4 outside areas of national jurisdiction		58.4.4	<i>Dissostichus</i> spp.	All seasons
32-11 (2002) ^{2,3}	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Subarea 58.6		58.6	<i>Dissostichus eleginoides</i>	All seasons
32-12 (1998) ³	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Subarea 58.7		58.7	<i>Dissostichus eleginoides</i>	All seasons
32-13 (2003)	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.1 outside areas of national jurisdiction		58.5.1	<i>Dissostichus eleginoides</i>	All seasons
32-14 (2003)	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.2 east of 79°20'E and outside the EEZ to the west of 79°20'E		58.5.2	<i>Dissostichus eleginoides</i>	All seasons
32-15 (2003)	Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Subarea 88.2 north of 65°S		88.2 north of 65°S	<i>Dissostichus</i> spp.	All seasons
32-16 (2003)	Prohibition of directed fishing for <i>Dissostichus</i> spp. in Statistical Subarea 88.3		88.3	<i>Dissostichus</i> spp.	All seasons
32-17 (2003)	Prohibition of directed fishing for <i>Electrona carlsbergi</i> in Statistical Subarea 48.3		48.3	<i>Electrona carlsbergi</i>	All seasons
32-18 (2006)	Conservation of sharks		All areas	Sharks	All seasons

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
By-catch Limits					
33-01 (1995)	Limitation of the by-catch of <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Notothenia rossii</i> and <i>Lepidonotothen squamifrons</i> in Statistical Subarea 48.3		48.3	<i>Gobionotothen gibberifrons</i> (1 470 tonnes), <i>Chaenocephalus aceratus</i> (2 200 tonnes), and <i>Pseudochaenichthys georgianus</i> , <i>Notothenia rossii</i> and <i>Lepidonotothen squamifrons</i> (300 tonnes each)	All seasons
33-02 (2008)	Limitation of by-catch in Statistical Division 58.5.2 in the 2008/09 season		58.5.2	<i>Channichthys rhinoceratus</i> (150 tonnes), <i>Lepidonotothen squamifrons</i> (80 tonnes), <i>Macrourus</i> spp. (360 tonnes), skates and rays (120 tonnes), other by-catch species (50 tonnes per species)	2008/09 season
33-03 (2008) ^{1,2,3}	Limitation of by-catch in new and exploratory fisheries in the 2008/09 season		Various	Skates and rays, <i>Macrourus</i> spp. and other by-catch species in all new and exploratory fisheries (see Annex 33-03/A)	2008/09 season
Toothfish					
41-01 (2008) ^{1,2,3}	General measures for exploratory fisheries for <i>Dissostichus</i> spp. in the Convention Area in the 2008/09 season		Various	<i>Dissostichus</i> spp. All exploratory fisheries	2008/09 season
41-02 (2008)	Limits on the fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3 in the 2007/08 and 2008/09 seasons		48.3	<i>Dissostichus eleginoides</i> (3 920 tonnes in each season) Longline and pot fisheries	Longline fishery: 1 May to 31 August in each season#* Pot fishery: 1 December to 30 November* in each season
41-03 (2008)	Limits on the fishery for <i>Dissostichus</i> spp. in Statistical Subarea 48.4 in the 2008/09 fishing season		48.4	<i>Dissostichus</i> spp. (150 tonnes) Longline fishery	1 December 2008 to 30 November 2009*
41-04 (2008)	Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 48.6 in the 2008/09 season		48.6	<i>Dissostichus</i> spp. (400 tonnes) Exploratory longline fishery	1 December 2008 to 30 November 2009*
41-05 (2008)	Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Division 58.4.2 in the 2008/09 season		58.4.2	<i>Dissostichus</i> spp. (70 tonnes) Exploratory longline fishery	1 December 2008 to 30 November 2009*

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
		Title			
Toothfish (continued)					
41-06 (2008)		Limits on the exploratory fishery for <i>Dissostichus</i> spp. on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction in the 2008/09 season	58.4.3a	<i>Dissostichus</i> spp. (86 tonnes) Exploratory longline fisheries	1 May to 31 August 2009#*
41-07 (2008)		Limits on the exploratory fishery for <i>Dissostichus</i> spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction in the 2008/09 season	58.4.3b	<i>Dissostichus</i> spp. (120 tonnes) Exploratory longline fisheries	1 May to 31 August 2009#*
41-08 (2008)		Limits on the fishery for <i>Dissostichus eleginoides</i> in Statistical Division 58.5.2 in the 2007/08 and 2008/09 seasons	58.5.2 west of 79°20'E	<i>Dissostichus eleginoides</i> (2 500 tonnes) Longline, trawl and pot fisheries	Longline fishery: 1 May to 14 September in each season#* Trawl and pot fishery: 1 December to 30 November* in each season
41-09 (2008)		Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 88.1 in the 2008/09 season	88.1	<i>Dissostichus</i> spp. (2 700 tonnes) Exploratory longline fishery	1 December 2008 to 31 August 2009*
41-10 (2008)		Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Subarea 88.2 in the 2008/09 season	88.2 south of 65°S	<i>Dissostichus</i> spp. (567 tonnes) Exploratory longline fishery	1 December 2008 to 31 August 2009*
41-11 (2008)		Limits on the exploratory fishery for <i>Dissostichus</i> spp. in Statistical Division 58.4.1 in the 2008/09 season	58.4.1	<i>Dissostichus</i> spp. (210 tonnes) Exploratory longline fishery	1 December 2008 to 30 November 2009*
Icefish					
42-01 (2008)		Limits on the fishery for <i>Champtocephalus gunnari</i> in Statistical Subarea 48.3 in the 2008/09 season	48.3	<i>Champtocephalus gunnari</i> (3 834 tonnes) Trawl fishery	15 November 2008 to 14 November 2009* with closure of inshore waters within 12 n miles of South Georgia from 1 March to 31 May 2009.
42-02 (2008)		Limits on the fishery for <i>Champtocephalus gunnari</i> in Statistical Division 58.5.2 in the 2008/09 season	58.5.2	<i>Champtocephalus gunnari</i> (102 tonnes) Trawl fishery	1 December 2008 to 30 November 2009*
Krill					
51-01 (2008)		Precautionary catch limitations on <i>Euphausia superba</i> in Statistical Subareas 48.1, 48.2, 48.3 and 48.4	48.1, 48.2, 48.3, 48.4	<i>Euphausia superba</i> (3 470 000 tonnes with a trigger level of 620 000 tonnes) Fishing method as in Annex 21-03/A	All seasons*

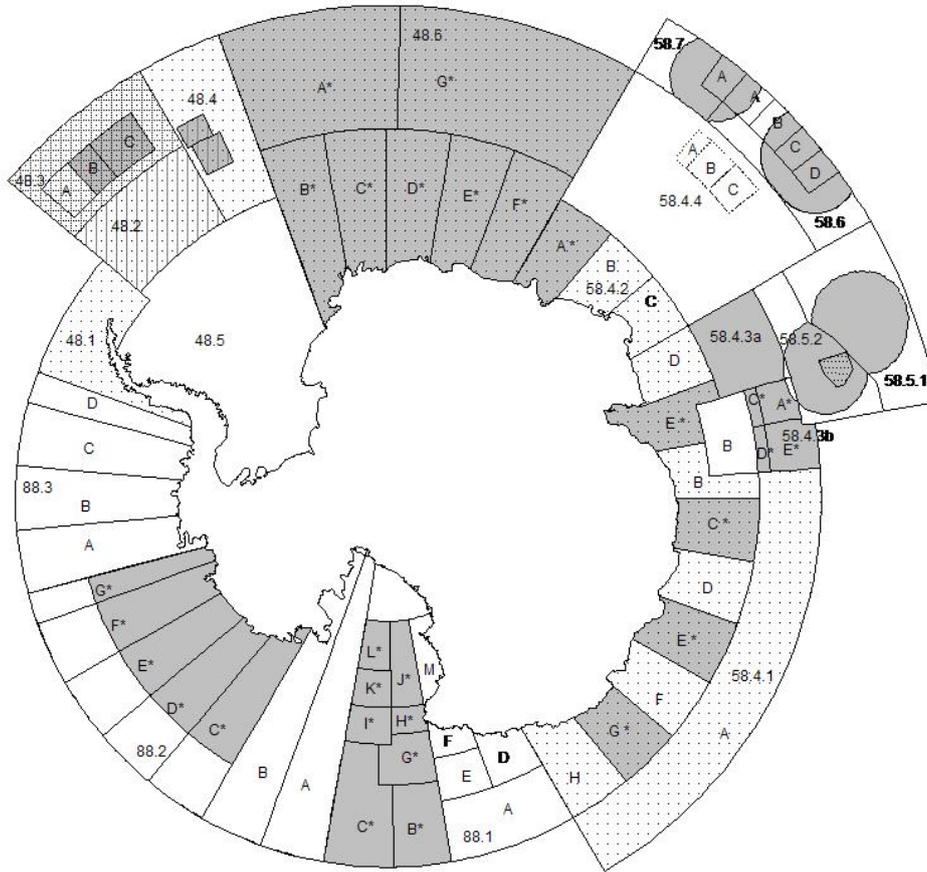

No.	Conservation Measure		Region	Species/Fishery (catch limit, if applicable)	Period in force and/or fishing season
	Title				
Krill (continued)					
51-02 (2008)	Precautionary catch limitation on <i>Euphausia superba</i> in Statistical Division 58.4.1		58.4.1	<i>Euphausia superba</i> (440 000 tonnes with a limit of 277 000 tonnes west of 115°E, 163 000 tonnes east of 115°E) Fishing method as in Annex 21-03/A	All seasons*
51-03 (2008)	Precautionary catch limitation on <i>Euphausia superba</i> in Statistical Division 58.4.2		58.4.2	<i>Euphausia superba</i> (2 645 000 tonnes with trigger levels of 260 000 tonnes west of 115°E, 192 000 tonnes east of 115°E) Fishing method as in Annex 21-03/A	All seasons*
51-04 (2008)	General measure for exploratory fisheries for <i>Euphausia superba</i> in the Convention Area in the 2008/09 season		Various	<i>Euphausia superba</i> All exploratory fisheries	2008/09 season
51-05 (2008)	Limits on the exploratory fishery for <i>Euphausia superba</i> in Statistical Subarea 48.6 in the 2008/09 season		48.6	<i>Euphausia superba</i> (15 000 tonnes, no more than 11 250 tonnes within 60 n miles of breeding colonies of land-based krill-dependent predators) Exploratory trawl fishery	1 December 2008 to 30 November 2009
Crab					
52-01 (2008)	Limits on the fishery for crab in Statistical Subarea 48.3 in the 2008/09 season		48.3	Crabs (suborder: Reptantia) (1 600 tonnes) Pot fishery	1 December 2008 to 30 November 2009*
52-02 (2008)	Limits on the exploratory fishery for crab in Statistical Subarea 48.2 in the 2008/09 season		48.2	Crabs (suborder: Reptantia) (250 tonnes) Exploratory pot fishery	1 December 2008 to 30 November 2009
52-03 (2008)	Limits on the exploratory fishery for crab in Statistical Subarea 48.4 in the 2008/09 season		48.4	Crabs (suborder: Reptantia) (10 tonnes) Exploratory pot fishery	1 December 2008 to 30 November 2009
Squid					
61-01 (2008)	Limits on the exploratory fishery for <i>Martialia hyadesi</i> in Statistical Subarea 48.3 in the 2008/09 season		48.3	<i>Martialia hyadesi</i> (2 500 tonnes) Exploratory jig fishery	1 December 2008 to 30 November 2009*

Resolutions (continued)				
20/XXII	Ice-strengthening standards in high-latitude fisheries	South of 60°S	All fisheries	All seasons
21/XXIII	Electronic Catch Documentation Scheme for <i>Dissostichus</i> spp.	All areas	<i>Dissostichus</i> spp.	All seasons
22/XXV	International actions to reduce the incidental mortality of seabirds arising from fishing	All areas	All fisheries	All seasons
23/XXIII	Safety on board vessels fishing in the Convention Area	All areas	All fisheries	All seasons
25/XXV	Combating illegal, unreported and unregulated fishing in the Convention Area by the flag vessels of non-Contracting Parties	All areas	All fisheries	All seasons
26/XXVI	International Polar Year/Census of Antarctic Marine Life	All areas	All fisheries	2007 to 2009
27/XXVII	Use of a specific tariff classification for Antarctic krill	All areas	<i>Euphausia superba</i>	All seasons
28/XXVII	Ballast water exchange in the Convention Area	All areas	All fisheries	All seasons

**FISHING AREAS (CATCH LIMIT > 0 TONNES) FOR TARGET SPECIES
IN THE CONVENTION AREA**

-  Toothfish (*Dissostichus* spp.)
-  Icefish (*Champsocephalus gunnari*)
-  Krill (*Euphausia superba*)
-  Crab (*Paralomis* spp.) and squid (*Martialia hyadesi*)

* Demersal fishing prohibited in depths shallower than 550 m.

APPLICATION OF CONSERVATION MEASURES TO FISHERIES IN THE CONVENTION AREA

* Applies to specified sectors only

HISTORY OF CONSERVATION MEASURES AND RESOLUTIONS

Measures and resolutions currently in force are indicated by X and their identification numbers are given under 'History'. Measures adopted under the old numbering system are given in brackets, with measures renumbered in 2002 indicated by a double asterisk (**). Each measure or resolution has one or more time series of historical events. The beginning of each series of events is identified by a single asterisk (*). The year following the asterisk is the year of the meeting where a particular measure or resolution was adopted. If the only event in the series is the year of adoption, then that particular measure or resolution was in force for a single year only. Other events in a series indicate the year of the meeting when that measure or resolution was revised or lapsed (including rescinded). The period when the measure or resolution was carried forward is indicated by a stippled line (...).

Number	Abbreviated Title	In Force	History
COMPLIANCE			
	Harvesting of stocks occurring both within and outside the Convention Area (Resolution)	X	*1993 (R10/XII)...in force as 10/XII
	Harvesting of <i>Dissostichus eleginoides</i> in high seas in Areas 51 and 57 (Resolution)	X	*2002 (R18/XXI)...in force as 18/XXI
	Non-Contracting Party cooperation enhancement program (Resolution)		*2005 (R24/XXIV)
10-01	Marking of fishing vessels and gear	X	*1998 (146/XVII**)...in force as 10-01 (1998)
	Flags of non-Compliance (Resolution)	X	*2002 (R19/XXI)...in force as 19/XXI
10-02	Licensing and inspection obligations of Contracting Parties	X	*1997 (119/XVI)...1998 (119/XVII)...2001 (119/XX**)...2004...2006...2007...2008...in force as 10-02 (2008)
10-03	Port inspections of vessels carrying toothfish	X	*1998 (147/XVII)...1999 (147/XVIII)...2000 (147/XIX)...2002...2005...2008...in force as 10-03 (2008)
10-04	Automated satellite-linked vessel monitoring systems (VMS)	X	*1998 (148/XVII)...2001 (148/XX)...2002...2004...2005...2006...2007...in force as 10-04 (2007)
	VMS (Resolution)		*1997 (R12/XVI)
10-05	Catch Documentation Scheme (CDS) for <i>Dissostichus</i> spp.	X	*1999 (170/XVIII)...2000 (170/XIX)...2001 (170/XX)...2002...2003...2004...2005...2006...2008...in force as 10-05 (2008)
	CDS: implementation by Acceding States and non-Contracting Parties (Resolution)	X	*2000 (R14/XIX)...in force as 14/XIX
	Use of ports not implementing CDS (Resolution)	X	*2000 (R15/XIX)...2003 (R15/XXII)...in force as 15/XXII
	Application of VMS in the CDS (Resolution)	X	*2000 (R16/XIX)...in force as 16/XIX
	Use of VMS and other measures for the verification of CDS data for areas outside the Convention Area (Resolution)	X	*2001 (R17/XX)...in force as 17/XX
	Implementation of the E-CDS (Resolution)	X	*2004 (R21/XXIII)...in force as 21/XXIII

Number	Abbreviated Title	In Force	History
10-06	Scheme to promote compliance by Contracting Party vessels	X	*2002...2004...2005...2006...2008...in force as 10-06 (2008)
10-07	Scheme to promote compliance by non-Contracting Party vessels	X	*1997 (118/XVI)...1998 (118/XVII)...2001 (118/XX)...2002...2003...2005...2006...2008...in force as 10-07 (2008)
	Flagging and licensing of non-Contracting party vessels (Resolution)		*2000 (R13/XIX)...lapsed in 2002
	Combating IUU fishing by non-Contracting Party vessels (Resolution)	X	*2006 (R25/XXV)...in force as 25/XXV
10-08	Scheme to promote compliance by Contracting Party nationals	X	*2006...in force as 10-08 (2006)
10-09	Notifications system for transshipments	X	*2008...in force as 10-09 (2008)
	Tariff classification for <i>Euphausia superba</i> (Resolution)	X	*2008 (R27/XXVII)...in force as 27/XXVII
GENERAL FISHERY MATTERS			
Notifications			
21-01	Notification for new fisheries	X	*1991 (31/X)...2002...2006...2008...in force as 21-01 (2008)
21-02	Notification for exploratory fisheries	X	*1993 (65/XII)...2002...2004...2005...2006...in force as 21-02 (2006)
21-03	Notifications for krill fisheries	X	*2006...2007...2008...in force as 21-03 (2008)
Gear Regulation			
22-01	Regulation on mesh size measurement	X	*1986 (4/V**)...in force as 22-01 (1986)
22-02	Mesh size	X	*1984 (2/III**)...in force as 22-02 (1984)
22-03	Mesh size for <i>Champscephalus gunnari</i>	X	*1990 (19/IX**)...in force as 22-03 (1990)
22-04	Prohibition of deep-sea gillnetting	X	*2006...in force as 22-04 (2006)
	Prohibition of large-scale pelagic driftnet fishing (Resolution)	X	*1990 (R7/IX)...in force as 7/IX
22-05	Restriction on bottom trawling in high-seas areas	X	*2006...2008...in force as 22-05 (2008)
22-06	Bottom fishing in the Convention Area	X	*2007...2008...in force as 22-06 (2008)
22-07	Bottom fishing activities subject to Conservation Measure 22-06	X	*2008...in force as 22-07 (2008)
Data Reporting			
23-01	Five-day catch and effort reporting	X	*1991 (36/X) *1992 (51/XI)...1993 (51/XII)...2000 (51/XIX**)...2003...2004...2005...in force as 23-01 (2005)
23-02	Ten-day catch and effort reporting	X	*1992 (61/XI)...1993 (61/XII**)...in force as 23-02 (1993)
23-03	Monthly catch and effort reporting	X	*1991 (40/X**)...in force as 23-03 (1991)

Number	Abbreviated Title	In Force	History
23-04	Fine-scale catch and effort data	X	*1989 (17/VIII) *1990 (25/IX) *1992 (52/XI)...lapsed in 1996 *1996 (117/XV) *1997 (122/XVI)...2000 (122/XIX**)...in force as 23-04 (2000)
23-05	Fine-scale biological data	X	*1992 (52/XI)...lapsed in 1996 *1996 (117/XV) *1997 (121/XVI)...2000 (121/XIX**) ...in force as 23-05 (2000)
	Fine-scale data for <i>Champocephalus gunnari</i>		*1987 (9/VI)...lapsed in 1989 *1995 (98/XIV)
	Fine-scale data for <i>Dissostichus eleginoides</i>		*1990 (26/IX) *1991 (37/X) *1992 (56/XI) *1993 (71/XII) *1994 (81/XIII) *1995 (94/XIV)
	Fine-scale data for <i>Electrona carlsbergi</i>		*1991 (39/X) *1992 (54/XI)...lapsed in 1995
23-06	Data reporting for krill fisheries	X	*2002...2004...2005...2007...in force as 23-06 (2007)
	Research and Experiments		
	International Polar Year (Resolution)	X	*2007(R26/XXVI)...in force as 26/XXVI
24-01	Application of measures to research	X	*1992 (47/XI) *1993 (64/XII)...2000 (64/XIX)...2002...2003...2005...2008...in force as 24-01 (2008)
	Application of measures to research (Resolution)		*1992 (R9/XI)
24-02	Longline weighting for seabird conservation	X	*2001 (216/XX)...2002...2003...2004...2005...2008...in force as 24-02 (2008)
24-03	Experimental integrated line-weighting trials		*2003
	Minimisation of Incidental Mortality		
	International action to reduce the mortality of seabirds arising from fishing (Resolution)	X	*2004 (R22/XXIII)...lapsed in 2006...2006 (R22/XXV)...in force as 22/XXV
25-01	Regulation of the use and disposal of plastic packaging bands		*1993 (63/XII)...1996 (63/XV**)...lapsed in 2006
25-02	Minimisation of the incidental mortality of seabirds in the course of longlining	X	*1991 (29/X)...1992 (29/XI)...1993 (29/XII)...1994 (29/XIII)...1995 (29/XIV)...1996 (29/XV)...1997 (29/XVI)...2000 (29/XIX)...2002...2003...2005...2007...2008...in force as 25-02 (2008)
	Minimisation of the incidental mortality of seabirds in the course of longlining (Resolution)		*1989 (R5/VIII)
25-03	Minimisation of the incidental mortality of seabirds and marine mammals in the course of trawling	X	*1991 (30/X)...lapsed in 1999 *1999 (173/XVIII**)...2003...in force as 25-03 (2003)
	Environmental Protection		
26-01	General environmental protection during fishing	X	*2006...2008...in force as 26-01 (2008)
	Ballast water exchange in the Convention Area (Resolution)	X	*2008 (R28/XXVII)...in force as 28/XXVII

Number	Abbreviated Title	In Force	History
FISHERY REGULATIONS			
General Measures			
	Ice-strengthening standards for fishing vessels (Resolution)	X	*2003 (R20/XXII)...in force as 20/XXII
	Safety on board vessels fishing in the Convention Area (Resolution)	X	*2004 (R23/XXIII)...in force as 23/XXIII
31-01	Regulation of fishing around South Georgia (Subarea 48.3)	X	*1986 (7/V**)...in force as 31-01 (1986)
31-02	General measure for the closure of all fisheries	X	*2007...in force as 31-02 (2007)
Fishing Seasons, Closed Areas and Prohibition of Fishing			
32-01	Fishing seasons	X	*2001 (217/XX**)...in force as 32-01 (2001)
	Closure adjacent to South Georgia		*1984 (1/III)...lapsed in 1989 *1989 (15/VIII) *1990 (21/IX)
	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 58.5 (Resolution)		*1985 (R3/IV)...lapsed in 1987
32-02	Prohibition of directed fishing for finfish in Subarea 48.1	X	*1990 (27/IX) *1991 (41/X) *1992 (58/XI) *1993 (72/XII)...1997 (72/XVI)...1998 (72/XVII**)...in force as 32-02 (1998)
32-03	Prohibition of directed fishing for finfish in Subarea 48.2	X	*1990 (27/IX) *1991 (42/X) *1992 (57/XI) *1993 (73/XII)...1997 (73/XVI)...1998 (73/XVII**)...in force as 32-03 (1998)
32-04	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.1	X	*1986 (5/V**)...in force as 32-04 (1986)
	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.1 (Resolution)		*1985 (R2/IV) *1986 (R4/V)
	Prohibition of directed fishery on <i>Gobionotothen gibberifrons</i> in Subarea 48.1 (Resolution)		*1989 (R6/VIII)
32-05	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.2	X	*1986 (6/V**)...in force as 32-05 (1986)
	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.2 (Resolution)		*1985 (R2/IV) *1986 (R4/V)
	Prohibition of directed fishery on <i>Gobionotothen gibberifrons</i> in Subarea 48.2 (Resolution)		*1989 (R6/VIII)

Number	Abbreviated Title	In Force	History
32-06	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.3	X	*1985 (3/IV**)...in force as 32-06 (1985)
	Prohibition of directed fishing for <i>Champsocephalus gunnari</i> in Subarea 48.3		*1987 (10/VI)
	Prohibition of directed fishery on <i>Notothenia rossii</i> in Subarea 48.3 (Resolution)		*1985 (R1/IV)
32-07	Prohibition of directed fishery on <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Lepidonotothen squamifrons</i> and <i>Patagonotothen guntheri</i> in Subarea 48.3	X	*1989 (14/VIII) *1990 (22/IX) *1991 (34/X) *1992 (48/XI)...lapsed in 1994 *1994 (76/XIII)...lapsed in 1996 *1996 (100/XV) *1997 (127/XVI) *1998 (152/XVII) *1999 (171/XVIII**)...in force as 32-07 (1999)
	Prohibition of directed fishery on <i>Patagonotothen guntheri</i> in Subarea 48.3		*1990 (23/IX)
32-08	Prohibition of directed fishing for <i>Lepidonotothen squamifrons</i> in Division 58.4.4	X	*1991 (43/X) *1997 (129/XVI**)...in force as 32-08 (1997)
32-09	Prohibition of directed fishing for <i>Dissostichus</i> spp. except in accordance with specific conservation measures	X	*1997 (120/XVI) *1998 (149/XVII) *1999 (172/XVIII) *2000 (193/XIX) *2001 (218/XX) *2002 *2003 *2004 *2005 *2006 *2007 *2008...in force as 32-09 (2008)
	Prohibition of directed fishing for <i>Dissostichus</i> spp.		*2000 (192/XIX)
32-10	Prohibition of directed fishing for <i>Dissostichus</i> spp. in Division 58.4.4 outside EEZ	X	*2002...in force as 32-10 (2002)
32-11	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Subarea 58.6 outside EEZs	X	*2002...in force as 32-11 (2002)
32-12	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Subarea 58.7 outside EEZ	X	*1998 (160/XVII**)...in force as 32-12 (1998)
32-13	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Division 58.5.1 outside EEZ	X	*2003...in force as 32-13 (2003)
32-14	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Division 58.5.2 east of 79°20'E and outside EEZ	X	*2003...in force as 32-14 (2003)
32-15	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Subarea 88.2 north of 65° S	X	*2003...in force as 32-15 (2003)
32-16	Prohibition of directed fishing for <i>Dissostichus eleginoides</i> in Subarea 88.3	X	*2003...in force as 32-16 (2003)
32-17	Prohibition of directed fishing for <i>Electrona carlsbergi</i> in Subarea 48.3	X	*2003...in force as 32-17 (2003)
32-18	Prohibition of directed fishing for sharks	X	*2006...in force as 32-18 (2006)

Number	Abbreviated Title	In Force	History
By-Catch Limits			
33-01	Limitation of the by-catch of <i>Gobionotothen gibberifrons</i> , <i>Chaenocephalus aceratus</i> , <i>Pseudochaenichthys georgianus</i> , <i>Notothenia rossii</i> and <i>Lepidonotothen squamifrons</i> in Subarea 48.3	X	*1992 (50/XI) *1993 (68/XII) *1994 (85/XIII) *1995 (95/XIV**)...in force as 33-01 (1995)
	Limitation of the by-catch of <i>Notothenia rossii</i> in Subarea 48.3 (Resolution)		*1985 (R1/IV)
	Limitation of the by-catch of <i>Notothenia rossii</i> in Subareas 48.1 and 48.2 (Resolution)		*1985 (R2/IV) *1986 (R4/V)
	Limitation of the by-catch of <i>Gobionotothen gibberifrons</i> in Subareas 48.1 and 48.2 (Resolution)		*1989 (R6/VIII)
33-02	Limitation of by-catch in Division 58.5.2	X	*1997 (132/XVI) *1998 (157/XVII) *1999 (178/XVIII) *2000 (198/XIX) *2001 (224/XX) *2002 *2003 *2004 *2005 *2006 *2007 *2008...in force as 33-02 (2008)
33-03	Limitation of by-catch in new and exploratory fisheries	X	*2000 (201/XIX) *2001 (228/XX) *2002 *2003 *2004 *2005 *2006 *2007 *2008...in force as 33-03 (2008)
Toothfish			
41-01	General measures for exploratory fisheries for <i>Dissostichus</i> spp.	X	*1996 (112/XV) *1997 (133/XVI) *1998 (161/XVII) *1999 (182/XVIII) *2000 (200/XIX) *2001 (227/XX) *2002 *2003 *2004 *2005 *2006 *2007 *2008...in force as 41-01 (2008)

CONSERVATION MEASURE 10-01 (1998)¹
Marking of fishing vessels and fishing gear

Species	all
Area	all
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. All Contracting Parties shall ensure that their fishing vessels licensed² in accordance with Conservation Measure 10-02 to operate in the Convention Area are marked in such a way that they can be readily identified in accordance with internationally recognised standards, such as the FAO Standard Specifications and Guidelines for the Marking and Identification of Fishing Vessels.
2. Marker buoys and similar objects floating on the surface and intended to indicate the location of fixed or set fishing gear shall be clearly marked at all times with the letter(s) and/or numbers of the vessels to which they belong.

¹ Except for waters adjacent to Kerguelen and Crozet Islands

² Includes permitted

CONSERVATION MEASURE 10-02 (2008)^{1,2}
Licensing and inspection obligations of Contracting Parties with regard to their flag vessels operating in the Convention Area

Species	all
Area	all
Season	all
Gear	all

1. Each Contracting Party shall prohibit fishing by its flag vessels in the Convention Area except pursuant to a licence³ that the Contracting Party has issued setting forth the specific areas, species and time periods for which such fishing is authorised and all other specific conditions to which the fishing is subject to give effect to CCAMLR conservation measures and requirements under the Convention.
2. A Contracting Party may only issue such a licence to fish in the Convention Area to vessels flying its flag, if it is satisfied of its ability to exercise its responsibilities under the Convention and its conservation measures, by requiring from each vessel, *inter alia*, the following:
 - (i) timely notification by the vessel to its Flag State of exit from and entry into any port;
 - (ii) notification by the vessel to its Flag State of entry into the Convention Area and movement between areas, subareas/divisions;
 - (iii) reporting by the vessel of catch data in accordance with CCAMLR requirements;
 - (iv) reporting, where possible as set out in Annex 10-02/A by the vessel of sightings of fishing vessels⁴ in the Convention Area;
 - (v) operation of a VMS system on board the vessel in accordance with Conservation Measure 10-04;

- (vi) noting the International Management Code for the Safe Operation of Ships and for Pollution Prevention (International Safety Management Code), from 1 December 2009:
- (a) adequate communication equipment (including MF/HF radio and carriage of at least one 406MHz EPIRB) and trained operators on board. Wherever possible, vessels should be fitted with Global Maritime Distress and Safety System (GMDSS) equipment;
 - (b) sufficient immersion survival suits for all on board;
 - (c) adequate arrangements to handle medical emergencies that may arise in the course of the voyage;
 - (d) reserves of food, fresh water, fuel and spare parts for critical equipment to provide for unforeseen delays and besetment;
 - (e) an approved⁵ Shipboard Oil Pollution Emergency Plan (SOPEP) outlining marine pollution mitigation arrangements (including insurance) in the event of a fuel or waste spill.
3. Each Contracting Party shall provide to the Secretariat within seven days of the issuance of each licence the following information about licences issued:
- name of the vessel
 - time periods authorised for fishing (start and end dates)
 - area(s), subareas or divisions of fishing
 - species targeted
 - gear used.
4. Each Contracting Party shall provide to the Secretariat within seven days of the issuance of each licence the following information about licences issued:
- (i) name of fishing vessel (any previous names if known)⁶, registration number⁷, IMO number (if issued), external markings and port of registry;
 - (ii) the nature of the authorisation to fish granted by the Flag State, specifying time periods authorised for fishing (start and end dates), area(s) of fishing, species targeted and gear used;
 - (iii) previous flag (if any)⁶;
 - (iv) international Radio Call Sign;
 - (v) name and address of vessel's owner(s), and any beneficial owner(s) if known;
 - (vi) name and address of licence owner (if different from vessel owner(s));
 - (vii) type of vessel;
 - (viii) where and when built;
 - (ix) length (m);

- (x) high-resolution colour photographs of the vessel of appropriate brightness and contrast⁸ which shall consist of:
- one photograph not smaller than 12 x 7 cm showing the starboard side of the vessel displaying its full overall length and complete structural features;
 - one photograph not smaller than 12 x 7 cm showing the port side of the vessel displaying its full overall length and complete structural features;
 - one photograph not smaller than 12 x 7 cm showing the stern taken directly from astern;
- (xi) where applicable, in accordance with Conservation Measure 10-04, details of the implementation of the tamper-proof requirements of the satellite monitoring device installed on board.
5. Each Contracting Party shall, to the extent practicable, also provide to the Secretariat at the same time as submitting information in accordance with paragraph 4, the following additional information in respect to each fishing vessel licensed:
- (i) name and address of operator, if different from vessel owners;
 - (ii) names and nationality of master and, where relevant, of fishing master;
 - (iii) type of fishing method or methods;
 - (iv) beam (m);
 - (v) gross registered tonnage;
 - (vi) vessel communication types and numbers (INMARSAT A, B and C numbers);
 - (vii) normal crew complement;
 - (viii) power of main engine or engines (kW);
 - (ix) carrying capacity (tonnes), number of fish holds and their capacity (m³);
 - (x) any other information in respect of each licensed vessel they consider appropriate (e.g. ice classification) for the purposes of the implementation of the conservation measures adopted by the Commission.
6. Contracting Parties shall communicate without delay to the Secretariat any change to any of the information submitted in accordance with paragraphs 3, 4 and 5.
7. The Executive Secretary shall place a list of licensed vessels on the public section of the CCAMLR website.
8. The licence or an authorised copy of the licence must be carried by the fishing vessel and must be available for inspection at any time by a designated CCAMLR inspector in the Convention Area.

9. Each Contracting Party shall verify, through inspections of all of its fishing vessels at the Party's departure and arrival ports, and where appropriate, in its Exclusive Economic Zone, their compliance with the conditions of the licence as described in paragraph 1 and with the CCAMLR conservation measures. In the event that there is evidence that the vessel has not fished in accordance with the conditions of its licence, the Contracting Party shall investigate the infringement and, if necessary, apply appropriate sanctions in accordance with its national legislation.
10. Each Contracting Party shall include in its annual report pursuant to paragraph 12 of the CCAMLR System of Inspection, steps it has taken to implement and apply this conservation measure; and may include additional measures it may have taken in relation to its flag vessels to promote the effectiveness of CCAMLR conservation measures.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Includes permit and authorisation.

⁴ Including support vessels such as reefer vessels.

⁵ Shipboard Oil Pollution Emergency Plan to be approved by the Maritime Safety Authority of the Flag State.

⁶ In respect of any vessel reflagged within the previous 12 months, any information on the details of the process of (reasons for) previous deregistration of the vessel from other registries, if known.

⁷ National registry number

⁸ All photographs shall be of sufficient quality to enable clear identification of the vessel.

ANNEX 10-02/A

REPORTING OF VESSEL SIGHTINGS

1. In the event that the master of a licensed fishing vessel sights a fishing vessel⁴ within the Convention Area, the master shall document as much information as possible on each such sighting, including:
 - (a) name and description of the vessel
 - (b) vessel call sign
 - (c) registration number and the Lloyds/IMO number of the vessel
 - (d) Flag State of the vessel
 - (e) photographs of the vessel to support the report
 - (f) any other relevant information regarding the observed activities of the sighted vessel.
2. The master shall forward a report containing the information referred to in paragraph 1 to their Flag State as soon as possible. The Flag State shall submit to the Secretariat any such reports that meet the criteria of paragraph 3 of Conservation Measure 10-06 or paragraph 8 of Conservation Measure 10-07.
3. The Secretariat shall use such reports for compiling estimates of IUU activities.

CONSERVATION MEASURE 10-03 (2008)^{1,2,3}
Port inspections of vessels carrying toothfish

Species	toothfish
Area	all
Season	all
Gear	all

1. Contracting Parties shall undertake inspections of all fishing vessels⁴ carrying *Dissostichus* spp. which enter their ports. The inspection shall be for the purpose of determining that if the vessel carried out harvesting activities in the Convention Area, these activities were carried out in accordance with CCAMLR conservation measures, and that if it intends to land or tranship *Dissostichus* spp. the catch to be unloaded or transhipped is accompanied by a *Dissostichus* catch document required by Conservation Measure 10-05 and that the catch agrees with the information recorded on the document.
2. To facilitate these inspections, Contracting Parties shall require vessels to provide advance notice of their entry into port and to convey a written declaration that they have not engaged in or supported illegal, unreported and unregulated (IUU) fishing in the Convention Area. The inspection shall be conducted within 48 hours of port entry and shall be carried out in an expeditious fashion. It shall impose no undue burdens on the vessel or its crew, and shall be guided by the relevant provisions of the CCAMLR System of Inspection. Vessels which either declare that they have been involved in IUU fishing or fail to make a declaration shall be denied port access, other than for emergency purposes.
3. In the event that there is evidence that the vessel has fished in contravention of CCAMLR conservation measures, the catch shall not be landed or transhipped. The Contracting Party will inform the Flag State of the vessel of its inspection findings and will cooperate with the Flag State in taking such appropriate action as is required to investigate the alleged infringement and, if necessary, apply appropriate sanctions in accordance with national legislation.
4. Contracting Parties shall promptly provide the Secretariat with a report on the outcome of each inspection conducted under this conservation measure. In respect of any vessels denied port access or permission to land or tranship *Dissostichus* spp., the Secretariat shall promptly convey such reports to all Contracting Parties and to all non-Contracting Parties cooperating with the Commission by participating in the Catch Documentation Scheme for *Dissostichus* spp. (CDS).

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Excluding by-catches of *Dissostichus* spp. by trawlers fishing on the high seas outside the Convention Area. A by-catch shall be defined as no more than 5% of total catch of all species and no more than 50 tonnes for an entire fishing trip by a vessel.

⁴ For the purposes of this conservation measure, 'fishing vessel' means any vessel of any size used for, equipped to be used for, or intended for use for the purposes of fishing or fishing related activities, including support ships, fish processing vessels, vessels engaged in transshipment and carrier vessels equipped for the transportation of fishery products except container vessels and excluding Members' marine science research vessels.

In relation to only carrier vessels equipped for transportation of fishery products, Contracting Parties shall conduct a preliminary assessment of the relevant documentation. If that assessment raises concerns regarding compliance with CCAMLR conservation measures, an inspection according to the provisions of this conservation measure shall be required.

CONSERVATION MEASURE 10-04 (2007)
Automated satellite-linked Vessel
Monitoring Systems (VMS)

Species	all
Area	all
Season	all
Gear	all

The Commission,

Recognising that in order to promote the objectives of the Convention and further improve compliance with the relevant conservation measures,

Convinced that illegal, unreported and unregulated (IUU) fishing compromises the objective of the Convention,

Recalling that Contracting Parties are required to cooperate in taking appropriate action to deter any fishing activities which are not consistent with the objective of the Convention,

Mindful of the rights and obligations of Flag States and Port States to promote the effectiveness of conservation measures,

Wanting to reinforce the conservation measures already adopted by the Commission,

Recognising the obligations and responsibilities of Contracting Parties under the Catch Documentation Scheme for *Dissostichus* spp. (CDS),

Recalling provisions as made under Article XXIV of the Convention,

Committed to take steps, consistent with international law, to identify the origins of *Dissostichus* spp. entering the markets of Contracting Parties and to determine whether *Dissostichus* spp. harvested in the Convention Area that is imported into their territories was caught in a manner consistent with CCAMLR conservation measures,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. Each Contracting Party shall ensure that its fishing vessels, licensed¹ in accordance with Conservation Measure 10-02, are equipped with a satellite-linked vessel monitoring device allowing for the continuous reporting of their position in the Convention Area for the duration of the licence issued by the Flag State. The vessel monitoring device shall automatically communicate at least every four hours to a land-based fisheries monitoring centre (FMC) of the Flag State of the vessel the following data:
 - (i) fishing vessel identification;
 - (ii) the current geographical position (latitude and longitude) of the vessel, with a position error which shall be less than 500 m, with a confidence interval of 99%; and
 - (iii) the date and time (expressed in UTC) of the fixing of the said position of the vessel.

2. Each Contracting Party as a Flag State shall ensure that the vessel monitoring device(s) on board its vessels are tamper proof, i.e. are of a type and configuration that prevent the input or output of false positions, and that are not capable of being over-ridden, whether manually, electronically or otherwise. To this end, the on-board satellite monitoring device must:
 - (i) be located within a sealed unit; and
 - (ii) be protected by official seals (or mechanisms) of a type that indicate whether the unit has been accessed or tampered with.
3. In the event that a Contracting Party has information to suspect that an on-board vessel monitoring device does not meet the requirements of paragraph 2, or has been tampered with, it shall immediately notify the Secretariat and the vessel's Flag State.
4. Each Contracting Party shall ensure that its FMC receives Vessel Monitoring System (VMS) reports and messages, and that the FMC is equipped with computer hardware and software enabling automatic data processing and electronic data transmission. Each Contracting Party shall provide for backup and recovery procedures in case of system failures.
5. Masters and owners/licensees of fishing vessels subject to VMS shall ensure that the vessel monitoring device on board their vessels within the Convention Area is at all times fully operational as per paragraph 1, and that the data are transmitted to the Flag State. Masters and owners/licensees shall in particular ensure that:
 - (i) VMS reports and messages are not altered in any way;
 - (ii) the antennae connected to the satellite monitoring device are not obstructed in any way;
 - (iii) the power supply of the satellite monitoring device is not interrupted in any way; and
 - (iv) the vessel monitoring device is not removed from the vessel.
6. A vessel monitoring device shall be active within the Convention Area. It may, however, be switched off when the fishing vessel is in port for a period of more than one week, subject to prior notification to the Flag State, and if the Flag State so desires also to the Secretariat, and providing that the first position report generated following the repowering (activating) shows that the fishing vessel has not changed position compared to the last report.
7. In the event of a technical failure or non-functioning of the vessel monitoring device on board the fishing vessel, the master or the owner of the vessel, or their representative, shall communicate to the Flag State every six hours, and if the Flag State so desires also to the Secretariat, starting at the time that the failure or the non-functioning was detected or notified in accordance with paragraph 11, the up-to-date geographical position of the vessel by electronic means (email, facsimile, telex, telephone message, radio).

8. Vessels with a defective vessel monitoring device shall take immediate steps to have the device repaired or replaced as soon as possible and, in any event, within two months. If the vessel during that time returns to port, it shall not be allowed by the Flag State to commence a further fishing trip in the Convention Area without having the defective device repaired or replaced.
9. When the Flag State has not received for 12 hours data transmissions referred to in paragraphs 1 and 7, or has reasons to doubt the correctness of the data transmissions under paragraphs 1 and 7, it shall as soon as possible notify the master or the owner or the representative thereof. If this situation occurs more than two times within a period of one year in respect of a particular vessel, the Flag State of the vessel shall investigate the matter, including having an authorised official check the device in question, in order to establish whether the equipment has been tampered with. The outcome of this investigation shall be forwarded to the CCAMLR Secretariat within 30 days of its completion.
- 10.^{2,3,4} Each Contracting Party shall forward VMS reports and messages received, pursuant to paragraph 1, to the CCAMLR Secretariat as soon as possible:
 - (i) but not later than four hours after receipt for those exploratory longline fisheries subject to conservation measures adopted at CCAMLR-XXIII; or
 - (ii) but not later than 10 working days following departure from the Convention Area for all other fisheries.
11. With regard to paragraphs 7 and 10(i), each Contracting Party shall, as soon as possible but no later than two working days following detection or notification of technical failure or non-functioning of the vessel monitoring device on board the fishing vessel, forward the geographical positions of the vessel to the Secretariat, or shall ensure that these positions are forwarded to the Secretariat by the master or the owner of the vessel, or their representative.
12. Each Flag State shall ensure that VMS reports and messages transmitted by the Contracting Party or its fishing vessels to the CCAMLR Secretariat, are in a computer-readable form in the data exchange format set out in Annex 10-04/A.
13. Each Flag State shall in addition separately notify by email or other means the CCAMLR Secretariat within 24 hours of each entry to, exit from and movement between subareas and divisions of the Convention Area by each of its fishing vessels in the format outlined in Annex 10-04/A. When a vessel intends to enter a closed area, or an area for which it is not licensed to fish, the Flag State shall provide prior notification to the Secretariat of the vessel's intentions. The Flag State may permit or direct that such notifications be provided by the vessel directly to the Secretariat.
14. Without prejudice to its responsibilities as a Flag State, if the Contracting Party so desires, it shall ensure that each of its vessels communicates the reports referred to in paragraphs 10 and 13 in parallel to the CCAMLR Secretariat.

15. Each Flag State shall notify to the CCAMLR Secretariat any changes without delay to the name, address, email, telephone and facsimile numbers, as well as the address of electronic communication of the relevant authorities of their FMC.
16. In the event that the CCAMLR Secretariat has not, for 48 consecutive hours, received the data transmissions referred to in paragraph 10(i), it shall promptly notify the Flag State of the vessel and require an explanation. The CCAMLR Secretariat shall promptly inform the Commission if the data transmissions at issue, or the Flag State explanation, are not received from the Contracting Party within a further five working days.
17. If VMS data received by the Secretariat indicate the presence of a vessel in an area or subarea for which no license details have been provided by the Flag State to the Secretariat as required by Conservation Measure 10-02, or in any area or subarea for which the Flag State or fishing vessel has not provided prior notification as required by paragraph 13, then the Secretariat shall notify the Flag State and require an explanation. The explanation shall be forwarded to the Secretariat for evaluation by the Commission at its next annual meeting.
18. The CCAMLR Secretariat and all Parties receiving data shall treat all VMS reports and messages received under paragraph 10 or paragraphs 19, 20, 21 or 22 in a confidential manner in accordance with the confidentiality rules established by the Commission as contained in Annex 10-04/B. Data from individual vessels shall be used for compliance purposes only, namely for:
 - (i) active surveillance presence, and/or inspections by a Contracting Party in a specified CCAMLR subarea or division; or
 - (ii) the purposes of verifying the content of a *Dissostichus* Catch Document (DCD).
19. The CCAMLR Secretariat shall place a list of vessels submitting VMS reports and messages pursuant to this conservation measure on a password-protected section of the CCAMLR website. This list shall be divided into subareas and divisions, without indicating the exact positions of vessels, and be updated when a vessel changes subarea or division. The list shall be posted daily by the Secretariat, establishing an electronic archive.
20. VMS reports and messages (including vessel locations), for the purposes of paragraph 18(i) above, may be provided by the Secretariat to a Contracting Party other than the Flag State without the permission of the Flag State only during active surveillance, and/or inspection in accordance with the CCAMLR System of Inspection and subject to the time frames set out in paragraph 10. In this case, the Secretariat shall provide VMS reports and messages, including vessel locations over the previous 10 days, for vessels actually detected during surveillance, and/or inspection by a Contracting Party, and VMS reports and messages (including vessel locations) for all vessels within 100 n miles of that same location. The Flag State(s) concerned shall be provided by the Party conducting the active surveillance, and/or inspection, with a report including name of the vessel or aircraft on active surveillance, and/or inspection under the CCAMLR System of Inspection, and the full name(s) of the CCAMLR

inspector(s) and their ID number(s). The Parties conducting the active surveillance, and/or inspection will make every reasonable effort to make this information available to the Flag State(s) as soon as possible.

21. A Party may contact the Secretariat prior to conducting active surveillance, and/or inspection in accordance with the CCAMLR System of Inspection, in a given area and request VMS reports and messages (including vessel locations), for vessels in that area. The Secretariat shall provide this information only with the permission of the Flag State for each of the vessels and according to the time frames set out in paragraph 10. On receipt of Flag State permission the Secretariat shall provide regular updates of positions to the Contracting Party for the duration of the active surveillance, and/or inspection in accordance with the CCAMLR System of Inspection.
22. A Contracting Party may request actual VMS reports and messages (including vessel locations) from the Secretariat for a vessel when verifying the claims on a DCD. In this case the Secretariat shall provide that data only with Flag State permission.
23. Notwithstanding the requirements of paragraphs 1 and 4, Contracting Parties may request VMS data for their own Flag vessels from the Secretariat.
24. The CCAMLR Secretariat shall annually, before 30 September, report on the implementation of and compliance with this conservation measure to the Commission.

¹ Includes vessels licensed under French domestic law and vessels licensed under South African domestic law.

² This paragraph does not apply to vessels licensed under French domestic law in the EEZs surrounding Kerguelen and Crozet Islands.

³ This paragraph does not apply to vessels licensed under South African domestic law in the EEZ surrounding Prince Edward Islands.

⁴ This paragraph and paragraphs thereafter do not apply to the krill fisheries, with the exception of paragraphs 15 and 24.

VMS DATA FORMAT
‘POSITION’, ‘EXIT’ AND ‘ENTRY’ REPORTS/MESSAGES

Data element	Field code	Mandatory/ Optional	Remarks
Start record	SR	M	System detail; indicates start of record.
Address	AD	M	Message detail; destination; ‘XCA’ for CCAMLR.
Sequence number	SQ	M ¹	Message detail; message serial number in current year.
Type of message	TM ²	M	Message detail; message type, ‘POS’ as position report/ message to be communicated by VMS or other means by vessels with a defective satellite tracking device.
Radio call sign	RC	M	Vessel registration detail; international radio call sign of the vessel.
Trip number	TN	O	Activity detail; fishing trip serial number in current year.
Vessel name	NA	M	Vessel registration detail; name of the vessel.
Contracting Party internal reference number	IR	O	Vessel registration detail. Unique Contracting Party vessel number as ISO-3 Flag State code followed by number.
External registration number	XR	O	Vessel registration detail; the side number of the vessel.
Latitude	LA	M ³	Activity detail; position.
Longitude	LO	M ³	Activity detail; position.
Latitude (decimal)	LT	M ⁴	Activity detail; position.
Longitude (decimal)	LG	M ⁴	Activity detail; position.
Date	DA	M	Message detail; position date.
Time	TI	M	Message detail; position time in UTC.
End of record	ER	M	System detail; indicates end of the record.

¹ Optional in case of a VMS message.

² Type of message shall be ‘ENT’ for the first VMS message from the Convention Area as detected by the FMC of the Contracting Party, or as directly submitted by the vessel.

Type of message shall be ‘EXI’ for the first VMS message from outside the Convention Area as detected by the FMC of the Contracting Party or as directly submitted by the vessel, and the values for latitude and longitude are, in this type of message, optional. Type of message shall be ‘MAN’ for reports communicated by vessels with a defective satellite tracking device.

³ Mandatory for manual messages.

⁴ Mandatory for VMS messages.

FORMAT FOR INDIRECT FLAG STATE REPORTING VIA EMAIL

Code	Code definition	Field contents	Example	Field contents explanation
SR	Start record	No data		No data
AD	Address	XCA	XCA	XCA = CCAMLR
SQ	Sequence number	XXX	123	Message sequence number
TM	Type of message	POS	POS	POS = position report, ENT = entry report, EXI = exit report
RC	Radio call sign	XXXXXXX	AB1234	Maximum of 8 characters
NA	Vessel name	XXXXXXXXXX	Vessel Name	Maximum of 30 characters
LT	Latitude	DD.ddd	-55.000	+/- numeral in GIS format. Must specify - for South and + for North.
LG	Longitude	DDD.ddd	-020.000	+/- numeral in GIS format. Must specify - for West and + for East.
DA	Record date	YYYYMMDD	20050114	8 characters only
TI	Record time	HHMM	0120	4 characters only, using 24-hour time format. Do not use separators or include seconds.
ER	End record	No data		No data

Sample string:

```
//SR//AD/XCA//SQ/001//TM/POS//RC/ABCD//NA/Vessel Name//LT/-55.000//LG/-020.000//DA/20050114//TI/0120//ER//
```

Notes:

- Three fields in Annex 10-04/A are optional. These are:
 TN (trip number)
 IR (Contracting Party internal reference number): Must start with the 3-character ISO country code, e.g. Argentina = ARGxxx
 XR (external registration number).
- Do not include any other fields.
- Do not include separators (e.g. : . or /) in the date and time fields.
- Do not include seconds in the time fields.

**PROVISIONS ON SECURE AND CONFIDENTIAL TREATMENT
OF ELECTRONIC REPORTS AND MESSAGES TRANSMITTED
PURSUANT TO CONSERVATION MEASURE 10-04**

1. Field of Application

- 1.1 The provisions set out below shall apply to all VMS reports and messages transmitted and received pursuant to Conservation Measure 10-04.

2. General Provisions

- 2.1 The CCAMLR Secretariat and the appropriate authorities of Contracting Parties transmitting and receiving VMS reports and messages shall take all necessary measures to comply with the security and confidentiality provisions set out in sections 3 and 4.
- 2.2 The CCAMLR Secretariat shall inform all Contracting Parties of the measures taken in the Secretariat to comply with these security and confidentiality provisions.
- 2.3 The CCAMLR Secretariat shall take all the necessary steps to ensure that the requirements pertaining to the deletion of VMS reports and messages handled by the Secretariat are complied with.
- 2.4 Each Contracting Party shall guarantee the CCAMLR Secretariat the right to obtain as appropriate, the rectification of reports and messages or the erasure of VMS reports and messages, the processing of which does not comply with the provisions of Conservation Measure 10-04.

3. Provisions on Confidentiality

- 3.1 All requests for data must be made to the CCAMLR Secretariat in writing. Requests for data must be made by the main Commission Contact or an alternative contact nominated by the main Commission Contact of the Contracting Party concerned. The Secretariat shall only provide data to a secure email address specified at the time of making a request for data.
- 3.2 In cases where the CCAMLR Secretariat is required to seek the permission of the Flag State before releasing VMS reports and messages to another Party, the Flag State shall respond to the Secretariat as soon as possible but in any case within two working days.
- 3.3 Where the Flag State chooses not to give permission for the release of VMS reports and messages, the Flag State shall, in each instance, provide a written report within 10 working days to the Commission outlining the reasons why it chooses not to permit data to be released. The CCAMLR Secretariat shall place any report so provided, or notice that no report was received, on a password-protected part of the CCAMLR website.

- 3.4 VMS reports and messages shall only be released and used for the purposes stipulated in paragraph 18 of Conservation Measure 10-04.
- 3.5 VMS reports and messages released pursuant to paragraphs 20, 21 and 22 of Conservation Measure 10-04 shall provide details of: name of vessel, date and time of position report, and latitude and longitude position at time of report.
- 3.6 Regarding paragraph 21 each inspecting Contracting Party shall make available VMS reports and messages and positions derived therefrom only to their inspectors designated under the CCAMLR System of Inspection. VMS reports and messages shall be transmitted to their inspectors no more than 48 hours prior to entry into the CCAMLR, subarea or division where surveillance is to be conducted by the Contracting Party. Contracting Parties must ensure that VMS reports and messages are kept confidential by such inspectors.
- 3.7 The CCAMLR Secretariat shall delete all the original VMS reports and messages referred to in section 1 from the database at the CCAMLR Secretariat by the end of the first calendar month following the third year in which the VMS reports and messages have originated. Thereafter the information related to the movement of the fishing vessels shall only be retained by the CCAMLR Secretariat after measures have been taken to ensure that the identity of the individual vessels can no longer be established.
- 3.8 Contracting Parties may retain and store VMS reports and messages provided by the Secretariat for the purposes of active surveillance presence, and/or inspections, until 24 hours after the vessels to which the reports and messages pertain have departed from the CCAMLR subarea or division. Departure is deemed to have been effected six hours after the transmission of the intention to exit from the CCAMLR subarea or division.

4. Provisions on Security

4.1 Overview

4.1.1 Contracting Parties and the CCAMLR Secretariat shall ensure the secure treatment of VMS reports and messages in their respective electronic data processing facilities, in particular where the processing involves transmission over a network. Contracting Parties and the CCAMLR Secretariat must implement appropriate technical and organisational measures to protect reports and messages against accidental or unlawful destruction or accidental loss, alteration, unauthorised disclosure or access, and against all inappropriate forms of processing.

4.1.2 The following security issues must be addressed from the outset:

- System access control:
The system has to withstand a break-in attempt from unauthorised persons.
- Authenticity and data access control:
The system has to be able to limit the access of authorised parties to a predefined set of data only.

- Communication security:
It shall be guaranteed that VMS reports and messages are securely communicated.
- Data security:
It has to be guaranteed that all VMS reports and messages that enter the system are securely stored for the required time and that they will not be tampered with.
- Security procedures:
Security procedures shall be designed addressing access to the system (both hardware and software), system administration and maintenance, backup and general usage of the system.

4.1.3 Having regard to the state of the art and the cost of their implementation, such measures shall ensure a level of security appropriate to the risks represented by the processing of the reports and the messages.

4.1.4 Security measures are described in more detail in the following paragraphs.

4.2 System Access Control

4.2.1 The following features are the mandatory requirements for the VMS installation located at the CCAMLR Data Centre:

- A stringent password and authentication system: each user of the system is assigned a unique user identification and associated password. Each time the user logs on to the system he/she has to provide the correct password. Even when successfully logged on the user only has access to those and only those functions and data that he/she is configured to have access to. Only a privileged user has access to all the data.
- Physical access to the computer system is controlled.
- Auditing: selective recording of events for analysis and detection of security breaches.
- Time-based access control: access to the system can be specified in terms of times-of-day and days-of-week that each user is allowed to log on to the system.
- Terminal access control: specifying for each workstation which users are allowed to access.

4.3 Authenticity and Data Access Security

4.3.1 Communication between Contracting Parties and the CCAMLR Secretariat for the purpose of Conservation Measure 10-04 shall use secure Internet protocols SSL, DES or verified certificates obtained from the CCAMLR Secretariat.

4.4 Data Security

4.4.1 Access limitation to the data shall be secured via a flexible user identification and password mechanism. Each user shall be given access only to the data necessary for their task.

4.5 Security Procedures

4.5.1 Each Contracting Party and the CCAMLR Secretariat shall nominate a security system administrator. The security system administrator shall review the log files generated by the software for which they are responsible, properly maintain the system security for which they are responsible, restrict access to the system for which they are responsible as deemed needed and in the case of Contracting Parties, also act as a liaison with the Secretariat in order to solve security matters.

CONSERVATION MEASURE 10-05 (2008) **Catch Documentation Scheme for *Dissostichus* spp.**

Species	toothfish
Area	all
Season	all
Gear	all

The Commission,

Concerned that illegal, unreported and unregulated (IUU) fishing for *Dissostichus* spp. in the Convention Area threatens serious depletion of populations of *Dissostichus* spp.,

Aware that IUU fishing involves significant by-catch of some Antarctic species, including endangered albatross,

Noting that IUU fishing is inconsistent with the objective of the Convention and undermines the effectiveness of CCAMLR conservation measures,

Underlining the responsibilities of Flag States to ensure that their vessels conduct their fishing activities in a responsible manner,

Mindful of the rights and obligations of Port States to promote the effectiveness of regional fishery conservation measures,

Aware that IUU fishing reflects the high value of, and resulting expansion in markets for and international trade in, *Dissostichus* spp.,

Recalling that Contracting Parties have agreed to introduce classification codes for *Dissostichus* spp. at a national level,

Recognising that the implementation of a Catch Documentation Scheme for *Dissostichus* spp. (CDS) will provide the Commission with essential information necessary to provide the precautionary management objectives of the Convention,

Committed to take steps, consistent with international law, to identify the origins of *Dissostichus* spp. entering the markets of Contracting Parties and to determine whether *Dissostichus* spp. harvested in the Convention Area that is imported into their territories was caught in a manner consistent with CCAMLR conservation measures,

Wishing to reinforce the conservation measures already adopted by the Commission with respect to *Dissostichus* spp.,

Further recognising the importance of enhancing cooperation with non-Contracting Parties to help prevent, deter and eliminate IUU fishing in the Convention Area,

Acknowledging that the Commission has adopted a policy to enhance cooperation between CCAMLR and non-Contracting Parties,

Inviting non-Contracting Parties whose vessels fish for *Dissostichus* spp. to participate in the CDS,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. The following definitions are intended only for the purposes of the completion of CDS documents and shall be applied as stated regardless of whether such actions as landings, transshipments, imports, exports or re-exports constitute the same under any CDS participant's customs law or other domestic legislation:
 - (i) Port State: The State that has control over a particular port area or free trade zone for the purposes of landing, transshipment, importing, exporting and re-exporting and whose authority serves as the authority for landing or transshipment certification.
 - (ii) Landing: The initial transfer of catch in its harvested or processed form from a vessel to dockside or to another vessel in a port or free trade zone where the catch is certified by an authority of the Port State as landed.
 - (iii) Export: Any movement of a catch in its harvested or processed form from territory under the control of the State or free trade zone of landing, or, where that State or free trade zone forms part of a customs union, any other member State of that customs union.
 - (iv) Import: The physical entering or bringing of a catch into any part of the geographical territory under the control of a State, except where the catch is landed or transhipped within the definitions of 'landing' or 'transshipment' in this conservation measure.
 - (v) Re-export: Any movement of a catch in its harvested or processed form from territory under the control of a State, free trade zone, or member State of a customs union of import unless that State, free trade zone, or any member State of that customs union of import is the first place of import, in which case the movement is an export within the definition of 'export' in this conservation measure.

- (vi) Transshipment: The transfer of a catch in its harvested or processed form from a vessel to another vessel or means of transport, and, where such transfer takes place within the territory under the control of a Port State, for the purpose of effecting its removal from that State. For the avoidance of doubt, temporarily placing a catch on land or an artificial structure to facilitate such transfer shall not prevent the transfer from being a transshipment where the catch is not 'landed' within the definition of 'landing' in this conservation measure.
2. Each Contracting Party shall take steps to identify the origin of *Dissostichus* spp. imported into or exported from its territories and to determine whether *Dissostichus* spp. harvested in the Convention Area that is imported into or exported from its territories was caught in a manner consistent with CCAMLR conservation measures.
 3. Each Contracting Party shall require that each master or authorised representative of its flag vessels authorised to engage in harvesting of *Dissostichus eleginoides* and/or *Dissostichus mawsoni* complete a *Dissostichus* catch document (DCD) for the catch landed or transhipped on each occasion that it lands or tranships *Dissostichus* spp.
 4. Each Contracting Party shall require that each landing of *Dissostichus* spp. at its ports and each transshipment of *Dissostichus* spp. to its vessels be accompanied by a completed DCD. The landing of *Dissostichus* spp. without a catch document is prohibited.
 5. Each Contracting Party shall, in accordance with their laws and regulations, require that their flag vessels which intend to harvest *Dissostichus* spp., including on the high seas outside the Convention Area, are provided with specific authorisation to do so. Each Contracting Party shall provide DCD forms to each of its flag vessels authorised to harvest *Dissostichus* spp. and only to those vessels.
 6. A non-Contracting Party seeking to cooperate with CCAMLR by participating in this scheme may issue DCD forms, in accordance with the procedures specified in paragraphs 8 and 9, to any of its flag vessels that intend to harvest *Dissostichus* spp.
 7. Non-Contracting Parties which are involved in the trade of *Dissostichus* spp. are encouraged to approach the CCAMLR Secretariat with requests for assistance. Proposals must demonstrate how any specific assistance requested will help to combat IUU fishing in the Convention Area. Such requests will be considered by the Commission at its annual meeting. The procedure regarding cooperation with CCAMLR in the implementation of the CDS by non-Contracting Parties involved in the trade of *Dissostichus* spp. is set out in Annex 10-05/C.
 8. The DCD shall include the following information:
 - (i) the name, address, telephone and fax numbers of the issuing authority;
 - (ii) the name, home port, national registry number and call sign of the vessel and, if issued, its IMO/Lloyd's registration number;
 - (iii) the reference number of the licence or permit, whichever is applicable, that is issued to the vessel;

- (iv) the weight of each *Dissostichus* species landed or transhipped by product type, and
 - (a) by CCAMLR statistical subarea or division if caught in the Convention Area; and/or
 - (b) by FAO statistical area, subarea or division if caught outside the Convention Area;
 - (v) the dates within which the catch was taken;
 - (vi) the date and the port at which the catch was landed or the date and the vessel, its flag and national registry number, to which the catch was transhipped;
 - (vii) the name, address, telephone and fax numbers of the recipient(s) of the catch and the amount of each species and product type received.
9. Procedures for completing DCDs in respect of vessels are set forth in paragraphs A1 to A10 of Annex 10-05/A to this measure.
10. Each Contracting Party shall require that each shipment of *Dissostichus* spp. imported into or exported or re-exported from its territory be accompanied by the export/re-export document. The import, export or re-export of *Dissostichus* spp. without an export/re-export document is prohibited.
11. An export/re-export document issued in respect of a vessel is one that:
- (i) includes all relevant information and signatures provided in accordance with paragraphs A1 to A11 of Annex 10-05/A to this measure;
 - (ii) includes a signed and stamped certification by a responsible official of the exporting State of the accuracy of the information contained in the document.
12. The standard documents for catch, export and re-export documents are attached to Annex 10-05/A as follows:
- (i) Attachment 1 contains the standard catch document (which also includes provision for export) and the standard form for re-export which are to be used until 31 May 2009;
 - (ii) Attachment 2 contains the standard catch document and the standard form for export/re-export which are to be used from 1 June 2009.

Until 31 May 2009:

- (i) all references in this conservation measure and its annex to the export/re-export document, with respect to exporting, shall be read as referring to the export section of the standard catch document in Attachment 1;

- (ii) all references in this conservation measure and its annex to the export/re-export document, with respect to re-exporting, shall be read as referring to the standard form for re-export in Attachment 1.
13. Each Contracting Party shall ensure that its customs government authorities or other appropriate government officials request and examine the documentation of each shipment of *Dissostichus* spp. imported into or exported from its territory to verify that it includes the export document and, where appropriate, validated re-export document(s) that account for all the *Dissostichus* spp. contained in the shipment. These officials may also examine the content of any shipment to verify the information contained in the catch document or documents.
 14. If, as a result of an examination referred to in paragraph 13 above, a question arises regarding the information contained in a DCD or a re-export document, the exporting State whose government authority validated the document(s) and, as appropriate, the Flag State whose vessel completed the document are called on to cooperate with the importing State with a view to resolving such question.
 15. Each Contracting Party shall promptly provide by the most rapid electronic means, copies to the CCAMLR Secretariat of all export documents and, where relevant, validated re-export documents that it issued from and received into its territory and shall submit annually to the Secretariat a summary list of documents issued from or received into its territory in respect of transshipments, landings, exports, re-exports and imports. The list shall include: document identification numbers; date of landing, export, re-export, import; weights landed, exported, re-exported or imported.
 16. Each Contracting Party, and any non-Contracting Party that issues DCDs in respect of its flag vessels in accordance with paragraph 6, shall inform the CCAMLR Secretariat of the government authority or authorities (including names, addresses, phone and fax numbers and email addresses) responsible for issuing and validating DCDs.
 17. Notwithstanding the above, any Contracting Party, or any non-Contracting Party participating in the CDS, may require additional verification of catch documents by Flag States by using, *inter alia*, VMS, in respect of catches¹ taken on the high seas outside the Convention Area, when landed at, imported into or exported from its territory.
 18. If, following an examination under paragraph 13, questions under paragraph 14 or requests for additional verification of documents under paragraph 17, it is determined, after consultation with the States concerned, that a catch document is invalid, the import, export or re-export of *Dissostichus* spp. being the subject of the document is prohibited.
 19. If a Contracting Party participating in the CDS has cause to sell or dispose of seized or confiscated *Dissostichus* spp., it may issue a Specially Validated *Dissostichus* Catch Document (SVDCD) specifying the reasons for that validation. The SVDCD shall include a statement describing the circumstances under which confiscated fish are moving in trade. To the extent practicable, Parties shall ensure that no financial benefit arising from the sale of seized or confiscated catch accrue to the perpetrators of IUU

fishing. If a Contracting Party issues a SVDCD, it shall immediately report all such validations to the Secretariat for conveying to all Parties and, as appropriate, recording in trade statistics.

20. A Contracting Party may transfer all or part of the proceeds from the sale of seized or confiscated *Dissostichus* spp. into the CDS Fund created by the Commission or into a national fund which promotes achievement of the objectives of the Convention. In addition, Contracting Parties may offer voluntary contributions to support the CDS Fund and its related activities. A Contracting Party may, consistent with its domestic legislation, decline to provide a market for toothfish offered for sale with a SVDCD by another State. Provisions concerning the uses of the CDS Fund are found in Annex 10-05/B.

¹ Excluding by-catches of *Dissostichus* spp. by trawlers fishing on the high seas outside the Convention Area. A by-catch shall be defined as no more than 5% of total catch of all species and no more than 50 tonnes for an entire fishing trip by a vessel.

ANNEX 10-05/A

- A1. Each Flag State shall ensure that each *Dissostichus* catch document form that it issues includes a specific identification number consisting of:
- (i) a four-digit number, consisting of the two-digit International Standards Organization (ISO) country code plus the last two digits of the year for which the form is issued;
 - (ii) a three-digit sequence number (beginning with 001) to denote the order in which catch document forms are issued.

It shall also enter on each *Dissostichus* catch document form the number as appropriate of the licence or permit issued to the vessel.

- A2. The master of a vessel which has been issued a *Dissostichus* catch document form or forms shall adhere to the following procedures prior to each landing or transshipment of *Dissostichus* spp.:
- (i) the master shall ensure that the information specified in paragraph 8 of this conservation measure is accurately recorded on the *Dissostichus* catch document form;
 - (ii) if a landing or transshipment includes catch of both *Dissostichus* spp., the master shall record on the *Dissostichus* catch document form the total amount of the catch landed or transhipped by weight of each species;
 - (iii) if a landing or transshipment includes catch of *Dissostichus* spp. taken from different statistical subareas and/or divisions, the master shall record on the *Dissostichus* catch document form the amount of the catch by weight of each species taken from each statistical subarea and/or division and indicating whether the catch was caught in an EEZ or on the high seas, as appropriate;

- (iv) the master shall convey to the Flag State of the vessel by the most rapid electronic means available, the *Dissostichus* catch document number, the dates within which the catch was taken, the species, processing type or types, the estimated weight to be landed and the area or areas of the catch, the date of landing or transshipment and the port and country of landing or vessel of transshipment and shall request from the Flag State, a Flag State confirmation number.
- A3. If, for catches¹ taken in the Convention Area or on the high seas outside the Convention Area, the Flag State verifies, by the use of a VMS (as described in paragraph 1 of Conservation Measure 10-04), the area fished and that the catch to be landed or transhipped as reported by its vessel is accurately recorded and taken in a manner consistent with its authorisation to fish, it shall convey a unique Flag State confirmation number to the vessel's master by the most rapid electronic means available. The *Dissostichus* catch document will receive a confirmation number from the Flag State, only when it is convinced that the information submitted by the vessel fully satisfies the provisions of this conservation measure.
- A4. The master shall enter the Flag State confirmation number on the *Dissostichus* catch document form.
- A5. The master of a vessel that has been issued a *Dissostichus* catch document form or forms shall adhere to the following procedures immediately after each landing or transshipment of *Dissostichus* spp.:
- (i) in the case of a transshipment, the master shall confirm the transshipment obtaining the signature on the *Dissostichus* catch document of the master of the vessel to which the catch is being transferred;
 - (ii) in the case of a landing, the master or authorised representative shall confirm the landing by obtaining a signed and stamped certification on the *Dissostichus* catch document by a responsible official of the Port State of landing or free trade zone who is acting under the direction of either the customs or fisheries authority of the Port State and is competent with regard to the validation of *Dissostichus* catch documents;
 - (iii) in the case of a landing, the master or authorised representative shall also obtain the signature on the *Dissostichus* catch document of the individual that receives the catch at the port of landing or free trade zone;
 - (iv) in the event that the catch is divided upon landing, the master or authorised representative shall present a copy of the *Dissostichus* catch document to each individual that receives a part of the catch at the port of landing or free trade zone, record on that copy of the catch document the amount and origin of the catch received by that individual and obtain the signature of that individual.
- A6. In respect of each landing or transshipment, the master or authorised representative shall immediately sign and convey by the most rapid electronic means available a copy, or, if the catch landed was divided, copies, of the signed *Dissostichus* catch document to the Flag State of the vessel and shall provide a copy of the relevant document to each recipient of the catch.

- A7. The Flag State of the vessel shall immediately convey by the most rapid electronic means available a copy or, if the catch was divided, copies, of the signed *Dissostichus* catch document to the CCAMLR Secretariat to be made available by the next working day to all Contracting Parties.
- A8. The master or authorised representative shall retain the original copies of the signed *Dissostichus* catch document(s) and return them to the Flag State no later than one month after the end of the fishing season.
- A9. The master of a vessel to which catch has been transhipped (receiving vessel) shall adhere to the following procedures immediately after each landing of such catch in order to complete each *Dissostichus* catch document received from transhipping vessels:
- (i) the master of the receiving vessel shall confirm the landing by obtaining a signed and stamped certification on the *Dissostichus* catch document by a responsible official of the Port State of landing or free trade zone who is acting under the direction of either the customs or fisheries authority of the Port State and is competent with regard to the validation of *Dissostichus* catch documents;
 - (ii) the master of the receiving vessel shall also obtain the signature on the *Dissostichus* catch document of the individual that receives the catch at the port of landing or free trade;
 - (iii) in the event that the catch is divided upon landing, the master of the receiving vessel shall present a copy of the *Dissostichus* catch document to each individual that receives a part of the catch at the port of landing or free trade zone, record on that copy of the catch document the amount and origin of the catch received by that individual and obtain the signature of that individual.
- A10. In respect of each landing of transhipped catch, the master or authorised representative of the receiving vessel shall immediately sign and convey by the most rapid electronic means available a copy of all the *Dissostichus* catch documents, or if the catch was divided, copies, of all the *Dissostichus* catch documents, to the Flag State(s) that issued the *Dissostichus* catch document, and shall provide a copy of the relevant document to each recipient of the catch. The Flag State of the receiving vessel shall immediately convey by the most rapid electronic means available a copy of the document to the CCAMLR Secretariat to be made available by the next working day to all Contracting Parties.
- A11. For each shipment of *Dissostichus* spp. to be exported or re-exported from the country of landing or import, the exporter shall adhere to the following procedures to obtain the necessary export or re-export document for all the *Dissostichus* spp. contained in the shipment:
- (i) the exporter/re-exporter shall enter on each *Dissostichus* export/re-export document the reference number of the corresponding *Dissostichus* catch document, the amount of each *Dissostichus* spp. reported on the document that is contained in the shipment;

- (ii) the exporter/re-exporter shall enter on each *Dissostichus* catch document the name and address of the importer of the shipment and the point of import;
- (iii) the exporter/re-exporter shall enter on each export/re-export document the exporter/re-exporter's name and address, and shall sign the document;
- (iv) the exporter/re-exporter shall obtain a signed and stamped validation of the export/re-export document (including the attachments if provided) by a responsible official of the exporting/re-exporting State;
- (v) the exporter/re-exporter shall indicate the transport details as appropriate:

if by sea

container(s) number(s) if appropriate, or
vessel name, and
bill of lading number, date and place of issue;

if by air

flight number, airway bill number, place and date of issue;

if by other means (ground transportation)

truck registration number and nationality,
railway transport number, date and place of issue.

¹ Excluding by-catches of *Dissostichus* spp. by trawlers fishing on the high seas outside the Convention Area. A by-catch shall be defined as no more than 5% of total catch of all species and no more than 50 tonnes for an entire fishing trip by a vessel.

ANNEX 10-05/A, ATTACHMENT 1

STANDARD CATCH AND RE-EXPORT DOCUMENTS
TO BE USED UNTIL 31 MAY 2009

DISSOSTICHUS CATCH DOCUMENT							V 1.5	
Document Number					Flag State Confirmation Number			
PRODUCTION SECTION								
1. Issuing Authority of Document Name			Address			Tel: Fax:		
2. Fishing Vessel Name			Home Port & Registration Number			Call Sign		IMO/Lloyd's Number (if issued)
3. Licence Number (if issued)				Fishing dates for catch under this document				
				4. From:		5. To:		
6. Description of Fish (Landed/Transhipped)					7. Description of Fish Sold			
Species	Type	Estimated Weight to be Landed (kg)	Area Caught*	Verified Weight Landed (kg)	Net Weight Sold (kg)	Recipient name, address, telephone, fax and signature.		
						Recipient Name:		
						Signature:		
						Address:

THE USE OF THE CDS FUND

- B1. The overall objective of the CDS Fund ('the Fund') is to provide a mechanism which enables the Commission to enhance its capacity to prevent, deter and eliminate IUU fishing in the Convention Area, by *inter alia*, improving the effectiveness of the CDS.
- B2. The Fund will be operated according to the following provisions:
- (i) The Fund shall be used for special projects, or special needs of the Secretariat if the Commission so decides, aimed at enhancing the Commission's capacity to contribute to the prevention, deterrence and elimination of IUU fishing in the Convention Area. The Fund may also be used for assisting the development and improving the effectiveness of the CDS and for other such purposes as the Commission may decide.
 - (ii) The Fund shall be used primarily for projects conducted by the Secretariat, although the participation of Members in these projects is not precluded. While individual Member projects shall be considered, this shall not replace the normal responsibilities of Members of the Commission. The Fund shall not be used for routine Secretariat activities.
 - (iii) Proposals for special projects may be made by Members, by the Commission or the Scientific Committee and their subsidiary bodies, or by the Secretariat. Proposals shall be submitted to the annual meeting of the Commission as working papers and be accompanied by an explanation of the proposal and an itemised statement of estimated expenditure.
 - (iv) The Commission will, at each annual meeting, designate six Members to serve on a Review Panel to review proposals and to make recommendations to the Commission on whether to fund special projects or special needs. The Review Panel will meet during the first week of the Commission's annual meeting.
 - (v) The Commission shall review all proposals and decide on appropriate projects and funding as a standing agenda item at its annual meeting.
 - (vi) The Fund may be used to assist Acceding States and non-Contracting Parties that wish to cooperate with CCAMLR by contributing to the prevention, deterrence and elimination of IUU fishing in the Convention Area, so long as this use is consistent with provisions (i) and (ii) above. Such assistance shall be provided within the scope of the CCAMLR Cooperation Enhancement Program contained in the Policy to Enhance Cooperation between CCAMLR and non-Contracting Parties. Acceding States and non-Contracting Parties may submit proposals for consideration by the Commission at its annual meeting, if the proposals are sponsored by, or in cooperation with, a Member or the Secretariat.
 - (vii) The Financial Regulations of the Commission shall apply to the Fund, except in so far as these provisions provide or the Commission decides otherwise.

- (viii) The Secretariat shall report to the annual meeting of the Commission on the activities of the Fund, including its income and expenditure. Annexed to the report shall be reports on the progress of each project being funded by the Fund, including details of the expenditure on each project. The report will be circulated to Members in advance of the annual meeting.
- (ix) Where an individual Member project is being funded according to provision (ii), that Member shall provide an annual report on the progress of the project, including details of the expenditure on the project. The report shall be submitted to the Secretariat as a working paper to be circulated to Members in advance of the annual meeting. When the project is completed, that Member shall provide a final statement of account certified by an auditor acceptable to the Commission.
- (x) The Commission shall review all ongoing projects at its annual meeting as a standing agenda item and reserves the right, after notice, to cancel a project at any time should it decide that it is necessary. Such a decision shall be exceptional, and shall take into account progress made to date and likely progress in the future, and shall in any case be preceded by an invitation from the Commission to the project coordinator to present a case for continuation of funding.
- (xi) The Commission may modify these provisions at any time.

ANNEX 10-05/C

**PROCEDURE REGARDING COOPERATION WITH CCAMLR IN THE
IMPLEMENTATION OF THE CDS BY NON-CONTRACTING PARTIES
INVOLVED IN THE TRADE OF *DISSOSTICHUS* SPP.**

- C1. Prior to the annual meeting of the Commission, the Executive Secretary shall contact all non-Contracting Parties which are known to be involved in the trade with *Dissostichus* spp. to urge them to become a Contracting Party to CCAMLR or to attain the status of a non-Contracting Party cooperating with CCAMLR by participating in the Catch Documentation Scheme for *Dissostichus* spp. (CDS) in accordance with the provisions of Conservation Measure 10-05 and produce a summary paper for consideration by the Commission. The Executive Secretary shall provide copies of this conservation measure and any related resolutions adopted by the Commission.
- C2. The Executive Secretary shall also establish contact with any non-Contracting Party during the intersessional period, as soon as possible after it was known the non-Contracting Party was engaged in the trade with *Dissostichus* spp. The Executive Secretary shall immediately circulate any written responses to the Members of the Commission.
- C3. The Executive Secretary shall encourage non-Contracting Parties to approach the CCAMLR Secretariat with requests for assistance. Proposals must demonstrate how any specific assistance requested will help to combat IUU fishing in the Convention Area. Such requests will be considered by the Commission at its annual meeting.

- C4. Any non-Contracting Party that seeks to be accorded the status of non-Contracting Party cooperating with CCAMLR by participating in the CDS shall apply to the Executive Secretary requesting such status. Such requests must be received by the Executive Secretary no later than ninety (90) days in advance of an annual meeting of the CAMLR Commission in order to be considered at that meeting.
- C5. Any non-Contracting Party requesting the status of a non-Contracting Party cooperating with CCAMLR by participating in the CDS shall fulfil the following requirements in order to have this status considered by the Commission:
- (i) Information requirements:
 - (a) communicate the data required under the CDS.
 - (ii) Compliance requirements:
 - (a) implement all the provisions of Conservation Measure 10-05;
 - (b) inform CCAMLR of all the measures taken to ensure compliance by its vessels used for the transshipments of *Dissostichus* spp. and its operators, including *inter alia*, and as appropriate, inspection at sea and in port, CDS implementation;
 - (c) respond to alleged violations of CCAMLR measures by its vessels transshipping *Dissostichus* spp. and its operators, as determined by the appropriate bodies, and communicate to CCAMLR the actions taken against operators.
- C6. An applicant for the status of a non-Contracting Party cooperating with CCAMLR by participating in the CDS shall also:
- (i) confirm its commitment to implement Conservation Measure 10-05; and
 - (ii) inform the Commission of the measures it takes to ensure compliance by its operators with Conservation Measure 10-05.
- C7. The Standing Committee for Implementation and Compliance (SCIC) shall be responsible for reviewing requests for the status of non-Contracting Party cooperating with CCAMLR by participating in the CDS and for recommending to the Commission whether the applicants should be granted such status.
- C8. Annually the Commission shall review the status granted to each non-Contracting Party and may revoke this status if the non-Contracting Party concerned has not complied with the criteria for attaining such status established by this measure.

CONSERVATION MEASURE 10-06 (2008)
Scheme to promote compliance by Contracting Party vessels
with CCAMLR conservation measures

Species	all
Area	all
Season	all
Gear	all

The Commission,

Convinced that illegal, unreported and unregulated (IUU) fishing compromises the objective of the Convention,

Aware that a number of vessels registered to Parties and non-Parties are engaged in activities which diminish the effectiveness of CCAMLR conservation measures,

Recalling that Contracting Parties are required to cooperate in taking appropriate action to deter any activities which are not consistent with the objective of the Convention,

Resolved to reinforce its integrated administrative and political measures aimed at eliminating IUU fishing in the Convention Area,

hereby adopts the following conservation measure in accordance with Article IX.2(i) of the Convention:

1. At each annual meeting, the Commission will identify those Contracting Parties whose vessels have engaged in fishing activities in the Convention Area in a manner which has diminished the effectiveness of CCAMLR conservation measures in force, and shall establish a list of such vessels (CP-IUU Vessel List), in accordance with the procedures and criteria set out hereafter.
2. This identification shall be documented, *inter alia*, on reports relating to the application of Conservation Measure 10-03, trade information obtained on the basis of the implementation of Conservation Measure 10-05 and relevant trade statistics such as Food and Agriculture Organization of the United Nations (FAO) and other national or international verifiable statistics, as well as any other information obtained from Port States and/or gathered from the fishing grounds which is suitably documented.
3. Where a Contracting Party obtains information that vessels flying the flag of another Contracting Party have engaged in activities set out in paragraph 5, it shall submit a report containing this information, within 30 days of having become aware of it, to the Executive Secretary and the Contracting Party concerned. Contracting Parties shall indicate that the information is provided for the purposes of considering whether to include the vessel concerned in the CP-IUU Vessel List under Conservation Measure 10-06. The Executive Secretary shall within one business day circulate the report to the other Contracting Parties and to non-Contracting Parties cooperating with the Commission by participating in the Catch Documentation Scheme for *Dissostichus* spp. (CDS), and invite them to communicate any information available to them in respect of the vessels referred to above, including their ownership, operators and their trade activities.
4. For the purposes of this conservation measure, the Contracting Parties are considered as having carried out fishing activities that have diminished the effectiveness of the conservation measures adopted by the Commission if:

- (i) the Parties do not ensure compliance by their vessels with the conservation measures adopted by the Commission and in force, in respect of the fisheries in which they participate that are placed under the competence of CCAMLR;
 - (ii) their vessels are repeatedly included in the CP-IUU Vessel List.
5. In order for a Contracting Party's vessel to be included in the CP-IUU Vessel List there must be evidence, gathered in accordance with paragraphs 2 and 3, that the vessel has:
- (i) engaged in fishing activities in the CCAMLR Convention Area without a licence issued in accordance with Conservation Measure 10-02, or in violation of the conditions under which such licence would have been issued in relation to authorised areas, species and time periods; or
 - (ii) not recorded or not declared its catches made in the CCAMLR Convention Area in accordance with the reporting system applicable to the fisheries it engaged in, or made false declarations; or
 - (iii) fished during closed fishing periods or in closed areas in contravention of CCAMLR conservation measures; or
 - (iv) used prohibited gear in contravention of applicable CCAMLR conservation measures; or
 - (v) transhipped or participated in joint fishing operations with, supported or re-supplied other vessels identified by CCAMLR as carrying out IUU fishing activities (i.e. vessels on the CP-IUU Vessel List or the NCP-IUU Vessel List established under Conservation Measure 10-07); or
 - (vi) failed to provide, when required under Conservation Measure 10-05, a valid catch document for *Dissostichus* spp.; or
 - (vii) engaged in fishing activities in a manner that undermines the attainment of the objectives of the Convention in waters adjacent to islands within the area to which the Convention applies over which the existence of State sovereignty is recognised by all Contracting Parties, in the terms of the statement made by the Chairman on 19 May 1980; or
 - (viii) engaged in fishing activities contrary to any other CCAMLR conservation measures in a manner that undermines the attainment of the objectives of the Convention according to Article XXII of the Convention.

Draft CP-IUU Vessel List

6. The Executive Secretary shall, before 1 July of each year, draw up a draft list of Contracting Party vessels (the Draft CP-IUU Vessel List), listing all Contracting Party vessels that, on the basis of the information gathered in accordance with paragraphs 2 and 3, and any other information that the Executive Secretary might have obtained in relation thereto, and the criteria defined in paragraph 4, might be presumed to have

engaged in any of the activities referred to in paragraph 5 during the period beginning 30 days before the start of the previous CCAMLR annual meeting. The Draft CP-IUU Vessel List shall be distributed immediately to the Contracting Parties concerned.

7. Contracting Parties whose vessels are included in the Draft CP-IUU Vessel List shall transmit their comments to the Executive Secretary before 1 September, including verifiable VMS data and other supporting information showing that the vessels listed have not engaged in the activities which led to their inclusion in the Draft CP-IUU Vessel List.

Provisional CP-IUU Vessel List

8. The Executive Secretary shall create a new list ('the Provisional CP-IUU Vessel List') which shall comprise the Draft CP-IUU Vessel List and all information received pursuant to paragraph 7. Before 1 October, the Executive Secretary shall transmit the Provisional CP-IUU Vessel List, the CP-IUU Vessel List agreed at the previous CCAMLR annual meeting, and any evidence or documented information received since that meeting regarding vessels on the Provisional CP-IUU Vessel List and CP-IUU Vessel List to all Contracting Parties and non-Contracting Parties cooperating with the Commission by participating in the CDS. The Executive Secretary shall at the same time:
 - (i) request non-Contracting Parties cooperating with the Commission by participating in the CDS that, to the extent possible in accordance with their applicable laws and regulations, they do not register or de-register vessels that have been placed on the Provisional CP-IUU Vessel List until such time as the Commission has had the opportunity to consider the List and has made its determination;
 - (ii) invite non-Contracting Parties cooperating with the Commission by participating in the CDS to submit any evidence or documented information regarding vessels on the Provisional CP-IUU Vessel List and CP-IUU Vessel List, at the latest 30 days before the start of the next CCAMLR annual meeting. Where the incident occurs within the month preceding the next CCAMLR annual meeting, evidence or documented information should be provided as soon as possible.
9. Contracting Parties shall take all necessary measures, to the extent possible in accordance with their applicable laws and regulations, in order that:
 - (i) they do not register or de-register vessels that have been placed on the Provisional CP-IUU List until such time as the Commission has had the opportunity to examine the List and has made its determination;
 - (ii) if they do de-register a vessel on the Provisional CP-IUU Vessel List they inform, where possible, the Executive Secretary of the proposed new Flag State of the vessel, whereupon the Executive Secretary shall inform that State that the vessel is on the Provisional CP-IUU Vessel List and urge that State not to register the vessel.

Proposed and Final CP-IUU Vessel List

10. Contracting Parties shall submit to the Executive Secretary any additional information which might be relevant for the establishment of the CP-IUU Vessel List within 30 days of having become aware of such information and at the latest 30 days before the start of the CCAMLR annual meeting. A report containing this information shall be submitted in the format set out in paragraph 16, and Contracting Parties shall indicate that the information is provided for the purposes of considering whether to include the vessel concerned in the CP-IUU Vessel List under Conservation Measure 10-06. The Secretariat shall collate all information received and, where this has not been provided in relation to a vessel, attempt to obtain the information in paragraphs 16(i) to (vii).
11. The Executive Secretary shall circulate to Contracting Parties, at the latest 30 days before the start of the CCAMLR annual meeting, all evidence or documented information received under paragraphs 8 and 9, together with any other evidence or documented information received in terms of paragraphs 2 and 3.
12. At each CCAMLR annual meeting, the Standing Committee on Implementation and Compliance (SCIC) shall, by consensus:
 - (i) adopt a Proposed CP-IUU Vessel List, following consideration of the Provisional CP-IUU Vessel List and information and evidence circulated under paragraph 10. The Proposed CP-IUU Vessel List shall be submitted to the Commission for approval;
 - (ii) recommend to the Commission which, if any, vessels should be removed from the CP-IUU Vessel List adopted at the previous CCAMLR annual meeting, following consideration of that List and information and evidence circulated under paragraph 10.
13. SCIC shall include a vessel on the Proposed CP-IUU Vessel List only if one or more of the criteria in paragraph 5 have been satisfied.
14. SCIC shall recommend that the Commission should remove a vessel from the CP-IUU Vessel List if the Contracting Party proves that:
 - (i) the vessel did not take part in the activities described in paragraph 1 which led to the inclusion of the vessel in the CP-IUU Vessel List; or
 - (ii) it has taken effective action in response to the activities in question, including prosecution and imposition of sanctions of adequate severity; or
 - (iii) the vessel has changed ownership, including beneficial ownership if known to be distinct from the registered ownership, and that the new owner can establish the previous owner no longer has any legal, financial, or real interests in the vessel, or exercises control over it and that the new owner has not participated in IUU fishing; or
 - (iv) it has taken measures considered sufficient to ensure the granting of the right to the vessel to fly its flag will not result in IUU fishing.

15. In order to facilitate the work of SCIC and the Commission, the Executive Secretary shall prepare a paper for each CCAMLR annual meeting, summarising and annexing all the information, evidence and comments submitted in respect of each vessel to be considered.
16. The Draft CP-IUU Vessel List, Provisional CP-IUU Vessel List, Proposed CP-IUU Vessel List and the CP-IUU Vessel List shall contain the following details:
 - (i) name of vessel and previous names, if any;
 - (ii) flag of vessel and previous flags, if any;
 - (iii) owner of vessel and previous owners, including beneficial owners, if any;
 - (iv) operator of vessel and previous operators, if any;
 - (v) call sign of vessel and previous call signs, if any;
 - (vi) Lloyds/IMO number;
 - (vii) photographs of the vessel, where available;
 - (viii) date vessel was first included on the CP-IUU Vessel List;
 - (ix) summary of activities which justify inclusion of the vessel on the List, together with references to all relevant documents informing of and evidencing those activities;
 - (x) date and location of subsequent sightings of the vessel in the Convention Area, if any, and of any other related activities performed by the vessel contrary to CCAMLR conservation measures.
17. On approval of the CP-IUU Vessel List, the Commission shall request Contracting Parties whose vessels appear thereon to take all necessary measures to address these activities, including if necessary, the withdrawal of the registration or of the fishing licences of these vessels, the nullification of the relevant catch documents and denial of further access to the CDS, and to inform the Commission of the measures taken in this respect.
18. Contracting Parties shall take all necessary measures, subject to and in accordance with their applicable laws and regulations and international law, in order that:
 - (i) the issuance of a licence to vessels on the CP-IUU Vessel List to fish in the Convention Area is prohibited;
 - (ii) the issuance of a licence to vessels on the CP-IUU Vessel List to fish in waters under their fisheries jurisdiction is prohibited;

- (iii) fishing vessels, support vessels, refuel vessels, mother-ships and cargo vessels flying their flag do not in any way, in the Convention Area, assist vessels on the CP-IUU Vessel List by participating in any transshipment or joint fishing operations, supporting or resupplying such vessels;
- (iv) vessels on the CP-IUU Vessel List should be denied access to ports unless for the purpose of enforcement action or for reasons of *force majeure* or for rendering assistance to vessels, or persons on those vessels, in danger or distress. Vessels allowed entry to port are to be inspected in accordance with relevant conservation measures;
- (v) where port access is granted to such vessels:
 - (a) documentation and other information, including DCDs where relevant are examined, with a view to verifying the area in which the catch was taken; and where the origin cannot be adequately verified, the catch is detained or any landing or transshipment of the catch is refused; and
 - (b) where possible
 - i. in the event catch is found to be taken in contravention of CCAMLR conservation measures, catch is confiscated;
 - ii. all support to such vessels, including non-emergency refuelling, resupplying and repairs is prohibited;
- (vi) the chartering of vessels on the CP-IUU Vessel List is prohibited;
- (vii) granting of their flag to vessels on the CP-IUU Vessel List is refused;
- (viii) imports, exports and re-exports of *Dissostichus* spp. from vessels on the CP-IUU Vessel List are prohibited;
- (ix) 'Export or Re-export Government Authority Validation' is not certified when the shipment (of *Dissostichus* spp.) is declared to have been caught by any vessel on the CP-IUU Vessel List;
- (x) importers, transporters and other sectors concerned are encouraged to refrain from dealing with and from transshipping of fish caught by vessels on the CP-IUU Vessel List;
- (xi) any appropriate information which is suitably documented is collected and submitted to the Executive Secretary, to be forwarded to Contracting Parties, and non-Contracting Parties, entities or fishing entities cooperating with the Commission by participating in the CDS, with the aim of detecting, controlling and preventing the importation or exportation of, and other trade-related activities relating to, catches from vessels on the CP-IUU Vessel List intended to circumvent this conservation measure.

19. The Executive Secretary shall place the CP-IUU Vessel List approved by the Commission on the public section of the CCAMLR website. Furthermore, the Executive Secretary shall communicate the CP-IUU Vessel List to the FAO and appropriate regional fisheries organisations to enhance cooperation between CCAMLR and these organisations for the purposes of preventing, deterring and eliminating IUU fishing.
20. The Executive Secretary shall circulate to non-Contracting Parties cooperating with the Commission by participating in the CDS the CP-IUU Vessel List, together with the request that, to the extent possible in accordance with their applicable laws and regulations, they do not register vessels that have been placed on the List unless they are removed from the List by the Commission.
21. If Contracting Parties obtain new or changed information for vessels on the CP-IUU Vessel List in relation to the details in paragraphs 16(i) to (vii), they shall notify the Executive Secretary who shall place a notification on the secure section of the CCAMLR website and advise all Contracting Parties of the notification. If there are no comments on the information within seven (7) days, the Executive Secretary will revise the CP-IUU Vessel List.
22. Without prejudice to their rights to take proper action consistent with international law, Contracting Parties should not take any trade measures or other sanctions which are inconsistent with their international obligations against vessels using as the basis for the action the fact that the vessel or vessels have been included in the Draft CP-IUU Vessel List drawn up by the Executive Secretary, pursuant to paragraph 6.
23. The Chair of the Commission shall request the Contracting Parties identified pursuant to paragraph 1 to take all necessary measures to avoid diminishing the effectiveness of CCAMLR conservation measures resulting from their vessels' activities, and to advise the Commission of actions taken in that regard.
24. The Commission shall review, at subsequent CCAMLR annual meetings, as appropriate, action taken by those Contracting Parties to which requests have been made pursuant to paragraph 23, and identify those which have not rectified their activities.
25. The Commission shall decide appropriate measures to be taken in respect to *Dissostichus* spp. so as to address these issues with those identified Contracting Parties. In this respect, Contracting Parties may cooperate to adopt appropriate multilaterally agreed trade-related measures, consistent with their obligations as members of the World Trade Organization, that may be necessary to prevent, deter and eliminate the IUU activities identified by the Commission. Multilateral trade-related measures may be used to support cooperative efforts to ensure that trade in *Dissostichus* spp. and its products does not in any way encourage IUU fishing or otherwise diminish the effectiveness of CCAMLR's conservation measures which are consistent with the United Nations Convention on the Law of the Sea 1982.

CONSERVATION MEASURE 10-07 (2008)
Scheme to promote compliance by non-Contracting Party
vessels with CCAMLR conservation measures

Species	all
Area	all
Season	all
Gear	all

The Commission,

Convinced that illegal, unreported and unregulated (IUU) fishing compromises the objective of the Convention,

Aware that a significant number of vessels registered to non-Contracting Parties are engaged in activities which diminish the effectiveness of CCAMLR conservation measures,

Recalling that Contracting Parties are required to cooperate in taking appropriate action to deter any activities which are not consistent with the objective of the Convention,

Resolved to reinforce its integrated administrative and political measures aimed at eliminating IUU fishing in the Convention Area,

hereby adopts the following conservation measure in accordance with Article IX.2(i) of the Convention:

1. The Contracting Parties request non-Contracting Parties to cooperate fully with the Commission with a view to ensuring that the effectiveness of CCAMLR conservation measures is not undermined.
2. At each annual meeting the Commission shall identify those non-Contracting Parties whose vessels are engaged in IUU fishing activities in the Convention Area that threaten to undermine the effectiveness of CCAMLR conservation measures, and shall establish a list of such vessels (NCP-IUU Vessel List), in accordance with the procedures and criteria set out hereafter.
3. This identification shall be documented, *inter alia*, on reports relating to the application of Conservation Measure 10-03, trade information obtained on the basis of the implementation of Conservation Measure 10-05 and relevant trade statistics such as Food and Agriculture Organization of the United Nations (FAO) and other national or international verifiable statistics, as well as any other information obtained from Port States and/or gathered from the fishing grounds which is suitably documented.
4. A non-Contracting Party vessel which has been sighted engaging in fishing activities in the Convention Area or which has been denied port access, landing or transshipment in accordance with Conservation Measure 10-03 is presumed to be undermining the effectiveness of CCAMLR conservation measures. In the case of any transshipment activities involving a sighted non-Contracting Party vessel inside or outside the Convention Area, the presumption of undermining the effectiveness of CCAMLR conservation measures applies to any other non-Contracting Party vessel which has engaged in such activities with that vessel.
5. When a non-Contracting Party vessel referred to in paragraph 4 enters a port of any Contracting Party, it shall be inspected by authorised Contracting Party officials in

accordance with Conservation Measure 10-03 and shall not be allowed to land or tranship any fish species subject to CCAMLR conservation measures it might be holding on board unless the vessel establishes that the fish were caught in compliance with all relevant CCAMLR conservation measures and requirements under this Convention.

6. A Contracting Party which sights a non-Contracting Party vessel engaging in fishing activities in the Convention Area or denies a non-Contracting Party port access, landing or transhipment under paragraph 5 shall attempt to inform the vessel that it is presumed to be undermining the effectiveness of CCAMLR conservation measures, and that this information will be distributed to the Executive Secretary, all Contracting Parties and the Flag State of the vessel.
7. Information regarding such sightings or denial of port access, landings or transhipments, and the result of all inspections conducted in the ports of Contracting Parties, and any subsequent action shall be transmitted within one business day to the Commission in accordance with Article XXII of the Convention. The Executive Secretary shall transmit this information to all Contracting Parties, within one business day of receiving it, and to the Flag State of the vessel concerned as soon as possible and to appropriate regional fisheries organisations. At this time, the Executive Secretary shall, in consultation with the Chair of the Commission, request the Flag State concerned that, where appropriate, measures be taken in accordance with its applicable laws and regulations to ensure that the vessel desists from any activities that undermine the effectiveness of CCAMLR conservation measures, and that the Flag State report back to CCAMLR on the results of such enquiries and/or on the measures it has taken in respect of the vessel. The other Contracting Parties and non-Contracting Parties cooperating with the Commission by participating in the Catch Documentation Scheme for *Dissostichus* spp. (CDS) shall be invited to communicate any information available to them in respect of the vessels referred to above, including their ownership, operators and their trade activities.
8. Where a Contracting Party obtains information that a non-Contracting Party vessel has engaged in activities set out in paragraph 9, it shall submit a report containing this information, within 30 days of having become aware of it, to the Executive Secretary (including where such information has already been transmitted under paragraph 7). Contracting Parties shall indicate that the information is provided for the purposes of considering whether to include the vessel concerned in the NCP-IUU Vessel List under Conservation Measure 10-07. In addition, the Contracting Party may also submit the report directly to the non-Contracting Party concerned. The Executive Secretary shall promptly forward the information to the non-Contracting Party concerned, indicating that it has been provided for the purposes of considering whether to include the vessel concerned in the NCP-IUU Vessel List under Conservation Measure 10-07. The Executive Secretary shall request that the Flag State take action to prevent the vessel undertaking any activities that undermine the effectiveness of CCAMLR conservation measures and that the Flag State report back to CCAMLR on the measures it has taken in respect of the vessel concerned. The Executive Secretary shall circulate the information and any report from the Flag State to all other Contracting Parties as soon as possible.

9. In order for a non-Contracting Party's vessel to be included in the NCP-IUU Vessel List, there must be evidence, gathered in accordance with paragraphs 3 and 8, that the vessel has:
- (i) been sighted engaging in fishing activities in the CCAMLR Convention Area; or
 - (ii) been denied port access, landing or transshipment in accordance with Conservation Measure 10-03; or
 - (iii) transhipped or participated in joint fishing operations with, supported or resupplied other vessels identified by CCAMLR as carrying out IUU fishing activities (i.e. vessels on the NCP-IUU Vessel List or the CP-IUU Vessel List established under Conservation Measure 10-06); or
 - (iv) failed to provide, when required under Conservation Measure 10-05, a valid catch document for *Dissostichus* spp.; or
 - (v) engaged in fishing activities in a manner that undermines the attainment of the objectives of the Convention in waters adjacent to islands within the area to which the Convention applies over which the existence of State sovereignty is recognised by all Contracting Parties, in the terms of the statement made by the Chairman on 19 May 1980; or
 - (vi) engaged in fishing activities contrary to any other CCAMLR conservation measures in a manner that undermines the attainment of the objectives of the Convention according to Article XXII of the Convention.

Draft NCP-IUU Vessel List

10. The Executive Secretary shall, before 1 July of each year, draw up a draft list ('the Draft NCP-IUU Vessel List'), listing all non-Contracting Party vessels that, on the basis of the information gathered in accordance with paragraphs 3 and 8 and any other information that the Executive Secretary might have obtained in relation thereto, might be presumed to have engaged in any of the activities referred to in paragraph 9 during the period beginning 30 days before the start of the previous CCAMLR annual meeting. The Draft NCP-IUU Vessel List shall be distributed immediately to the non-Contracting Parties concerned and to all Contracting Parties.
11. The Executive Secretary shall invite non-Contracting Parties whose vessels are included in the Draft NCP-IUU Vessel List to transmit their comments to the Executive Secretary before 1 September, including verifiable VMS data and other supporting information showing that the vessels listed have not engaged in the activities which led to their inclusion in the Draft NCP-IUU Vessel List.

Provisional NCP-IUU Vessel List

12. The Executive Secretary shall create a new list ('the Provisional NCP-IUU Vessel List') which shall comprise the Draft NCP-IUU Vessel List and all information received pursuant to paragraph 11. Before 1 October, the Executive Secretary shall transmit the Provisional NCP-IUU Vessel List, the NCP-IUU Vessel List agreed at the previous CCAMLR annual meeting, and any evidence or documented information received since

that meeting regarding vessels on the Provisional NCP-IUU Vessel List or the NCP-IUU Vessel List to all Contracting Parties and non-Contracting Parties cooperating with the Commission by participating in the CDS. The Executive Secretary shall at the same time:

- (i) request non-Contracting Parties cooperating with the Commission by participating in the CDS that, to the extent possible in accordance with their applicable laws and regulations, they do not register or de-register vessels that have been placed on the List until such time as the Commission has had the opportunity to consider the List and has made its determination;
 - (ii) invite non-Contracting Parties cooperating with the Commission by participating in the CDS to submit any evidence or documented information regarding vessels on the Provisional NCP-IUU Vessel List and NCP-IUU Vessel List, at the latest 30 days before the start of the next CCAMLR annual meeting. Where the incident occurs within the month preceding the next CCAMLR annual meeting, evidence or documented information should be provided as soon as possible;
 - (iii) transmit the Provisional NCP-IUU Vessel List and any evidence or documented information received regarding vessels on that List to all non-Contracting Parties whose vessels are included in the List and who are not non-Contracting Parties cooperating with the Commission by participating in the CDS.
13. Contracting Parties shall take all necessary measures, to the extent possible in accordance with their applicable laws and regulations, in order that:
- (i) they do not register vessels that have been placed on the Provisional NCP-IUU Vessel List until such time as the Commission has had the opportunity to examine the List and has made its determination;
 - (ii) if they do de-register a vessel on the Provisional NCP-IUU Vessel List they inform, where possible, the Executive Secretary of the proposed new Flag State of the vessel, whereupon the Executive Secretary shall inform that State that the vessel is on the Provisional NCP-IUU Vessel List and urge that State not to register the vessel.

Proposed and Final NCP-IUU Vessel List

14. Contracting Parties shall submit to the Executive Secretary any additional information which might be relevant for the establishment of the NCP-IUU Vessel List within 30 days of having become aware of such information and at the latest 30 days before the start of the CCAMLR annual meeting. A report containing this information shall be submitted in the format set out in paragraph 20, and Contracting Parties shall indicate that the information is provided for the purposes of considering whether to include the vessel concerned in the NCP-IUU Vessel List under Conservation Measure 10-07. The Executive Secretary shall collate all information received and, where this has not been provided in relation to a vessel, attempt to obtain the information in paragraphs 20(i) to (vii).

15. The Executive Secretary shall circulate to Contracting Parties, at the latest 30 days before the start of the CCAMLR annual meeting, all evidence or documented information received under paragraphs 12 and 13, together with any other evidence or documented information received in terms of paragraphs 3 and 8.
16. At each CCAMLR annual meeting, the Standing Committee on Implementation and Compliance (SCIC) shall, by consensus:
 - (i) adopt a Proposed NCP-IUU Vessel List, following consideration of the Provisional NCP-IUU Vessel List and information and evidence circulated under paragraph 14. The Proposed NCP-IUU Vessel List shall be submitted to the Commission for approval;
 - (ii) recommend to the Commission which, if any, vessels should be removed from the NCP-IUU Vessel List adopted at the previous CCAMLR annual meeting, following consideration of that List and information and evidence circulated under paragraph 14.
17. SCIC shall include a vessel on the Proposed NCP-IUU Vessel List only if one or more of the criteria in paragraph 9 have been satisfied.
18. SCIC shall recommend that the Commission should remove a vessel from the NCP-IUU Vessel List if the non-Contracting Party proves that:
 - (i) the vessel did not take part in the activities described in paragraph 9 which led to the inclusion of the vessel in the NCP-IUU Vessel List; or
 - (ii) it has taken effective action in response to the activities in question, including prosecution and imposition of sanctions of adequate severity; or
 - (iii) the vessel has changed ownership including beneficial ownership if known to be distinct from the registered ownership and that the new owner can establish the previous owner no longer has any legal, financial, or real interests in the vessel, or exercises control over it and that the new owner has not participated in IUU fishing; or
 - (iv) it has taken measures considered sufficient to ensure the granting of the right to the vessel to fly its flag will not result in IUU fishing.
19. In order to facilitate the work of SCIC and the Commission, the Executive Secretary shall prepare a paper for each CCAMLR annual meeting, summarising and annexing all the information, evidence and comments submitted in respect of each vessel to be considered.
20. The Draft NCP-IUU Vessel List, Provisional NCP-IUU Vessel List, Proposed NCP-IUU Vessel List and the NCP-IUU Vessel List shall contain the following details:
 - (i) name of vessel and previous names, if any;
 - (ii) flag of vessel and previous flags, if any;

- (iii) owner of vessel and previous owners including beneficial owners, if any;
 - (iv) operator of vessel and previous operators, if any;
 - (v) call sign of vessel and previous call signs, if any;
 - (vi) Lloyds/IMO number;
 - (vii) photographs of the vessel, where available;
 - (viii) date vessel was first included on the NCP-IUU Vessel List;
 - (ix) summary of activities which justify inclusion of the vessel in the List, together with references to all relevant documents informing of and evidencing those activities;
 - (x) date and location of subsequent sightings of the vessel in the Convention Area, if any, and of any other related activities performed by the vessel contrary to CCAMLR conservation measures.
21. On approval of the NCP-IUU Vessel List, the Commission shall request non-Contracting Parties whose vessels appear thereon to take all necessary measures to address these activities, including if necessary, the withdrawal of the registration or of the fishing licences of these vessels, the nullification of the relevant catch documents and denial of further access to the CDS, and to inform the Commission of the measures taken in this respect.
22. Contracting Parties shall take all necessary measures, subject to and in accordance with their applicable laws and regulations and international law, in order that:
- (i) the issuance of a licence to vessels on the NCP-IUU Vessel List to fish in waters under their fisheries jurisdiction is prohibited;
 - (ii) fishing vessels, support vessels, refuel vessels, mother-ships and cargo vessels flying their flag do not in any way assist vessels on the NCP-IUU Vessel List by participating in any transshipment or joint fishing operations, supporting or resupplying such vessels;
 - (iii) vessels on the NCP-IUU Vessel List should be denied access to ports unless for the purpose of enforcement action or for reasons of *force majeure* or for rendering assistance to vessels, or persons on those vessels, in danger or distress. Vessels allowed entry to port are to be inspected in accordance with relevant conservation measures;
 - (iv) where port access is granted to such vessels:
 - (a) documentation and other information, including DCDs where relevant are examined, with a view to verifying the area in which the catch was taken; and where the origin cannot be adequately verified, the catch is detained or any landing or transshipment of the catch is refused; and

- (b) where possible
 - i. in the event catch is found to be taken in contravention of CCAMLR conservation measures, catch is confiscated;
 - ii. all support to such vessels, including non-emergency refuelling, resupplying and repairs is prohibited;
 - (v) the chartering of vessels on the NCP-IUU Vessel List is prohibited;
 - (vi) granting of their flag to vessels on the NCP-IUU Vessel List is refused;
 - (vii) imports, exports and re-exports of *Dissostichus* spp. from vessels on the NCP-IUU Vessel List are prohibited;
 - (viii) 'Export or Re-export Government Authority Validation' is not certified when the shipment (of *Dissostichus* spp.) is declared to have been caught by any vessel on the NCP-IUU Vessel List;
 - (ix) importers, transporters and other sectors concerned are encouraged to refrain from dealing with and from transshipping of fish caught by vessels on the NCP-IUU Vessel List;
 - (x) any appropriate information which is suitably documented is collected and submitted to the Executive Secretary, to be forwarded to Contracting Parties and non-Contracting Parties, entities or fishing entities cooperating with the Commission by participating in the CDS, with the aim of detecting, controlling and preventing the importation or exportation of, and other trade-related activities relating to, catches from vessels on the NCP-IUU Vessel List intended to circumvent this conservation measure.
23. The Executive Secretary shall place the NCP-IUU Vessel List approved by the Commission on the public section of the CCAMLR website. Furthermore, the Executive Secretary shall communicate the NCP-IUU Vessel List to the FAO and appropriate regional fisheries organisations to enhance cooperation between CCAMLR and these organisations for the purposes of preventing, deterring and eliminating IUU fishing.
24. The Executive Secretary shall circulate to non-Contracting Parties cooperating with the Commission by participating in the CDS the NCP-IUU Vessel List, together with the request that, to the extent possible in accordance with their applicable laws and regulations, they do not register vessels that have been placed on the List unless they are removed from the List by the Commission.
25. If Contracting Parties obtain new or changed information for vessels on the NCP-IUU Vessel List in relation to the details in paragraphs 20(i) to (vii), they shall notify the Executive Secretary who shall place a notification on the secure section of the CCAMLR website and advise all Contracting Parties and the non-Contracting Party concerned of the notification. If there are no comments on the information within seven (7) days, the Executive Secretary will revise the NCP-IUU Vessel List.

26. Without prejudice to their rights to take proper action consistent with international law, Contracting Parties should not take any trade measures or other sanctions which are inconsistent with their international obligations against vessels using as the basis for the action the fact that the vessel or vessels have been included in the Draft NCP-IUU Vessel List drawn up by the Executive Secretary, pursuant to paragraph 10.
27. The Chair of the Commission shall request the non-Contracting Parties identified pursuant to paragraph 1 to take all necessary measures to avoid diminishing the effectiveness of CCAMLR conservation measures resulting from their vessels' activities, including if necessary withdrawal of a vessel's registration or fishing licence, nullification of the relevant CDS documents and denial of further access to the CDS, and to advise the Commission of actions taken in that regard.
28. Contracting Parties shall jointly and/or individually request non-Contracting Parties identified pursuant to paragraph 2 to cooperate fully with the Commission in order to avoid diminishing the effectiveness of conservation measures adopted by the Commission.
29. The Commission shall review, at subsequent CCAMLR annual meetings, as appropriate, action taken by those non-Contracting Parties to which requests have been made pursuant to paragraph 26, and identify those which have not rectified their activities.
30. The Commission shall decide appropriate measures to be taken in respect to *Dissostichus* spp. so as to address these issues with those identified non-Contracting Parties. In this respect, Contracting Parties may cooperate to adopt appropriate multilaterally agreed trade-related measures, consistent with their obligations as members of the World Trade Organization, that may be necessary to prevent, deter and eliminate the IUU activities identified by the Commission. Multilateral trade-related measures may be used to support cooperative efforts to ensure that trade in *Dissostichus* spp. and its products does not in any way encourage IUU fishing or otherwise diminish the effectiveness of CCAMLR's conservation measures which are consistent with the United Nations Convention on the Law of the Sea 1982.

CONSERVATION MEASURE 10-08 (2006)
Scheme to promote compliance by Contracting Party nationals
with CCAMLR conservation measures

Species	all
Area	all
Season	all
Gear	all

The Commission,

Convinced that illegal, unreported and unregulated (IUU) fishing compromises the objectives of the Convention,

Concerned that some Flag States do not comply with their obligations regarding jurisdiction and control according to international law in respect of fishing vessels entitled to fly their flag that carry out their activities in the Convention Area, and that as a result these vessels are not under the effective control of such Flag States,

Aware that the lack of effective control facilitates fishing by these vessels in the Convention Area in a manner that undermines the effectiveness of CCAMLR conservation measures, and can lead to illegal, unreported and unregulated (IUU) catches of fish and unacceptable levels of incidental mortality of seabirds,

Concerned that vessels that carry out activities in the Convention Area which do not comply with the CCAMLR conservation measures are benefiting from the support provided by persons subject to the jurisdiction of Contracting Parties, including through participation in transshipment, transport and trade of illegally harvested catches or engagement on board or in the management of these vessels,

Noting that the FAO International Plan of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing calls on States to take measures to discourage nationals subject to their jurisdiction from supporting and engaging in any activity that undermines the effectiveness of international conservation and management measures,

Recalling that Contracting Parties should cooperate in taking appropriate action to deter any activities which are not consistent with the objective of the Convention,

Resolved to reinforce its integrated administrative and political measures aimed at eliminating IUU fishing in the Convention Area,

hereby adopts the following conservation measure in accordance with Article IX.2(i) of the Convention:

1. Without prejudice to the primacy of the responsibility of the Flag State, the Contracting Parties shall take appropriate measures, subject to and in accordance with their applicable laws and regulations:
 - (i) to verify if any natural or legal persons subject to their jurisdiction are engaged in the activities described in paragraphs 5(i) to (viii) of Conservation Measure 10-06 and 9(i) to (vi) of Conservation Measure 10-07;
 - (ii) take appropriate action in response to any verified activities referred to in paragraph 1(i); and
 - (iii) cooperate for the purpose of implementing the measures and actions referred to in paragraph 1(i). To this end, relevant agencies of Contracting Parties should cooperate to implement CCAMLR conservation measures and Contracting Parties shall seek cooperation by industries within their jurisdiction.
2. To assist with the implementation of this conservation measure, Contracting Parties shall submit reports to the CCAMLR Secretariat and the Contracting Parties and non-Contracting Parties cooperating with CCAMLR for the purpose of implementing the Catch Documentation Scheme for *Dissostichus* spp. on the actions and measures taken in accordance with paragraph 1, in a timely fashion.
3. These provisions shall be applicable from 1 July 2008. Contracting Parties may voluntarily decide to implement these provisions prior to this date.

CONSERVATION MEASURE 10-09 (2008)
Notification system for transshipments within the
Convention Area

Species	various
Area	various
Season	all
Fishery	various

The Commission,

Desiring to improve knowledge within CCAMLR of all vessels operating within the Convention Area, and in particular those which offer support to harvesting vessels,

Noting that an increasing number of vessels are operating within the Convention Area, either engaged directly in harvesting activities or in providing support to those vessels,

Recognising the need to increase the control over transshipment operations which support the harvesting of species within the Convention Area,

Concerned that vessels involved in the support of illegal, unreported and unregulated (IUU) fishing may be operating inside the Convention Area,

Taking account of the need to combat IUU fishing activities because they undermine the effectiveness of the conservation measures already adopted by CCAMLR,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. This conservation measure applies to all CCAMLR new and exploratory fisheries as well as to those listed in Annex 10-09/A.
2. Each Contracting Party as a Flag State shall notify the Secretariat at least 72 hours in advance if any of its vessels intend to tranship¹ within the Convention Area. The Flag State may permit or direct that such notifications be provided by the vessel directly to the Secretariat.
3. Notifications of intended transshipment operations shall include the following information, for all carrier vessels involved:
 - name and registration number
 - international radio call sign
 - Flag State
 - type of vessels, length, gross registered tonnage (GRT) and carrying capacity
 - proposed time and position, in latitude and longitude, of transshipment.

The notification should also include details of the type and amount of catches and other goods, such as food stores and fuel, being transhipped.

4. The CCAMLR Secretariat shall maintain a list of all such notifications on the password-protected part of its website, in a manner consistent with confidentiality requirements notified by CCAMLR Contracting Parties for their vessels.

5. For fisheries not covered by the provisions of paragraph 1, CCAMLR Contracting Parties shall provide, as a background paper to the annual meeting of the Commission, a report including details set out in paragraph 3 of all transshipments activities in the Convention Area of the vessels flying their flag, during the previous year.
6. No vessel covered by paragraph 1 may tranship to any vessel within the Convention Area for which prior notification, pursuant to paragraphs 1 to 3 above, has not been given.
7. The Commission shall review the implementation of this conservation measure at its 2010 meeting.

¹ Transshipment means the transfer of harvested marine living resources and any other goods or materials to or from fishing vessels.

ANNEX 10-09/A

**ADDITIONAL FISHERIES TO WHICH THIS
CONSERVATION MEASURE APPLIES**

Target species	Statistical subarea/division	Fishing gear
<i>Dissostichus eleginoides</i>	Subarea 48.3	Longline
	Division 58.5.2	Longline, pot, trawl
<i>Dissostichus</i> spp.	Subarea 48.4	Longline
<i>Champscephalus gunnari</i>	Subarea 48.3	Trawl
	Division 58.5.2	Trawl
Crab	Subarea 48.3	Pot

CONSERVATION MEASURE 21-01 (2008)^{1,2}
**Notification that Members are considering
 initiating a new fishery**

Species	all
Area	all
Season	all
Gear	all

The Commission,

Recognising that in the past, Antarctic fisheries have been initiated in the Convention Area before sufficient information was available upon which to base management advice,

Noting that in recent years new fisheries have started without adequate information being available to evaluate either the fishery potential or the possible impacts on the target stocks or species dependent on them,

Believing that without prior notification of a new fishery, the Commission is unable to fulfil its function under Article IX,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. A new fishery, for the purposes of this conservation measure, is a fishery on a species using a particular fishing method in a statistical subarea or division for which:
 - (i) information on distribution, abundance, demography, potential yield and stock identity from comprehensive research/surveys or exploratory fishing have not been submitted to CCAMLR;
or
 - (ii) catch and effort data have never been submitted to CCAMLR;
or
 - (iii) catch and effort data from the two most recent seasons in which fishing occurred have not been submitted to CCAMLR.
2. In addition to those fisheries identified according to paragraph 1, the use of fishing methods in high-seas areas of the Convention Area as specified in Annex 21-01/A will constitute new fisheries and will require approval of the Commission for specific areas before proceeding.
3. Any Member proposing to participate in a new fishery shall:
 - (i) notify its intention to the Commission not less than three months in advance of the next regular meeting of the Commission. This notification shall include the information prescribed in paragraph 4 of Conservation Measure 10-02 in respect of vessels proposing to participate in the fishery, with the exception that the notification shall not be required to specify the information referred to in subparagraph 4(ii) of Conservation Measure 10-02. Members shall, to the extent practicable, also provide in their notification the additional information detailed in paragraph 5 of Conservation Measure 10-02 in respect to each fishing vessel notified. Members are not hereby exempted from their obligations under Conservation Measure 10-02 to submit any necessary updates to vessel and licence details within the deadline established therein as of issuance of the licence to the vessel concerned;
 - (ii) prepare and submit to CCAMLR by a specified date a Fishery Operations Plan for the fishing season, for review by the Scientific Committee and the Commission. The Fishery Operations Plan shall include as much of the following information as the Member is able to provide, so as to assist the Scientific Committee in its preparation of the Data Collection Plan:
 - (a) the nature of the new fishery, including target species, methods of fishing, proposed region and maximum catch levels proposed for the forthcoming season;
 - (b) biological information on the target species from comprehensive research/survey cruises, such as distribution, abundance, demographic data and information on stock identity;

- (c) details of dependent and related species and the likelihood of their being affected by the proposed fishery;
 - (d) information from other fisheries in the region or similar fisheries elsewhere that may assist in the evaluation of potential yield;
 - (e) if the proposed fishery will be undertaken using bottom trawl gear, information on the known and anticipated impacts of this gear on vulnerable marine ecosystems, including benthos and benthic communities.
- (iii) provide a commitment, in its proposal, to implement any Data Collection Plan developed by the Scientific Committee for the fishery.
4. The Member shall not initiate a new fishery pending the process specified in paragraphs 8 and 9 below.
5. To ensure that adequate information is made available to the Scientific Committee for evaluation, during the period when a fishery is classified as new, the Scientific Committee shall develop (and update annually as appropriate) a Data Collection Plan, which should include research proposals, as appropriate. This shall identify the data needed and describe any operational research actions necessary to obtain the relevant data from the new fishery to enable an assessment of the stock to be made.
6. The Data Collection Plan shall include, where appropriate:
- (i) a description of the catch, effort and related biological, ecological and environmental data required to undertake the evaluations described in paragraph 1, and the date by which such data are to be reported annually to CCAMLR;
 - (ii) a plan for directing fishing effort during the initial phase to permit the acquisition of relevant data to evaluate the fishery potential and the ecological relationships among harvested, dependent and related populations and the likelihood of adverse impacts;
 - (iii) where appropriate, a plan for the acquisition of any other research data by fishing vessels, including activities that may require the cooperative activities of scientific observers and the vessel, as may be required for the Scientific Committee to evaluate the fishery potential and the ecological relationships among harvested, dependent and related populations and the likelihood of adverse impacts;
 - (iv) an evaluation of the time scales involved in determining the responses of harvested, dependent and related populations to fishing activities.
7. New fisheries shall be open only to those vessels that are equipped and configured so that they can comply with all relevant conservation measures. A vessel with a confirmed involvement in illegal, unreported or unregulated fishing in respect of Conservation Measures 10-06 and 10-07 shall not be permitted to participate in new fisheries.

8. The information provided in accordance with paragraphs 3 to 7, together with any other relevant information, shall be considered by the Scientific Committee, which shall then advise the Commission.
9. After its review of the information on the proposed new fishery, taking full account of the recommendations and the advice of the Scientific Committee, the Commission may then take such action as it deems necessary.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

ANNEX 21-01/A

ADDITIONAL FISHING METHODS

Bottom trawling in high-seas areas of the Convention Area.

CONSERVATION MEASURE 21-02 (2006)^{1,2}

Exploratory fisheries

Species	all
Area	all
Season	all
Gear	all

The Commission,

Recognising that in the past, some Antarctic fisheries had been initiated and subsequently expanded in the Convention Area before sufficient information was available upon which to base management advice,

Agreeing that exploratory fishing should not be allowed to expand faster than the acquisition of information necessary to ensure that the fishery can and will be conducted in accordance with the principles set forth in Article II,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. For the purposes of this conservation measure, exploratory fisheries are defined as follows:
 - (i) an exploratory fishery shall be defined as a fishery that was previously classified as a 'new fishery', as defined by Conservation Measure 21-01;
 - (ii) an exploratory fishery shall continue to be classified as such until sufficient information is available:
 - (a) to evaluate the distribution, abundance, and demography of the target species, leading to an estimate of the fishery's potential yield;
 - (b) to review the fishery's potential impacts on dependent and related species;

- (c) to allow the Scientific Committee to formulate and provide advice to the Commission on appropriate harvest catch levels, as well as effort levels and fishing gear, where appropriate.
2. To ensure that adequate information is made available to the Scientific Committee for evaluation, during the period when a fishery is classified as exploratory, the Scientific Committee shall develop (and update annually as appropriate) a Data Collection Plan, which should include research proposals, as appropriate. This shall identify the data needed and describe any operational research actions necessary to obtain the relevant data from the exploratory fishery to enable an assessment of the stock to be made.
3. The Data Collection Plan shall include, where appropriate:
 - (i) a description of the catch, effort, and related biological, ecological, and environmental data required to undertake the evaluations described in paragraph 1(ii), and the date by which such data are to be reported annually to CCAMLR;
 - (ii) a plan for directing fishing effort during the exploratory phase to permit the acquisition of relevant data to evaluate the fishery potential and the ecological relationships among harvested, dependent and related populations and the likelihood of adverse impacts;
 - (iii) where appropriate, a plan for the acquisition of any other research data by fishing vessels, including activities that may require the cooperative activities of scientific observers and the vessel, as may be required for the Scientific Committee to evaluate the fishery potential and the ecological relationships among harvested, dependent and related populations and the likelihood of adverse impacts;
 - (iv) an evaluation of the time-scales involved in determining the responses of harvested, dependent and related populations to fishing activities.
4. The Commission shall annually determine a precautionary catch limit at a level not substantially above that necessary to obtain the information specified in the Data Collection Plan and required to undertake the evaluations described in paragraph 1(ii).
5. Any Member proposing to participate in an exploratory fishery shall:
 - (i) notify its intention to the Commission not less than three months in advance of the next regular meeting of the Commission. This notification shall include the information prescribed in paragraph 4 of Conservation Measure 10-02 in respect of vessels proposing to participate in the fishery, with the exception that the notification shall not be required to specify the information referred to in subparagraph 4(ii) of Conservation Measure 10-02. Members shall, to the extent practicable, also provide in their notification the additional information detailed in paragraph 5 of Conservation Measure 10-02 in respect to each fishing vessel notified. Members are not hereby exempted from their obligations under Conservation Measure 10-02 to submit any necessary updates to vessel and licence details within the deadline established therein as of issuance of the licence to the vessel concerned;

- (ii) prepare and submit to CCAMLR by a specified date a Fishery Operations Plan for the fishing season, for review by the Scientific Committee and the Commission. The Fishery Operations Plan shall include as much of the following information as the Member is able to provide, so as to assist the Scientific Committee in its preparation of the Data Collection Plan:
 - (a) the nature of the exploratory fishery, including target species, methods of fishing, proposed region and maximum catch levels proposed for the forthcoming season;
 - (b) biological information on the target species from comprehensive research/survey cruises, such as distribution, abundance, demographic data, and information on stock identity;
 - (c) details of dependent and related species and the likelihood of their being affected by the proposed fishery;
 - (d) information from other fisheries in the region or similar fisheries elsewhere that may assist in the evaluation of potential yield;
 - (e) if the proposed fishery will be undertaken using bottom trawl gear, information on the known and anticipated impacts of this gear on vulnerable marine ecosystems, including benthos and benthic communities.
 - (iii) provide a commitment, in its proposal, to implement any Data Collection Plan developed by the Scientific Committee for the fishery.
6. On the basis of the information submitted in accordance with paragraph 5, and taking into account the advice and evaluation provided by the Scientific Committee and the Standing Committee on Implementation and Compliance (SCIC), the Commission shall annually consider adoption of relevant conservation measures for each exploratory fishery.
 7. The Commission shall not consider a notification by a Member unless the information required by paragraph 5 has been submitted by the due date.
 8. Notwithstanding paragraph 7, Members shall be entitled under Conservation Measure 10-02 to authorise participation in an exploratory fishery by a vessel other than that identified by the Commission in accordance with paragraph 5 if the notified vessel is prevented from participation due to legitimate operational or *force majeure* reasons. In such circumstances the Member concerned shall immediately inform the Secretariat thereof providing:
 - (i) full details of the intended replacement vessel(s) as prescribed in subparagraph 5(i);
 - (ii) a comprehensive account of the reasons justifying the replacement and any relevant supporting evidence or references.

The Secretariat shall immediately circulate this information to all Members.

9. Members whose vessels participate in exploratory fisheries in accordance with paragraphs 5 and/or 8 shall:
- (i) ensure that their vessels are equipped and configured so that they can comply with all relevant conservation measures;
 - (ii) ensure that each vessel carries a CCAMLR-designated scientific observer to collect data in accordance with the Data Collection Plan, and to assist in collecting biological and other relevant data;
 - (iii) annually (by the specified date) submit to CCAMLR the data specified by the Data Collection Plan;
 - (iv) be prohibited from continuing participation in the relevant exploratory fishing if the data specified in the Data Collection Plan have not been submitted to CCAMLR for the most recent season in which fishing occurred, until the relevant data have been submitted to CCAMLR and the Scientific Committee has been allowed an opportunity to review the data.
10. A vessel on either of the IUU Vessel Lists established under Conservation Measures 10-06 and 10-07 shall not be permitted to participate in exploratory fisheries.
11. Notifications for exploratory fisheries pursuant to the provisions above shall be subject to an administrative cost-recovery scheme and shall therefore be accompanied by a payment per vessel, the amount and refundable component of which shall be decided by the Commission, as well as the conditions and modalities according to which such payment shall be made.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 21-03 (2008)
Notifications of intent to participate in a fishery for
Euphausia superba

Species	krill
Area	all
Season	all
Gear	all

1. In order for the Scientific Committee to thoroughly study the notifications to fish for krill for the coming season, all Members of the Commission intending to fish for krill in the Convention Area shall notify the Secretariat of their intention not later than 1 June prior to the annual meeting of the Commission, immediately prior to the season in which they intend to fish, using the pro formas in Annex 21-03/A and Annex 21-03/B.
2. This notification shall include the information prescribed in paragraph 4 of Conservation Measure 10-02 in respect of each vessel proposing to participate in the fishery, with the exception that the notification shall not be required to specify the information referred to in subparagraph 4(ii) of Conservation Measure 10-02. Members shall, to the extent practicable, also provide in their notification the additional information detailed in paragraph 5 of Conservation Measure 10-02 in respect to each fishing vessel notified. Members are not hereby exempted from their obligations under Conservation Measure 10-02 to submit any necessary updates to vessel and licence details within the deadline established therein as of issuance of the licence to the vessel concerned.

3. A Member intending to fish for krill in the Convention Area may only notify in respect of vessels flying its flag at the time of the notification.
4. Members shall ensure, including by submitting notifications by the due date, appropriate review by the Commission of notifications to fish for krill in the Convention Area before a vessel commences fishing.
5. Notwithstanding paragraph 4, Members shall be entitled under Conservation Measure 10-02 to authorise participation in a krill fishery by a vessel other than that notified to the Commission in accordance with paragraph 2, if the notified vessel is prevented from participation due to legitimate operational reasons or *force majeure*. In such circumstances the Member concerned shall immediately inform the Secretariat providing:
 - (i) full details of the intended replacement vessel(s) as prescribed in paragraph 2;
 - (ii) a comprehensive account of the reasons justifying the replacement and any relevant supporting evidence or references.

The Secretariat shall immediately circulate this information to all Members.

6. A vessel on either of the IUU Vessel Lists established under Conservation Measures 10-06 and 10-07 shall not be permitted by Members to participate in krill fisheries.
7. The Secretariat shall provide the Commission and its relevant subsidiary bodies with information regarding substantial discrepancies between notifications and actual catches in the krill fishery in the latest season.

ANNEX 21-03/A

**NOTIFICATION OF INTENT TO PARTICIPATE IN A FISHERY
FOR *EUPHAUSIA SUPERBA***

Member: _____

Fishing season: _____

Name of vessel: _____

Expected level of catch (tonnes): _____

Fishing technique¹: Conventional trawl
 Continuous fishing system
 Pumping to clear codend
 Other methods: Please specify _____

Method used for direct estimate of green weight of krill caught: _____

Products to be derived from the catch²:

Product type	% of catch

Notified fishing areas and months

	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov
48.1												
48.2												
48.3												
48.4												
48.5												
48.6												
58.4.1												
58.4.2												
88.1												
88.2												
88.3												

- X Mark boxes where and when the notified vessel(s) is/are most likely to operate.
- Precautionary catch limits not set, therefore considered as exploratory fisheries.

Note that the details provided here are for information only and do not preclude operation in areas or times which were not specified.

¹ Notifications to fish for krill under exploratory fisheries shall be notified under Conservation Measure 21-02. The deadline of 1 June for the submission of notifications applicable to this conservation measure shall, however, apply to exploratory fishery notifications for krill to allow for their consideration by the Working Group on Ecosystem Monitoring and Management (WG-EMM). WG-EMM will review the notifications and advise whether Conservation Measure 21-02 is appropriate. If WG-EMM advises that Conservation Measure 21-02 is appropriate, then it shall request the notifying Member to supply a Data Collection Plan for consideration by the Scientific Committee.

² Information to be provided to the extent possible.

**NET CONFIGURATION AND USE OF FISHING TECHNIQUES
AS LISTED IN ANNEX 21-03/A**

Net opening (mouth) circumference (m)	Vertical opening (m)	Horizontal opening (m)

Net Panel length and mesh size

Panel	Length (m)	Mesh size (mm)
1st panel		
2nd panel		
3rd panel		
.....		
.....		
Final panel (Codend)		

Provide diagram of each net configuration used

Use of multiple fishing techniques*: Yes No

*If yes, frequency of switch between fishing techniques: _____

	Fishing technique	Expected proportion of time to be used (%)
1		
2		
3		
4		
5		
...		
		Total 100%

Presence of marine mammal exclusion device*: Yes No

*If yes, provide design of the device:

Provide explanation of fishing techniques, gear configuration and characteristics and fishing patterns:

CONSERVATION MEASURE 22-01 (1986)

Regulation on mesh size measurement

(this conservation measure supplements
Conservation Measure 22-02)

Species	all
Area	all
Season	all
Gear	trawl

Regulations on Mesh Size Measurement

ARTICLE 1

Description of Gauges

1. Gauges to be used for determining mesh sizes shall be 2 mm thick, flat, of durable material and capable of retaining their shape. They shall have either a series of parallel-edged sides connected by intermediate tapering edges with a taper of one to eight on each side, or only tapering edges with the taper defined above. They shall have a hole at the narrowest extremity.
2. Each gauge shall be inscribed on its face with the width in millimetres both on the parallel-sided section, if any, and on the tapering section. In the case of the latter the width shall be inscribed every 1 mm interval and the indication of the width shall appear at regular intervals.

ARTICLE 2

Use of the Gauge

1. The net shall be stretched in the direction of the long diagonal of the meshes.
2. A gauge as described in Article 1 shall be inserted by its narrowest extremity into the mesh opening in a direction perpendicular to the plane of the net.
3. The gauge shall be inserted into the mesh opening either with a manual force or using a weight or dynamometer, until it is stopped at the tapering edges by the resistance of the mesh.

ARTICLE 3

Selection of Meshes to be Measured

1. Meshes to be measured shall form a series of 20 consecutive meshes chosen in the direction of the long axis of the net.
2. Meshes less than 50 cm from lacings, ropes or codline shall not be measured. This distance shall be measured perpendicular to the lacings, ropes or codline with the net stretched in the direction of that measurement. Nor shall any mesh be measured which has been mended or broken or has attachments to the net fixed at that mesh.
3. By way of derogation from paragraph 1, the meshes to be measured need not be consecutive if the application of paragraph 2 prevents it.
4. Nets shall be measured only when wet and unfrozen.

ARTICLE 4

Measurement of Each Mesh

The size of each mesh shall be the width of the gauge at the point where the gauge is stopped, when using this gauge in accordance with Article 2.

ARTICLE 5

Determination of the Mesh Size of the Net

1. The mesh size of the net shall be the arithmetical mean in millimetres of the measurements of the total number of meshes selected and measured as provided for in Articles 3 and 4, the arithmetical mean being rounded up to the next millimetre.
2. The total number of meshes to be measured is provided for in Article 6.

ARTICLE 6

Sequence of Inspection Procedure

1. The inspector shall measure one series of 20 meshes, selected in accordance with Article 3, inserting the gauge manually without using a weight or dynamometer.

The mesh size of the net shall then be determined in accordance with Article 5.

If the calculation of the mesh size shows that the mesh size does not appear to comply with the rules in force, then two additional series of 20 meshes selected in accordance with Article 3 shall be measured. The mesh size shall then be recalculated in accordance with Article 5, taking into account the 60 meshes already measured. Without prejudice to paragraph 2, this shall be the mesh size of the net.

2. If the captain of the vessel contests the mesh size determined in accordance with paragraph 1, such measurement will not be considered for the determination of the mesh size and the net shall be remeasured.

A weight or dynamometer attached to the gauge shall be used for remeasurement.

The choice of weight or dynamometer shall be at the discretion of the inspector.

The weight shall be fixed to the hole in the narrowest extremity of the gauge using a hook. The dynamometer may either be fixed to the hole in the narrowest extremity of the gauge or be applied at the largest extremity of the gauge.

The accuracy of the weight or dynamometer shall be certified by the appropriate national authority.

For nets of a mesh size of 35 mm or less as determined in accordance with paragraph 1, a force of 19.61 newtons (equivalent to a mass of 2 kilograms) shall be applied and for other nets, a force of 49.03 newtons (equivalent to a mass of 5 kilograms).

For the purposes of determining the mesh size in accordance with Article 5 when using a weight or dynamometer, one series of 20 meshes only shall be measured.

CONSERVATION MEASURE 22-02 (1984)

Mesh size

(as amended in accordance with Conservation Measure 22-03)

Species	toothfish, target demersal
Area	all
Season	all
Gear	trawl

1. The use of pelagic and bottom trawls having the mesh size in any part of a trawl less than indicated is prohibited for any directed fishery for:

Notothenia rossii, *Dissostichus eleginoides* 120 mm

Gobionotothen gibberifrons, *Notothenia kempi*,
Lepidonotothen squamifrons 80 mm

2. It is prohibited to use any means or device which would obstruct or diminish the size of the meshes.
3. This conservation measure does not apply to fishing conducted for scientific research purposes.
4. This measure will apply as of 1 September 1985.

CONSERVATION MEASURE 22-03 (1990)¹
Mesh size for *Champscephalus gunnari*

Species	icefish
Area	all
Season	all
Gear	trawl

1. The use of pelagic and bottom trawls having the mesh size in any part of a trawl less than 90 mm is prohibited for any directed fishery for *Champscephalus gunnari*.
2. The mesh size specified above is defined in accordance with the regulations on mesh size measurement, Conservation Measure 22-01 (1986).
3. It is prohibited to use any means or device which would obstruct or diminish the size of the meshes.
4. This conservation measure does not apply to fishing conducted for scientific research purposes.
5. This measure will apply as of 1 November 1991.
6. Conservation Measure 22-02 is amended accordingly.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

CONSERVATION MEASURE 22-04 (2006)
Interim prohibition of deep-sea gillnetting

Species	all
Area	all
Season	all
Gear	gillnet

The Commission,

Concerned that there have been sightings of illegal, unreported and unregulated (IUU) vessels fishing in the Convention Area using gillnetting,

Also concerned that deep-sea gillnetting in the Convention Area and the associated ghost-fishing by lost or discarded nets has serious detrimental effects on the marine environment and many species of marine living resources,

Aware of the large quantities of non-target species, especially sharks and rays, that are killed by deep-sea gillnetting, and greatly concerned by the impacts on their populations,

Desiring to clearly indicate to the international community that the Commission considers deep-sea gillnetting to be a potentially destructive fishing method, and a practice which may undermine the ability of the Commission to achieve its conservation objective,

Noting that any application in respect of scientific research is subject to the requirements of Conservation Measure 24-01,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. The use of gillnets¹ in the Convention Area, for purposes other than scientific research, is prohibited until such time as the Scientific Committee has investigated and reported on the potential impacts of this gear and the Commission has agreed on the basis of advice from the Scientific Committee that such a method may be used in the Convention Area.
2. The use of gillnets for scientific research in waters shallower than 100 metres shall be permitted subject to the requirements of Conservation Measure 24-01.
3. Proposals for the use of gillnets for scientific research in waters deeper than 100 metres shall be notified in advance to the Scientific Committee and be approved by the Commission before such research can commence.
4. Any vessel seeking to transit the Convention Area carrying gillnets must give advance notice of its intent, including the expected dates of its passage through the Convention Area, to the Secretariat. Any vessel in possession of gillnets within the Convention Area which has not given such advance notice shall be in breach of this conservation measure.

¹ Gillnets are strings of single, double or triple netting walls, vertical, near the surface, in midwater or on the bottom, in which fish will gill, entangle or enmesh. Gillnets have floats on the upper line (headrope) and, in general, weights on the ground-line (footrope). Gillnets consist of single or, less commonly, double or triple netting (known as 'trammel net') mounted together on the same frame ropes. Several types of nets may be combined in one gear (for example, trammel net combined with gillnet). These nets can be used either alone or, as is more usual, in large numbers placed in line ('fleets' of nets). The gear can be set, anchored to the bottom or left drifting, free or connected with the vessel.

CONSERVATION MEASURE 22-05 (2008)
Restrictions on the use of bottom trawling gear
in high-seas areas of the Convention Area

Species	all
Area	high seas
Season	all
Gear	bottom trawl

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. The use of bottom trawling gear in the high-seas areas of the Convention Area is restricted to areas for which the Commission has conservation measures in force for bottom trawling gear.

2. This conservation measure does not apply to the use of bottom trawling gear in conducting scientific research in the Convention Area.

CONSERVATION MEASURE 22-06 (2008)^{1,2}
Bottom fishing in the Convention Area

Species	all
Area	see paragraphs 1, 2
Season	all
Gear	bottom fishing

The Commission,

Recognising the commitment made by Members to implement the CCAMLR precautionary and ecosystem approaches to fisheries management by embracing principles of conservation as stated in Article II of the Convention,

Conscious of the urgent need to protect vulnerable marine ecosystems (VMEs) from bottom fishing activities that have significant adverse impacts on such ecosystems,

Noting that United Nations General Assembly Resolution 61/105, adopted on 8 December 2006, calls on regional fisheries management organisations or arrangements with the competence to regulate bottom fisheries to adopt and implement measures to prevent significant adverse impacts of bottom fisheries on VMEs and noting further that all CCAMLR Members joined in the consensus by which this resolution was adopted,

Noting also the importance of Article IX of the Convention, including the use of the best scientific evidence available,

Aware of the steps already taken by CCAMLR to address the impacts of deep-sea gillnetting and bottom trawling in the Convention Area, through the implementation of Conservation Measures 22-04 and 22-05 respectively,

Recognising that CCAMLR has responsibilities for the conservation of Antarctic marine living resources, part of which include the attributes of a regional fisheries management organisation,

Noting that all CCAMLR conservation measures are published on the CCAMLR website,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

Management of bottom fishing

1. This conservation measure applies to areas in the Convention Area south of 60°S, and to the rest of the Convention Area with the exception of subareas and divisions where an established fishery was in place in 2006/07 with a catch limit greater than zero.
2. This conservation measure also applies to the area of Division 58.4.1 north of 60°S.

3. For the purposes of this measure, the term ‘vulnerable marine ecosystems’ in the context of CCAMLR includes seamounts, hydrothermal vents, cold water corals and sponge fields.
4. For the purposes of this measure, the term ‘bottom fishing activities’ includes the use of any gear that interacts with the bottom.
5. Until 30 November 2008, bottom fishing activities shall be limited to those areas for which bottom fishing activities were approved by the Commission in the 2006/07 fishing season.
6. Contracting Parties whose vessels wish to engage in any bottom fishing activities, beginning 1 December 2008, shall follow the procedures described in paragraphs 8 to 12 below.
7. Contracting Parties shall authorise vessels flying their flag to participate in bottom fishing activities only in accordance with the provisions of this conservation measure and Conservation Measure 10-02.

Assessment of bottom fishing

8. All individual bottom fishing activities commencing 1 December 2008 and thereafter shall be subject to assessment by the Scientific Committee, based on the best available scientific information, to determine if such activities, taking account of the history of bottom fishing in the areas proposed, would contribute to having significant adverse impacts on VMEs, and to ensure that if it is determined that these activities would make such contributions, that they are managed to prevent such impacts or are not authorised to proceed. The assessments shall include the following procedures:
 - (i) Each Contracting Party proposing to participate in bottom fishing shall submit to the Scientific Committee and Commission information and a preliminary assessment based on the pro forma in Annex 22-06/A, with the best available data, of the known and anticipated impacts of its bottom fishing activities on VMEs, including benthos and benthic communities, no less than three months in advance of the next meeting of the Commission. These submissions shall also include the mitigation measures proposed by the Contracting Party to prevent such impacts.
 - (ii) The Scientific Committee shall undertake an assessment, according to procedures and standards it develops, and provide advice to the Commission as to whether the proposed bottom fishing activity would contribute to having significant adverse impacts on VMEs and, if so, whether the proposed or additional mitigation measures would prevent such impacts. The Scientific Committee may use in its assessment additional information available to it, including information from other fisheries in the region or similar fisheries elsewhere.
 - (iii) The Commission shall, taking account of advice and recommendations provided by the Scientific Committee concerning bottom fishing activities, including data and information arising from reports pursuant to paragraph 8, adopt conservation measures to prevent significant adverse impacts on VMEs, that as appropriate:

- (a) allow, prohibit or restrict bottom fishing activities within particular areas;
- (b) require specific mitigation measures for bottom fishing activities;
- (c) allow, prohibit or restrict bottom fishing with certain gear types; and/or
- (d) contain any other relevant requirements or restrictions to prevent significant adverse impacts to VMEs.

Encounters with VMEs

9. Annex 22-06/B provides a notification form for Contracting Parties to use to notify the Secretariat when evidence of VMEs has been encountered, and has not otherwise been reported under Conservation Measure 22-07.
10. Contracting Parties, in the absence of site-specific or other conservation measures to prevent significant adverse impact on VMEs, shall require vessels flying their flag to cease bottom fishing activities in any location where evidence of a VME is encountered in the course of fishing operations, and to report the encounter to the Secretariat in accordance with the schedule of the Catch and Effort Reporting System (Conservation Measures 23-01, 23-02 or 23-03, whichever is applicable), so that appropriate conservation measures can be adopted in respect of the relevant site.
11. The Scientific Committee shall provide advice to the Commission on the known and anticipated impacts of bottom fishing activities on VMEs, and recommend practices, including ceasing fishing operations if needed, when evidence of a VME is encountered in the course of bottom fishing operations. Taking account of this advice, the Commission shall adopt conservation measures to be applied when evidence of a VME is encountered in the course of fishing operations.

Monitoring and control of bottom fishing activities

12. Notwithstanding Members' obligations pursuant to Conservation Measure 21-02, all Contracting Parties whose vessels participate in bottom fisheries shall:
 - (i) ensure that their vessels are equipped and configured so that they can comply with all relevant conservation measures;
 - (ii) ensure that each vessel carries at least one CCAMLR-designated scientific observer to collect data in accordance with this and other conservation measures;
 - (iii) submit data pursuant to Data Collection Plans for bottom fisheries to be developed by the Scientific Committee and included in conservation measures;
 - (iv) be prohibited from continuing participation in the relevant bottom fishery if data arising from conservation measures relevant to that bottom fishery have not been submitted to CCAMLR pursuant to paragraph 12(iii) for the most recent season in which fishing occurred, until the relevant data have been submitted to CCAMLR and the Scientific Committee has been allowed an opportunity to review the data.
13. The Secretariat shall annually compile a list of vessels authorised to fish pursuant to this conservation measure and shall make this list publicly available on CCAMLR's website.

Data collection and sharing and scientific research

14. The Scientific Committee shall, based on the best available scientific information, advise the Commission on where VMEs are known to occur or are likely to occur, and advise on potential mitigation measures. Contracting Parties shall provide the Scientific Committee with all relevant information to assist in this work. The Secretariat shall maintain an inventory including digital maps of all known VMEs in the Convention Area for circulation to all Contracting Parties and other relevant bodies.
15. Scientific bottom fishing research activities notified under Conservation Measure 24-01, paragraph 2, shall proceed according to Conservation Measure 24-01 and shall be undertaken with due regard to potential impacts on VMEs. Scientific bottom fishing research activities notified under Conservation Measure 24-01, paragraph 3, shall be treated in accordance with all aspects of paragraph 9 of this conservation measure, notwithstanding the procedures in Conservation Measure 24-01. Consistent with existing reporting requirements in Conservation Measure 24-01, paragraph 4, information regarding the location and the type of any VME encountered, in the course of scientific bottom fishing research activities, shall be reported to the Secretariat.

Review

16. This conservation measure will be reviewed at the next regular meeting of the Commission, based on the findings of the Scientific Committee. In addition, beginning in 2009 and biennially thereafter, the Commission will examine the effectiveness of relevant conservation measures in protecting VMEs from significant adverse impacts, based on advice from the Scientific Committee.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

**PRO FORMA FOR SUBMITTING PRELIMINARY ASSESSMENTS OF
THE POTENTIAL FOR PROPOSED BOTTOM FISHING ACTIVITIES
TO HAVE SIGNIFICANT ADVERSE IMPACTS ON
VULNERABLE MARINE ECOSYSTEMS (VMEs)**

1. Preliminary assessment of bottom fishing activities – Required Information

1.1 Scope

- 1.1.1 Fishing method(s) to be used
Longline type (Spanish/auto/trotline/pots)
- 1.1.2 Subarea/division
e.g. 88.1 and 88.2
- 1.1.3 Period of application
Year
-

1.2 Proposed fishing activity

- 1.2.1 Detailed description of gear
Please provide a detailed diagram of the gear configuration to be used (see WG-FSA-08/60 for example or diagrams available in the CCAMLR observer logbook). Include details of line type; line length (length range if necessary); hook type(s); numbers per line and spacing of hooks within a line (per vertical line for trotlines); weight material and mass; spacing of weights; anchor type; floats and spacing etc. for each vessel included in this application/notification.
- 1.2.2 Scale of proposed activity
Please provide estimates of total numbers of hooks and/or lines to be deployed.
- 1.2.3 Spatial distribution of activity
Please provide details of SSRUs or geographical regions within the subarea/division in which activities will take place including the depth range of fishing activities.
-

1.3 Mitigation measures to be used

Please provide details of modifications to gear configuration or methods of deployment aimed at preventing or reducing adverse impacts to VMEs.

2. Preliminary assessment of bottom fishing activities – Supporting Information

2.1 Assessment of known/anticipated impacts on VMEs

Please provide data or information available on the current state of knowledge of impacts of proposed fishing activities on VMEs within the area of activity.

- 2.1.1 Estimated spatial effort footprint
Please provide details of % area covered by fishing effort.
- 2.1.2 Summary of potential VMEs present within areas of activity
e.g. biogenic/geological; habitat area coverage/distribution; fragility/vulnerability and resilience of habitats; species composition/endemism; life-history traits. Please provide details.
- 2.1.3 Probability of impacts
e.g. low/medium/high/unknown. Please provide details.
- 2.1.4 Magnitude/severity of the interaction of the proposed fishing gear with VMEs
e.g. associated mortality and spatial extent of impacts. Please provide details.
-

2.1.5 Physical and biological/ecological consequences of impact
e.g. loss of physical habitat structure or of keystone species or extinctions.

2.2 Estimated cumulative footprint

Please provide an estimated cumulative impact derived from information provided under 2.1.1 to 2.1.5 above and any additional information available from the Secretariat (e.g. historical fishing effort; habitat maps).

2.3 Research activities related to provision of new information on VMEs

2.3.1 Previous research

Please provide a summary of research previously carried out in the proposed area of activity by your Member State (including national/regional/international research programs). This should include data collected in the previous season under 2.3.2 and details of data submitted to the secretariat such as:

- *Indirect evidence (e.g. by-catch observation; species identification through sample collection and genetic and morphological analysis; acoustic or geomorphic data collection; other)*
- *Direct evidence (e.g. observations using camera gear or ROVS; other)*

2.3.2 In-season research

Please summarise details of the research planned during the proposed fishing activities by your Member State (including national/regional/international research programs). Please provide details of what data will be collected in order to document evidence of or further knowledge on VMEs within the areas of activities including:

- *Indirect evidence (see examples above)*
- *Direct evidence (see examples above)*

2.3.3 Follow-on research

Please provide details of potential future research resulting from previous/in-season research, including collaborative work with other Member States or as part of national/regional/international research programs including:

- *Indirect evidence (see examples above)*
 - *Direct evidence (see examples above)*
-

CONSERVATION MEASURE 22-07 (2008)^{1,2}
Interim measure for bottom fishing activities subject to
Conservation Measure 22-06 encountering potential
vulnerable marine ecosystems in the Convention Area

Species	all
Area	see CM 22-06
Season	all
Gear	bottom fishing

The Commission,

Noting the commitment made by Members to avoid significant adverse impacts on vulnerable marine ecosystems (VMEs) from bottom fishing activities,

Acknowledging the current prohibitions on bottom trawling in Conservation Measure 22-05 and on deep-sea gillnetting in Conservation Measure 22-04 in the high seas areas of the Convention Area,

Agreeing on the need to implement the precautionary approach for managing bottom fisheries with respect to VMEs due to the difficulty in acquiring data on their location, extent and risk of significant adverse impacts,

Further noting the need to acquire additional data during the 2008/09 season to contribute to assessments and advice on a long-term precautionary approach to avoiding significant adverse impacts on VMEs,

hereby adopts the following conservation measure in accordance with Article IX of the Convention and Conservation Measure 22-06:

Area

1. This conservation measure applies to the same area as Conservation Measure 22-06.

Definitions

2. The following definitions apply to this conservation measure:
 - (i) Those contained in paragraphs 3 and 4 in Conservation Measure 22-06 relating to ‘vulnerable marine ecosystems’ (VMEs) and ‘bottom fishing activities’.
 - (ii) VME indicator organism means any benthic organism listed in the Benthic Invertebrate Classification Guide³.
 - (iii) ‘VME indicator unit’ means either one litre of those VME indicator organisms that can be placed in a 10-litre container; or one kilogram of those VME indicator organisms that do not fit into a 10-litre container.
 - (iv) ‘Line segment’ means a 1 000-hook section of line or a 1 200 m section of line, whichever is the shorter, and for pot lines a 1 200 m section.
 - (v) ‘Risk Area’ means an area where 10 or more VME indicator units are recovered within a single line segment. A Risk Area has a radius of 1 n mile from the midpoint⁴ of the line segment from which the VME indicator units are recovered. However, Members may require their vessels to observe a larger Risk Area in accordance with their domestic laws.

Vessel requirements

3. Members shall require their vessels to clearly mark fishing lines into line segments and to monitor all line segments for the number of VME indicator units.
4. Members shall require their vessels, if 10 or more VME indicator units are recovered in one line segment, to complete hauling any lines intersecting with the Risk Area without delay and not to set any further lines intersecting with the Risk Area. The vessel shall immediately communicate to the Secretariat and to its Flag State the location of the midpoint of the line segment from which those VME indicator units were recovered along with the number of VME indicator units recovered.
5. Members shall require their vessels, if five or more VME indicator units are recovered within one line segment, to immediately communicate to the Secretariat⁵ and to their Flag State the location of the midpoint of the line segment from which those VME indicator units were recovered along with the number of VME indicator units recovered.

Management

6. On receipt of a notification under paragraph 4, the Secretariat shall:
 - (i) record the location of the Risk Area;
 - (ii) within one working day of receipt, notify all fishing vessels in the relevant fishery and their Flag States that the Risk Area is closed; and that, as in paragraph 4, all vessels shall immediately cease setting any further lines intersecting with the Risk Area.
7. On receipt of five notifications under paragraph 5 within a single fine-scale rectangle⁶, the Secretariat shall, within one working day of receiving the fifth notification, notify all fishing vessels in the relevant fishery and their Flag States of the coordinates of the fine-scale rectangle, indicating that VMEs may occur within that area. Vessels may continue to fish in the area consistent with paragraphs 4 and 5.

Data

8. Vessels shall report in accordance with Conservation Measure 23-01 total benthos recovered in a 5-day period. To the extent possible, VME indicator units for each line segment and the midpoint of each line segment on all lines should be reported in the fine-scale data.

Review

9. A Risk Area shall remain closed for any fishery until reviewed by the Scientific Committee and management actions are determined by the Commission. Scientific research as agreed by the Scientific Committee shall be allowed in Risk Areas.
10. The Commission will review this conservation measure in 2009, in light of observer, vessel and other data collected during the 2008/09 season, the results of the 2009 Expert Workshop on Vulnerable Marine Ecosystems, any other relevant information, the

deliberations of the Working Group on Ecosystem Monitoring and Management (WG-EMM) and the Working Group on Fish Stock Assessment (WG-FSA), and in accordance with the advice of the Scientific Committee.

- ¹ Except for waters adjacent to the Kerguelen and Crozet Islands
- ² Except for waters adjacent to the Prince Edward Islands
- ³ Available from the Secretariat.
- ⁴ In latitude and longitude.
- ⁵ This may be through the Flag State or directly to the Secretariat, whichever is the most practicable.
- ⁶ A fine-scale rectangle is defined as an area of 0.5° latitude by 1° longitude with respect to the northwest corner of the statistical subarea or division. The identification of each rectangle is by the latitude of its northernmost boundary and the longitude of the boundary closest to 0°.

CONSERVATION MEASURE 23-01 (2005)
Five-day Catch and Effort Reporting System

Species	all
Area	various
Season	all
Gear	various

This conservation measure is adopted in accordance with Conservation Measure 31-01 where appropriate:

1. For the purposes of this Catch and Effort Reporting System the calendar month shall be divided into six reporting periods, viz: day 1 to day 5, day 6 to day 10, day 11 to day 15, day 16 to day 20, day 21 to day 25 and day 26 to the last day of the month. These reporting periods are hereinafter referred to as periods A, B, C, D, E and F.
2. At the end of each reporting period, each Contracting Party shall obtain from each of its vessels its total catch of all species, including by-catch species, and total days and hours fished for that period and shall, by facsimile or email, transmit the aggregated catch and days and hours fished for its vessels. The catch and effort data shall reach the Executive Secretary not later than two (2) working days after the end of the reporting period. In the case of longline fisheries, the number of hooks shall also be reported. In the case of pot fisheries, the number of pots shall also be reported.
3. A report must be submitted by every Contracting Party taking part in the fishery for each reporting period for the duration of the fishery even if no catches are taken. A Contracting Party may authorise each of its vessels to report directly to the Secretariat.
4. Such reports shall specify the month and reporting period (A, B, C, D, E or F) to which each report refers.
5. Immediately after the deadline has passed for receipt of the reports for each period, the Executive Secretary shall notify all Contracting Parties engaged in fishing activities in the area, of the total catch taken during the reporting period, the total aggregate catch for the season to date together with an estimate of the date upon which the total allowable catch is likely to be reached for that season. In the case of exploratory fisheries, the Executive Secretary shall also notify the total aggregate catch for the season to date in each small-scale research unit (SSRU) together with an estimate of the date upon which the total allowable catch is likely to be reached in each SSRU for that

season. Estimates shall be based on a projection forward of the trend in daily catch rates, obtained using linear regression techniques from a number of the most recent catch reports.

6. At the end of every six reporting periods, the Executive Secretary shall inform all Contracting Parties of the total catch taken during the six most recent reporting periods, the total aggregate catch for the season to date together with an estimate of the date upon which the total allowable catch is likely to be reached for that season.
7. If the estimated date of completion of the total allowable catch is within five days of the date on which the Secretariat received the report of the catches, the Executive Secretary shall inform all Contracting Parties that the fishery will close on that estimated day or on the day on which the report was received, whichever is the later. In the case of exploratory fisheries, if the estimated date of completion of the catch in any SSRU is within five days of the day on which the Secretariat received the report of catches, the Executive Secretary shall additionally inform all Contracting Parties, and their relevant fishing vessels if so authorised, that fishing in that SSRU will be prohibited from that calculated day, or on the day on which the report was received, whichever is the later.
8. Should a Contracting Party, or where a vessel is authorised to report directly to the Secretariat, the vessel, fail to transmit a report to the Executive Secretary in the appropriate form by the deadline specified in paragraph 2, the Executive Secretary shall issue a reminder to the Contracting Party. If at the end of a further two five-day periods, or, in the case of exploratory fisheries, a further one five-day period, those data have still not been provided, the Executive Secretary shall notify all Contracting Parties of the closure of the fishery to the vessel which has failed to supply the data as required and the Contracting Party concerned shall require the vessel to cease fishing. If the Executive Secretary is notified by the Contracting Party that the failure of the vessel to report is due to technical difficulties, the vessel may resume fishing once the report or explanation concerning the failure has been submitted.

**CONSERVATION MEASURE 23-02 (1993)
Ten-day Catch and Effort Reporting System**

Species	all
Area	various
Season	all
Gear	various

This conservation measure is adopted in accordance with Conservation Measure 31-01 where appropriate:

1. For the purposes of this Catch and Effort Reporting System the calendar month shall be divided into three reporting periods, viz: day 1 to day 10, day 11 day 20, day 21 to the last day of the month. These reporting periods are hereinafter referred to as periods A, B and C.
2. At the end of each reporting period, each Contracting Party shall obtain from each of its vessels its total catch and total days and hours fished for that period and shall, by cable, telex or facsimile, transmit the aggregated catch and days and hours fished for its vessels so as to reach the Executive Secretary not later than the end of the next reporting period. In the case of longline fisheries, the number of hooks shall also be reported.

3. A report must be submitted by every Contracting Party taking part in the fishery for each reporting period for the duration of the fishery even if no catches are taken.
4. The retained catch of all species and by-catch species, must be reported.
5. Such reports shall specify the month and reporting period (A, B and C) to which each report refers.
6. Immediately after the deadline has passed for receipt of the reports for each period, the Executive Secretary shall notify all Contracting Parties engaged in fishing activities in the area, of the total catch taken during the reporting period, the total aggregate catch for the season to date together with an estimate of the date upon which the total allowable catch is likely to be reached for that season. The estimate shall be based on a projection forward of the trend in daily catch rates, obtained using linear regression techniques from a number of the most recent catch reports.
7. At the end of every three reporting periods, the Executive Secretary shall inform all Contracting Parties of the total catch taken during the three most recent reporting periods, the total aggregate catch for the season to date together with an estimate of the date upon which the total allowable catch is likely to be reached for that season.
8. If the estimated date of completion of the TAC is within ten days of the date on which the Secretariat received the report of the catches, the Executive Secretary shall inform all Contracting Parties that the fishery will close on that estimated day or on the day on which the report was received, whichever is the later.

CONSERVATION MEASURE 23-03 (1991)
Monthly Catch and Effort Reporting System

Species	all
Area	various
Season	all
Gear	various

This conservation measure is adopted in accordance with Conservation Measure 31-01 where appropriate:

1. For the purposes of this Catch and Effort Reporting System the reporting period shall be defined as one calendar month.
2. At the end of each reporting period, each Contracting Party shall obtain from each of its vessels its total catch and total days and hours fished for that period and shall, by cable or telex, transmit the aggregated catch and days and hours fished for its vessels so as to reach the Executive Secretary not later than the end of the next reporting period.
3. Such reports shall specify the month to which each report refers.
4. Immediately after the deadline has passed for receipt of the reports for each period, the Executive Secretary shall notify all Contracting Parties of the total catch taken during the reporting period, the total aggregate catch for the season to date together with an estimate of the date upon which the total allowable catch is likely to be reached for that

season. The estimate shall be based on a projection forward of the trend in daily catch rates, obtained using linear regression techniques from a number of the most recent catch reports.

5. In the case of finfish, if the estimated date of completion of the TAC is within one reporting period of the date on which the Secretariat received the report of the catches, the Executive Secretary shall inform all Contracting Parties that the fishery will close on that estimated day or on the day on which the report was received, whichever is the later.

CONSERVATION MEASURE 23-04 (2000)^{1,2}
Monthly Fine-Scale Catch and Effort Data Reporting System
for Trawl, Longline and Pot Fisheries

Species	all except krill
Area	all
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01, where appropriate.

This conservation measure is invoked by the conservation measures to which it is attached.

1. Specification of ‘target species’ and ‘by-catch species’ referred to in this conservation measure shall be made in the conservation measure to which it is attached.
2. At the end of each month each Contracting Party shall obtain from each of its vessels the data required to complete the CCAMLR fine-scale catch and effort data form (trawl fisheries Form C1, longline fisheries Form C2, or pot fisheries Form C5). It shall transmit those data in the specified format to the Executive Secretary not later than the end of the following month.
3. The catch of all target and by-catch species must be reported by species.
4. The numbers of seabirds and marine mammals of each species caught and released or killed must be reported.
5. Should a Contracting Party fail to transmit the fine-scale catch and effort data to the Executive Secretary in the appropriate form by the deadline specified in paragraph 2, the Executive Secretary shall issue a reminder to the Contracting Party. If at the end of a further two months those data have still not been provided, the Executive Secretary shall notify all Contracting Parties of the closure of the fishery to vessels of the Contracting Party which has failed to supply the data as required.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 23-05 (2000)^{1,2}
Monthly Fine-Scale Biological Data Reporting System
for Trawl, Longline and Pot Fisheries

Species	all except krill
Area	all
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01, where appropriate.

This conservation measure is invoked by the conservation measures to which it is attached.

1. Specification of ‘target species’ and ‘by-catch species’ referred to in this conservation measure shall be made in the conservation measure to which it is attached.
2. At the end of each month each Contracting Party shall obtain from each of its vessels representative samples of length composition measurements of the target species and by-catch species from the fishery (Form B2). It shall transmit those data in the specified form to the Executive Secretary not later than the end of the following month.
3. For the purpose of implementing this conservation measure:
 - (i) length measurements of fish should be of total length to the nearest centimetre below;
 - (ii) a representative sample of length composition should be taken from each single fine-scale grid rectangle (0.5° latitude by 1° longitude) in which fishing occurs. In the event that the vessel moves from one fine-scale grid rectangle to another during the course of a month, then a separate length composition should be submitted for each fine-scale grid rectangle.
4. Should a Contracting Party fail to transmit the fine-scale length composition data to the Executive Secretary in the appropriate form by the deadline specified in paragraph 2, the Executive Secretary shall issue a reminder to the Contracting Party. If at the end of a further two months those data have still not been provided, the Executive Secretary shall notify all Contracting Parties of the closure of the fishery to vessels of the Contracting Party which has failed to supply the data as required.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 23-06 (2007)
Data Reporting System for *Euphausia superba* Fisheries

Species	krill
Area	all
Season	all
Gear	all

1. This conservation measure is invoked by the conservation measures to which it is attached.
2. Catches shall be reported in accordance with the monthly Catch and Effort Reporting System set out in Conservation Measure 23-03 according to the statistical areas, subareas, divisions or any other area or unit specified with catch limits in Conservation Measure 51-02.

3. Provided that the total reported catch for the region for which a trigger level has been specified in Conservation Measures 51-01 and 51-03 in the fishing season is less than 80% of the applicable trigger level, catches shall be reported in accordance with the Monthly Catch and Effort Reporting System set out in Conservation Measure 23-03 according to the statistical areas, subareas, divisions or any other area or unit specified with catch limits in Conservation Measures 51-01 and 51-03.
4. When the total reported catch in any fishing season is greater than or equal to 80% of the trigger level set in Conservation Measures 51-01 and 51-03, catches shall be reported in accordance with the 10-day Catch and Effort Reporting System set out in Conservation Measure 23-02, according to the statistical areas, subareas, divisions or any other area or unit specified with catch limits in Conservation Measures 51-01 and 51-03.
5. In all seasons after the conditions of paragraph 4 have been met, paragraph 3 shall apply when the total catch is less than 50% of the trigger level and paragraph 4 shall apply when the total catch is greater than or equal to 50% of the trigger level.
6. At the end of each fishing season each Contracting Party shall obtain from each of its vessels the haul-by-haul data required to complete the CCAMLR fine-scale catch and effort data form (trawl fisheries Form C1). It shall transmit those data in the specified format to the Executive Secretary not later than 1 April of the following year.
7. This conservation measure shall be reviewed in 2010 or when catch limits for SSMUs are established in the relevant areas, whichever is sooner.

CONSERVATION MEASURE 24-01 (2008)^{1,2}

The application of conservation measures to scientific research

Species	all
Area	all
Season	all
Gear	all

This conservation measure governs the application of conservation measures to scientific research and is adopted in accordance with Article IX of the Convention.

1. General application:
 - (a) Catches taken by any vessel for research purposes will be considered as part of any catch limits in force for each species taken unless the catch limit in an area³ is set at zero.
 - (b) In the event of research being undertaken in an area³ with a zero catch limit, then the catches adopted under paragraphs 2 or 3 below shall be considered to be the catch limit for the season in that area. When such an area sits within a group of areas to which an overall catch limit applies, that overall catch limit shall not be exceeded including any catch taken for research purposes.
2. Application to Members taking less than 50 tonnes of finfish in a season including no more than the amounts specified for finfish taxa in Annex 24-01/B and less than 0.1% of a given catch limit for non-fish taxa indicated in Annex 24-01/B:

- (a) Any Member planning to use a vessel or vessels for research purposes when the estimated seasonal catch is as above shall notify the Secretariat of the Commission which in turn will notify all Members immediately, according to the format provided in Annex 24-01/A.
 - (b) Vessels to which the provisions of paragraph 2(a) above apply, shall be exempt from conservation measures relating to mesh size regulations, prohibition of types of gear, closed areas, fishing seasons and size limits, and reporting system requirements other than those specified in paragraph 4 below.
3. Application to Members taking more than 50 tonnes of finfish or more than the amounts specified for finfish taxa in Annex 24-01/B or more than 0.1% of a given catch limit for non-fish taxa indicated in Annex 24-01/B:
 - (a) Any Member planning to use any type of vessel or vessels to conduct fishing for research purposes when the estimated seasonal catch is as above, shall notify the Commission and provide the opportunity for other Members to review and comment on its Research Plan. The plan shall be provided to the Secretariat for distribution to Members at least six months in advance of the planned starting date for the research. In the event of any request for a review of such plan being lodged within two months of its circulation, the Executive Secretary shall notify all Members and submit the plan to the Scientific Committee for review. Based on the submitted Research Plan and any advice provided by the appropriate working group, the Scientific Committee will provide advice to the Commission where the review process will be concluded. Until the review process is complete, the planned fishing for research purposes shall not proceed.
 - (b) Research Plans shall be reported in accordance with the standardised guidelines and formats adopted by the Scientific Committee, given in Annex 24-01/A.
4. Reporting requirements for these research activities are:
 - (a) The CCAMLR within-season five-day reporting system shall apply.
 - (b) All research catches shall be reported to CCAMLR as part of the annual STATLANT returns.
 - (c) A summary of the results of any research subject to the above provisions shall be provided to the Secretariat within 180 days of the completion of the research fishing. Members shall provide a full report to the Scientific Committee within 12 months for review and comment.
 - (d) Catch, effort and biological data resulting from research fishing should be reported to the Secretariat according to the haul-by-haul reporting format for research vessels (C4).

5. Other requirements for these research activities are:
- (a) All vessels conducting research fishing under the research exemption, during a voyage that invokes any commercial fishing, shall be linked to an automated satellite-linked vessel monitoring system in accordance with Conservation Measure 10-04.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Any management area including subarea, division or SSRU, whichever is designated as a zero catch limit.

ANNEX 24-01/A

FORMATS FOR NOTIFICATION OF RESEARCH VESSEL ACTIVITY

Format 1

**NOTIFICATION OF RESEARCH VESSEL ACTIVITY IN ACCORDANCE
WITH PARAGRAPH 2 OF CONSERVATION MEASURE 24-01**

Name and registration number of vessel _____

Division and subarea in which research is to be carried out _____

Estimated dates of entering and leaving CCAMLR Convention Area _____

Purpose of research _____

Fishing equipment likely to be used:

Bottom trawl _____

Midwater trawl _____

Longline _____

Crab pots _____

Other fishing gear (specify) _____

Port of registration _____ Registration number _____

Radio call sign _____ Overall length _____ (m)

Tonnage _____

Equipment used for determining position _____

Fishing capacity (limited to scientific sampling activities only or commercial capacity) _____ (tonnes/day)

Fish processing capacity (if vessel type is commercial) _____ (tonnes/day)

Fish storage capacity (if vessel type is commercial) _____ (m³)

DESCRIPTION OF FISHING GEAR TO BE USED

Trawl type (i.e. bottom, midwater) _____

Mesh shape (i.e. diamond, square) and mesh size in codend (mm) _____

Longline _____

Other sampling gear as plankton nets, CTD probes, water samplers, etc. (specify) _____

DESCRIPTION OF ACOUSTIC GEAR TO BE USED

Type _____ Frequency _____

SURVEY DESIGN AND METHODS OF DATA ANALYSES

Survey design (random, semi-random) _____

Target species _____

Stratification (if any) according to:

Depth zones (list) _____

Fish density (list) _____

Other (specify) _____

Duration of standard sampling stations/hauls (preferably 30 min) _____ (min)

Proposed number of hauls _____

Proposed sample size (total): _____ (number) _____ (kg)

Proposed methods of survey data analyses
(i.e. swept area method, acoustic survey) _____

DATA TO BE COLLECTED

Haul-by-haul catch and effort data in accordance with CCAMLR Form C4
for reporting results of fishing for research purposes: _____

Fine-scale biological data in accordance with CCAMLR Forms B1, B2 and B3:

Other data (as applicable)

ANNEX 24-01/B

TAXA-SPECIFIC SCHEDULE FOR NOTIFICATION OF RESEARCH VESSEL ACTIVITY

Taxon	Gear type	Expected Catch
(a) Thresholds for finfish taxa		
<i>Dissostichus</i> spp.	Longline	5 tonnes
	Trawl	5 tonnes
	Pot	5 tonnes
	Other	0 tonnes
<i>Champscephalus gunnari</i>	All	10 tonnes
(b) Non-fish taxa for which a catch threshold of 0.1% of the catch limit for a given area would apply		
Krill		
Squid		
Crabs		

CONSERVATION MEASURE 24-02 (2008)
Longline weighting for seabird conservation

Species	seabirds
Area	selected
Season	all
Gear	longline

In respect of fisheries in Statistical Subareas 48.4, 48.6, 88.1 and 88.2 and Statistical Divisions 58.4.1, 58.4.2, 58.4.3a, 58.4.3b and 58.5.2, paragraph 5 of Conservation Measure 25-02 shall not apply only where a vessel can demonstrate its ability to fully comply with one of the following protocols.

Protocol A (for vessels monitoring longline sink rate with Time-Depth Recorders (TDRs) and using longlines to which weights are manually attached):

- A1. Prior to entry into force of the licence for this fishery and once per fishing season, either prior to entering the Convention Area or at the first opportunity after entering the Convention Area and before commencing fishing, the vessel shall, under observation by a scientific observer:
- (i) set a minimum of two longlines, unbaited if set in the Convention Area, with a minimum of four TDRs on the middle one-third of each longline, where:
 - (a) for vessels using the auto longline system, each longline shall be at least 6 000 m in length;
 - (b) for vessels using the Spanish longline system, each longline shall be at least 16 000 m in length;
 - (c) for vessels using the Spanish longline system, with longlines less than 16 000 m in length, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
 - (d) for vessels using a longline system other than an autoline or Spanish longline system, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
 - (ii) randomise TDR placement on the longline, noting that, except for trotlines, all tests should be applied midway between weights. In the case of trotlines TDRs should be placed on droppers less than 1 m from the attachment position of the uppermost cluster of hooks (i.e. hooks most distant from line weight);
 - (iii) calculate an individual sink rate for each TDR when returned to the vessel, where:
 - (a) the sink rate shall be measured as an average of the time taken for the longline to sink from the surface (0 m) to 15 m;
 - (b) this sink rate shall be at a minimum rate of 0.3 m/s;
 - (iv) if the minimum sink rate is not achieved at all eight sample points (four tests on two longlines), continue the testing until such time as a total of eight tests with a minimum sink rate of 0.3 m/s are recorded;

- (v) all equipment and fishing gear used in the tests is to be to the same specifications as that to be used in the Convention Area.
- A2. During fishing, for a vessel to be allowed to maintain the exemption to night-time setting requirements (paragraph 5 of Conservation Measure 25-02), regular longline sink monitoring shall be undertaken by the CCAMLR scientific observer. The vessel shall cooperate with the CCAMLR observer who shall:
- (i) attempt to conduct a TDR test on one longline set every twenty-four hour period;
 - (ii) every seven days place at least four TDRs on a single longline to determine any sink rate variation along the longline;
 - (iii) randomise TDR placement on the longline, noting that all tests should be applied halfway between weights;
 - (iv) calculate an individual longline sink rate for each TDR when returned to the vessel;
 - (v) measure the longline sink rate as an average of the time taken for the longline to sink from the surface (0 m) to 15 m.
- A3. The vessel shall:
- (i) ensure that all longlines are weighted to achieve a minimum longline sink rate of 0.3 m/s at all times whilst operating under this exemption;
 - (ii) report daily to its national agency on the achievement of this target whilst operating under this exemption;
 - (iii) ensure that data collected from longline sink rate tests and longline sink rate monitoring during fishing are recorded in the CCAMLR-approved format¹ and submitted to the relevant national agency and CCAMLR Data Manager within two months of the vessel departing a fishery to which this measure applies.

Protocol B (for vessels monitoring longline sink rate with bottle tests and using longlines to which weights are manually attached):

- B1. Prior to entry into force of the licence for this fishery and once per fishing season either prior to entering the Convention Area or at the first opportunity after entering the Convention Area and before commencing fishing, the vessel shall, under observation by a scientific observer:
- (i) set a minimum of two longlines, unbaited if set in the Convention Area, with a minimum of four bottle tests (see paragraphs B5 to B9) on the middle one-third of each longline, where:
 - (a) for vessels using the auto longline system, each longline shall be at least 6 000 m in length;

- (b) for vessels using the Spanish longline system, each longline shall be at least 16 000 m in length;
 - (c) for vessels using the Spanish longline system, with longlines less than 16 000 m in length, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
 - (d) for vessels using a longline system other than an autoline or Spanish longline system, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
- (ii) randomise bottle test placement on the longline, noting that, except for trotlines, all tests should be applied midway between weights. In the case of trotlines TDRs should be placed on droppers less than 1 m from the attachment position of the uppermost cluster of hooks (i.e. hooks most distant from line weight);
 - (iii) calculate an individual sink rate for each bottle test at the time of the test, where:
 - (a) the sink rate shall be measured as the time taken for the longline to sink from the surface (0 m) to 10 m;
 - (b) this sink rate shall be at a minimum rate of 0.3 m/s;
 - (iv) if the minimum sink rate is not achieved at all eight sample points (four tests on two longlines), continue the testing until such time as a total of eight tests with a minimum sink rate of 0.3 m/s are recorded;
 - (v) all equipment and fishing gear used in the tests is to be to the same specifications as that to be used in the Convention Area.
- B2. During fishing, for a vessel to be allowed to maintain the exemption to night-time setting requirements (paragraph 5 of Conservation Measure 25-02), regular longline sink rate monitoring shall be undertaken by the CCAMLR scientific observer. The vessel shall cooperate with the CCAMLR observer who shall:
- (i) attempt to conduct a bottle test on one longline set every twenty-four hour period;
 - (ii) every seven days conduct at least four bottle tests on a single longline to determine any sink rate variation along the longline;
 - (iii) randomise bottle test placement on the longline, noting that all tests should be applied halfway between weights;
 - (iv) calculate an individual longline sink rate for each bottle test at the time of the test;
 - (v) measure the longline sink rate as the time taken for the longline to sink from the surface (0 m) to 10 m.

B3. The vessel shall:

- (i) ensure that all longlines are weighted to achieve a minimum longline sink rate of 0.3 m/s at all times whilst operating under this exemption;
- (ii) report daily to its national agency on the achievement of this target whilst operating under this exemption;
- (iii) ensure that data collected from longline sink rate tests and longline sink rate monitoring during fishing are recorded in the CCAMLR-approved format¹ and submitted to the relevant national agency and CCAMLR Data Manager within two months of the vessel departing a fishery to which this measure applies.

B4. A bottle test is to be conducted as described below.

Bottle Set Up

- B5. 10 m of 2 mm multifilament nylon snood twine, or equivalent, is securely attached to the neck of a 500–1 000 ml plastic bottle² with a longline clip attached to the other end. The length measurement is taken from the attachment point (terminal end of the clip) to the neck of the bottle, and should be checked by the observer every few days.
- B6. Reflective tape should be wrapped around the bottle to allow it to be observed in low light conditions and at night.

Test

- B7. The bottle is emptied of water, the stopper is left open and the twine is wrapped around the body of the bottle for setting. The bottle with the encircled twine is attached to the longline³, midway between weights (the attachment point).
- B8. The observer records the time at which the attachment point enters the water as t_1 in seconds. The time at which the bottle is observed to be pulled completely under is recorded as t_2 in seconds⁴. The result of the test is calculated as follows:

$$\text{Longline sink rate} = 10 / (t_2 - t_1).$$

- B9. The result should be equal to or greater than 0.3 m/s. These data are to be recorded in the space provided in the electronic observer logbook.

Protocol C (for vessels monitoring longline sink rate with either (TDR) or bottle tests, and using internally weighted longlines with integrated weight of at least 50 g/m and designed to sink instantly with a linear profile at greater than 0.2 m/s with no external weights attached):

- C1. Prior to entry into force of the licence for this fishery and once per fishing season either prior to entering the Convention Area or at the first opportunity after entering the Convention Area and before commencing fishing, the vessel shall, under observation by a scientific observer:

- (i) set a minimum of two longlines, unbaited if set in the Convention Area, with either a minimum of four TDRs, or a minimum of four bottle tests (see paragraphs B5 to B9) on the middle one-third of each longline, where:
 - (a) for vessels using the auto longline system, each longline shall be at least 6 000 m in length;
 - (b) for vessels using the Spanish longline system, each longline shall be at least 16 000 m in length;
 - (c) for vessels using the Spanish longline system, with longlines less than 16 000 m in length, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
 - (d) for vessels using a longline system other than an autoline or Spanish longline system, each longline shall be of the maximum length to be used by the vessel in the Convention Area;
 - (ii) randomise TDR or bottle test placement on the longline;
 - (iii) calculate an individual sink rate for each TDR when returned to the vessel, or for each bottle test at the time of the test, where:
 - (a) the sink rate shall be measured as an average of the time taken for the longline to sink from the surface (0 m) to 15 m for TDRs and the time taken for the longline to sink from the surface (0 m) to 10 m for bottle tests;
 - (b) this sink rate shall be at a minimum rate of 0.2 m/s;
 - (iv) if the minimum sink rate is not achieved at all eight sample points (four tests on two longlines), continue the testing until such time as a total of eight tests with a minimum sink rate of 0.2 m/s are recorded;
 - (v) all equipment and fishing gear used in the tests is to be to the same specifications as that to be used in the Convention Area.
- C2. During fishing, for a vessel to be allowed to maintain the exemption to night-time setting requirements (paragraph 5 of Conservation Measure 25-02), regular longline sink rate monitoring shall be undertaken by the CCAMLR scientific observer. The vessel shall cooperate with the CCAMLR observer who shall:
- (i) attempt to conduct a TDR or bottle test on one longline set every twenty-four hour period;
 - (ii) every seven days conduct at least four TDR or bottle tests on a single longline to determine any sink rate variation along the longline;
 - (iii) randomise TDR or bottle test placement on the longline;

- (iv) calculate an individual longline sink rate for each TDR when returned to the vessel or each bottle test at the time of the test;
- (v) measure the longline sink rate for bottle tests as the time taken for the longline to sink from the surface (0 m) to 10 m, or for TDRs the average of the time taken for the longline to sink from the surface (0 m) to 15 m.

C3. The vessel shall:

- (i) ensure that all longlines are set so as to achieve a minimum longline sink rate of 0.2 m/s at all times whilst operating under this exemption;
- (ii) report daily to its national agency on the achievement of this target whilst operating under this exemption;
- (iii) ensure that data collected from longline sink rate tests and longline sink rate monitoring during fishing are recorded in the CCAMLR-approved format¹ and submitted to the relevant national agency and CCAMLR Data Manager within two months of the vessel departing a fishery to which this measure applies.

¹ Included in the scientific observer electronic logbook.

² A plastic water bottle that has a 'stopper' is needed. The stopper of the bottle is left open so that the bottle will fill with water after being pulled under water. This allows the plastic bottle to be re-used rather than being crushed by water pressure.

³ On autolines attach to the backbone; on the Spanish longline system attach to the hookline.

⁴ Binoculars will make this process easier to view, especially in foul weather.

CONSERVATION MEASURE 25-02 (2008)^{1,2}
Minimisation of the incidental mortality of seabirds
in the course of longline fishing or longline fishing
research in the Convention Area

Species	seabirds
Area	all
Season	all
Gear	longline

The Commission,

Noting the need to reduce the incidental mortality of seabirds during longline fishing by minimising their attraction to fishing vessels and by preventing them from attempting to seize baited hooks, particularly during the period when the lines are set,

Recognising that in certain subareas and divisions of the Convention Area there is also a high risk that seabirds will be caught during line hauling,

Adopts the following measures to reduce the possibility of incidental mortality of seabirds during longline fishing.

1. Fishing operations shall be conducted in such a way that hooklines³ sink beyond the reach of seabirds as soon as possible after they are put in the water.

2. Vessels using autoline systems should add weights to the hookline or use integrated weight (IW) hooklines while deploying longlines. IW longlines of a minimum of 50 g/m or attachment to non-IW longlines of 5 kg weights at 50 to 60 m intervals are recommended.
3. Vessels using the Spanish method of longline fishing should release weights before line tension occurs; traditional weights⁴ of at least 8.5 kg mass shall be used, spaced at intervals of no more than 40 m, or traditional weights⁴ of at least 6 kg mass shall be used, spaced at intervals of no more than 20 m, or solid steel weights⁵ of at least 5 kg mass shall be used, spaced at intervals of no more than 40 m.
4. Vessels using the trotline system exclusively (not a mix of trotlines and the Spanish system within the same longline) shall deploy weights only at the distal end of the droppers in the trotline. Weights shall be traditional weights of at least 6 kg or solid steel weights of at least 5 kg. Vessels alternating between the use of the Spanish system and trotline method shall use: (i) for the Spanish system: line weighting shall conform to the provisions in paragraph 3; (ii) for the trotline method: line weighting shall be either 8.5 kg traditional weights or 5 kg steel weights attached on the hook-end of all droppers in the trotline at no more than 80 m intervals⁶.
5. Longlines shall be set at night only (i.e. during the hours of darkness between the times of nautical twilight⁷)⁸. During longline fishing at night, only the minimum ship's lights necessary for safety shall be used.
6. The dumping of offal is prohibited while longlines are being set. The dumping of offal during the haul shall be avoided. Any such discharge shall take place only on the opposite side of the vessel to that where longlines are hauled. For vessels or fisheries where there is not a requirement to retain offal on board the vessel, a system shall be implemented to remove fish hooks from offal and fish heads prior to discharge.
7. Vessels which are so configured that they lack on-board processing facilities or adequate capacity to retain offal on board, or the ability to discharge offal on the opposite side of the vessel to that where longlines are hauled, shall not be authorised to fish in the Convention Area.
8. A streamer line shall be deployed during longline setting to deter birds from approaching the hookline. Specifications of the streamer line and its method of deployment are given in Annex 25-02/A.
9. A device designed to discourage birds from accessing baits during the haul of longlines shall be employed in those areas defined by CCAMLR as average-to-high or high (Level of Risk 4 or 5) in terms of risk of seabird by-catch. These areas are currently Statistical Subareas 48.3, 58.6 and 58.7 and Statistical Divisions 58.5.1 and 58.5.2.
10. Every effort should be made to ensure that birds captured alive during longlining are released alive and that wherever possible hooks are removed without jeopardising the life of the bird concerned.
11. Other variations in the design of mitigation measures may be tested on vessels carrying two observers, at least one appointed in accordance with the CCAMLR Scheme of

International Scientific Observation, providing that all other elements of this conservation measure are complied with⁹. Full proposals for any such testing must be notified to the Working Group on Fish Stock Assessment (WG-FSA) in advance of the fishing season in which the trials are proposed to be conducted.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Hookline is defined as the groundline or mainline to which the baited hooks are attached by snoods.

⁴ Traditional weights are those made from rocks or concrete.

⁵ Solid steel weights shall not be made from chain links. They should be made in a hydrodynamic shape designed to sink rapidly.

⁶ Recognising that Spanish system longlines with weights at 40 m intervals are typically configured with lines at 80 m intervals that connect hauling and hook lines (see diagram Annex 25-02/B). These connecting lines form the dropper lines of the trotline method.

⁷ The exact times of nautical twilight are set forth in the Nautical Almanac tables for the relevant latitude, local time and date. A copy of the algorithm for calculating these times is available from the CCAMLR Secretariat. All times, whether for ship operations or observer reporting, shall be referenced to GMT.

⁸ Wherever possible, setting of lines should be completed at least three hours before sunrise (to reduce loss of bait to/catches of white-chinned petrels).

⁹ The mitigation measures under test should be constructed and operated taking full account of the principles set out in WG-FSA-03/22 ([the published version](#) of which is available from the CCAMLR Secretariat and website); testing should be carried out independently of actual commercial fishing and in a manner consistent with the spirit of Conservation Measure 21-02.

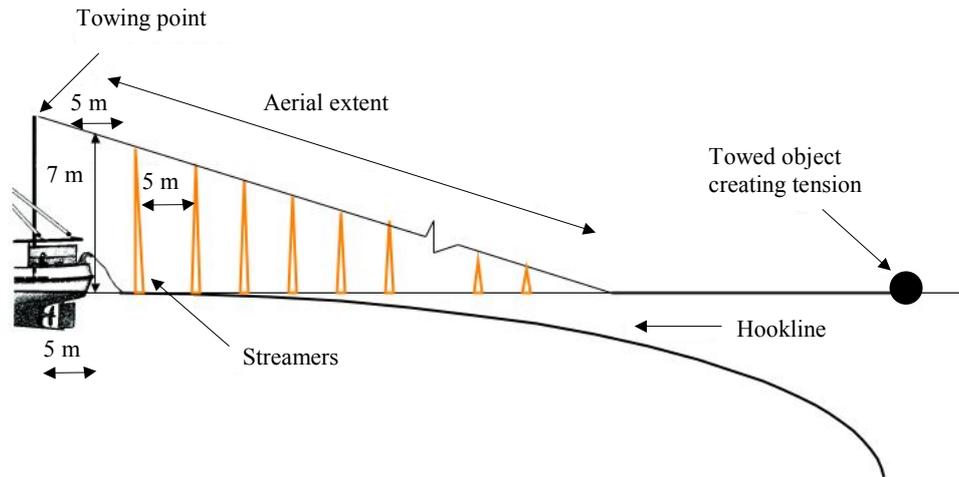

ANNEX 25-02/A

1. The aerial extent of the streamer line, which is the part of the line supporting the streamers, is the effective seabird deterrent component of a streamer line. Vessels are encouraged to optimise the aerial extent and ensure that it protects the hookline as far astern of the vessel as possible, even in crosswinds.
2. The streamer line shall be attached to the vessel such that it is suspended from a point a minimum of 7 m above the water at the stern on the windward side of the point where the hookline enters the water.
3. The streamer line shall be a minimum of 150 m in length and include an object towed at the seaward end to create tension to maximise aerial coverage. The object towed should be maintained directly behind the attachment point to the vessel such that in crosswinds the aerial extent of the streamer line is over the hookline.
4. Branched streamers, each comprising two strands of a minimum of 3 mm diameter brightly coloured plastic tubing¹ or cord, shall be attached no more than 5 m apart commencing 5 m from the point of attachment of the streamer line to the vessel and thereafter along the aerial extent of the line. Streamer length shall range between minimums of 6.5 m from the stern to 1 m for the seaward end. When a streamer line is fully deployed, the branched streamers should reach the sea surface in the absence of wind and swell. Swivels or a similar device should be placed in the streamer line in such a way as to prevent streamers being twisted around the streamer line. Each branched streamer may also have a swivel or other device at its attachment point to the streamer line to prevent fouling of individual streamers.

- Vessels are encouraged to deploy a second streamer line such that streamer lines are towed from the point of attachment each side of the hookline. The leeward streamer line should be of similar specifications (in order to avoid entanglement the leeward streamer line may need to be shorter) and deployed from the leeward side of the hookline.

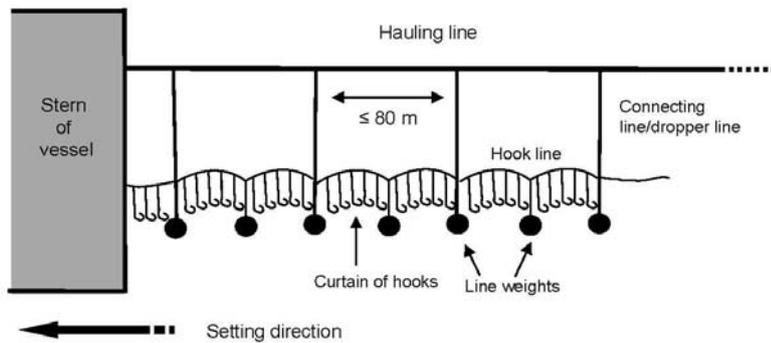

¹ Plastic tubing should be of a type that is manufactured to be protected from ultraviolet radiation.

Streamer Line

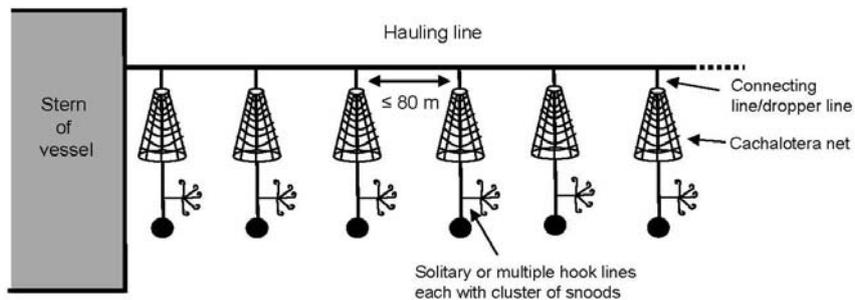

ANNEX 25-02/B

Typical configuration of Spanish system

Typical configuration of trotline method

CONSERVATION MEASURE 25-03 (2003)¹
Minimisation of the incidental mortality of seabirds and marine mammals in the course of trawl fishing in the Convention Area

Species	seabirds, marine mammals
Area	all
Season	all
Gear	trawl

The Commission,

Noting the need to reduce the incidental mortality of or injury to seabirds and marine mammals from fishing operations,

Adopts the following measures to reduce the incidental mortality of or injury to seabirds and marine mammals during trawl fishing.

1. The use of net monitor cables on vessels in the CCAMLR Convention Area is prohibited.
2. Vessels operating within the Convention Area should at all times arrange the location and level of lighting so as to minimise illumination directed out from the vessel, consistent with the safe operation of the vessel.
3. The discharge of offal shall be prohibited during the shooting and hauling of trawl gear.
4. Nets should be cleaned prior to shooting to remove items that might attract birds.
5. Vessels should adopt shooting and hauling procedures that minimise the time that the net is lying on the surface of the water with the meshes slack. Net maintenance should, to the extent possible, not be carried out with the net in the water.
6. Vessels should be encouraged to develop gear configurations that will minimise the chance of birds encountering the parts of the net to which they are most vulnerable. This could include increasing the weighting or decreasing the buoyancy of the net so that it sinks faster, or placing coloured streamers or other devices over particular areas of the net where the mesh sizes create a particular danger to birds.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

CONSERVATION MEASURE 26-01 (2008)^{1,2}
General environmental protection during fishing

Species	all
Area	all
Season	all
Gear	all

The Commission,

Concerned that certain activities associated with fishing may affect the Antarctic marine environment and that these activities have played a notable role in CCAMLR's efforts to minimise incidental mortality of non-target species such as seabirds and seals,

Noting that previous CCAMLR recommendations, and the provisions of the MARPOL 73/78 Convention and its Annexes, prohibit the disposal of all plastics at sea, in the CAMLR Convention Area,

Noting various provisions of the Protocol on Environmental Protection to the Antarctic Treaty in particular its Annexes as well as related Recommendations and Measures of the Antarctic Treaty Consultative Meetings,

Recollecting that for many years advice from the Scientific Committee has indicated that significant numbers of Antarctic fur seals have been entangled and killed in plastic packaging bands in the Convention Area,

Noting the recommendations of CCAMLR and the provisions of the MARPOL Convention and its Annexes which prohibit the jettisoning of all plastics at sea and that entanglement of fur seals is still continuing,

Recognising that the bait boxes used on fishing vessels in particular and other packages in general need not be secured by plastic packaging bands because suitable alternatives exist,

Adopts the following conservation measure to minimise possible effects on the marine environment arising from fishing-related activities in the context of mitigating incidental mortality of non-target species and protecting the marine environment in accordance with Article IX of the Convention.

Disposal of Plastic Packaging Bands

1. The use on fishing vessels of plastic packaging bands to secure bait boxes shall be prohibited.
2. The use of other plastic packaging bands for other purposes on fishing vessels which do not use on-board incinerators (closed systems) shall be prohibited.
3. Any packaging bands, once removed from packages, shall be cut into approximately 30 cm sections, so that they do not form a continuous loop and at the earliest opportunity burned in the on-board incinerator.
4. Any plastic residue shall be stored on board the vessel until reaching port and in no case discarded at sea.

Prohibition of Discharge in High-Latitude Fisheries

5. Vessels fishing south of 60°S shall be prohibited from dumping or discharging:
 - (i) oil or fuel products or oily residues into the sea, except as permitted under Annex I of MARPOL 73/78;
 - (ii) garbage;
 - (iii) food wastes not capable of passing through a screen with openings no greater than 25 mm;
 - (iv) poultry or parts (including egg shells);

- (v) sewage within 12 n miles of land or ice shelves, or sewage while the ship is travelling at a speed of less than 4 knots;
- (vi) offal; or
- (vii) incineration ash.

Translocation of Poultry

6. Live poultry or other living birds shall not be brought into areas south of 60°S, and any dressed poultry not consumed shall be removed from those areas.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 31-01 (1986) **Regulation of fishing around South Georgia** **(Statistical Subarea 48.3)**

Species	target
Area	48.3
Season	all
Gear	all

Without prejudice to other conservation measures adopted by the Commission, for species upon which fisheries are permitted around South Georgia (Statistical Subarea 48.3), the Commission shall, at its 1987 Meeting, adopt limitations on catch, or equivalent measures, binding for the 1987/88 season.

Such limitations of catch or equivalent measures shall be based upon the advice of the Scientific Committee, taking into account any data resulting from fishery surveys around South Georgia.

For each fishing season after 1987/88, the Commission shall establish such limitations or other measures, as necessary, around South Georgia on a similar basis at the meeting of the Commission immediately preceding that season.

CONSERVATION MEASURE 31-02 (2007)^{1,2} **General measure for the closure of all fisheries**

Species	all
Area	all
Season	all
Gear	all

This conservation measure governs the closure of all fisheries and is adopted in accordance with Article IX of the Convention.

- General application
1. Following notification by the Secretariat of the closure of a fishery (Conservation Measures 23-01, 23-02, 23-03 and 41-01 refer), all vessels in the area, management area, subarea, division, small-scale research unit or other management unit subject to the closure notice, shall remove all their fishing gear from the water by the notified closure date and time.

2. On receipt of such notification by the vessel, no further longlines may be set within 24 hours of the notified closure date and time. If such notification is received less than 24 hours before the closure date and time, no further longlines may be set following receipt of that notification.
3. All vessels should depart the closed fishery as soon as all fishing gear has been removed from the water.
4. Notwithstanding paragraph 1, should it appear likely that a vessel will be unable to remove all its fishing gear from the water by the notified closure date and time because of:
 - (i) consideration of the safety of the vessel and crew;
 - (ii) the limitations which may arise from adverse weather conditions;
 - (iii) sea-ice cover; or
 - (iv) the need to protect the Antarctic marine environment,

the vessel shall notify the Flag State concerned of the situation. The Flag State or vessel shall also notify the Secretariat. The vessel shall nonetheless make all reasonable efforts to remove all its fishing gear from the water as soon as possible.

Other
relevant
considerations

5. In the event the vessel is unable to remove all of its fishing gear from the water by the notified closure date and time, the Flag State shall promptly inform the Secretariat. On receipt of such information the Secretariat shall promptly inform Members.
6. If paragraph 5 applies, the Flag State shall carry out an investigation of the vessel's actions and, according to its domestic procedures, report on its findings, including all relevant matters, to the Commission no later than the next meeting of the Commission. The final report should assess whether the vessel made all reasonable efforts to remove all its fishing gear from the water:
 - (i) by the notified closure date and time; and
 - (ii) as soon as possible after the notification referred to in paragraph 4.
7. In the event that a vessel does not depart the closed fishery as soon as all fishing gear has been removed from the water, the Flag State or vessel should inform the Secretariat. On receipt of such information the Secretariat shall promptly inform Members.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 32-01 (2001)
Fishing seasons

Species	all
Area	all
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

The fishing season for all Convention Area species is 1 December to 30 November of the following year, unless otherwise set in specific conservation measures.

CONSERVATION MEASURE 32-02 (1998)
**Prohibition of directed fishing for finfish
 in Statistical Subarea 48.1**

Species	target finfish
Area	48.1
Season	all
Gear	all

Taking of finfish, other than for scientific research purposes, is prohibited in Statistical Subarea 48.1 from 7 November 1998 until at least such time that a survey of stock biomass is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-03 (1998)
**Prohibition of directed fishing for finfish
 in Statistical Subarea 48.2**

Species	target finfish
Area	48.2
Season	all
Gear	all

Taking of finfish, other than for scientific research purposes, is prohibited in Statistical Subarea 48.2 from 7 November 1998 until at least such time that a survey of stock biomass is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-04 (1986)¹
**Prohibition of directed fishery on *Notothenia rossii*
 in the Peninsula area (Statistical Subarea 48.1)**

Species	rockcod
Area	48.1
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

Directed fishing on *Notothenia rossii* in the Peninsula area (Statistical Area 48.1) is prohibited.

By-catches of *Notothenia rossii* in fisheries directed to other species shall be kept to the level allowing the optimum recruitment to the stock.

¹ This conservation measure remains in force, but is currently encompassed within the provisions in Conservation Measure 32-02.

CONSERVATION MEASURE 32-05 (1986)¹
Prohibition of directed fishery on *Notothenia rossii*
around South Orkneys (Statistical Subarea 48.2)

Species	rockcod
Area	48.2
Season	all
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

Directed fishing on *Notothenia rossii* around South Orkneys (Statistical Subarea 48.2) is prohibited.

By-catches of *Notothenia rossii* in fisheries directed to other species shall be kept to the level allowing the optimum recruitment to the stock.

¹ This conservation measure remains in force, but is currently encompassed within the provisions in Conservation Measure 32-03.

CONSERVATION MEASURE 32-06 (1985)
Prohibition of directed fishery on *Notothenia rossii*
around South Georgia (Statistical Subarea 48.3)

Species	rockcod
Area	48.3
Season	all
Gear	all

1. Directed fishing on *Notothenia rossii* around South Georgia (Statistical Subarea 48.3) is prohibited.
2. By-catches of *Notothenia rossii* in fisheries directed to other species shall be kept to the level allowing the optimum recruitment to the stock.

CONSERVATION MEASURE 32-07 (1999)
Prohibition of directed fishery on *Gobionotothen*
gibberifrons*, *Chaenocephalus aceratus*, *Pseudochaenichthys
***georgianus*, *Lepidonotothen squamifrons* and**
***Patagonotothen guntheri* in Statistical Subarea 48.3**

Species	target demersal
Area	48.3
Season	all
Gear	trawl

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01:

Directed fishing on *Gobionotothen gibberifrons*, *Chaenocephalus aceratus*, *Pseudochaenichthys georgianus*, *Lepidonotothen squamifrons* and *Patagonotothen guntheri* in Statistical Subarea 48.3 is prohibited until a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-08 (1997)
Prohibition of directed fishing for *Lepidonotothen squamifrons*
in Statistical Division 58.4.4 (Ob and Lena Banks)

Species	rockcod
Area	58.4.4
Season	all
Gear	all

Directed fishing for *Lepidonotothen squamifrons*, other than for scientific research purposes, is prohibited in Statistical Division 58.4.4 from 8 November 1997 until at least such time that a survey of stock biomass is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-09 (2008)
Prohibition of directed fishing for *Dissostichus* spp. except
in accordance with specific conservation measures
in the 2008/09 season

Species	toothfish
Area	48.5
Season	2008/09
Gear	all

The Commission hereby adopts the following conservation measure in accordance with Article IX of the Convention:

Directed fishing for *Dissostichus* spp. in Statistical Subarea 48.5 is prohibited from 1 December 2008 to 30 November 2009.

CONSERVATION MEASURE 32-10 (2002)
Prohibition of directed fishing for *Dissostichus* spp. in
Statistical Division 58.4.4 outside areas of national jurisdiction

Species	toothfish
Area	58.4.4
Season	all
Gear	all

Taking of *Dissostichus* spp., other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Division 58.4.4 from 1 December 2002. This prohibition shall apply until at least such time that a survey of the *Dissostichus* spp. stock in this division is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-11 (2002)^{1,2}
Prohibition of directed fishing for *Dissostichus eleginoides*
in Statistical Subarea 58.6

Species	toothfish
Area	58.6
Season	all
Gear	all

Taking of *Dissostichus eleginoides*, other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Subarea 58.6 from 1 December 2002. This prohibition shall apply until at least such time that a survey of the *Dissostichus*

eleginoides stock in this subarea is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

¹ Except for waters adjacent to the Prince Edward Islands

² Except for waters adjacent to the Crozet Islands

CONSERVATION MEASURE 32-12 (1998)¹
Prohibition of directed fishing for *Dissostichus eleginoides*
in Statistical Subarea 58.7

Species	toothfish
Area	58.7
Season	all
Gear	all

Taking of *Dissostichus eleginoides*, other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Subarea 58.7 from 7 November 1998. This prohibition shall apply until at least such time that a survey of the *Dissostichus eleginoides* stock in this subarea is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

¹ Except for waters adjacent to the Prince Edward Islands

CONSERVATION MEASURE 32-13 (2003)
Prohibition of directed fishing for *Dissostichus eleginoides*
in Statistical Division 58.5.1 outside areas
of national jurisdiction

Species	toothfish
Area	58.5.1
Season	all
Gear	all

Taking of *Dissostichus eleginoides*, other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Division 58.5.1 outside areas of national jurisdiction from 1 December 2003. This prohibition shall apply until at least such time that a survey of the *Dissostichus eleginoides* stock in this division is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment (WG-FSA) and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-14 (2003)
Prohibition of directed fishing for *Dissostichus eleginoides*
in Statistical Division 58.5.2 east of 79°20'E and outside the EEZ
to the west of 79°20'E

Species	toothfish
Area	58.5.2
Season	all
Gear	all

Taking of *Dissostichus eleginoides*, other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Division 58.5.2 east of 79°20'E and outside the EEZ to the west of 79°20'E from 1 December 2003. This prohibition shall apply until at least such time that a survey of the *Dissostichus eleginoides* stock in this division is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment (WG-FSA) and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-15 (2003)
Prohibition of directed fishing for *Dissostichus* spp.
in Statistical Subarea 88.2 north of 65°S

Species	toothfish
Area	88.2
Season	all
Gear	all

Taking of *Dissostichus* spp., other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Subarea 88.2 north of 65°S from 1 December 2003. This prohibition shall apply until at least such time that a survey of the *Dissostichus* spp. stock in this subarea is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment (WG-FSA) and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-16 (2003)
Prohibition of directed fishing for *Dissostichus* spp.
in Statistical Subarea 88.3

Species	toothfish
Area	88.3
Season	all
Gear	all

Taking of *Dissostichus* spp., other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Subarea 88.3 from 1 December 2003. This prohibition shall apply until at least such time that a survey of the *Dissostichus* spp. stock in this subarea is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment (WG-FSA) and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.

CONSERVATION MEASURE 32-17 (2003)
Prohibition of directed fishing for *Electrona carlsbergi*
in Statistical Subarea 48.3

Species	lanternfish
Area	48.3
Season	all
Gear	all

Taking of *Electrona carlsbergi*, other than for scientific research purposes in accordance with Conservation Measure 24-01, is prohibited in Statistical Subarea 48.3 from 1 December 2003. This prohibition shall apply until at least such time that a survey of the *Electrona carlsbergi* stock in this subarea is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment (WG-FSA) and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee; or a research plan for an exploratory fishery is submitted and approved by the Scientific Committee consistent with Conservation Measure 24-01.

CONSERVATION MEASURE 32-18 (2006)
Conservation of sharks

Species	sharks
Area	all
Season	all
Gear	all

The Commission,

Recalling the aims of the Convention, and particularly its Article IX,

Recognising that the Food and Agriculture Organization of the United Nations (FAO), in its International Plan of Action for the Conservation and Management of Sharks, requests that States, within the framework of their respective competencies and consistent with international law, should strive to cooperate through regional fisheries management organisations with a view to ensuring the sustainability of shark stocks,

Mindful of the fact that a large number of sharks are caught in fisheries operating within the Convention Area and that such catch may be unsustainable,

Bearing in mind, furthermore, that, pending the collection of information on the status of shark stocks, it would be appropriate to restrict and, if possible, to reduce removals from these stocks,

Recognising the need to collect data on catches, discards and trade in order to manage and conserve sharks,

hereby adopts the following conservation measure, in accordance with Article IX of the Convention:

1. Directed fishing on shark species in the Convention Area, for purposes other than scientific research, is prohibited. This prohibition shall apply until such time as the Scientific Committee has investigated and reported on the potential impacts of this fishing activity and the Commission has agreed on the basis of advice from the Scientific Committee that such fishing may occur in the Convention Area.
2. Any by-catch of shark, especially juveniles and gravid females, taken accidentally in other fisheries, shall, as far as possible, be released alive.

CONSERVATION MEASURE 33-01 (1995)
**Limitation of the by-catch of *Gobionotothen gibberifrons*,
Chaenocephalus aceratus, *Pseudochaenichthys georgianus*,
Notothenia rossii and *Lepidonotothen squamifrons*
in Statistical Subarea 48.3**

Species	by-catch
Area	48.3
Season	all
Gear	all

This conservation measure is adopted in accordance with Conservation Measure 31-01:

In any directed fishery in Statistical Subarea 48.3 in any fishing season, the by-catch of *Gobionotothen gibberifrons* shall not exceed 1 470 tonnes; the by-catch of *Chaenocephalus aceratus* shall not exceed 2 200 tonnes; and the by-catch of *Pseudochaenichthys georgianus*, *Notothenia rossii* and *Lepidonotothen squamifrons* shall not exceed 300 tonnes each.

These limits shall be kept under review by the Commission taking into account the advice of the Scientific Committee.

CONSERVATION MEASURE 33-02 (2008)
Limitation of by-catch in Statistical Division 58.5.2
in the 2008/09 season

Species	by-catch
Area	58.5.2
Season	2008/09
Gear	all

1. There shall be no directed fishing for any species other than *Dissostichus eleginoides* and *Champscephalus gunnari* in Statistical Division 58.5.2 in the 2008/09 fishing season.
2. In directed fisheries in Statistical Division 58.5.2 in the 2008/09 season, the by-catch of *Channichthys rhinoceratus* shall not exceed 150 tonnes, the by-catch of *Lepidonotothen squamifrons* shall not exceed 80 tonnes, the by-catch of *Macrourus* spp. shall not exceed 360 tonnes and the by-catch of skates and rays shall not exceed 120 tonnes. For the purposes of this measure, 'Macrourus spp.' and 'skates and rays' should each be counted as a single species.
3. The by-catch of any fish species not mentioned in paragraph 2, and for which there is no other catch limit in force, shall not exceed 50 tonnes in Statistical Division 58.5.2.
4. If, in the course of a directed fishery, the by-catch in any one haul of *Channichthys rhinoceratus*, *Lepidonotothen squamifrons*, *Macrourus* spp., *Somniosus* spp. or skates and rays is equal to, or greater than 2 tonnes, then the fishing vessel shall not fish using that method of fishing at any point within 5 n miles¹ of the location where the by-catch exceeded 2 tonnes for a period of at least five days². The location where the by-catch exceeded 2 tonnes is defined as the path³ followed by the fishing vessel.
5. If, in the course of a directed fishery, the by-catch in any one haul of any other by-catch species for which by-catch limitations apply under this conservation measure is equal to, or greater than 1 tonne, then the fishing vessel shall not fish using that method of fishing at any point within 5 n miles¹ of the location where the by-catch exceeded 1 tonne for a period of at least five days². The location where the by-catch exceeded 1 tonne is defined as the path³ followed by the fishing vessel.

¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.

² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.

³ For a trawl the path is defined from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel. For a longline or a pot, the path is defined from the point at which the first anchor of a set was deployed to the point at which the last anchor of that set was deployed.

CONSERVATION MEASURE 33-03 (2008)^{1,2}
Limitation of by-catch in new and exploratory fisheries
in the 2008/09 season

Species	by-catch
Area	various
Season	2008/09
Gear	all

1. This conservation measure applies to new and exploratory fisheries in all areas containing small-scale research units (SSRUs) in the 2008/09 season, except where specific by-catch limits apply.
2. The catch limits for all by-catch species are set out in Annex 33-03/A. Within these catch limits, the total catch³ of by-catch species in any SSRU or combination of SSRUs as defined in relevant conservation measures shall not exceed the following limits:
 - skates and rays 5% of the catch limit of *Dissostichus* spp. or 50 tonnes whichever is greater;
 - *Macrourus* spp. 16% of the catch limit for *Dissostichus* spp. or 20 tonnes, whichever is greater;
 - all other species combined 20 tonnes.
3. For the purposes of this measure ‘*Macrourus* spp.’ and ‘skates and rays’ should each be counted as a single species.
4. Unless otherwise requested by scientific observers, vessels, where possible, should release skates and rays alive from the line by cutting snoods, and when practical, removing the hooks.
5. If the by-catch of any one species is equal to or greater than 1 tonne in any one haul or set, then the fishing vessel shall move to another location at least 5 n miles⁴ distant. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch exceeded 1 tonne for a period of at least five days⁵. The location where the by-catch exceeded 1 tonne is defined as the path⁶ followed by the fishing vessel.
6. If the catch of *Macrourus* spp. taken by a single vessel in any two 10-day periods⁷ in a single SSRU exceeds 1 500 kg in each 10-day period and exceeds 16% of the catch of *Dissostichus* spp. by that vessel in that SSRU in those periods, the vessel shall cease fishing in that SSRU for the remainder of the season.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Total green weight caught, excluding individuals released alive

⁴ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.

⁵ The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.

⁶ For a trawl the path is defined from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel. For a longline the path is defined from the point at which the first anchor of a set was deployed to the point at which the last anchor of that set was deployed.

⁷ A 10-day period is defined as day 1 to day 10, day 11 to day 20, or day 21 to the last day of the month.

ANNEX 33-03/A

Table 1: By-catch catch limits for new and exploratory fisheries in 2008/09.

Subarea/ division	Region	<i>Dissostichus</i> spp. catch limit (tonnes per region)	By-catch catch limit		
			Skates and rays (tonnes per region)	<i>Macrourus</i> spp. (tonnes per region)	Other species (tonnes per SSRU)
48.6	North of 60°S	200	50	32	20
	South of 60°S	200	50	32	20
58.4.1	Whole division	210	50	33	20
58.4.2	Whole division	70	50	20	20
58.4.3a	Whole division	86	50	26	20
58.4.3b	North of 60°S	120	50	80	20
88.1	Whole subarea	2700	135	430	20
88.2	South of 65°S	567	50	90	20

Region: As defined in column 2 of this table.

Rules for catch limits for by-catch species:

Skates and rays: 5% of the catch limit for *Dissostichus* spp. or 50 tonnes, whichever is greatest (SC-CAMLR-XXI, paragraph 5.76).

Macrourus spp.: 16% of the catch limit for *Dissostichus* spp. or 20 tonnes whichever is greatest, except in Statistical Divisions 58.4.3a and 58.4.3b (SC-CAMLR-XXII, paragraph 4.207), and Statistical Subarea 88.1 (SC-CAMLR-XXVII, paragraph 4.162).

Other species: 20 tonnes per SSRU.

CONSERVATION MEASURE 41-01 (2008)^{1,2}
General measures for exploratory fisheries for
***Dissostichus* spp. in the Convention Area in the**
2008/09 season

Species	toothfish
Area	various
Season	2008/09
Gear	longline, trawl

The Commission hereby adopts the following conservation measure:

1. This conservation measure applies to exploratory fisheries using the trawl or longline methods except for such fisheries where the Commission has given specific exemptions to the extent of those exemptions. In trawl fisheries, a haul comprises a single deployment of the trawl net. In longline fisheries, a haul comprises the setting of one or more lines in a single location.
2. Fishing should take place over as large a geographical and bathymetric range as possible to obtain the information necessary to determine fishery potential and to avoid over-concentration of catch and effort. To this end, fishing in any small-scale research unit (SSRU) shall cease when the reported catch reaches the specified catch limit³ and that SSRU shall be closed to fishing for the remainder of the season.
3. In order to give effect to paragraph 2 above:
 - (i) the precise geographic position of a haul in trawl fisheries will be determined by the midpoint of the path between the start point and end point of the haul for the purposes of catch and effort reporting;

- (ii) the precise geographic position of a haul/set in longline fisheries will be determined by the centre point of the line or lines deployed for the purposes of catch and effort reporting;
 - (iii) the vessel will be deemed to be fishing in any SSRU from the beginning of the setting process until the completion of the hauling of all lines;
 - (iv) catch and effort information for each species by SSRU shall be reported to the Executive Secretary every five days using the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
 - (v) the Secretariat shall notify Contracting Parties participating in these fisheries when the total catch for *Dissostichus eleginoides* and *Dissostichus mawsoni* combined in any SSRU is likely to reach the specified catch limit, and of the closure of that SSRU when that limit is reached⁴. No part of a trawl path may lie within a closed SSRU and no part of a longline may be set within a closed SSRU.
4. The by-catch in each exploratory fishery shall be regulated as in Conservation Measure 33-03.
 5. The total number and weight of *Dissostichus eleginoides* and *Dissostichus mawsoni* discarded, including those with the 'jellymeat' condition, shall be reported.
 6. Each vessel participating in the exploratory fisheries for *Dissostichus* spp. during the 2008/09 season shall have one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing season.
 7. The Data Collection Plan (Annex 41-01/A), Research Plan (Annex 41-01/B) and Tagging Program (Annex 41-01/C) shall be implemented. Data collected pursuant to the Data Collection and Research Plans for the period up to 31 August 2009 shall be reported to CCAMLR by 30 September 2009 so that the data will be available to the meeting of the Working Group on Fish Stock Assessment (WG-FSA) in 2009. Such data taken after 31 August 2009 shall be reported to CCAMLR not later than three months after the closure of the fishery, but, where possible, submitted in time for the consideration of WG-FSA.
 8. Members who choose not to participate in the fishery prior to the commencement of the fishery shall inform the Secretariat of changes in their plans no later than one month before the start of the fishery. If, for whatever reason, Members are unable to participate in the fishery, they shall inform the Secretariat no later than one week after finding that they cannot participate. The Secretariat will inform all Contracting Parties immediately after such notification is received.

¹ Except for waters adjacent to the Kerguelen and Crozet Islands

² Except for waters adjacent to the Prince Edward Islands

³ Unless otherwise specified, the catch limit for *Dissostichus* spp. shall be 100 tonnes in any SSRU except in respect of Statistical Subarea 88.2.

⁴ The closure of fisheries is governed by Conservation Measure 31-02.

ANNEX 41-01/A

DATA COLLECTION PLAN FOR EXPLORATORY FISHERIES

1. All vessels will comply with the Five-day Catch and Effort Reporting System (Conservation Measure 23-01) and Monthly Fine-scale Catch, Effort and Biological Data Reporting Systems (Conservation Measures 23-04 and 23-05).
2. All data required by the CCAMLR *Scientific Observers Manual* for finfish fisheries will be collected. These include:
 - (i) position, date and depth at the start and end of every haul;
 - (ii) haul-by-haul catch and catch per effort by species;
 - (iii) haul-by-haul length frequency of common species;
 - (iv) sex and gonad state of common species;
 - (v) diet and stomach fullness;
 - (vi) scales and/or otoliths for age determination;
 - (vii) number and mass by species of by-catch of fish and other organisms;
 - (viii) observation on occurrence and incidental mortality of seabirds and mammals in relation to fishing operations.
3. Data specific to longline fisheries will be collected. These include:
 - (i) position and sea depth at each end of every line in a haul;
 - (ii) setting, soak and hauling times;
 - (iii) number and species of fish lost at surface;
 - (iv) number of hooks set;
 - (v) bait type;
 - (vi) baiting success (%);
 - (vii) hook type.

ANNEX 41-01/B

RESEARCH PLAN FOR EXPLORATORY FISHERIES

1. Activities under this Research Plan shall not be exempted from any conservation measure in force.
2. This plan applies to all small-scale research units (SSRUs) as defined in Table 1 and Figure 1.
3. Except when fishing in Statistical Subareas 88.1 and 88.2 (see paragraph 5), any vessel undertaking prospecting or commercial fishing in any SSRU must undertake the following research activities:
 - (i) On first entry into an SSRU, the first 10 hauls, whether by trawl or longline, shall be designated 'research hauls' and must satisfy the criteria set out in paragraph 4.

Research hauls shall be carried out on, or close to, positions provided by the CCAMLR Secretariat¹, based on a stratified random design in prescribed areas within that SSRU.

- (ii) On completion of 10 research hauls the vessel may continue to fish within the SSRU.
4. To be designated as a research haul:
- (i) each research haul must be separated by not less than 5 n miles from any other research haul, distance to be measured from the geographical midpoint of each research haul;
 - (ii) each haul shall comprise: for longlines, at least 3 500 hooks and no more than 5 000 hooks; this may comprise a number of separate lines set in the same location; for trawls, at least 30 minutes effective fishing time as defined in the *Draft Manual for Bottom Trawl Surveys in the Convention Area* (SC-CAMLR-XI, Annex 5, Appendix H, Attachment E, paragraph 4);
 - (iii) each haul of a longline shall have a soak time of not less than six hours, measured from the time of completion of the setting process to the beginning of the hauling process.
5. In the exploratory fisheries in Statistical Subareas 88.1 and 88.2, all data specified in the Data Collection Plan (Annex 41-01/A) of this conservation measure shall be collected for every haul; all fish of each *Dissostichus* species in a haul (up to a maximum of 35 fish) are to be measured and randomly sampled for biological studies (paragraphs 2(iv) to (vi) of Annex 41-01/A).
6. In all other exploratory fisheries, all data specified in the Data Collection Plan (Annex 41-01/A) of this conservation measure shall be collected for every research haul; in particular, all fish in a research haul up to 100 fish are to be measured and at least 30 fish sampled for biological studies (paragraphs 2(iv) to (vi) of Annex 41-01/A). Where more than 100 fish are caught, a method for randomly subsampling the fish should be applied.

¹ The Secretariat will generate a list of random stations for each vessel participating in exploratory fisheries. These lists will be provided to notifying Members prior to the start of the fishing season (SC-CAMLR-XXVII, paragraphs 4.113 and 4.114).

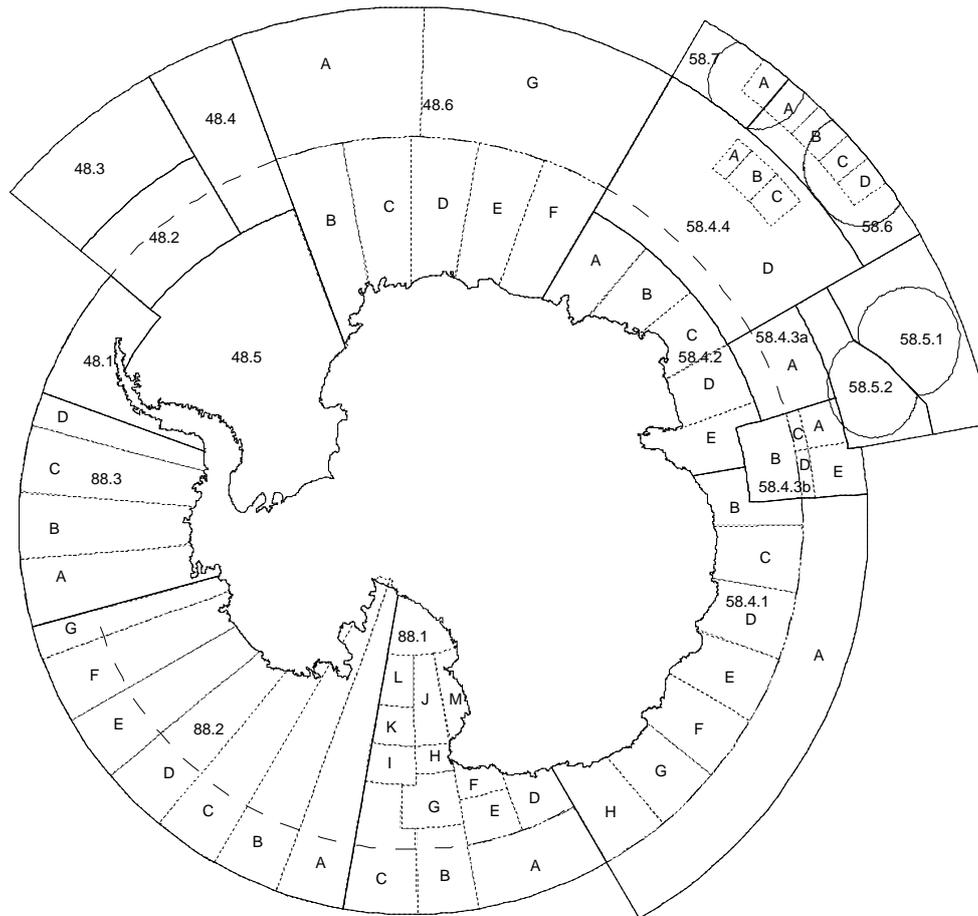

Figure 1: Small-scale research units for new and exploratory fisheries. The boundaries of these units are listed in Table 1. EEZ boundaries for Australia, France and South Africa are marked in order to address notifications for new and exploratory fisheries in waters adjacent to these zones. Dashed line – approximate delineation between *Dissostichus eginoides* and *Dissostichus mawsoni*.

ANNEX 41-01/C

TAGGING PROGRAM FOR *DISSOSTICHUS* SPP. AND SKATES IN EXPLORATORY FISHERIES

1. The responsibility for ensuring tagging, tag recovery and correct reporting shall lie with the Flag State of the fishing vessel. The fishing vessel shall cooperate with the CCAMLR scientific observer in undertaking the tagging program.
2. This program shall apply in each exploratory longline fishery, and any vessel that participates in more than one exploratory fishery shall apply the following in each exploratory fishery in which that vessel fishes:
 - (i) Each longline vessel shall tag and release *Dissostichus* spp., continuously while fishing, at a rate specified in the conservation measure for that fishery according to the CCAMLR Tagging Protocol¹.

- (ii) The program shall target toothfish of all sizes in order to meet the tagging requirement, only toothfish that are in good condition shall be tagged and the availability of these fish shall be reported by the observer. All released toothfish must be double-tagged and releases should cover as broad a geographical area as possible. In regions where both species occur, the tagging rate shall to the extent practicable be in proportion to the species and sizes of *Dissostichus* spp. present in the catches.
 - (iii) During the 2008/09 season (Year-of-the-Skate), each longline vessel shall tag and release skates, continuously while fishing, at a rate specified in the conservation measure for that fishery according to the CCAMLR Tagging Protocol. All tagged skates must be double-tagged and released alive.
 - (iv) All toothfish and skate tags for use in exploratory fisheries shall be sourced from the Secretariat.
 - (v) Recaptured tagged fish (i.e. fish caught that have a previously inserted tag) shall not be re-released, even if at liberty for only a short period.
 - (vi) All recaptured tagged fish should be biologically sampled (length, weight, sex, gonad stage), an electronic time-stamped photograph taken of the fish and tag, the otoliths recovered and the tag removed.
3. Toothfish that are tagged and released shall not be counted against the catch limits.
 4. All relevant tag data and any data recording tag recaptures shall be reported electronically in the CCAMLR format¹ to the Executive Secretary (i) by the vessel every month along with its monthly fine-scale catch and effort (C2) data, and (ii) by the observer as part of the data reporting requirements for observer data¹.
 5. All relevant tag data, any data recording tag recaptures, and specimens (tags and otoliths) from recaptures shall also be reported electronically in the CCAMLR format¹ to the relevant regional tag data repository as detailed in the CCAMLR Tagging Protocol (available at www.ccamlr.org/pu/e/sc/tag/intro.htm).

¹ In accordance with the CCAMLR Tagging Protocol for exploratory fisheries which is available from the Secretariat and included in the scientific observer logbook forms.

CONSERVATION MEASURE 41-02 (2008)
Limits on the fishery for *Dissostichus eleginoides*
in Statistical Subarea 48.3 in the 2007/08
and 2008/09 seasons

Species	toothfish
Area	48.3
Season	2007/08, 2008/09
Gear	longline, pot

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01:

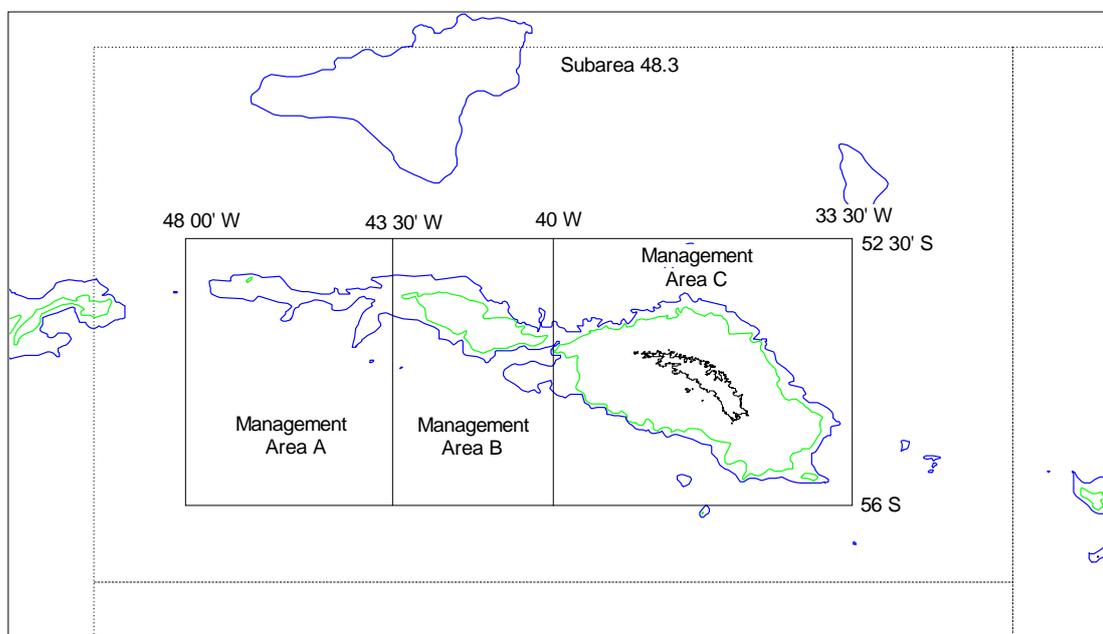

- Access
1. The fishery for *Dissostichus eleginoides* in Statistical Subarea 48.3 shall be conducted by vessels using longlines and pots only.

2. For the purpose of this fishery, the area open to the fishery is defined as that portion of Statistical Subarea 48.3 that lies within the area bounded by latitudes 52°30'S and 56°0'S and by longitudes 33°30'W and 48°0'W.
 3. A map illustrating the area defined by paragraph 2 is appended to this conservation measure (Annex 41-02/A). The portion of Statistical Subarea 48.3 outside that defined above shall be closed to directed fishing for *Dissostichus eleginoides* in the 2007/08 and 2008/09 seasons.
- Catch limit
4. The total catch of *Dissostichus eleginoides* in Statistical Subarea 48.3 in the 2007/08 and 2008/09 seasons shall be limited to 3 920 tonnes in each season. The catch limit shall be further subdivided between the Management Areas shown in Annex 41-02/A as follows:
 - Management Area A: 0 tonnes
 - Management Area B: 1 176 tonnes in each season
 - Management Area C: 2 744 tonnes in each season.
- Season
5. For the purpose of the longline fishery for *Dissostichus eleginoides* in Statistical Subarea 48.3, the 2007/08 and 2008/09 seasons are defined as the period from 1 May to 31 August in each season, or until the catch limit is reached, whichever is sooner. For the purpose of the pot fishery for *Dissostichus eleginoides* in Statistical Subarea 48.3, the 2007/08 and 2008/09 seasons are defined as the period from 1 December to 30 November, or until the catch limit is reached, whichever is sooner. The season for longline fishing operations may be extended to 14 September in each season for any vessel which has demonstrated full compliance with Conservation Measure 25-02 in the previous season. This extension to the season shall also be subject to a catch limit of three (3) seabirds per vessel. If three seabirds are caught during the season extension, fishing shall cease immediately for that vessel.
- By-catch
6. The by-catch of crab in any pot fishery undertaken shall be counted against the catch limit in the crab fishery in Statistical Subarea 48.3.
 7. The by-catch of finfish in the fishery for *Dissostichus eleginoides* in Statistical Subarea 48.3 in the 2007/08 and 2008/09 seasons shall not exceed 196 tonnes for skates and rays and 196 tonnes for *Macrourus* spp. in each season. For the purpose of these by-catch limits, 'Macrourus spp.' and 'skates and rays' shall each be counted as a single species.
 8. If the by-catch of any one species is equal to or greater than 1 tonne in any one haul or set, then the fishing vessel shall move to another location at least 5 n miles¹ distant. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch exceeded 1 tonne for a period of at least five days². The location where the by-catch exceeded 1 tonne is defined as the path³ followed by the fishing vessel.

- Mitigation 9. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-02 so as to minimise the incidental mortality of seabirds in the course of fishing.
- Observers 10. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period.
- Data: catch/effort 11. For the purpose of implementing this conservation measure, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
12. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus eleginoides* and by-catch species are defined as any species other than *Dissostichus eleginoides*.
13. The total number and weight of *Dissostichus eleginoides* discarded, including those with the 'jellymeat' condition, shall be reported. These fish will count towards the total allowable catch.
- Data: biological 14. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research fishing 15. Catches of *Dissostichus eleginoides* taken under the provisions of Conservation Measure 24-01 in the area of the fishery defined in this conservation measure shall be considered as part of the catch limit.
- Environmental protection 16. Conservation Measure 26-01 applies.
- ¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.
- ² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.
- ³ For a longline or a pot, the path is defined from the point at which the first anchor of a set was deployed to the point at which the last anchor of that set was deployed.

ANNEX 41-02/A

Subarea 48.3 – the area of the fishery and the three management areas for catch allocation according to paragraph 4. Latitudes and longitudes are given in degrees and minutes. 1 000 and 2 000 m contours are shown.

CONSERVATION MEASURE 41-03 (2008)

Limits on the fishery for *Dissostichus* spp. in Statistical Subarea 48.4 in the 2008/09 fishing season

Species	toothfish
Area	48.4
Season	2008/09
Gear	longline

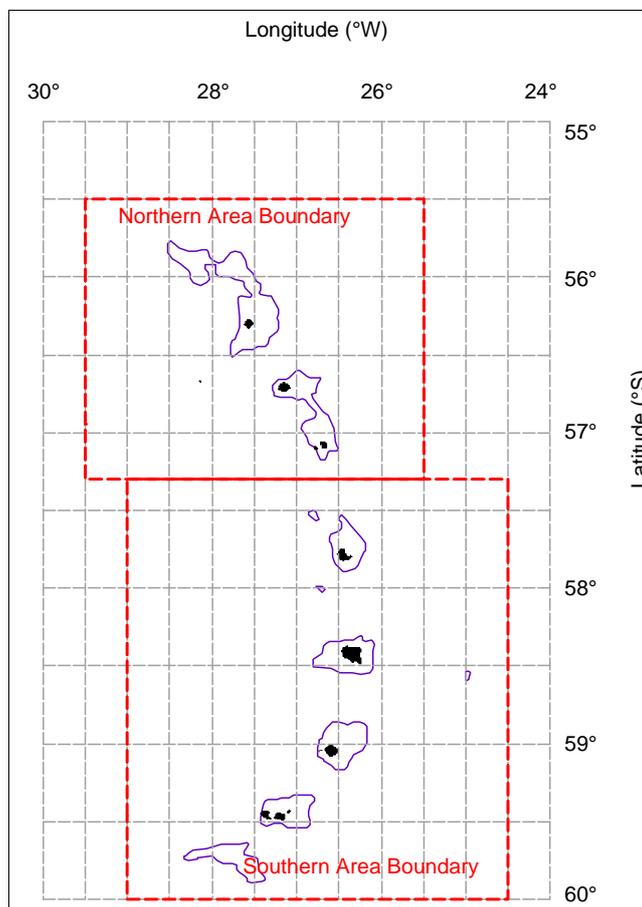

- Access
1. Directed fishing shall be by longlines only. The use of all other methods of directed fishing for *Dissostichus* spp. in Statistical Subarea 48.4 shall be prohibited.
 2. For the purpose of this fishery, the areas open to fishing are defined as that portion of Statistical Subarea 48.4 that lies within the area bounded by latitudes 55°30'S and 57°20'S and by longitudes 25°30'W and 29°30'W (Northern Area), and that portion of Statistical Subarea 48.4 that lies within the area bounded by latitudes 57°20'S and 60°00'S and by longitudes 24°30'W and 29°00'W (Southern Area).
 3. A map illustrating the areas defined by paragraph 2 is appended to this conservation measure (Annex 41-03/A). The portion of Statistical Subarea 48.4 outside that defined above shall be closed to directed fishing for *Dissostichus* spp. in the 2008/09 season.
- Catch limit
4. In the Northern Area of Statistical Subarea 48.4, the total catch of *Dissostichus eleginoides* shall be limited to 75 tonnes, and the taking of *Dissostichus mawsoni*, other than for scientific research purposes, is prohibited.

5. In the Southern Area of Statistical Subarea 48.4, the total catch of *Dissostichus* spp. shall be limited to 75 tonnes.
- Season 6. For the purposes of the fishery for *Dissostichus* spp. in Statistical Subarea 48.4, the fishing season shall be 1 December 2008 to 30 November 2009, or until the total catch limit for *Dissostichus* spp. in Statistical Subarea 48.4 is reached, whichever is sooner.
- By-catch 7. In the Northern Area of Statistical Subarea 48.4, the by-catch of finfish shall not exceed 4 tonnes for skates and rays and 12 tonnes for *Macrourus* spp.
8. In the Southern Area of Statistical Subarea 48.4, the by-catch of finfish shall trigger a move-on rule if the catch of skates and rays exceeds 5% of the catch of *Dissostichus* spp. in any one haul or set, or if the catch of *Macrourus* spp. exceeds 16% of the catch of *Dissostichus* spp. in any one haul or set. If the move-on rule is triggered, then the fishing vessel shall move to another location at least 5 n miles¹ distant. The fishing vessel shall not return to any point within 5 n miles of the location where the move-on rule was triggered for a period of at least five days². The location where the move-on rule was triggered is defined as the path³ followed by the fishing vessel.
9. For the purpose of these by-catch limits, ‘*Macrourus* spp.’ and ‘skates and rays’ shall each be counted as a single species.
10. *Dissostichus mawsoni* caught in the Northern Area of Statistical Subarea 48.4 shall, if in good condition, be tagged and released; or if dead, may be retained.
- Mitigation 11. Fishing in Statistical Subarea 48.4 shall be carried out in accordance with the provisions of Conservation Measure 25-02. When fishing is carried out in accordance with the provisions of Conservation Measure 24-02, vessels may, subject to paragraph 13 below, fish during daylight hours in an exemption to paragraph 5 (night setting) of Conservation Measure 25-02.
12. Fishing in Statistical Subarea 48.4 in December, January, February, March, October and November shall, in addition to paragraph 11 above, be carried out in accordance with the provisions of Conservation Measure 24-02.
13. Any vessel fishing under the exemption from night setting provided in paragraph 11 above and catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02.
- Observers 14. Each vessel participating in the fishery for *Dissostichus* spp. in Statistical Subarea 48.4 shall have at least one scientific observer appointed in

accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.

- Data: catch/effort 15. For the purpose of implementing this conservation measure, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
 - (ii) the Monthly Fine-scale Catch and Effort Data Reporting System set out in Conservation Measure 23-04. Data shall be reported on a haul-by-haul basis. For the purposes of Conservation Measure 23-04, the target species is *Dissostichus* spp., and ‘by-catch species’ are defined as any species other than *Dissostichus* spp.
- Data: biological 16. Fine-scale biological data, as required under Conservation Measure 23-05 shall be collected and recorded. Such data shall be reported in accordance with the Scheme of International Scientific Observation.
- Tagging program 17. Each vessel taking part in the fishery for *Dissostichus* spp. in Statistical Subarea 48.4 shall undertake a tagging program in accordance with the CCAMLR Tagging Protocol. The following additional provisions shall apply:
- (i) fish should be tagged at an average rate of five fish per tonne of green weight catch throughout the season;
 - (ii) fish should be tagged that have been caught across as broad a range of depths within the designated area as practicable;
 - (iii) fish of a range of total lengths should be tagged.
- Environmental protection 18. Conservation Measure 26-01 applies.
- ¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.
 - ² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.
 - ³ For a longline or a pot, the path is defined from the point at which the first anchor of a set was deployed to the point at which the last anchor of that set was deployed.

Statistical Subarea 48.4 – Northern Area and Southern Area of the fishery in the 2008/09 season according to paragraph 2. Latitudes and longitudes are given in degrees, and the 1 000 m contour is shown.

CONSERVATION MEASURE 41-04 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
in Statistical Subarea 48.6 in the 2008/09 season

Species	toothfish
Area	48.6
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02:

- Access
1. Fishing for *Dissostichus* spp. in Statistical Subarea 48.6 shall be limited to the exploratory longline fishery by Japan and the Republic of Korea. The fishery shall be conducted by Japanese and Korean flagged vessels using longlines only. No more than one vessel per country shall fish at any one time.
 2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.

- Catch limit 3. The total catch of *Dissostichus* spp. in Statistical Subarea 48.6 in the 2008/09 season shall not exceed a precautionary catch limit of 200 tonnes north of 60°S and 200 tonnes south of 60°S.
- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 48.6, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009.
- By-catch 5. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.
- Mitigation 6. The exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 48.6 shall be carried out in accordance with the provisions of Conservation Measure 25-02, except paragraph 5 (night setting), which shall not apply as long as the requirements of Conservation Measure 24-02 are met¹.
7. Any vessel catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02.
- Observers 8. Each vessel participating in the fishery shall have at least two scientific observers, one of whom shall be an observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.
- Data: catch/effort 9. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
10. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological 11. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 12. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively.
13. Toothfish shall be tagged at a rate of at least three fish per tonne green weight caught.

14. Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel.
- Environ-
mental
protection 15. Conservation Measure 26-01 applies.
16. There shall be no offal discharge in this fishery.
17. Conservation Measures 22-06 and 22-07 apply.

¹ The Japanese-flagged vessel *Shinsei Maru No. 3* is exempted from the requirement to conduct longline sink rate tests outside the Convention Area when fishing at the end of the 2007/08 season and into the 2008/09 season, provided that the vessel conducted regular longline sink rate testing in 2007/08.

CONSERVATION MEASURE 41-05 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
in Statistical Division 58.4.2 in the 2008/09 season

Species	toothfish
Area	58.4.2
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02, and notes that this measure would be for one year and that data arising from these activities would be reviewed by the Scientific Committee:

- Access 1. Fishing for *Dissostichus* spp. in Statistical Division 58.4.2 shall be limited to the exploratory longline fishery by Japan, Republic of Korea, Spain and Uruguay. The fishery shall be conducted by one (1) Japanese, four (4) Korean, one (1) Spanish and one (1) Uruguayan flagged vessels using longlines only.
2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.
- Catch limit 3. The total catch of *Dissostichus* spp. in Statistical Division 58.4.2, in the 2008/09 season shall not exceed a precautionary catch limit of 70 tonnes applied as follows:
- SSRU A – 30 tonnes
 SSRU B – 0 tonnes
 SSRU C – 0 tonnes
 SSRU D – 0 tonnes
 SSRU E – 40 tonnes.
- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.2, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009.
- Fishing operations 5. The exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.2 shall be carried out in accordance with the provisions of Conservation Measure 41-01, except paragraph 6.

- By-catch 6. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.
- Mitigation 7. The exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.2 shall be carried out in accordance with the provisions of Conservation Measure 25-02, except paragraph 5 (night setting) shall not apply, providing that vessels comply with Conservation Measure 24-02.
8. Any vessel catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02.
- Observers 9. Each vessel participating in the fishery shall have at least two scientific observers, one of whom shall be an observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.
- Research 10. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively.
11. Toothfish shall be tagged at a rate of at least three fish per tonne green weight caught.
12. Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel.
- Data: catch/effort 13. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
14. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological 15. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Environ- mental protection 16. Conservation Measure 26-01 applies.
17. Conservation Measures 22-06 and 22-07 apply.

CONSERVATION MEASURE 41-06 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
on Elan Bank (Statistical Division 58.4.3a) outside areas
of national jurisdiction in the 2008/09 season

Species	toothfish
Area	58.4.3a
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02:

- | | |
|-------------|---|
| Access | <ol style="list-style-type: none"> 1. Fishing for <i>Dissostichus</i> spp. on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction shall be limited to the exploratory fishery by Japan. The fishery shall be conducted by one (1) Japanese flagged vessel using longlines only. 2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities. |
| Catch limit | <ol style="list-style-type: none"> 3. The total catch of <i>Dissostichus</i> spp. on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction in the 2008/09 season shall not exceed a precautionary catch limit of 86 tonnes. |
| Season | <ol style="list-style-type: none"> 4. For the purpose of the exploratory longline fishery for <i>Dissostichus</i> spp. on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction, the 2008/09 season is defined as the period from 1 May to 31 August 2009, or until the catch limit is reached, whichever is sooner. |
| By-catch | <ol style="list-style-type: none"> 5. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03. |
| Mitigation | <ol style="list-style-type: none"> 6. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-02 so as to minimise the incidental mortality of seabirds in the course of fishing. 7. The fishery on Elan Bank (Statistical Division 58.4.3a) outside areas of national jurisdiction, may take place outside the prescribed season (paragraph 4) provided that, prior to entry into force of the licence, each vessel shall demonstrate its capacity to comply with longline weighting as approved by the Scientific Committee and described in Conservation Measure 24-02 and such data shall be reported to the Secretariat immediately. 8. Should a total of three (3) seabirds be caught by a vessel outside the normal season (defined in paragraph 4), the vessel shall cease fishing immediately and shall not be permitted to fish outside the normal fishing season for the remainder of the 2008/09 fishing season. |
| Observers | <ol style="list-style-type: none"> 9. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period. |

- Data: catch/effort
10. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
11. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological
12. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research
13. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively.
14. Toothfish shall be tagged at a rate of at least three fish per tonne green weight caught.
15. Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel.
- Environ-mental protection
16. Conservation Measure 26-01 applies.
17. Conservation Measures 22-06 and 22-07 apply.

CONSERVATION MEASURE 41-07 (2008)

Limits on the exploratory fishery for *Dissostichus* spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction in the 2008/09 season

Species	toothfish
Area	58.4.3b
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02:

- Access
1. Fishing for *Dissostichus* spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction shall be limited to the exploratory fishery by Japan, Spain and Uruguay. The fishery shall be conducted by Japanese, Spanish and Uruguayan flagged vessels using longlines only. No more than one vessel per country shall fish at any one time.

2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.
- Catch limit 3. The total catch of *Dissostichus* spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction in the 2008/09 season shall not exceed a precautionary catch limit of 120 tonnes applied as follows:
- SSRU A – 30 tonnes
 SSRU B – 0 tonnes
 SSRU C – 30 tonnes
 SSRU D – 30 tonnes
 SSRU E – 30 tonnes.
- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction, the 2008/09 season is defined as the period from 1 May to 31 August 2009, or until the catch limit is reached, whichever is sooner.
- By-catch 5. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.
- Mitigation 6. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-02 so as to minimise the incidental mortality of seabirds in the course of fishing.
7. The fishery on BANZARE Bank (Statistical Division 58.4.3b) outside areas of national jurisdiction, may take place outside the prescribed season (paragraph 4) provided that, prior to entry into force of the licence, each vessel shall demonstrate its capacity to comply with experimental line-weighting trials as approved by the Scientific Committee and described in Conservation Measure 24-02 and such data shall be reported to the Secretariat immediately.
8. Should a total of three (3) seabirds be caught by a vessel outside the normal season (defined in paragraph 4), the vessel shall cease fishing immediately and shall not be permitted to fish outside the normal fishing season for the remainder of the 2008/09 fishing season.
- Observers 9. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period.
- Data: catch/effort 10. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:

- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
11. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological 12. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 13. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively.
14. Toothfish shall be tagged at a rate of at least three fish per tonne green weight caught.
15. Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel.
- Environmental protection 16. Conservation Measure 26-01 applies.
17. Conservation Measures 22-06 and 22-07 apply.

CONSERVATION MEASURE 41-08 (2008)
Limits on the fishery for *Dissostichus eleginoides* in
Statistical Division 58.5.2 in the 2007/08 and 2008/09 seasons

Species	toothfish
Area	58.5.2
Season	2007/08, 2008/09
Gear	various

- Access 1. The fishery for *Dissostichus eleginoides* in Statistical Division 58.5.2 shall be conducted by vessels using trawls, pots or longlines only.
- Catch limit 2. The total catch of *Dissostichus eleginoides* in Statistical Division 58.5.2 in the 2007/08 and 2008/09 seasons shall be limited to 2 500 tonnes west of 79°20'E.
- Season 3. For the purpose of the trawl and pot fisheries for *Dissostichus eleginoides* in Statistical Division 58.5.2, the 2007/08 and 2008/09 seasons are defined as the period from 1 December to 30 November, or until the catch limit is reached, whichever is sooner. For the purpose of the longline

fishery for *Dissostichus eleginoides* in Statistical Division 58.5.2, the 2007/08 and 2008/09 seasons are defined as the period from 1 May to 14 September in each season, or until the catch limit is reached, whichever is sooner. The season for longline fishing operations may be extended from 15 April to 30 April and 15 September to 31 October in each season for any vessel which has demonstrated full compliance with Conservation Measure 25-02 in the previous season. These extensions to the season will also be subject to a total catch limit of three (3) seabirds per vessel. If three seabirds are caught during the season extension, fishing throughout the season extensions shall cease immediately for that vessel.

- By-catch 4. Fishing shall cease if the by-catch of any species reaches its by-catch limit as set out in Conservation Measure 33-02.
- Mitigation 5. The operation of the trawl fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds and mammals through the course of fishing. The operation of the longline fishery shall be carried out in accordance with Conservation Measure 25-02, except paragraph 5 (night setting) shall not apply for vessels using integrated weighted lines (IWLs) during the period 1 May to 31 October in each season. Such vessels may deploy IWL gear during daylight hours if, prior to entry into force of the licence, each vessel shall demonstrate its capacity to comply with experimental line-weighting trials as approved by the Scientific Committee and described in Conservation Measure 24-02.
- During the period 15 April to 30 April in each season, vessels shall use IWL gear and in a manner that ensures lines are set and hauled sequentially, in conjunction with night setting and paired streamer lines.
- Observers 6. Each vessel participating in this fishery shall have at least one scientific observer, and may include one appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period, with the exception of the period 15 April to 30 April in each season when two scientific observers shall be carried.
- Data: catch/effort 7. For the purpose of implementing this conservation measure, the following shall apply:
- (i) the Ten-day Catch and Effort Reporting System set out in Annex 41-08/A;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Annex 41-08/A. Fine-scale data shall be submitted on a haul-by-haul basis.

8. For the purpose of Annex 41-08/A, the target species is *Dissostichus eleginoides* and by-catch species are defined as any species other than *Dissostichus eleginoides*.
 9. The total number and weight of *Dissostichus eleginoides* discarded, including those with the 'jellymeat' condition, shall be reported. These fish will count towards the total allowable catch.
- Data: biological
10. Fine-scale biological data, as required under Annex 41-08/A, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Environmental protection
11. Conservation Measure 26-01 applies.

ANNEX 41-08/A

DATA REPORTING SYSTEM

A ten-day catch and effort reporting system shall be implemented:

- (i) for the purpose of implementing this system, the calendar month shall be divided into three reporting periods, viz: day 1 to day 10, day 11 to day 20 and day 21 to the last day of the month. The reporting periods are hereafter referred to as periods A, B and C;
- (ii) at the end of each reporting period, each Contracting Party participating in the fishery shall obtain from each of its vessels information on total catch and total days and hours fished for that period and shall, by cable, telex, facsimile or electronic transmission, transmit the aggregated catch and days and hours fished for its vessels so as to reach the Executive Secretary no later than the end of the next reporting period;
- (iii) a report must be submitted by every Contracting Party taking part in the fishery for each reporting period for the duration of the fishery, even if no catches are taken;
- (iv) the catch of *Dissostichus eleginoides* and of all by-catch species must be reported;
- (v) such reports shall specify the month and reporting period (A, B and C) to which each report refers;
- (vi) immediately after the deadline has passed for receipt of the reports for each period, the Executive Secretary shall notify all Contracting Parties engaged in fishing activities in the division of the total catch taken during the reporting period and the total aggregate catch for the season to date;

- (vii) at the end of every three reporting periods, the Executive Secretary shall inform all Contracting Parties of the total catch taken during the three most recent reporting periods and the total aggregate catch for the season to date.

A fine-scale catch, effort and biological data reporting system shall be implemented:

- (i) the scientific observer(s) aboard each vessel shall collect the data required to complete the CCAMLR fine-scale catch and effort data form C1 for trawl fishing, form C2 for longline fishing, or form C5 for pot fishing, latest versions. These data shall be submitted to the CCAMLR Secretariat not later than one month after the vessel returns to port;
- (ii) the catch of *Dissostichus eleginoides* and of all by-catch species must be reported;
- (iii) the numbers of seabirds and marine mammals of each species caught and released or killed must be reported;
- (iv) the scientific observer(s) aboard each vessel shall collect data on the length composition from representative samples of *Dissostichus eleginoides* and by-catch species:
- (a) length measurements shall be to the nearest centimetre below;
- (b) representative samples of length composition shall be taken from each fine-scale grid rectangle (0.5° latitude by 1° longitude) fished in each calendar month;
- (v) the above data shall be submitted to the CCAMLR Secretariat not later than one month after the vessel returns to port.

CONSERVATION MEASURE 41-09 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
in Statistical Subarea 88.1 in the 2008/09 season

Species	toothfish
Area	88.1
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02:

- Access
1. Fishing for *Dissostichus* spp. in Statistical Subarea 88.1 shall be limited to the exploratory longline fishery by Argentina, Chile, Republic of Korea, New Zealand, Russia, South Africa, Spain, UK and Uruguay. The fishery shall be conducted by a maximum in the season of two (2) Argentine, one (1) Chilean, four (4) Korean, four (4) New Zealand, three (3) Russian, one (1) South African, one (1) Spanish, three (3) UK and two (2) Uruguayan flagged vessels using longlines only.
 2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.

- Catch limit 3. The total catch of *Dissostichus* spp. in Statistical Subarea 88.1 in the 2008/09 season shall not exceed a precautionary catch limit of 2 700 tonnes applied as follows:
- SSRU A – 0 tonnes
 - SSRUs B, C and G – 352 tonnes total
 - SSRU D – 0 tonnes
 - SSRU E – 0 tonnes
 - SSRU F – 0 tonnes
 - SSRUs H, I and K – 1 994 tonnes total
 - SSRU J and L – 354 tonnes
 - SSRU M – 0 tonnes.
- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 88.1, the 2008/09 season is defined as the period from 1 December 2008 to 31 August 2009.
- Fishing operations 5. The exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 88.1 shall be carried out in accordance with the provisions of Conservation Measure 41-01, except paragraph 6.
- By-catch 6. The total by-catch in Statistical Subarea 88.1 in the 2008/09 season shall not exceed a precautionary catch limit of 135 tonnes of skates and rays, and 430 tonnes of *Macrourus* spp. Within these total by-catch limits, individual limits will apply as follows:
- SSRU A – 0 tonnes of any species
 - SSRUs B, C and G total – 50 tonnes of skates and rays, 40 tonnes of *Macrourus* spp., 60 tonnes of other species
 - SSRU D – 0 tonnes of any species
 - SSRU E – 0 tonnes of any species
 - SSRU F – 0 tonnes of any species
 - SSRUs H, I and K total – 99 tonnes of skates and rays, 320 tonnes of *Macrourus* spp., 60 tonnes of other species
 - SSRU J and L – 50 tonnes of skates and rays, 70 tonnes of *Macrourus* spp., 40 tonnes of other species.
 - SSRU M – 0 tonnes of any species.
- The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.
- Mitigation 7. The exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 88.1 shall be carried out in accordance with the provisions of Conservation Measure 25-02, except paragraph 5 (night setting), which shall not apply as long as the requirements of Conservation Measure 24-02 are met.
8. Any vessel catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02.

- Observers 9. Each vessel participating in the fishery shall have at least two scientific observers, one of whom shall be an observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.
- VMS 10. Each vessel participating in this exploratory longline fishery shall be required to operate a VMS at all times, in accordance with Conservation Measure 10-04.
- CDS 11. Each vessel participating in this exploratory longline fishery shall be required to participate in the Catch Documentation Scheme for *Dissostichus* spp., in accordance with Conservation Measure 10-05.
- Research 12. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively. The setting of research hauls (Conservation Measure 41-01, Annex B, paragraphs 3 and 4) is not required.
13. Toothfish shall be tagged at a rate of at least one fish per tonne green weight caught in each SSRU.
14. Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel.
- Data: catch/effort 15. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
16. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological 17. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Environmental protection 18. Conservation Measure 26-01 applies.
19. Conservation Measures 22-06 and 22-07 apply.

- Additional elements 20. Fishing for *Dissostichus* spp. in Statistical Subarea 88.1 shall be prohibited within 10 n miles of the coast of the Balleny Islands.

CONSERVATION MEASURE 41-10 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
in Statistical Subarea 88.2 in the 2008/09 season

Species	toothfish
Area	88.2
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02:

- Access 1. Fishing for *Dissostichus* spp. in Statistical Subarea 88.2 shall be limited to the exploratory longline fishery by Argentina, Chile, Republic of Korea, New Zealand, Russia, South Africa, Spain, UK and Uruguay. The fishery shall be conducted by a maximum in the season of two (2) Argentine, one (1) Chilean, two (2) Korean, four (4) New Zealand, three (3) Russian, one (1) South African, one (1) Spanish, three (3) UK and two (2) Uruguayan flagged vessels using longlines only.
2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.
- Catch limit 3. The total catch of *Dissostichus* spp. in Statistical Subarea 88.2 south of 65°S in the 2008/09 season shall not exceed a precautionary catch limit of 567 applied as follows:
- SSRU A – 0 tonnes
 SSRU B – 0 tonnes
 SSRUs C, D, F and G – 214 tonnes total
 SSRU E – 353 tonnes.
- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 88.2, the 2008/09 season is defined as the period from 1 December 2008 to 31 August 2009.
5. The exploratory longline fishery for *Dissostichus* spp. in Statistical Subarea 88.2 shall be carried out in accordance with the provisions of Conservation Measure 41-01, except paragraph 6.
- By-catch 6. The total by-catch in Statistical Subarea 88.2 in the 2008/09 season shall not exceed a precautionary catch limit of 50 tonnes of skates and rays, and 90 tonnes of *Macrourus* spp. Within these total by-catch limits, individual limits will apply as follows:

SSRU A – 0 tonnes of any species
 SSRU B – 0 tonnes of any species
 SSRUs C, D, F, G – 50 tonnes of skates and rays, 34 tonnes of *Macrourus* spp., 80 tonnes of other species
 SSRU E – 50 tonnes of skates and rays, 56 tonnes of *Macrourus* spp., 20 tonnes of other species.

The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.

- | | | |
|-----------------------|-----|---|
| Mitigation | 7. | The exploratory longline fishery for <i>Dissostichus</i> spp. in Statistical Subarea 88.2 shall be carried out in accordance with the provisions of Conservation Measure 25-02, except paragraph 5 (night setting), which shall not apply as long as the requirements of Conservation Measure 24-02 are met. |
| | 8. | Any vessel catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02. |
| Observers | 9. | Each vessel participating in the fishery shall have at least two scientific observers, one of whom shall be an observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period. |
| VMS | 10. | Each vessel participating in this exploratory longline fishery shall be required to operate a VMS at all times, in accordance with Conservation Measure 10-04. |
| CDS | 11. | Each vessel participating in this exploratory longline fishery shall be required to participate in the Catch Documentation Scheme for <i>Dissostichus</i> spp., in accordance with Conservation Measure 10-05. |
| Research | 12. | Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively. The setting of research hauls (Conservation Measure 41-01, Annex B, paragraphs 3 and 4) is not required. |
| | 13. | Toothfish shall be tagged at a rate of at least one fish per tonne green weight caught in each SSRU. |
| | 14. | Skates shall be tagged at a rate of at least one skate per five skates caught, up to a maximum of 500 skates per vessel. |
| Data:
catch/effort | 15. | For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply: <ul style="list-style-type: none"> (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01; |

- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.

16. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.

Data: biological 17. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.

Environ- mental 18. Conservation Measure 26-01 applies.

protection 19. Conservation Measures 22-06 and 22-07 apply.

CONSERVATION MEASURE 41-11 (2008)
Limits on the exploratory fishery for *Dissostichus* spp.
in Statistical Division 58.4.1 in the 2008/09 season

Species	toothfish
Area	58.4.1
Season	2008/09
Gear	longline

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02, and notes that this measure would be for one year and that data arising from these activities would be reviewed by the Scientific Committee:

Access 1. Fishing for *Dissostichus* spp. in Statistical Division 58.4.1 shall be limited to the exploratory longline fishery by Japan, Republic of Korea, New Zealand, South Africa, Spain and Uruguay. The fishery shall be conducted by one (1) Japanese, five (5) Korean, four (4) New Zealand, one (1) South African, one (1) Spanish and one (1) Uruguayan flagged vessels using longlines only.

2. Fishing is prohibited in depths shallower than 550 m in order to protect benthic communities.

Catch limit 3. The total catch of *Dissostichus* spp. in Statistical Division 58.4.1 in the 2008/09 season shall not exceed a precautionary catch limit of 210 tonnes applied as follows:

- SSRU A – 0 tonnes
- SSRU B – 0 tonnes
- SSRU C – 100 tonnes
- SSRU D – 0 tonnes
- SSRU E – 50 tonnes
- SSRU F – 0 tonnes
- SSRU G – 60 tonnes
- SSRU H – 0 tonnes.

- Season 4. For the purpose of the exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.1, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009.
- Fishing operations 5. The exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.1 shall be carried out in accordance with the provisions of Conservation Measure 41-01, except paragraph 6.
- By-catch 6. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-03.
- Mitigation 7. The exploratory longline fishery for *Dissostichus* spp. in Statistical Division 58.4.1 shall be carried out in accordance with the provisions of Conservation Measure 25-02, except paragraph 5 (night setting) shall not apply, providing that vessels comply with Conservation Measure 24-02.
8. Any vessel catching a total of three (3) seabirds shall immediately revert to night setting in accordance with Conservation Measure 25-02.
- Observers 9. Each vessel participating in the fishery shall have at least two scientific observers, one of whom shall be an observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.
- Research 10. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan and Tagging Program described in Conservation Measure 41-01, Annex B and Annex C respectively.
11. Toothfish shall be tagged at a rate of at least three fish per tonne green weight caught.
- Data: catch/effort 12. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
13. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Dissostichus* spp. and by-catch species are defined as any species other than *Dissostichus* spp.
- Data: biological 14. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.

- Environmental protection
15. Conservation Measure 26-01 applies.
 16. There shall be no offal discharge in this fishery.
 17. Conservation Measures 22-06 and 22-07 apply.

CONSERVATION MEASURE 42-01 (2008)
Limits on the fishery for *Champscephalus gunnari*
in Statistical Subarea 48.3 in the 2008/09 season

Species	icefish
Area	48.3
Season	2008/09
Gear	trawl

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01:

- Access
1. The fishery for *Champscephalus gunnari* in Statistical Subarea 48.3 shall be conducted by vessels using trawls only. The use of bottom trawls in the directed fishery for *Champscephalus gunnari* in Statistical Subarea 48.3 is prohibited.
 2. Fishing for *Champscephalus gunnari* shall be prohibited within 12 n miles of the coast of South Georgia during the period 1 March to 31 May.
- Catch limit
3. The total catch of *Champscephalus gunnari* in Statistical Subarea 48.3 in the 2008/09 season shall be limited to 3 834 tonnes.
 4. Where any haul contains more than 100 kg of *Champscephalus gunnari*, and more than 10% of the *Champscephalus gunnari* by number are smaller than 240 mm total length, the fishing vessel shall move to another fishing location at least 5 n miles distant¹. The fishing vessel shall not return to any point within 5 n miles of the location where the catch of small *Champscephalus gunnari* exceeded 10%, for a period of at least five days². The location where the catch of small *Champscephalus gunnari* exceeded 10% is defined as the path followed by the fishing vessel from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel.
- Season
5. For the purpose of the trawl fishery for *Champscephalus gunnari* in Statistical Subarea 48.3, the 2008/09 season is defined as the period from 15 November 2008 to 14 November 2009, or until the catch limit is reached, whichever is sooner.

- By-catch 6. The by-catch in this fishery shall be regulated as set out in Conservation Measure 33-01. If, in the course of the directed fishery for *Champscephalus gunnari*, the by-catch in any one haul of any of the species named in Conservation Measure 33-01 is greater than 100 kg and exceeds 5% of the total catch of all fish by weight, or is equal to or greater than 2 tonnes, then the fishing vessel shall move to another location at least 5 n miles distant¹. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch of species named in Conservation Measure 33-01 exceeded 5% for a period of at least five days². The location where the by-catch exceeded 5% is defined as the path followed by the fishing vessel from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel.
- Mitigation 7. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of the fishery. Vessels shall use net binding³ and consider adding weight to the codend to reduce seabird captures during shooting operations.
8. Should any vessel catch a total of 20 seabirds, it shall cease fishing and shall be excluded from further participation in the fishery in the 2008/09 season.
- Observers 9. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period.
- Data: catch/effort 10. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
11. For the purpose of Conservation Measures 23-01 and 23-04, the target species is *Champscephalus gunnari* and by-catch species are defined as any species other than *Champscephalus gunnari*.
- Data: biological 12. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.

Environmental protection 13. Conservation Measure 26-01 applies.

- ¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.
- ² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.
- ³ See SC-CAMLR-XXV, Annex 5, Appendix D, paragraph 59 for guidelines for net binding.

CONSERVATION MEASURE 42-02 (2008)
Limits on the fishery for *Champscephalus gunnari*
in Statistical Division 58.5.2 in the 2008/09 season

Species	icefish
Area	58.5.2
Season	2008/09
Gear	trawl

- Access
1. The fishery for *Champscephalus gunnari* in Statistical Division 58.5.2 shall be conducted by vessels using trawls only.
 2. For the purpose of this fishery for *Champscephalus gunnari*, the area open to the fishery is defined as that portion of Statistical Division 58.5.2 that lies within the area enclosed by a line:
 - (i) starting at the point where the meridian of longitude 72°15'E intersects the Australia–France Maritime Delimitation Agreement Boundary then south along the meridian to its intersection with the parallel of latitude 53°25'S;
 - (ii) then east along that parallel to its intersection with the meridian of longitude 74°E;
 - (iii) then northeasterly along the geodesic to the intersection of the parallel of latitude 52°40'S and the meridian of longitude 76°E;
 - (iv) then north along the meridian to its intersection with the parallel of latitude 52°S;
 - (v) then northwesterly along the geodesic to the intersection of the parallel of latitude 51°S with the meridian of longitude 74°30'E;
 - (vi) then southwesterly along the geodesic to the point of commencement.
 3. A chart illustrating the above definition is appended to this conservation measure (Annex 42-02/A). Areas in Statistical Division 58.5.2 outside that defined above shall be closed to directed fishing for *Champscephalus gunnari*.

- Catch limit 4. The total catch of *Champocephalus gunnari* in Statistical Division 58.5.2 in the 2008/09 season shall be limited to 102 tonnes.
5. Where any haul contains more than 100 kg of *Champocephalus gunnari*, and more than 10% of the *Champocephalus gunnari* by number are smaller than the specified minimum legal total length, the fishing vessel shall move to another fishing location at least 5 n miles distant¹. The fishing vessel shall not return to any point within 5 n miles of the location where the catch of small *Champocephalus gunnari* exceeded 10% for a period of at least five days². The location where the catch of small *Champocephalus gunnari* exceeded 10% is defined as the path followed by the fishing vessel from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel. The minimum legal total length shall be 240 mm.
- Season 6. For the purpose of the trawl fishery for *Champocephalus gunnari* in Statistical Division 58.5.2, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009, or until the catch limit is reached, whichever is sooner.
- By-catch 7. Fishing shall cease if the by-catch of any species reaches its by-catch limit as set out in Conservation Measure 33-02.
- Mitigation 8. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of fishing.
- Observers 9. Each vessel participating in this fishery shall have at least one scientific observer, and may include one appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board throughout all fishing activities within the fishing period.
- Data: catch/effort 10. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Ten-day Catch and Effort Reporting System set out in Annex 42-02/B;
- (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Annex 42-02/B. Fine-scale data shall be submitted on a haul-by-haul basis.
11. For the purpose of Annex 42-02/B, the target species is *Champocephalus gunnari* and by-catch species are defined as any species other than *Champocephalus gunnari*.
- Data: biological 12. Fine-scale biological data, as required under Annex 42-02/B, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.

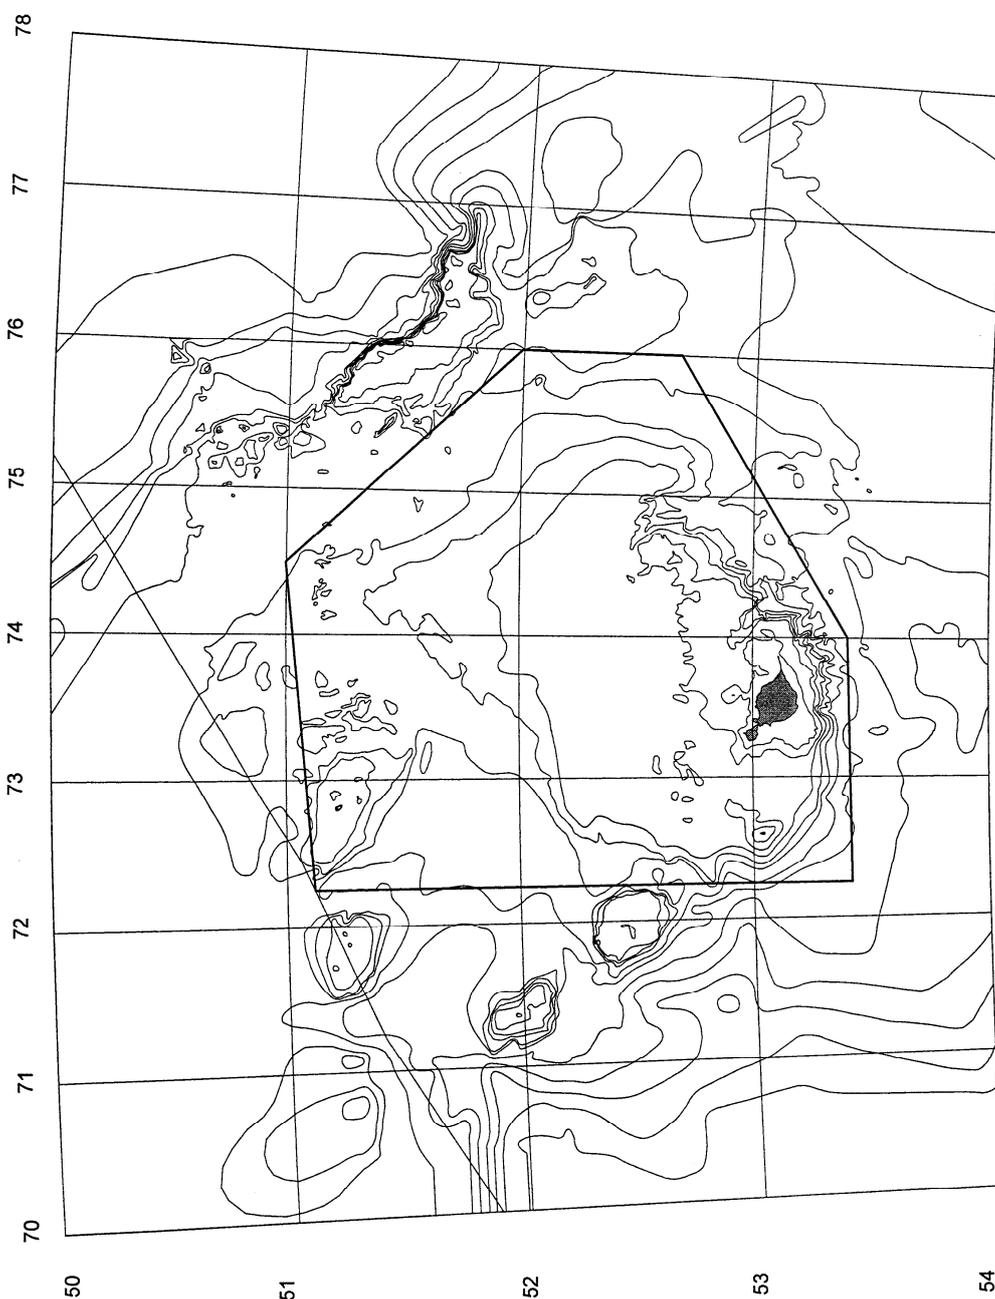

Environmental
protection

13. Conservation Measure 26-01 applies.

- ¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.
- ² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 23-01, pending the adoption of a more appropriate period by the Commission.

ANNEX 42-02/A

CHART OF THE HEARD ISLAND PLATEAU

DATA REPORTING SYSTEM

A ten-day catch and effort reporting system shall be implemented:

- (i) for the purpose of implementing this system, the calendar month shall be divided into three reporting periods, viz: day 1 to day 10, day 11 to day 20 and day 21 to the last day of the month. The reporting periods are hereafter referred to as periods A, B and C;
- (ii) at the end of each reporting period, each Contracting Party participating in the fishery shall obtain from each of its vessels information on total catch and total days and hours fished for that period and shall, by cable, telex, facsimile or electronic transmission, transmit the aggregated catch and days and hours fished for its vessels so as to reach the Executive Secretary no later than the end of the next reporting period;
- (iii) a report must be submitted by every Contracting Party taking part in the fishery for each reporting period for the duration of the fishery, even if no catches are taken;
- (iv) the catch of *Champtocephalus gunnari* and of all by-catch species must be reported;
- (v) such reports shall specify the month and reporting period (A, B and C) to which each report refers;
- (vi) immediately after the deadline has passed for receipt of the reports for each period, the Executive Secretary shall notify all Contracting Parties engaged in fishing activities in the division of the total catch taken during the reporting period and the total aggregate catch for the season to date;
- (vii) at the end of every three reporting periods, the Executive Secretary shall inform all Contracting Parties of the total catch taken during the three most recent reporting periods and the total aggregate catch for the season to date.

A fine-scale catch, effort and biological data reporting system shall be implemented:

- (i) the scientific observer(s) aboard each vessel shall collect the data required to complete the CCAMLR fine-scale catch and effort data form C1, latest version. These data shall be submitted to the CCAMLR Secretariat not later than one month after the vessel returns to port;
- (ii) the catch of *Champtocephalus gunnari* and of all by-catch species must be reported;
- (iii) the numbers of seabirds and marine mammals of each species caught and released or killed must be reported;

- (iv) the scientific observer(s) aboard each vessel shall collect data on the length composition from representative samples of *Champscephalus gunnari* and by-catch species:
- (a) length measurements shall be to the nearest centimetre below;
 - (b) representative samples of length composition shall be taken from each fine-scale grid rectangle (0.5° latitude by 1° longitude) fished in each calendar month;
- (v) the above data shall be submitted to the CCAMLR Secretariat not later than one month after the vessel returns to port.

CONSERVATION MEASURE 51-01 (2008)
Precautionary catch limitations on *Euphausia superba*
in Statistical Subareas 48.1, 48.2, 48.3 and 48.4

Species	krill
Area	48.1, 48.2, 48.3, 48.4
Season	all
Gear	all

The Commission,

Noting that it has agreed (CCAMLR-XIX, paragraph 10.11) that the krill catches in Statistical Subareas 48.1, 48.2, 48.3 and 48.4 shall not exceed a set level, defined herein as a trigger level, until a procedure for division of the overall catch limit into smaller management units has been established, and that the Scientific Committee has been directed to provide advice on such a subdivision,

Recognising that the Scientific Committee agreed a trigger level of 620 000 tonnes,

adopts the following measure in accordance with Article IX of its Convention:

- | | |
|---------------|---|
| Access | 1. The fishery for <i>Euphausia superba</i> in Statistical Subareas 48.1, 48.2, 48.3 and 48.4 shall be conducted by vessels using fishing methods listed in Conservation Measure 21-03, Annex A only. |
| Catch limit | 2. The total combined catch of <i>Euphausia superba</i> in Statistical Subareas 48.1, 48.2, 48.3 and 48.4 shall be limited to 3.47 million tonnes in any fishing season. |
| Trigger level | 3. Until the Commission has defined an allocation of this total catch limit between smaller management units ¹ , based on the advice from the Scientific Committee, the total combined catch in Statistical Subareas 48.1, 48.2, 48.3 and 48.4 shall be further limited to 620 000 tonnes in any fishing season. |
| | 4. This measure shall be kept under review by the Commission, taking into account the advice of the Scientific Committee. |
| Season | 5. A fishing season begins on 1 December and finishes on 30 November of the following year. |

- Mitigation 6. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of fishing.
7. The use of marine mammal exclusion devices on trawls is mandatory.
- Data 8. For the purpose of implementing this conservation measure, the data requirements set out in Conservation Measure 23-06 shall apply.
- Environmental protection 9. Conservation Measure 26-01 applies.
- ¹ Defined in CCAMLR-XXI, paragraph 4.5.

CONSERVATION MEASURE 51-02 (2008)
Precautionary catch limitation on *Euphausia superba*
in Statistical Division 58.4.1

Species	krill
Area	58.4.1
Season	all
Gear	trawl

- Access 1. The fishery for *Euphausia superba* in Statistical Division 58.4.1 shall be conducted by vessels using fishing methods listed in Conservation Measure 21-03, Annex A only.
- Catch limit 2. The total catch of *Euphausia superba* in Statistical Division 58.4.1 shall be limited to 440 000 tonnes in any fishing season.
3. The total catch shall be further subdivided into two subdivisions within Statistical Division 58.4.1 as follows: west of 115°E, 277 000 tonnes; and east of 115°E, 163 000 tonnes.
4. This measure shall be kept under review by the Commission, taking into account the advice of the Scientific Committee.
- Season 5. A fishing season begins on 1 December and finishes on 30 November the following year.
- Mitigation 6. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of fishing.
7. The use of marine mammal exclusion devices on trawls is mandatory.
- Data 8. For the purposes of implementing this conservation measure, the data requirements set out in Conservation Measure 23-06 shall apply.
- Environmental protection 9. Conservation Measure 26-01 applies.

CONSERVATION MEASURE 51-03 (2008)
Precautionary catch limitation on *Euphausia superba*
in Statistical Division 58.4.2

Species	krill
Area	58.4.2
Season	all
Gear	trawl

- Access 1. The fishery for *Euphausia superba* in Statistical Division 58.4.2 shall be conducted by vessels using fishing methods listed in Conservation Measure 21-03, Annex A only.
- Catch limit 2. The total catch of *Euphausia superba* in Statistical Division 58.4.2 shall be limited to 2.645 million tonnes in any fishing season.
3. The total catch limit shall be further subdivided into two subdivisions within Statistical Division 58.4.2 as follows: west of 55°E, 1.448 million tonnes; and east of 55°E, 1.080 million tonnes.
- Trigger level¹ 4. Until the Commission has defined an allocation of this total catch limit between smaller management units, as the Scientific Committee may advise, the total catch in Division 58.4.2 shall be limited to 260 000 tonnes west of 55°E and 192 000 tonnes east of 55°E in any fishing season.
5. This measure shall be kept under review by the Commission, taking into account the advice of the Scientific Committee.
- Season 6. A fishing season begins on 1 December and finishes on 30 November of the following year.
- Mitigation 7. The operation of this fishery shall be carried out in accordance with Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of fishing.
8. The use of marine mammal exclusion devices on trawls is mandatory.
- Observers 9. Each vessel participating in the fishery shall have at least one scientific observer in accordance with the CCAMLR Scheme of International Scientific Observation or a domestic scientific observer fulfilling the requests in the scheme, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period².
- Data 10. For the purposes of implementing this conservation measure, the data requirements set out in Conservation Measure 23-06 shall apply.
- Environmental protection 11. Conservation Measure 26-01 applies.

¹ A trigger level is a set level that the catch shall not exceed until a procedure for the division of the overall catch limit into smaller management units, upon which the Scientific Committee has been directed to provide advice, has been established.

- ² Bearing in mind the limited ecological information from research and fisheries observers in Statistical Division 58.4.2 compared to Statistical Area 48, the Commission recognised the need to collect scientific data from the fishery. This paragraph applies only to the krill fishery in Statistical Division 58.4.2 and shall be revised depending on the advice of the Scientific Committee on a systematic scheme for scientific observation in the krill fishery or reviewed within three years, whichever comes earlier.

CONSERVATION MEASURE 51-04 (2008)
General measure for exploratory fisheries for *Euphausia superba*
in the Convention Area in the 2008/09 season

Species	krill
Area	various
Season	2008/09
Gear	various

The Commission hereby adopts the following conservation measure:

1. This conservation measure applies to exploratory fisheries for Antarctic krill (*Euphausia superba*) except for such fisheries where the Commission has given specific exemptions, and only to the extent of those exemptions.
2. Fishing in any statistical subarea or division shall cease when the reported catch reaches the specified catch limit¹ and that subarea or division shall be closed to fishing for the remainder of the season. No more than 75% of the catch limit shall be taken within 60 n miles of known breeding colonies of land-based krill-dependent predators.
3. In order to give effect to paragraph 2 above:
 - (i) the precise geographic position of a trawl haul will be determined by the midpoint of the path between the start point and end point of the haul for the purposes of catch and effort reporting;
 - (ii) for the purposes of this conservation measure, fishing is defined as any time that fishing gear, conventional trawls, pumped codends, and continuous pumping gear are in the water;
 - (iii) the Secretariat shall notify Contracting Parties participating in these fisheries when the total catch of *Euphausia superba* combined in any statistical subarea or division is likely to reach the specified catch limit, and of the closure of that subarea or division when that limit is reached². No part of a trawl path may lie within a closed subarea or division.
4. The total green weight of krill caught and lost shall be reported.
5. Each vessel participating in the exploratory fisheries for krill during the 2008/09 season shall have one observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing season.
6. The Data Collection Plan (Annex 51-04/A) and Research Plan (Annex 51-04/B) shall be implemented. Data collected pursuant to the Data Collection and Research Plans for the period up to 1 May 2009 shall be reported to CCAMLR by 1 June 2009 so that the data will be available to the meeting of the Working Group on Ecosystem Monitoring and

Management (WG-EMM) in 2009. Such data taken after 1 June 2009 shall be reported to CCAMLR not later than three months after the closure of the fishery, but, where possible, submitted in time for the consideration of the Scientific Committee.

7. Contracting Parties who choose not to participate in the fishery prior to the commencement of the fishery shall inform CCAMLR of changes in their plans no later than one month before the start of the fishery. If, for whatever reason, Contracting Parties are unable to participate in the fishery, they shall inform CCAMLR no later than one week after finding that they cannot participate. The Secretariat will inform all Contracting Parties immediately after such notification is received.

¹ Unless otherwise specified, the catch limit for krill shall be 15 000 tonnes in any statistical subarea or division.

² The closure of fisheries is governed by Conservation Measure 31-02.

ANNEX 51-04/A

DATA COLLECTION PLANS FOR EXPLORATORY KRILL FISHERIES

1. During normal fishing operations, all vessels will comply with the Ten-day Catch and Effort Reporting System (Conservation Measure 23-02) and the Monthly Fine-scale Catch, Effort and Biological Data Reporting Systems (Conservation Measures 23-04 and 23-05), including requirements for the provision of haul-by-haul data.
2. During normal fishing operations, all data required by the CCAMLR *Scientific Observers Manual* for krill fisheries will be collected.
3. Detailed information on the configuration of every commercial trawl used during normal fishing operations and every research net used during required research operations will be reported to CCAMLR no later than one month after the conclusion of each fishing trip.
4. Data collected from research net hauls shall include:
 - (i) the start and end positions and times of the haul;
 - (ii) the date on which the haul was conducted;
 - (iii) characteristics of the haul such as tow speed, the maximum amount of wire payed out during a tow, the average wire angle during the tow, and calibrated flow-meter values that can be used to provide accurate measures of volume filtered;
 - (iv) an estimate of the total catch (in numbers or weight) of krill; and
 - (v) a random sample of up to 200 krill or the entire catch, whichever is less, to be taken from the haul by the observer – the length, sex and maturity stage should be measured and recorded for all krill according to protocols in the CCAMLR *Scientific Observers Manual*.

5. At a minimum, data collected from acoustic transects shall:
 - (i) as far as possible, be recorded following protocols specified for the CCAMLR-2000 Survey;
 - (ii) be linked to position data recorded from a GPS;
 - (iii) be continuously recorded and then electronically archived every five days or whenever the vessel moves between exploratory units, whichever occurs most frequently.
6. Data collected during research operations conducted by fishing vessels shall be reported to CCAMLR no later than one month after the conclusion of each fishing trip.
7. Data collected by Contracting Parties conducting fishery-independent research operations shall, as applicable, be submitted to CCAMLR following guidelines for the submission of CEMP data and data collected during the CCAMLR-2000 Survey. These data shall be submitted in sufficient time to be considered by the next meeting of WG-EMM.

ANNEX 51-04/B

RESEARCH PLANS FOR EXPLORATORY KRILL FISHERIES

1. Activities under this Research Plan shall not be exempted from any conservation measure in force.
2. This plan applies to all statistical subarea or divisions.
3. A schematic representation of the plans described herein is provided in Figure 1.
4. Contracting Parties intending to conduct exploratory krill fisheries shall choose one of the following four Research and Data Collection Plans and advise CCAMLR of their choice at least one month prior to initiating any fishing activities.
 - (i) predator monitoring
 - (ii) a research survey conducted from a scientific vessel
 - (iii) acoustic transects by fishing vessels, or
 - (iv) research trawls by fishing vessels.
5. In cases where Contracting Parties select plan (i), predator monitoring, from the list in paragraph 4 above, those Parties shall, as far as possible, follow CEMP Standard Methods. Monitoring shall be conducted for a period of time sufficient both to cover the entire breeding period of land-based predators and to cover the duration of any exploratory fishing that occurs during their breeding season.

6. In cases where Contracting Parties select plan (ii), research survey conducted from a scientific vessel, from the list in paragraph 4 above, Contracting Parties shall, as far as possible, follow all data collection and analysis protocols specified for the CCAMLR-2000 Survey.
7. In cases where Contracting Parties select plans (iii) acoustic transects by fishing vessels, or (iv) research trawls by fishing vessels, from the list in paragraph 4 above, vessels participating in exploratory krill fisheries shall first conduct normal exploratory fishing operations and then conduct additional research requirements. Vessels will conduct normal fishing operations until they voluntarily decide to stop fishing for the season or until the catch limit for the exploratory fishery is reached. Vessels will then complete all required research operations. The research requirements must be completed within a fishing season.
8. For the purposes of this conservation measure, exploratory units are defined as areas of 1° latitude by 1° longitude size, and the vertices of these units shall occur at integer points of latitude and longitude within statistical subarea or divisions.
9. During normal exploratory fishing operations, vessels can choose to fish in any exploratory unit, however one set of acoustic transects or one set of research hauls must be conducted in each exploratory unit visited during normal fishing operations.
10. Plans (iii) acoustic transects by fishing vessels, and (iv) research trawls by fishing vessels, from the list in paragraph 4 above shall be conducted as follows:
 - (i) upon completion (either voluntarily or if the catch limit has been reached) of normal exploratory fishing operations, the vessel will transit to the nearest previously unvisited exploratory unit and begin research operations;
 - (ii) the vessel will determine how many previously unvisited exploratory units must be surveyed during research operations by dividing the catch obtained during normal exploratory fishing operations by 2 000 tonnes and rounding that number to the nearest integer;
 - (iii) the vessel will then select a number of exploratory units equal to the number of units determined by the calculation in item (ii) above and conduct one set of acoustic transects or one set of research hauls in each of these units;
 - (iv) exploratory units visited during research operations must not have been visited during normal exploratory fishing operations;
 - (v) the survey will be conducted in a way that ensures the exploratory units visited during research operations will surround the units in which normal exploratory fishing operations previously occurred.
11. Research hauls shall be conducted with nekton trawls commonly used in scientific research (e.g. IKMT or RMT type nets) that have 4–5 mm mesh, including the codend. Every research haul shall be a randomly located, oblique haul made to a depth of 200 m or 25 m above the bottom (whichever is less) with a duration of 0.5 h. A set of research hauls is defined as three research hauls separated by a minimum of 10 n miles.

12. Acoustic transects shall be conducted using a scientific-quality echosounder collecting information at 120 kHz. The echosounder should be calibrated. Every acoustic transect shall be a randomly located, continuous path travelled at constant speed of 10 knots or less and in a constant direction. The minimum distance between the start and end points of a transect shall be 30 n miles, and a set of acoustic transects is defined as two transects separated by at least 10 n miles.

13. All acoustic transects, both during normal exploratory fishing operations and research operations, shall be accompanied by at least one net haul. These hauls can be conducted either with commercial trawls or with research trawls. Trawls that accompany acoustic transects can be conducted during the transect or immediately after the completion of the transect. In the latter case, the trawl shall be conducted along a previous segment of the transect line. Trawls that accompany acoustic transects shall be at least 0.5 h in duration, or sufficient time to achieve a representative sample, and the data collected from these hauls shall be the same as those required for research hauls.

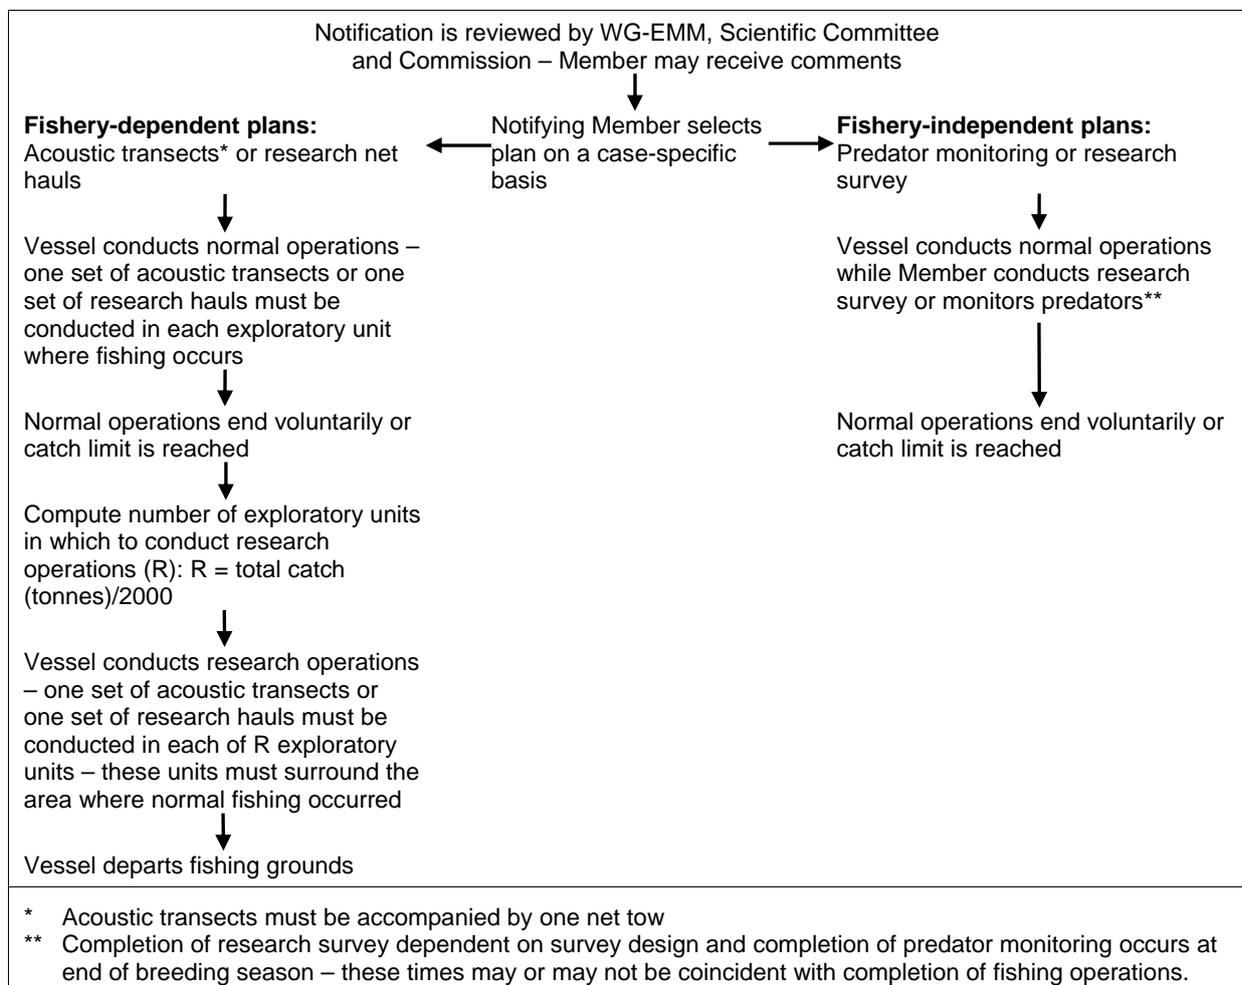

Figure 1: Schematic description of main operations to be conducted during the planning and prosecution of exploratory krill fisheries.

CONSERVATION MEASURE 51-05 (2008)
Limits on the exploratory fishery for *Euphausia superba*
in Statistical Subarea 48.6 in the 2008/09 season

Species	krill
Area	48.6
Season	2008/09
Gear	trawl

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-02, and notes that this measure would be for one year and that data arising from these activities would be reviewed by the Scientific Committee:

- | | |
|-----------------------|---|
| Access | 1. Fishing for <i>Euphausia superba</i> in Statistical Subarea 48.6 shall be limited to the exploratory trawl fishery by Norway. The fishery shall be conducted by one (1) Norwegian flagged vessel using one of the fishing techniques in Annex 21-03/A. |
| Catch limit | 2. The total catch of <i>Euphausia superba</i> in Statistical Subarea 48.6 in the 2008/09 season shall not exceed a precautionary catch limit of 15 000 tonnes, of which no more than 11 250 tonnes shall be taken from areas within 60 n miles of known breeding colonies of land-based krill-dependent predators. |
| Season | 3. For the purpose of the exploratory fishery for <i>Euphausia superba</i> in Statistical Subarea 48.6, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009. |
| Mitigation | 4. The exploratory fishery for <i>Euphausia superba</i> in Statistical Subarea 48.6 shall be carried out in accordance with the provisions of Conservation Measure 25-03 so as to minimise the incidental mortality of seabirds in the course of fishing.

5. The use of marine mammal exclusion devices on trawls is mandatory. |
| Observers | 6. The vessel participating in the fishery shall have one observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible an additional observer, on board throughout all fishing activities within the fishing period. |
| Data:
catch/effort | 7. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:

(i) the Ten-day Catch and Effort Reporting System set out in Conservation Measure 23-02;

(ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.

8. For the purpose of Conservation Measures 23-01 and 23-04, the target species is <i>Euphausia superba</i> and by-catch species are defined as any species other than <i>Euphausia superba</i> . |

- Data: biological 9. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 10. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the Research Plan described in Conservation Measure 51-04.
- Environmental protection 11. Conservation Measure 26-01 applies.
12. There shall be no offal discharge in this fishery.

CONSERVATION MEASURE 52-01 (2008)
Limits on the fishery for crab in Statistical Subarea 48.3
in the 2008/09 season

Species	crab
Area	48.3
Season	2008/09
Gear	pot

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 31-01:

- Access 1. The fishery for crab in Statistical Subarea 48.3 shall be conducted by vessels using pots only. The crab fishery is defined as any commercial harvest activity in which the target species is any member of the crab group (Order Decapoda, Suborder Reptantia).
2. The crab fishery shall be limited to one vessel per Member.
3. Each Member intending to participate in the crab fishery shall notify the CCAMLR Secretariat at least three months in advance of starting fishing of the name, type, size, registration number, radio call sign, and Research and Fishery Operation Plans of the vessel that the Member has authorised to participate in the crab fishery.
- Catch limit 4. The total catch of crab in Statistical Subarea 48.3 in the 2008/09 season shall not exceed a precautionary catch limit of 1 600 tonnes.
5. The crab fishery shall be limited to sexually mature male crabs – all female and undersized male crabs caught shall be released unharmed. In the case of *Paralomis spinosissima* and *Paralomis formosa*, males with a minimum carapace width of 94 and 90 mm respectively, may be retained in the catch.
- Season 6. For the purpose of the pot fishery for crab in Statistical Subarea 48.3, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009, or until the catch limit is reached, whichever is sooner.
- By-catch 7. The by-catch of *Dissostichus eleginoides* shall be counted against the catch limit in the fishery for *Dissostichus eleginoides* in Statistical Subarea 48.3.

- Observers 8. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period. Scientific observers shall be afforded unrestricted access to the catch for statistical random sampling prior to, as well as after, sorting by the crew.
- Data: catch/effort 9. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Ten-day Catch and Effort Reporting System set out in Conservation Measure 23-02;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
10. For the purpose of Conservation Measures 23-02 and 23-04 the target species is crab and by-catch species are defined as any species other than crab.
- Data: biological 11. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 12. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the data requirements described in Annex 52-01/A and the experimental harvest regime described in Annex 52-01/B. Data collected for the period up to 31 August 2009 shall be reported to CCAMLR by 30 September 2009 so that the data will be available to the meeting of the Working Group on Fish Stock Assessment (WG-FSA) in 2009. Such data collected after 31 August 2009 shall be reported to CCAMLR not later than three months after the closure of the fishery.
- Environmental protection 13. Conservation Measure 26-01 applies.

ANNEX 52-01/A

DATA REQUIREMENTS

Catch and Effort Data:

Cruise Descriptions

cruise code, vessel code, permit number, year.

Pot Descriptions

diagrams and other information, including pot shape, dimensions, mesh size, funnel position, aperture and orientation, number of chambers, presence of an escape port.

Effort Descriptions

date, time, latitude and longitude of the start of the set, compass bearing of the set, total number of pots set, spacing of pots on the line, number of pots lost, depth, soak time, bait type.

Catch Descriptions

retained catch in numbers and weight, by-catch of all species (see Table 1), incremental record number for linking with sample information.

Table 1: Data requirements for by-catch species in the crab fishery in Statistical Subarea 48.3.

Species	Data requirements
<i>Dissostichus eleginoides</i>	Numbers and estimated total weight
<i>Notothenia rossii</i>	Numbers and estimated total weight
Other species	Estimated total weight

Biological Data:

For these data, crabs are to be sampled from the line hauled just prior to noon, by collecting the entire contents of a number of pots spaced at intervals along the line so that between 35 and 50 specimens are represented in the subsample.

Cruise Descriptions

cruise code, vessel code, permit number.

Sample Descriptions

date, position at start of the set, compass bearing of the set, line number.

Data

species, sex, length of at least 35 individuals, presence/absence of rhizocephalan parasites, record of the destination of the crab (kept, discarded, destroyed), record of the pot number from which the crab comes.

ANNEX 52-01/B

EXPERIMENTAL HARVEST REGIME

This annex applies to all crab fishing within Statistical Subarea 48.3. Every vessel participating in the crab fishery in Statistical Subarea 48.3 shall conduct fishing operations in accordance with an experimental harvest regime as outlined below:

1. Vessels shall conduct the experimental harvest regime at the start of their first season of participation in the crab fishery and the following conditions shall apply:

- (i) every vessel when undertaking an experimental harvesting regime shall expend its first 200 000 pot hours of effort within a total area delineated by 12 blocks of 0.5° latitude by 1.0° longitude. For the purposes of this conservation measure, these blocks shall be numbered A to L. In Annex 52-01/C, the blocks are illustrated (Figure 1), and the geographic position is denoted by the coordinates of the northeast corner of the block. For each string, pot hours shall be calculated by taking the total number of pots on the string and multiplying that number by the soak time (in hours) for that string. Soak time shall be defined for each string as the time between start of setting and start of hauling;
 - (ii) vessels shall not fish outside the area delineated by the 0.5° latitude by 1.0° longitude blocks prior to completing the experimental harvesting regime;
 - (iii) vessels shall not expend more than 30 000 pot hours in any single block of 0.5° latitude by 1.0° longitude;
 - (iv) if a vessel returns to port before it has expended 200 000 pot hours in the experimental harvesting regime, the remaining pot hours shall be expended before it can be considered that the vessel has completed the experimental harvesting regime;
 - (v) after completing 200 000 pot hours of experimental fishing, it shall be considered that vessels have completed the experimental harvesting regime and they shall be permitted to commence fishing in a normal fashion.
2. Data collected during the experimental harvest regime up to 30 June 2009 shall be submitted to CCAMLR by 31 August 2009.
3. Vessels that complete the experimental harvest regime shall not be required to conduct experimental fishing in future seasons.
4. Fishing vessels shall participate in the experimental harvest regime independently (i.e. vessels may not cooperate to complete phases of the experiment).
5. Crabs taken by any vessel for research purposes will be considered as part of any catch limits in force for each species taken, and shall be reported to CCAMLR as part of the annual STATLANT returns.
6. All vessels participating in the experimental harvest regime shall carry at least one scientific observer, appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board during all fishing activities.

LOCATIONS OF FISHING AREAS FOR THE EXPERIMENTAL HARVEST REGIME

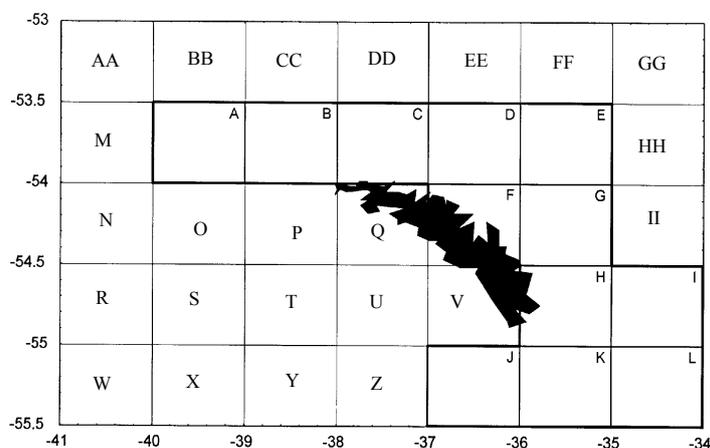

Figure 1: Operational area for Phase 1 of the experimental harvest regime for the fishery for crab in Statistical Subarea 48.3.

CONSERVATION MEASURE 52-02 (2008) Limits on the exploratory fishery for crab in Statistical Subarea 48.2 in the 2008/09 season

Species	crab
Area	48.2
Season	2008/09
Gear	pot

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-01, and notes that this measure would be for one year and that data arising from these activities would be reviewed by the Scientific Committee:

- | | |
|-------------|---|
| Access | <ol style="list-style-type: none"> 1. The fishery for crab in Statistical Subarea 48.2 shall be conducted by vessels using pots only. The crab fishery is defined as any harvest activity in which the target species is any member of the crab group (Order Decapoda, Suborder Reptantia). The fishery in the 2008/09 season shall be conducted by one (1) Russian flagged vessels using pots only. 2. The crab fishery shall be limited to one vessel per Member. |
| Catch limit | <ol style="list-style-type: none"> 3. The total catch of crab in Statistical Subarea 48.2 in the 2008/09 season shall not exceed a precautionary catch limit of 250 tonnes. 4. The crab fishery shall be limited to sexually mature male crabs – all female and undersized male crabs caught shall be released unharmed. In the case of <i>Paralomis spinosissima</i> and <i>Paralomis formosa</i>, males with a minimum carapace width of 94 and 90 mm respectively, may be retained in the catch. |

- Season 5. For the purpose of the pot fishery for crab in Statistical Subarea 48.2, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009, or until the catch limit is reached, whichever is sooner.
- By-catch 6. All by-catch of finfish shall be recorded for length, identified to species and then released to the sea with the least possible handling. Before release, all live specimens of *Dissostichus* spp. shall be measured and tagged. Full biological data shall be taken from all dead finfish by-catch. A total by-catch limit of 0.5 tonnes shall apply for all dead finfish.
- Observers 7. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period. Scientific observers shall be afforded unrestricted access to the catch for statistical random sampling prior to, as well as after, sorting by the crew.
- Data: catch/effort 8. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Ten-day Catch and Effort Reporting System set out in Conservation Measure 23-02;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
9. For the purpose of Conservation Measures 23-02 and 23-04 the target species is crab and by-catch species are defined as any species other than crab.
- Data: biological 10. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 11. Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the data requirements described in Annex 52-02/A and the experimental harvest regime described in Annex 52-02/B. Data collected for the period up to 31 August 2009 shall be reported to CCAMLR by 30 September 2009 so that the data will be available to the meeting of the Working Group on Fish Stock Assessment (WG-FSA) in 2009. Such data collected after 31 August 2009 shall be reported to CCAMLR not later than three months after the closure of the fishery.

- Environmental protection
12. Conservation Measure 26-01 applies.
 13. Conservation Measures 22-06 and 22-07 apply.

ANNEX 52-02/A

DATA REQUIREMENTS

Catch and Effort Data:

Cruise Descriptions

cruise code, vessel code, permit number, year.

Pot Descriptions

diagrams and other information, including pot shape, dimensions, mesh size, funnel position, aperture and orientation, number of chambers, presence of an escape port.

Effort Descriptions

date, time, latitude and longitude of the start of the set, compass bearing of the set, total number of pots set, spacing of pots on the line, number of pots lost, depth, soak time, bait type.

Catch Descriptions

retained catch in numbers and weight, by-catch of all species (see Table 1), incremental record number for linking with sample information.

Table 1: Data requirements for by-catch species in the crab fishery in Statistical Subarea 48.3.

Species	Data requirements
<i>Dissostichus eleginoides</i>	Numbers and estimated total weight
<i>Notothenia rossii</i>	Numbers and estimated total weight
Other species	Estimated total weight

Biological Data:

For these data, crabs are to be sampled from the line hauled just prior to noon, by collecting the entire contents of a number of pots spaced at intervals along the line so that between 35 and 50 specimens are represented in the subsample.

Cruise Descriptions

cruise code, vessel code, permit number.

Sample Descriptions

date, position at start of the set, compass bearing of the set, line number.

Data

species, sex, length of at least 35 individuals, presence/absence of rhizocephalan parasites, record of the destination of the crab (kept, discarded, destroyed), record of the pot number from which the crab comes.

EXPERIMENTAL HARVEST REGIME

This annex applies to all crab fishing within Statistical Subarea 48.2. Every vessel participating in the crab fishery in Statistical Subarea 48.2 shall conduct fishing operations in accordance with an experimental harvest regime as outlined below:

1. Vessels shall conduct the experimental harvest regime at the start of their first season of participation in the crab fishery and the following conditions shall apply:
 - (i) every vessel when undertaking an experimental harvesting regime shall expend its first 200 000 pot hours of effort within a total area delineated by 12 blocks of 0.5° latitude by 1.0° longitude. For the purposes of this conservation measure, these blocks shall be numbered A to L. In Annex 52-02/C, the blocks are illustrated (Figure 1), and the geographic position is denoted by the coordinates of the northeast corner of the block. For each string, pot hours shall be calculated by taking the total number of pots on the string and multiplying that number by the soak time (in hours) for that string. Soak time shall be defined for each string as the time between start of setting and start of hauling;
 - (ii) vessels shall not fish outside the area delineated by the 0.5° latitude by 1.0° longitude blocks prior to completing the experimental harvesting regime;
 - (iii) vessels shall not expend more than 30 000 pot hours in any single block of 0.5° latitude by 1.0° longitude;
 - (iv) if a vessel returns to port before it has expended 200 000 pot hours in the experimental harvesting regime, the remaining pot hours shall be expended before it can be considered that the vessel has completed the experimental harvesting regime;
 - (v) after completing 200 000 pot hours of experimental fishing, it shall be considered that vessels have completed the experimental harvesting regime and they shall be permitted to commence fishing in a normal fashion.
2. Data collected during the experimental harvest regime up to 30 June 2009 shall be submitted to CCAMLR by 31 August 2009.
3. Vessels that complete the experimental harvest regime shall not be required to conduct experimental fishing in future seasons.
4. Fishing vessels shall participate in the experimental harvest regime independently (i.e. vessels may not cooperate to complete phases of the experiment).
5. Crabs taken by any vessel for research purposes will be considered as part of any catch limits in force for each species taken, and shall be reported to CCAMLR as part of the annual STATLANT returns.

6. All vessels participating in the experimental harvest regime shall carry at least one scientific observer, appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board during all fishing activities.

ANNEX 52-02/C

LOCATIONS OF FISHING AREAS FOR THE EXPERIMENTAL HARVEST REGIME

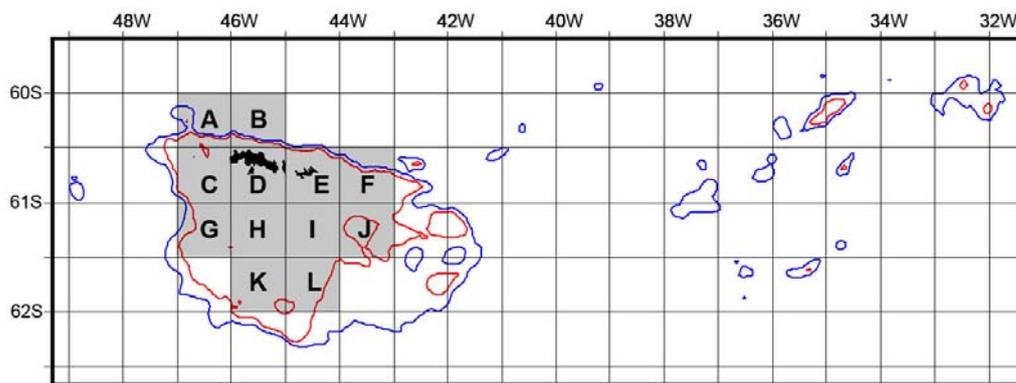

Figure 1: Operational area for Phase 1 of the experimental harvest regime for the exploratory fishery for crab in Statistical Subarea 48.2.

**CONSERVATION MEASURE 52-03 (2008)
Limits on the exploratory fishery for crab in
Statistical Subarea 48.4 in the 2008/09 season**

Species	crab
Area	48.4
Season	2008/09
Gear	pot

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 21-01, and notes that this measure would be for one year and that data arising from these activities would be reviewed by the Scientific Committee:

- | | |
|-------------|---|
| Access | <ol style="list-style-type: none"> 1. The fishery for crab in Statistical Subarea 48.4 shall be conducted by vessels using pots only. The crab fishery is defined as any harvest activity in which the target species is any member of the crab group (Order Decapoda, Suborder Reptantia). The fishery in the 2008/09 season shall be conducted by one (1) Russian flagged vessels using pots only. 2. The crab fishery shall be limited to one vessel per Member. |
| Catch limit | <ol style="list-style-type: none"> 3. The total catch of crab in Statistical Subarea 48.4 in the 2008/09 season shall not exceed a precautionary catch limit of 10 tonnes. 4. The crab fishery shall be limited to sexually mature male crabs – all female and undersized male crabs caught shall be released unharmed. In |

the case of *Paralomis spinosissima* and *Paralomis formosa*, males with a minimum carapace width of 94 and 90 mm respectively, may be retained in the catch.

- | | | |
|-----------------------|-----|---|
| Season | 5. | For the purpose of the pot fishery for crab in Statistical Subarea 48.4, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009, or until the catch limit is reached, whichever is sooner. |
| By-catch | 6. | All by-catch of finfish shall be recorded for length, identified to species and then released to the sea with the least possible handling. Before release, all live specimens of <i>Dissostichus</i> spp. shall be measured and tagged. Full biological data shall be taken from all dead finfish by-catch. A total by-catch limit of 0.5 tonnes shall apply for all dead finfish. |
| Observers | 7. | Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period. Scientific observers shall be afforded unrestricted access to the catch for statistical random sampling prior to, as well as after, sorting by the crew. |
| Data:
catch/effort | 8. | For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply: <ul style="list-style-type: none"> (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 23-01; (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis. |
| | 9. | For the purpose of Conservation Measures 23-02 and 23-04 the target species is crab and by-catch species are defined as any species other than crab. |
| Data:
biological | 10. | Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation. |
| Research | 11. | Each vessel participating in this exploratory fishery shall conduct fishery-based research in accordance with the data requirements described in Annex 52-03/A and the experimental harvest regime described in Annex 52-03/B. Data collected for the period up to 31 August 2009 shall be reported to CCAMLR by 30 September 2009 so that the data will be available to the meeting of the Working Group on Fish Stock Assessment (WG-FSA) in 2009. Such data collected after 31 August 2009 shall be reported to CCAMLR not later than three months after the closure of the fishery. |

Environmental protection 12. Conservation Measure 26-01 applies.

ANNEX 52-03/A

DATA REQUIREMENTS

Catch and Effort Data:

Cruise Descriptions

cruise code, vessel code, permit number, year.

Pot Descriptions

diagrams and other information, including pot shape, dimensions, mesh size, funnel position, aperture and orientation, number of chambers, presence of an escape port.

Effort Descriptions

date, time, latitude and longitude of the start of the set, compass bearing of the set, total number of pots set, spacing of pots on the line, number of pots lost, depth, soak time, bait type.

Catch Descriptions

retained catch in numbers and weight, by-catch of all species (see Table 1), incremental record number for linking with sample information.

Table 1: Data requirements for by-catch species in the crab fishery in Statistical Subarea 48.3.

Species	Data requirements
<i>Dissostichus eleginoides</i>	Numbers and estimated total weight
<i>Notothenia rossii</i>	Numbers and estimated total weight
Other species	Estimated total weight

Biological Data:

For these data, crabs are to be sampled from the line hauled just prior to noon, by collecting the entire contents of a number of pots spaced at intervals along the line so that between 35 and 50 specimens are represented in the subsample.

Cruise Descriptions

cruise code, vessel code, permit number.

Sample Descriptions

date, position at start of the set, compass bearing of the set, line number.

Data

species, sex, length of at least 35 individuals, presence/absence of rhizocephalan parasites, record of the destination of the crab (kept, discarded, destroyed), record of the pot number from which the crab comes.

EXPERIMENTAL HARVEST REGIME

The following annex applies to all crab fishing within Statistical Subarea 48.4. Every vessel participating in the crab fishery in Statistical Subarea 48.4 shall conduct fishing operations in accordance with an experimental harvest regime as outlined below:

1. Vessels shall conduct the experimental harvest regime at the start of their first season of participation in the crab fishery and the following conditions shall apply:
 - (i) every vessel when undertaking an experimental harvesting regime shall expend its first 30 000 pot hours of effort within a total area delineated by seven blocks distributed amongst seven island groups. For the purposes of this conservation measure, these blocks shall be numbered A to G. In Annex 52-03/C, the blocks are illustrated (Figure 1). For each string, pot hours shall be calculated by taking the total number of pots on the string and multiplying that number by the soak time (in hours) for that string. Soak time shall be defined for each string as the time between start of setting and start of hauling;
 - (ii) vessels shall not fish outside the area delineated by the seven blocks prior to completing the experimental harvesting regime;
 - (iii) vessels shall not expend more than 4 500 pot hours in any single island group;
 - (iv) if a vessel returns to port before it has expended 30 000 pot hours in the experimental harvesting regime, the remaining pot hours shall be expended before it can be considered that the vessel has completed the experimental harvesting regime;
 - (v) after completing 30 000 pot hours of experimental fishing, it shall be considered that vessels have completed the experimental harvesting regime and they shall be permitted to commence fishing in a normal fashion.
2. Data collected during the experimental harvest regime up to 30 June 2009 shall be submitted to CCAMLR by 31 August 2009.
3. Vessels that complete the experimental harvest regime shall not be required to conduct experimental fishing in future seasons.
4. Fishing vessels shall participate in the experimental harvest regime independently (i.e. vessels may not cooperate to complete phases of the experiment).
5. Crabs taken by any vessel for research purposes will be considered as part of any catch limits in force for each species taken, and shall be reported to CCAMLR as part of the annual STATLANT returns.
6. All vessels participating in the experimental harvest regime shall carry at least one scientific observer, appointed in accordance with the CCAMLR Scheme of International Scientific Observation, on board during all fishing activities.

**LOCATIONS OF FISHING AREAS FOR THE
EXPERIMENTAL HARVEST REGIME**

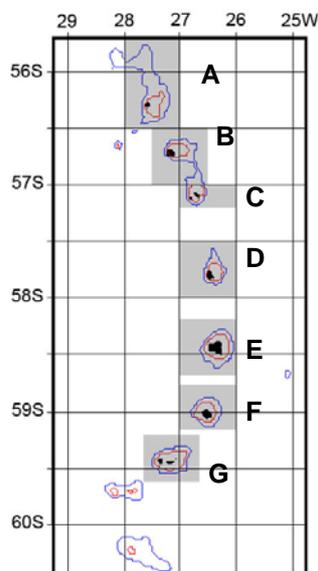

Figure 1: Operational area for Phase 1 of experimental harvest regime for the exploratory fishery for crab in Subarea 48.4.

CONSERVATION MEASURE 61-01 (2008)
Limits on the exploratory fishery for *Martialia hyadesi*
in Statistical Subarea 48.3 in the 2008/09 season

Species	squid
Area	48.3
Season	2008/09
Gear	jig

The Commission hereby adopts the following conservation measure in accordance with Conservation Measures 21-02 and 31-01:

- | | |
|-------------|---|
| Access | 1. Fishing for <i>Martialia hyadesi</i> in Statistical Subarea 48.3 shall be limited to the exploratory jig fishery by notifying countries. The fishery shall be conducted by vessels using jigs only. |
| Catch limit | 2. The total catch of <i>Martialia hyadesi</i> in Statistical Subarea 48.3 in the 2008/09 season shall not exceed a precautionary catch limit of 2 500 tonnes. |
| Season | 3. For the purpose of the exploratory jig fishery for <i>Martialia hyadesi</i> in Statistical Subarea 48.3, the 2008/09 season is defined as the period from 1 December 2008 to 30 November 2009, or until the catch limit is reached, whichever is sooner. |
| Observers | 4. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of |

International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period.

- Data: catch/effort 5. For the purpose of implementing this conservation measure in the 2008/09 season, the following shall apply:
- (i) the Ten-day Catch and Effort Reporting System set out in Conservation Measure 23-02;
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 23-04. Fine-scale data shall be submitted on a haul-by-haul basis.
6. For the purpose of Conservation Measures 23-02 and 23-04, the target species is *Martialia hyadesi* and by-catch species are defined as any species other than *Martialia hyadesi*.
- Data: biological 7. Fine-scale biological data, as required under Conservation Measure 23-05, shall be collected and recorded. Such data shall be reported in accordance with the CCAMLR Scheme of International Scientific Observation.
- Research 8. Each vessel participating in this exploratory fishery shall collect data in accordance with the Data Collection Plan described in Annex 61-01/A. Data collected pursuant to the plan for the period up to 31 August 2009 shall be reported to CCAMLR by 30 September 2009.
- Environmental protection 9. Conservation Measure 26-01 applies.

ANNEX 61-01/A

**DATA COLLECTION PLAN FOR EXPLORATORY
SQUID (*MARTIALIA HYADESI*) FISHERIES
IN STATISTICAL SUBAREA 48.3**

1. All vessels will comply with conditions set by CCAMLR. These include data required to complete the data form (Form TAC) for the Ten-day Catch and Effort Reporting System, as specified by Conservation Measure 23-02; and data required to complete the CCAMLR standard fine-scale catch and effort data form for a squid jig fishery (Form C3). This includes numbers of seabirds and marine mammals of each species caught and released or killed.
2. All data required by the CCAMLR *Scientific Observers Manual* for squid fisheries will be collected. These include:
 - (i) vessel and observer program details (Form S1)
 - (ii) catch information (Form S2)
 - (iii) biological data (Form S3).

CONSERVATION MEASURE 91-01 (2004)
Procedure for according protection to CEMP sites

Species	all
Area	general

The Commission,

Bearing in mind that the Scientific Committee has established a system of sites contributing data to the CCAMLR Ecosystem Monitoring Program (CEMP), and that additions may be made to this system in the future,

Recalling that it is not the purpose of the protection accorded to CEMP sites to restrict fishing activity in adjacent waters,

Recognising that studies being undertaken at CEMP sites may be vulnerable to accidental or wilful interference,

Concerned, therefore, to provide protection for CEMP sites, scientific investigations and the Antarctic marine living resources therein, in cases where a Member or Members of the Commission conducting or planning to conduct CEMP studies believes such protection to be desirable,

hereby adopts the following conservation measure in accordance with Article IX of the Convention:

1. In cases where a Member or Members of the Commission conducting, or planning to conduct, CEMP studies at a CEMP site believe it desirable that protection should be accorded to the site, it, or they, shall prepare a draft management plan in accordance with Annex A to this conservation measure.
2. Each such draft management plan shall be sent to the Executive Secretary for transmission to all Members of the Commission for their consideration at least three months before its consideration by WG-EMM.
3. The draft management plan shall be considered in turn by WG-EMM, the Scientific Committee and the Commission. In consultation with the Member or Members of the Commission which drew up the draft management plan, it may be amended by any of these bodies. If a draft management plan is amended by either WG-EMM or the Scientific Committee, it shall be passed on in its amended form either to the Scientific Committee or to the Commission as the case may be.
4. If, following completion of the procedures outlined in paragraphs 1 to 3 above, the Commission considers it appropriate to accord the desired protection to the CEMP site, the Commission shall adopt a Resolution calling on Members to comply, on a voluntary basis, with the provisions of the draft management plan, pending the conclusion of action in accordance with paragraphs 5 to 8 below.
5. The Executive Secretary shall communicate such a Resolution to SCAR, the Antarctic Treaty Consultative Parties and, if appropriate, the Contracting Parties to other components of the Antarctic Treaty System which are in force.

6. Unless, before the opening date of the next regular meeting of the Commission, the Executive Secretary has received:
 - (i) an indication from an Antarctic Treaty Consultative Party that it desires the resolution to be considered at a Consultative Meeting; or
 - (ii) an objection from any other quarter referred to in paragraph 5 above;

the Commission may, by means of a conservation measure, confirm its adoption of the management plan for the CEMP site and shall include the management plan in Annex 91-01/A of that conservation measure.
7. In the event that an Antarctic Treaty Consultative Party has indicated its desire for the Resolution to be considered at a Consultative Meeting, the Commission shall await the outcome of such consideration, and may then proceed accordingly.
8. If objection is received in accordance with paragraphs 6(ii) or 7 above, the Commission may institute such consultations as it may deem appropriate to achieve the necessary protection and to avoid interference with the achievement of the principles and purposes of, and measures approved under, the Antarctic Treaty and other components of the Antarctic Treaty System which are in force.
9. The management plan of any site may be amended by decision of the Commission. In such cases full account shall be taken of the advice of the Scientific Committee. Any amendment which increases the area of the site or adds to categories or types of activities that would jeopardise the objectives of the site shall be subject to the procedures set out in paragraphs 5 to 8 above.
10. Entry into a CEMP site described by a conservation measure shall be prohibited except for the purposes authorised in the relevant management plan for the site and in accordance with a permit issued under paragraph 11.
11. Each Contracting Party shall, as appropriate, issue permits authorising its nationals to carry out activities consistent with the provisions of the management plans for CEMP sites and shall take such other measures, within its competence, as may be necessary to ensure that its nationals comply with the management plans for such sites.
12. Copies of such permits shall be sent to the Executive Secretary as soon as practical after they are issued. Each year the Executive Secretary shall provide the Commission and the Scientific Committee with a brief description of the permits that have been issued by the Parties. In cases where permits are issued for purposes not directly related to the conduct of CEMP studies at the site in question, the Executive Secretary shall forward a copy of the permit to the Member or Members of the Commission conducting CEMP studies at that site.
13. Each management plan shall be reviewed every five years by WG-EMM and the Scientific Committee to determine whether it requires revision and whether continued protection is necessary. The Commission may then act accordingly.

**INFORMATION TO BE INCLUDED IN MANAGEMENT
PLANS FOR CEMP SITES**

A. GEOGRAPHICAL INFORMATION

1. A description of the site, and any buffer zone within the site, including:
 - 1.1 geographical coordinates
 - 1.2 natural features, including those that define the site
 - 1.3 boundary markers
 - 1.4 access points (pedestrian, vehicular, airborne, sea-borne)
 - 1.5 pedestrian and vehicular routes
 - 1.6 preferred anchorages
 - 1.7 location of structures within the site
 - 1.8 restricted areas within the site
 - 1.9 location of nearby scientific stations or other facilities
 - 1.10 location of areas or sites, in or near the site, which have been accorded protected status in accordance with measures adopted under the Antarctic Treaty or other components of the Antarctic Treaty System that are in force.

2. Maps, including the following elements where appropriate:
 - 2.1 Essential features
 - 2.1.1 Title
 - 2.1.2 Latitude and longitude
 - 2.1.3 Scale bar with numerical scale
 - 2.1.4 Comprehensive legend
 - 2.1.5 Adequate and approved place names
 - 2.1.6 Map projection and spheroid modification (indicate beneath the scale bar)
 - 2.1.7 North arrow
 - 2.1.8 Contour interval
 - 2.1.9 Date of map preparation
 - 2.1.10 Map preparer
 - 2.1.11 Date of image collection (where applicable)

 - 2.2 Essential topographical features
 - 2.2.1 Coastline, rock, and ice
 - 2.2.2 Peaks and ridgelines
 - 2.2.3 Ice margins and other glacial features, clear delineation between ice/snow and ice-free ground; if glacial features are part of the boundary, date of survey should be indicated
 - 2.2.4 Contours (labelled as appropriate), survey points, and spot heights
 - 2.2.5 Bathymetric contours of marine areas, with relevant bottom features if known

 - 2.3 Natural features
 - 2.3.1 Lakes, ponds, and streams

- 2.3.2 Moraines, screes, cliffs, beaches
- 2.3.3 Beach areas
- 2.3.4 Bird and seal concentrations or breeding colonies
- 2.3.5 Extensive areas of vegetation
- 2.3.6 Wildlife access areas to the sea
- 2.4 Anthropogenic features
 - 2.4.1 Stations
 - 2.4.2 Field huts, refuges
 - 2.4.3 Campsites
 - 2.4.4 Roads and vehicle tracks, footpaths, feature overlaps
 - 2.4.5 Approach paths and landing areas for airplanes and helicopters
 - 2.4.6 Approach paths and access points for boats (wharfs, jetties)
 - 2.4.7 Power supplies, cables
 - 2.4.8 Antennae
 - 2.4.9 Fuel storage areas
 - 2.4.10 Water reservoirs and pipes
 - 2.4.11 Emergency caches
 - 2.4.12 Markers, signs
 - 2.4.13 Historic sites or artefacts, archaeological sites
 - 2.4.14 Scientific installations or sampling areas
 - 2.4.15 Site contamination or modification
- 2.5 Boundaries
 - 2.5.1 Boundary of area
 - 2.5.2 Boundaries of subsidiary zones and protected areas within the mapping area
 - 2.5.3 Boundary signs and markers (including cairns)
 - 2.5.4 Boat/aircraft approach routes
 - 2.5.5 Navigation markers or beacons
 - 2.5.6 Survey points and markers
- 2.6 Other mapping guidelines
 - 2.6.1 Verify all features and boundaries by GPS if possible
 - 2.6.2 Ensure visual balance among elements
 - 2.6.3 Appropriate shading (shading should be distinguishable on a photocopy of the map)
 - 2.6.4 Correct and appropriate text; no feature overlap
 - 2.6.5 Appropriate legend; use SCAR approved map symbols when possible
 - 2.6.6 Text appropriately shadowed on image data
 - 2.6.7 Photographs may be used where appropriate
 - 2.6.8 Official maps should be in black and white
 - 2.6.9 Most likely two or more maps will be needed for a management plan, one showing the site and the vicinity, and one detailed map of the site showing features essential for the management plan objectives; other maps may be useful (i.e. geological map of the area, three dimensional terrain model).

B. BIOLOGICAL FEATURES

1. A description of the biological features of the site, in both space and time, which it is the purpose of the management plan to protect.

C. CEMP STUDIES

1. A full description of the CEMP studies being conducted or planned to be conducted, including the species and parameters which are being or are to be studied.

D. PROTECTION MEASURES

1. Statements of prohibited activities:
 - 1.1 throughout the site at all times of the year
 - 1.2 throughout the site at defined parts of the year
 - 1.3 in parts of the site at all times of the year
 - 1.4 in parts of the site at defined parts of the year.
2. Prohibitions regarding access to and movement within or over the site.
3. Prohibitions regarding:
 - 3.1 the installation, modification, and/or removal of structures
 - 3.2 the disposal of waste.
4. Prohibitions for the purpose of ensuring that activity in the site does not prejudice the purposes for which protection status has been accorded to areas or sites, in or near the site, under the Antarctic Treaty or other components of the Antarctic Treaty System which are in force.

E. COMMUNICATIONS INFORMATION

1. The name, address, telephone and facsimile numbers, and email addresses, of:
 - 1.1 the organisation or organisations responsible for appointing national representative(s) to the Commission;
 - 1.2 the national organisation or organisations conducting CEMP studies at the site.

Notes:

1. A code of conduct. If it would help towards achieving the scientific objectives of the site, a code of conduct may be annexed to the management plan. Such a code should be written in hortatory rather than mandatory terms, and must be consistent with the prohibitions contained in Section D above.
2. Members of the Commission preparing draft management plans for submission in accordance with this conservation measure should bear in mind that the primary purpose of the management plan is to provide for the protection of CEMP studies at the site through the application of the prohibitions contained in Section D. To that end, the management plan is to be drafted in concise and unambiguous terms. Information which is intended to help scientists, or others, appreciate broader considerations regarding the site (e.g. historical and bibliographic information) should not be included in the management plan but may be annexed to it.

CONSERVATION MEASURE 91-02 (2004)
Protection of the Cape Shirreff CEMP site

Species	all
Area	48.1

1. The Commission noted that a program of long-term studies is being undertaken at Cape Shirreff and the San Telmo Islands, Livingston Island, South Shetland Islands, as part of the CCAMLR Ecosystem Monitoring Program (CEMP). Recognising that these studies may be vulnerable to accidental or wilful interference, the Commission expressed its concern that this CEMP site, the scientific investigations, and the Antarctic marine living resources therein be protected.
2. Therefore, the Commission considers it appropriate to accord protection to the Cape Shirreff CEMP site, as defined in the Cape Shirreff management plan.
3. Members shall comply with the provisions of the Cape Shirreff CEMP site management plan, which is recorded in Annex 91-02/A.
4. In accordance with Article X, the Commission shall draw this conservation measure to the attention of any State that is not a Party to the Convention and whose nationals or vessels are present in the Convention Area.

ANNEX 91-02/A

**MANAGEMENT PLAN FOR THE PROTECTION OF
CAPE SHIRREFF AND THE SAN TELMO ISLANDS,
SOUTH SHETLAND ISLANDS, AS A SITE INCLUDED
IN THE CCAMLR ECOSYSTEM MONITORING PROGRAM¹**

A. GEOGRAPHICAL INFORMATION

1. Description of the site:

- (a) Geographical coordinates: Cape Shirreff is a low, ice-free peninsula towards the western end of the north coast of Livingston Island, South Shetland Islands, situated at latitude 62°27'S, longitude 60°47'W, between Barclay Bay and Hero Bay. San Telmo Islands are the largest of a small group of ice-free rock islets, approximately 2 km west of Cape Shirreff.
- (b) Natural features: Cape Shirreff is approximately 3 km from north to south and 0.5 to 1.2 km from east to west. The site is characterised by many inlets, coves and cliffs. Its southern boundary is bordered by a permanent glacial ice barrier, which is located at the narrowest part of the cape. The cape is mainly an extensive rock platform, 46 to 83 m above sea level, the bedrock being largely covered by weathered rock and glacial deposits. The eastern side of the base of the cape has two beaches with a total length of about 600 m. The first is a boulder beach, the second of sand. Above this is a raised beach with mosses and lichens, crossed by melt-streams from the snow above. The extremity of the cape has a rocky barrier about 150 m long. The western side is formed by almost continuous

¹ As adopted at CCAMLR-XVIII (paragraphs 9.5 and 9.6), and revised at CCAMLR-XIX (paragraph 9.9).

cliffs 10 to 15 m high above an exposed coast with a few protected beaches. At the southwestern base of the cape is a small sandy and pebble beach approximately 50 m long.

The San Telmo Islands are located approximately 2 km west of Cape Shirreff, and are a group of ice-free, rocky islets. The east coast of San Telmo Island (the largest of the group) has a sandy and pebble beach (60 m) at the south end, separated from the northern sandy beach (120 m) by two irregular cliffs (45 m) and narrow pebble beaches.

- (c) Boundary markers: The boundaries of the Cape Shirreff CEMP Protected Area are identical to the boundaries of the Site of Special Scientific Interest No. 32, as specified by ATCM Recommendation XV-7. At present, there are no man-made boundary markers indicating the limits of the SSSI or established protected areas. The boundaries of the site are defined by natural features (i.e. coastlines, glacial margins) described in Section A.1(d).
- (d) Natural features that define the site: The Cape Shirreff CEMP Protected Area includes the entire area of the Cape Shirreff peninsula north of the glacier ice tongue margin, and most of the San Telmo Islands group. For the purposes of the CEMP protected area, 'the entire area' of Cape Shirreff and the San Telmo Islands group is defined as any land or rocks exposed at mean low tide within the area delimited by the map (Figure 3).
- (e) Access points: The Cape Shirreff part of the CEMP site may be entered at any point where pinniped or seabird rookeries are not present on or near the beach. Access to the island in the San Telmo group is unrestricted but should be at the least densely populated areas and cause minimal disturbance to the fauna. Access for other than CEMP research should avoid disturbing pinnipeds and seabirds (see Sections D.1 and D.2). Access by small boat or helicopter is recommended in most circumstances. Four helicopter landing areas are recommended including: (i) the south plain of Playa Yámana, which is situated on the Southwest coast of the cape; (ii) on the west coast of the cape, on the top plain of Gaviota Hill (10 x 20 m), near the monument erected to commemorate the officers and crew of the Spanish ship *San Telmo*; (iii); the wide plain, Paso Ancho, situated to the east of Cóndor Hill; and (iv) the top plain of Cóndor Hill. Recommended sites for landing small boats include: (i) the northern end of Half Moon beach, on the east coast of the cape; (ii) on the east coast, 300 m north of El Mirador, there is a deep channel which permits easy disembarkation, and (iii) the northern end of Playa Yámana on the west coast of the cape (during high tide conditions). There are no landing sites for fixed-wing aircraft.
- (f) Pedestrian and vehicular routes: Boats, helicopters, fixed-wing aircraft and land vehicles should avoid the site except for operations directly supporting authorised scientific activities. During these operations, boats and aircraft should travel routes that avoid or minimise disturbance of pinnipeds and seabirds. Land vehicles should not be used except to transport needed equipment and supplies to and from the field camps. Pedestrians should not walk through wildlife population areas, especially during the breeding season, or disturb other fauna or flora except as necessary to conduct authorised research.

- (g) Preferred anchorages: Numerous shoals and pinnacles are known to exist in the vicinity of Cape Shirreff and the San Telmo Islands. The detailed bathymetric chart No. 14301 produced by the Servicio Hidrográfico y Oceanográfico de la Armada de Chile (SHOA, 1994) provides guidance but those unfamiliar with local conditions at Cape Shirreff are advised to approach the area with caution. Three anchorages that have been used in the past are: (i) northwest coast – situated between Rapa-Nui Point on Cape Shirreff and the northern extremity of the San Telmo Islands; (ii) east coast – 2.5 km to the east of El Mirador, being alert for icebergs drifting in the area; and (iii) south coast – located about 4 km off the southern coast of Byers Peninsula to support ship-based helicopter operations. Organisation(s) conducting CEMP studies at the site can provide further details about sailing instructions pertaining to recommended anchorages (see Section E.2).
- (h) Location of structures within the site: During the 1991/92 austral summer, a fibreglass cabin for four people was installed by the Instituto Antártico Chileno (INACH) (Anonymous, 1992) in the El Mirador area. This area is on the cape's east coast, at the base of Condor Hill (near the site of the previous installation of the former Soviet Union). This site was chosen because of its accessibility by helicopter and boat, shelter from winds, good water supply and absence of seal or bird colonies. During the 1996/97 austral summer a US AMLR field camp was established approximately 50 m to the south of the INACH camp. The US camp is comprised of four small wood-constructed buildings (including an outhouse); all within 3 m of each other and jointed by wooden walkways. In February 1999 an emergency shelter/bird observation blind was constructed by the US program at the northern end of the Cape. Minor remains of a hut used in the past by the former Soviet Union as well as sparse evidence of a 19th century sealers' camp can be found near the camp site.
- (i) Areas within the site where activities are constrained: The protection measures specified in Section D apply to all areas within the Cape Shirreff CEMP Protected Area, as defined in Section A.1(d).
- (j) Location of nearby scientific, research, or refuge facilities: The nearest research facility to the site is Juan Carlos I Station (summer only) maintained by the Spanish government at South Bay, Livingston Island, (62°40'S, 60°22'W), approximately 30 km southeast of Cape Shirreff. The Chilean Station Arturo Prat is located on Greenwich Island (62°30'S, 59°41'W) approximately 56 km northeast of Cape Shirreff. Numerous scientific stations and research facilities (e.g. Argentina, Brazil, Chile, China, Korea, Poland, Russia, Uruguay) are located on King George Island, approximately 100 km northeast of Cape Shirreff. The largest of these facilities is Base Presidente Eduardo Frei Montalva (also formerly referred to as Base Teniente Rodolfo Marsh Martin), maintained by the Chilean government on the western end of King George Island (62°12'S, 58°55'W).
- (k) Areas or sites protected under the Antarctic Treaty System: Cape Shirreff and the San Telmo Islands are protected as a Site of Special Scientific Interest (No. 32) under the Antarctic Treaty System (see Section A.1(c)). Several other sites or areas within 100 km of Cape Shirreff are also protected under the Antarctic Treaty System: SSSI No. 5, Fildes Peninsula (62°12'S, 58°59'W); SSSI

No. 6, Byers Peninsula (62°38'S, 61°05'W); SSSI No. 35, Ardley Island, Maxwell Bay, King George Island (62°13'S, 58°56'W); Marine SSSI No. 35, Western Bransfield Strait (63°20'S to 63°35'S, 61°45'W to 62°30'W); and SPA No. 16, Coppermine Peninsula, Robert Island (62°23'S, 59°44'W). The Seal Islands CEMP Protected Area (60°59'14"S, 55°23'04"W) is located approximately 325 km northeast of Cape Shirreff.

2. Maps of the site:

- (a) Figures 1 and 2 show the geographical position of Cape Shirreff and the San Telmo Islands in relation to major surrounding features, including the South Shetland Islands and adjacent bodies of water.
- (b) Figure 3 identifies the boundaries of the site and provides details of specific locations within the vicinity of Cape Shirreff and the San Telmo Islands, including preferred vessel anchorages.

B. BIOLOGICAL FEATURES

1. Terrestrial: There is no information on soil biology of Cape Shirreff but it is likely that similar types of plants and invertebrates are found as at other sites in the South Shetland Islands (e.g. see Lindsey, 1971; Allison and Smith, 1973; Smith, 1984; Sömme, 1985). A moderate lichen cover (e.g. *Polytrichum alpestre*, *Usnea fasciata*) is present on rocks located in the higher geological platforms. In some valleys there are patches of moss and grass (e.g. *Deschampsia antarctica*).
2. Inland waters: There are several ephemeral ponds and streams located at Cape Shirreff. These form from melting snow, especially in January and February. Hidden Lake is the only permanent body of water on the cape, and it is located in the confluence of the slope of three hills: El Toqui, Pehuenche and Aymara. The lake's drainage supports the growth of moss banks along its northeast and southwest slopes. From the southwest slope a stream flows to the western coast at Playa Yámana. The lake's depth is estimated at two to 3 m and it is approximately 12 m long when fullest; the lake diminishes considerably in size after February (Torres, 1995). There are no known lakes or ephemeral ponds of significance on the San Telmo Islands.
3. Marine: No studies on littoral communities have been carried out. There is abundant macroalgae present in the intertidal zone. The limpet *Nacella concinna* is common, as elsewhere in the South Shetland Islands.
4. Seabirds: In January 1958, 2 000 pairs of chinstrap penguins (*Pygoscelis antarctica*) and 200 to 500 pairs of gentoo penguins (*P. papua*) were reported (Croxall and Kirkwood, 1979). In 1981 two unspecified penguin colonies had 4 328 and 1 686 individuals respectively (Sallaberry and Schlatter, 1983). A census in January 1987, produced estimates of 20 800 adult chinstrap penguins and 750 adult gentoo penguins (Shuford and Spear, 1987). Hucke-Gaete et al. (1997a) identified the presence of 31 breeding colonies for both species during 1996/97 and reported estimates of 6 907 breeding pairs of chinstrap penguins and 682 of gentoo penguins. A chick census developed in early February that same year gave a total of 8 802 chinstrap penguins and 825 gentoo penguins. The first of a continuing CCAMLR census of the colonies at

Cape Shirreff conducted on 3 December, 1997 recorded 7 617 and 810 breeding pairs of chinstrap and gentoo penguins, respectively (Martin 1998). Dominican gulls (*Larus dominicanus*), brown skuas (*Catharacta lönnerbergi*), Antarctic terns (*Sterna vittata*), blue-eyed shags (*Phalacrocorax atriceps*), cape petrels (*Daption capense*), Wilson's storm petrels (*Oceanites oceanicus*) and black-bellied storm petrel (*Fregetta tropica*) also nest on the cape. Giant petrels (*Macronectes giganteus*) are regular visitors during the austral summer (Torres, 1995).

5. Pinnipeds: Cape Shirreff is presently the site of the largest known breeding colony of the Antarctic fur seal (*Arctocephalus gazella*) in the South Shetland Islands. The first post-exploitation record of fur seals at Cape Shirreff was reported by O'Gorman (1961) in mid-February 1958 when 27 non-breeding adults were seen. Over the past 30 years, the colony has continued to increase in size (Aguayo and Torres, 1968, 1993; Bengtson et al., 1990, Torres, 1995; Hucke-Gaete et al., 1999). Annual censuses begun in 1991/92 by INACH scientists showed that pup production has increased every year except for 1997/98 when there was an apparent 14% decrease in the entire SSSI. From 1965/66 to 1998/99 the population increased at a rate of 19.8%. However, from 1992/93 to 1998/99 the growth rate has decreased to ca. 7% per year, with the last census in 1998/99 reporting 5 497 pups born on Cape Shirreff and 3 027 pups born on San Telmo Islands (Hucke-Gaete et al., 1999). Groups of non-breeding southern elephant seals (*Mirounga leonina*), Weddell seals (*Leptonychotes weddelli*), leopard seals (*Hydrurga leptonyx*) and crabeater seals (*Lobodon carcinophagus*) have been observed on the cape (O'Gorman, 1961; Aguayo and Torres, 1967; Bengtson et al., 1990; Torres et al., 1998). Additionally, observations of pup carcasses suggest breeding sites of southern elephant seals (Torres, 1995).

C. CEMP STUDIES

1. The presence at Cape Shirreff of both Antarctic fur seal and penguin breeding colonies, and of krill fisheries within the foraging range of these species, make this a critical site for inclusion in the ecosystem monitoring network established to help meet the objectives of the Convention on the Conservation of Antarctic Marine Living Resources. The purpose of the designation is to allow planned research and monitoring to proceed, while avoiding or reducing, to the greatest extent possible, other activities which could interfere with or affect the results of the research and monitoring program or alter the natural features of the site.
2. The following species are of particular interest for CEMP routine monitoring and directed research at this site: Antarctic fur seals, chinstrap penguins and gentoo penguins.
3. Long-term studies are under way to assess and monitor the feeding ecology, growth and condition, reproductive success, behaviour, and population dynamics of pinnipeds and seabirds that breed in the area. The results of these studies will be compared with environmental data, wildlife diseases, offshore sampling data, and fishery statistics to identify possible cause-effect relationships.
4. Chilean scientists have been conducting studies at the site for many years and in recent seasons they have developed studies specifically designed to contribute to CEMP. These studies have mainly focused on Antarctic fur seals, wildlife diseases and survey

of marine debris. Annual marine debris surveys began in 1985, with a baseline established in 1994 (e.g. Torres and Jorquera 1995, 1999). In 1996/97 US scientists began CEMP monitoring studies of Antarctic fur seals, chinstrap and gentoo penguins in conjunction with studies of offshore prey distribution and general oceanography (e.g. Martin, 1999).

5. Penguin parameters routinely monitored include trends in population size (A3), demography (A4), duration of foraging trips (A5), breeding success (A6), chick fledging weight (A7), chick diet (A8) and breeding chronology (A9). Studies of fur seals include foraging energetics, at-sea foraging locations using satellite-linked telemetry, diving behaviour, diet studies, duration of foraging trips (C1), reproductive success, and pup growth rates (C2).

D. PROTECTION MEASURES

1. Prohibited activities and temporal constraints:

- (a) Throughout the site at all times of the year: Any activities which damage, interfere with, or adversely affect the planned CEMP monitoring and directed research at this site are not permitted.
- (b) Throughout the site at all times of the year: Any non-CEMP activities are not permitted which result in:
 - (i) killing, injuring, or disturbing pinnipeds or seabirds;
 - (ii) damaging or destroying pinniped or seabird breeding areas; or
 - (iii) damaging or destroying the access of pinnipeds or seabirds to their breeding areas.
- (c) Throughout the site at defined parts of the year: Human occupation of the site during the period 1 June to 31 August is not permitted except under emergency circumstances.
- (d) In parts of the site at all times of the year: Building structures within boundaries of any pinniped or seabird colony is not permitted. For this purpose, colonies are defined as the specific locations where pinniped pups are born or where seabird nests are built. This prohibition does not pertain to placing markers (e.g. numbered stakes, posts, etc.) or situating research equipment in colonies as may be required to facilitate scientific research.
- (e) In parts of the site at defined parts of the year: Entry into any pinniped or seabird colonies during the period 1 September to 31 May is not permitted except in association with CEMP activities.

2. Prohibitions regarding access to and movement within the site:

- (a) Entry to the site at locations where pinniped or seabird colonies are present in densely populated areas is not permitted.

- (b) Aircraft overflight of the site is not permitted at altitudes less than 1 000 m unless the proposed flight plan has been reviewed in advance by the organisation(s) conducting CEMP activities at the site (see Section E.2). Aircraft overflight at altitudes below 200 m is not permitted.
- (c) The use of land vehicles is not permitted except to transport needed equipment and supplies to and from the field camps.
- (d) Pedestrians are not permitted to walk through wildlife population areas (e.g. colonies, resting areas, pathways), or to disturb other fauna or flora, except as necessary to conduct authorised research.

3. Prohibitions regarding structures:

- (a) Building structures other than those directly supporting authorised scientific research and monitoring programs or to house research personnel and their equipment is not permitted.
- (b) Human occupation of these structures is not permitted during the period 1 June to 31 August (see Section D.1(c)).
- (c) New structures are not permitted to be built within the site unless the proposed plans have been reviewed in advance by the organisation(s) conducting CEMP activities at the site (see Section E.2).

4. Prohibitions regarding waste disposal:

- (a) Landfill disposal of any materials is not permitted; all materials brought to the site are to be removed when no longer in use.
- (b) Disposal of waste fuels, volatile liquids and scientific chemicals within the site is not permitted; these materials are to be removed from the site for proper disposal elsewhere.
- (c) The open burning of any materials is not permitted (except for properly used fuels for heating, lighting or cooking).

5. Prohibitions regarding the Antarctic Treaty System:

It is not permitted to undertake any activities in the Cape Shirreff CEMP Protected Area which are not in compliance with the provisions of: (i) the Antarctic Treaty, including the Agreed Measures for the Conservation of Antarctic Fauna and Flora and the Protocol on Environmental Protection, (ii) the Convention for the Conservation of Antarctic Seals, and (iii) the Convention for the Conservation of Antarctic Marine Living Resources.

E. COMMUNICATIONS INFORMATION

ANNEX 91-02/A CAPE SHIRREFF, APPENDIX 1

**CODE OF CONDUCT FOR THE CAPE SHIRREFF
CEMP PROTECTED AREA**

Investigators should take all reasonable steps to ensure that their activities, both in implementing their scientific protocols as well as in maintaining a field camp, do not unduly harm or alter the natural behaviour and ecology of wildlife. Wherever possible, actions should be taken to minimise disturbance of the natural environment.

Killing, capturing, handling and taking eggs, blood, or other biological samples from pinniped and seabirds should be limited to that necessary to characterise and monitor individual and population parameters that may change in detectable ways in response to changes in food availability or other environmental factors. Sampling should be done and reported in accordance with: (i) the Agreed Measures for the Conservation of Antarctic Fauna and Flora and the Protocol on Environmental Protection, (ii) the Convention for the Conservation of Antarctic Seals, and (iii) the Convention for the Conservation of Antarctic Marine Living Resources.

Geological, glaciological and other studies which can be done outside of the pinniped and seabird breeding season, and which will not damage or destroy pinniped or seabird breeding areas, or access to those areas, would not adversely affect the planned assessment and monitoring studies. Likewise, the planned assessment and monitoring studies would not be affected adversely by periodic biological surveys or studies of other species which do not result in killing, injuring, or disturbing pinnipeds or seabirds, or damage or destroy pinnipeds or seabird breeding areas or access to those areas.

ANNEX 91-02/A CAPE SHIRREFF, APPENDIX 2

BACKGROUND INFORMATION CONCERNING CAPE SHIRREFF

Prior to 1819, there were substantial colonies of fur seals, and possibly elephant seals, throughout the South Shetland Islands archipelago. Thereafter, Cape Shirreff was the scene of more intensive sealing activities until about 1825. Sealers' refuges were erected all around the western shores of Livingston Island, with those on the south coast being occupied mainly by American sealers and those on the north coast by British sealers. There were about 60 to 75 men living ashore at Cape Shirreff in January 1821 (Stackpole, 1955) and 95 000 skins were taken during the 1821/22 season (O'Gorman, 1963). There are ruins of at least 12 sealers' huts on the cape and the shoreline in several bays is littered with timbers and sections of wrecked sealers' vessels (Torres, 1995). The outcome of the sealing of the early 1820s was the extermination of fur seals from the entire region. Antarctic fur seals were not observed again in the South Shetland Islands until 1958, when a small colony was discovered at Cape Shirreff, Livingston Island (O'Gorman, 1961). The original colonisers probably came from South Georgia, where surviving fur seal colonies had substantially recovered by the early 1950s. Chilean studies at the site began in 1965 (e.g. Aguayo and Torres, 1967, 1968) and US studies began in 1996 (e.g. Martin, 1998). At present, the fur seal rookeries at Cape Shirreff and the San Telmo Islands are the largest in the South Shetland Islands.

HISTORY OF PROTECTION AT CAPE SHIRREFF

Cape Shirreff was designated in 1966 as Specially Protected Area (SPA) No. 11 by ATCM Recommendation IV-11 'on the grounds that the cape supports a considerable diversity of plant and animal life, including many invertebrates, that a substantial population of elephant seals (*Mirounga leonina*) and small colonies of Antarctic fur seals are found on the beaches and that the area is of outstanding interest'. The protection conferred on this site was successful in ensuring that Antarctic fur seals were not disturbed during the important early phases of their recolonisation. Subsequent to the site's designation as a SPA, the locally breeding population of Antarctic fur seals increased to a level at which biological research activities could be undertaken without threatening the continued recolonisation and population increase of this species.

Surveys during the mid-1980s to locate study sites for long-term monitoring of fur seal and penguin populations as part of the CCAMLR Ecosystem Monitoring Program (CEMP) indicated that Cape Shirreff would be an excellent site within the Antarctic Peninsula Integrated Study Region. To carry out such a monitoring program safely and effectively, a multi-year field camp for four to six researchers was needed within the area previously designated as SPA No. 11. This might have been considered inappropriate within a SPA and hence a proposal was made in 1988 to redesignate Cape Shirreff as a Site of Special Scientific Interest (SSSI). Additionally, it was proposed substantially to enlarge the site by the inclusion of the San Telmo Islands group, presently the location of the largest fur seal colony in the Antarctic Peninsula region.

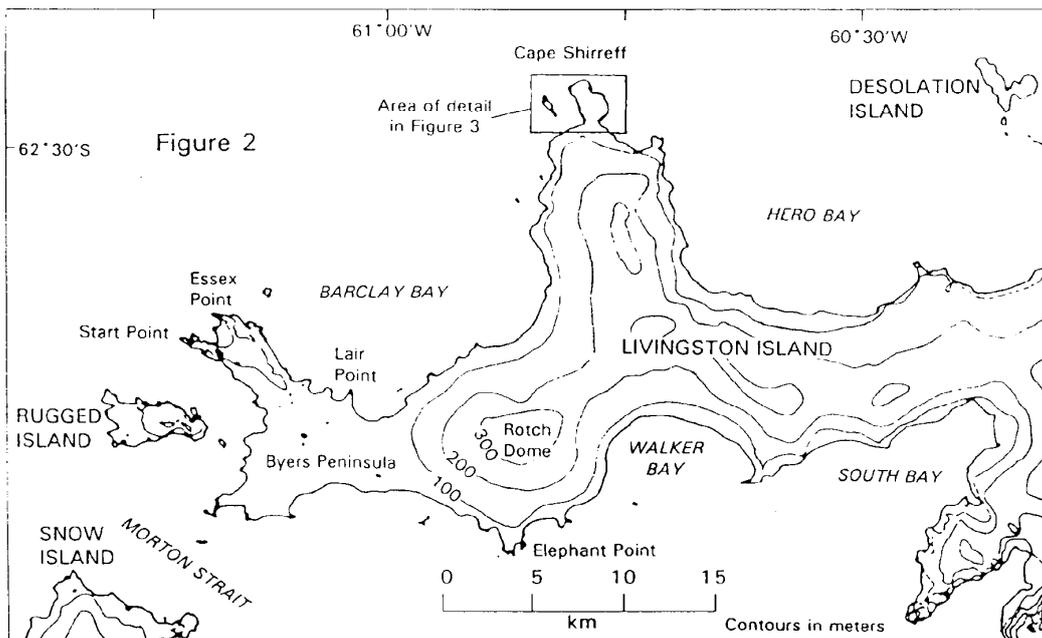

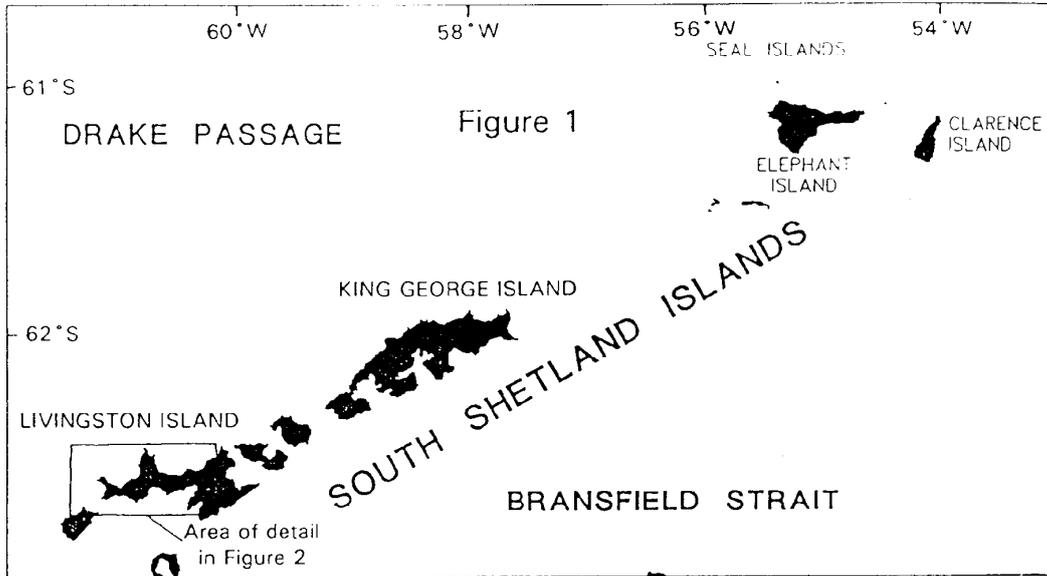

Cape Shirreff was redesignated in 1990 as SSSI No. 32 by Recommendation XV-7, which was adopted by the XVth Consultative Meeting of the Antarctic Treaty. It was understood that SSSI No. 32, Cape Shirreff, should be redesignated an SPA (in its enlarged form) if and when the long-term monitoring of fur seals and seabirds at the site should be ended.

Chilean and US scientists initiated CEMP studies at Cape Shirreff during the late 1980s, and have collaborated on predator studies at Cape Shirreff since 1996/97. To further protect the site from damage or disturbance that could adversely affect the long-term CEMP monitoring and directed research, in 1991 Cape Shirreff was proposed as a CEMP Protected Area.

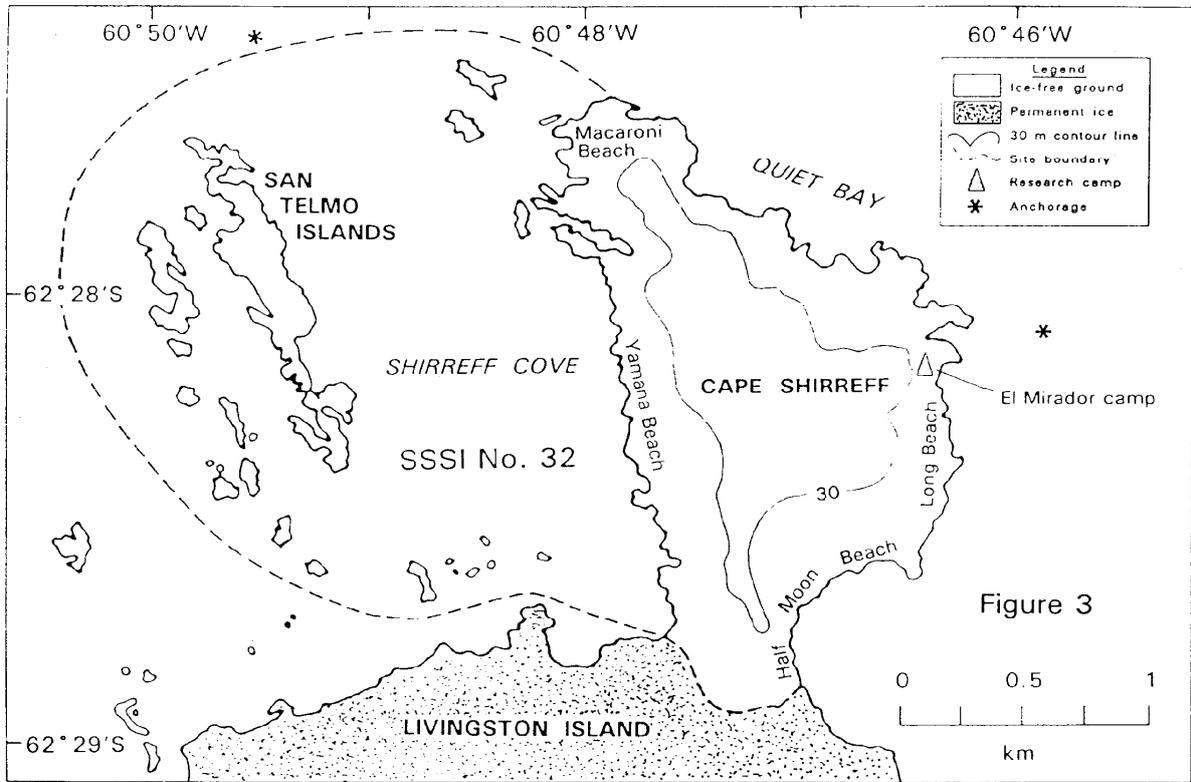

Figure 3: This map shows a detailed view of the Cape Shirreff and the San Telmo Islands CEMP Protected Area. Note that the boundaries of the CEMP Protected Area are identical to the boundaries of Site of Special Scientific Interest No. 32, which is protected under the Antarctic Treaty.

RESOLUTION 7/IX
Driftnet fishing in the Convention Area

Species	all
Area	all
Season	all
Gear	driftnet

1. The Commission endorsed the goals of the UN General Assembly Resolution 44/225 on large-scale pelagic driftnet fishing, which calls, *inter alia*, for a cessation of any further expansion of large-scale pelagic driftnet fishing on the high seas. Recognising the concentration of marine living resources present in Antarctic waters, it was noted that large-scale pelagic driftnet fishing can be a highly indiscriminate and wasteful fishing method that is widely considered to threaten the effective conservation of living marine resources. Although no Member is currently engaged in large-scale pelagic driftnet fishing in the Convention Area, the Commission expressed concern about the potential impact on marine living resources if large-scale pelagic driftnet fishing were to expand into the Convention Area.
2. To this end, the Commission agreed, in accordance with UN Resolution 44/225, that there will be no expansion of large-scale pelagic driftnet fishing into the Convention Area.
3. It was agreed that, in accordance with Article X, the Commission would draw this Resolution to the attention of any State that is not a Party to the Convention and whose nationals or vessels engage in large-scale pelagic driftnet fishing.

RESOLUTION 10/XII
Resolution on harvesting of stocks occurring both within and outside the Convention Area

Species	all
Area	all
Season	all
Gear	all

The Commission,

Recalling the principles of conservation in Article II of the Convention and in particular that of the maintenance of the ecological relationships between harvested, dependent and related populations of Antarctic marine living resources,

Recalling the requirement under Article XI of the Convention for the Commission to seek to cooperate with Contracting Parties which may exercise jurisdiction in marine areas adjacent to the area to which the Convention applies in respect of the conservation of any stock or stocks of associated species which occur both within those areas and the area to which the Convention applies, with a view to harmonising the conservation measures adopted in respect of such stocks,

Emphasising the importance of further research on any stock or stocks of species which occur both within the area of the Convention and within adjacent areas,

Noting the concerns expressed by the Scientific Committee on the substantial exploitation of such stocks inside and outside the Convention Area,

reaffirmed that Members should ensure that their flag vessels conduct harvesting of such stocks in areas adjacent to the Convention Area responsibly and with due respect for the conservation measures it has adopted under the Convention.

RESOLUTION 14/XIX
Catch Documentation Scheme: implementation
by Acceding States and non-Contracting Parties

Species	toothfish
Area	all
Season	all
Gear	all

The Commission,

Having considered reports on the implementation of the Catch Documentation Scheme for *Dissostichus* spp. established by Conservation Measure 10-05 (1999),

Being satisfied that the Scheme has been successfully launched, and noting the improvements to the scheme made by Conservation Measures 10-05 (2000) and 10-05 (2001),

Conscious that the effectiveness of the Scheme depends also on implementation of the Scheme by those Contracting Parties which are not Members of the Commission ('Acceding States') but which fish for, or trade in, *Dissostichus* spp., as well as by non-Contracting Parties,

Concerned at the evidence that several acceding States and non-Contracting Parties which continue to be engaged in fishing for, or trading in, *Dissostichus* spp. are not implementing the Scheme,

Particularly concerned at the failure by such acceding States to implement the Scheme, to uphold and promote its objectives, and to meet their obligations under Article XXII to exert appropriate efforts with regard to activities contrary to the objectives of the Convention,

Determined to take all necessary measures, consistent with international law, to ensure that the effectiveness and credibility of the Scheme is not harmed by non-implementation of it by acceding States and non-Contracting Parties,

Acting pursuant to Article X of the Convention,

1. Urges all Acceding States and non-Contracting Parties not participating in the Catch Documentation Scheme which fish for, or trade in, *Dissostichus* spp. to implement the Scheme as soon as possible.
2. Requests to this end that the CCAMLR Secretariat convey this resolution to such Acceding States and non-Contracting Parties and give all possible advice and assistance to them.
3. Recommends that Members of the Commission make appropriate representations concerning this resolution to such Acceding States and non-Contracting Parties.
4. Reminds Members of the Commission of their obligation under the Catch Documentation Scheme to prevent trade in *Dissostichus* spp. in their territory, or by their flag vessels, with Acceding States or non-Contracting Parties when it is not carried out in compliance with the Scheme.
5. Decides to consider the matter again at the Twentieth Meeting of the Commission in 2001 with a view to taking such further measures as may be necessary.

RESOLUTION 15/XXII
Use of ports not implementing the
Catch Documentation Scheme for *Dissostichus* spp.

Species	toothfish
Area	all
Season	all
Gear	all

The Commission,

Noting that a number of Acceding States and non-Contracting Parties not participating in the Catch Documentation Scheme for *Dissostichus* spp., as set out in Conservation Measure 10-05, continue to trade in *Dissostichus* spp.,

Recognising that these Acceding States and non-Contracting Parties thus do not participate in the landing procedures for *Dissostichus* spp. accompanied by *Dissostichus* Catch Documents,

urges Contracting Parties,

When licensing a vessel to fish for *Dissostichus* spp. either inside the Convention Area under Conservation Measure 10-02, or on the high seas, to require, as a condition of that licence¹, that the vessel should land catches only in States that are fully implementing the CDS; and to attach to the licence a list of all Acceding States and non-Contracting Parties that are fully implementing the Catch Documentation Scheme.

¹ Includes permits and authorisations

RESOLUTION 16/XIX
Application of VMS in the Catch Documentation Scheme

Species	toothfish
Area	all
Season	all
Gear	all

The Commission agreed that, on a voluntary basis, subject to their laws and regulations, Flag States participating in the Catch Documentation Scheme for *Dissostichus* spp. should ensure that their flag vessels authorised to fish for or tranship *Dissostichus* spp. on the high seas maintain an operational VMS, as defined in Conservation Measure 10-04, throughout the whole of the calendar year.¹

¹ This requirement does not extend to vessels of less than 19 m engaged in artisanal fisheries.

RESOLUTION 17/XX
Use of VMS and other measures for the verification of
CDS catch data for areas outside the Convention Area,
in particular, in FAO Statistical Area 51

Species	toothfish
Area	north of Convention Area
Season	all
Gear	all

The Commission,

Recognising the need to continue to take action, using a precautionary approach, based on the best scientific information available, in order to ensure the long-term sustainability of *Dissostichus* spp. stocks in the Convention Area,

Concerned that the Catch Documentation Scheme for *Dissostichus* spp. (CDS) could be used to disguise illegal, unreported and unregulated (IUU) catches of *Dissostichus* spp. in order to gain legal access to markets,

Concerned that any misreporting and misuse of the CDS seriously undermines the effectiveness of CCAMLR conservation measures,

1. Urges States participating in the CDS to ensure that *Dissostichus* Catch Documents (DCDs) relating to landings or imports of *Dissostichus* spp., when necessary, are checked by contact with Flag States to verify that the information in the DCD is consistent with the data reports derived from an automated satellite-linked Vessel Monitoring System (VMS)¹.
2. Urges States participating in the CDS, if necessary to that end, to consider reviewing their domestic laws and regulations, with a view to prohibiting, in a manner consistent with international law, landings/transshipments/imports of *Dissostichus* spp. declared in a DCD as having been caught in FAO Statistical Area 51 if the Flag State fails to demonstrate that it verified the DCD using automated satellite-linked VMS derived data reports.
3. Requests the Scientific Committee to review the data concerning the areas where *Dissostichus* spp. occur outside the Convention Area and the potential biomass of *Dissostichus* spp. in such areas, in order to assist the Commission in the conservation and management of *Dissostichus* stocks and in defining the areas and potential biomasses of *Dissostichus* spp. which could be landed/imported/exported under the CDS.

¹ In this regard, verification of the information in the relevant DCD shall not be requested for the trawlers as described in Conservation Measure 10-05, footnote 1.

RESOLUTION 18/XXI
Harvesting of *Dissostichus eleginoides* in areas outside of Coastal State jurisdiction adjacent to the CCAMLR Area in FAO Statistical Areas 51 and 57

Species	toothfish
Area	north of Convention Area
Season	all
Gear	all

The Commission,

Affirming that CCAMLR was established to conserve the marine living resources of the Antarctic marine ecosystem,

Recognising that CCAMLR also has the attributes of a regional fisheries management organisation as considered under the auspices of the United Nations,

Recognising that CCAMLR is the primary body responsible for the conservation and rational use of *Dissostichus eleginoides* in areas not under national jurisdiction,

Noting Resolution 10/XII concerning the need to harmonise management measures within and adjacent to the CCAMLR Area taking into account Article 87 of UNCLOS and in recognition of the obligations to conserve the living resources of the high seas under Articles 117 to 119 of UNCLOS,

Noting the role of cooperation in scientific research through collecting and exchanging data,

Recognising that measures to manage harvesting of stocks of *Dissostichus eleginoides* are needed in high seas of FAO Statistical Areas 51 and 57,

Recommends that Members provide data and other information, subject to their laws and regulations, relevant to understanding the biology and estimating the status of stocks in FAO Statistical Areas 51 and 57.

Recommends that Members take steps necessary to conduct only that level of harvesting of *Dissostichus eleginoides* in FAO Statistical Areas 51 and 57, which would ensure the conservation of this species in the Convention Area.

RESOLUTION 19/XXI

Flags of non-compliance*

Species	all
Area	all
Season	all
Gear	all

The Commission,

Concerned that some Flag States, particularly certain non-Contracting Parties, do not comply with their obligations regarding jurisdiction and control according to international law in respect of fishing vessels entitled to fly their flag that carry out their activities in the Convention Area, and that as a result these vessels are not under the effective control of such Flag States,

Aware that the lack of effective control facilitates fishing by these vessels in the Convention Area in a manner that undermines the effectiveness of CCAMLR's conservation measures, leading to illegal, unreported and unregulated (IUU) catches of fish and unacceptable levels of incidental mortality of seabirds,

Considering therefore such fishing vessels to be flying Flags of Non-Compliance (FONC) in the context of CCAMLR (FONC vessels),

Noting that the FAO Agreement to Promote Compliance with International Conservation and Management Measures by Fishing Vessels on the High Seas emphasizes that the practice of flagging or reflagging fishing vessels as a means of avoiding compliance with international conservation and management measures for living marine resources and the failure of the States to fulfil their responsibilities with respect of fishing vessels entitled to fly their flag, are among the factors that seriously undermine the effectiveness of such measures,

Noting that the International Plan of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing calls on States to take measures to discourage nationals subject to their jurisdiction from supporting and engaging in any activity that undermines the effectiveness of international conservation and management measures,

urges all Contracting Parties and non-Contracting Parties cooperating with CCAMLR to:

1. Without prejudice to the primacy of the responsibility of the Flag State, to take measures or otherwise cooperate to ensure, to the greatest extent possible, that the nationals subject to their jurisdiction do not support or engage in IUU fishing, including engagement on board FONC vessels in the CCAMLR Convention Area if this is consistent with their national law.
2. Ensure the full cooperation of their relevant national agencies and industries in implementing the measures adopted by CCAMLR.
3. Develop ways to ensure that the export or transfer of fishing vessels from their State to a FONC State is prohibited.
4. Prohibit the landings and transshipments of fish and fish products from FONC vessels.

* Many of the flags hereby called FONC are commonly referred to as ‘flags of convenience’.

RESOLUTION 20/XXII
Ice-strengthening standards in high-latitude fisheries¹

Species	all
Area	south of 60°S
Season	all
Gear	all

The Commission

Recognising the unique circumstances in high-latitude fisheries, especially the extensive ice coverage which can pose a risk to fishing vessels operating in those fisheries,

Recognising also that the safety of fishing vessels, crew and CCAMLR scientific observers is a significant concern of all Members,

Further recognising the difficulties of search and rescue response in high-latitude fisheries,

Concerned that collisions with ice could result in oil spills and other adverse consequences for Antarctic marine living resources and the pristine Antarctic environment,

Considering that vessels fishing in high-latitude fisheries should be suitable for ice conditions,

urges Members to licence to fish in high-latitude fisheries only those of their flag vessels with a minimum ice classification standard of ICE-1C² which will remain current for the duration of the planned fishing activity.

¹ Subareas and divisions south of 60°S and adjacent to the Antarctic continent

² As defined in the Det Norske Veritas (DNV) Rules for Classification of Ships or an equivalent standard of certification as defined by a recognised classification authority.

RESOLUTION 21/XXIII
Electronic Catch Documentation Scheme for *Dissostichus* spp.

Species	toothfish
Area	all
Season	all
Gear	all

The Commission,

Noting the successful implementation of the trial electronic Catch Documentation Scheme for *Dissostichus* spp. (E-CDS) during the intersessional period,

Desiring to ensure that *Dissostichus* Catch Documents are handled in the most efficient and timely way,

Aware of the importance of applying the best technologies to make the functioning of the Catch Documentation Scheme for *Dissostichus* spp. (CDS) more secure against, *inter alia*, possible fraudulent activities;

Noting that, whilst paper-based *Dissostichus* Catch Documents will, for the time being, also be retained, some Contracting Parties are already converting to electronic systems,

1. Urges Contracting Parties, and non-Contracting Parties cooperating in the CDS, to adopt the E-CDS as a matter of priority.
2. Requests the Secretariat to compile information relating to, and submit a report on, the implementation of the E-CDS so that the effectiveness of the electronic scheme can be reviewed at the next meeting of the Commission.

RESOLUTION 22/XXV
International actions to reduce the incidental mortality of seabirds arising from fishing

Species	seabirds
Area	all
Season	all
Gear	all

The Commission,

Recollecting that the greatest current threats to species and populations of Southern Ocean seabirds breeding in the Convention Area are fishery-related incidental mortality and the potential impact of illegal, unreported and unregulated (IUU) fishing,

Noting the substantial reduction of incidental mortality of seabirds in the Convention Area as a result of conservation measures implemented by the Commission,

Concerned that, despite such measures, many populations of albatross and petrel species breeding in the Convention Area continue to decline and that such reductions in their populations are unsustainable,

Concerned at increasing evidence of fishery-related incidental mortality of seabirds that breed and forage in the Convention Area,

Noting that the seabirds caught are almost entirely albatross and petrel species which are threatened with global extinction,

Recognising that some populations of albatrosses and petrels will not stabilise until total incidental mortality levels are significantly reduced,

Recalling CCAMLR's collaborations with the Agreement on the Conservation of Albatrosses and Petrels (ACAP), a multilateral agreement that provides a focus for international cooperation and exchange of information and expertise towards the conservation of the declining populations of these seabirds,

Recalling repeated attempts to communicate these concerns to RFMOs,

1. Invites listed RFMOs (Appendix 1), consistent with the FAO's Code of Conduct for Responsible Fisheries and the IPOA-Seabirds, to implement or develop, as appropriate, mechanisms to require the collection, reporting and dissemination of annual data on seabird incidental mortality, particularly:
 - (i) rates of incidental mortality of seabirds associated with each fishery, details of the seabird species involved, and estimates of total seabird mortality (at least at the scale of FAO area);
 - (ii) measures to reduce or eliminate incidental mortality of seabirds that are in use in each fishery and the extent to which any of these are voluntary or mandatory, together with an assessment of their effectiveness;
 - (iii) scientific observer programs that can provide comprehensive spatial and temporal coverage of fisheries to allow statistically robust estimation of incidental mortality associated with each fishery.
2. For high-seas areas within the range of seabirds that breed and forage in the Convention Area, where unregulated fishing takes place or where systematic data reporting has not yet been introduced by listed RFMOs, the Executive Secretary should contact Flag States which have vessels in these areas to:
 - (i) express CCAMLR's interest in such seabird species,
 - (ii) indicate the need to require such fishing vessels to collect and report the data specified in paragraph 1 above, and
 - (iii) forward these data to the CCAMLR Secretariat to be made available to ad hoc WG-IMAF.
3. Encourages Contracting Parties to:
 - (i) request that the topic of seabird incidental mortality be included on the agenda of meetings of pertinent RFMOs and, where possible and appropriate, to send relevant experts to these meetings;
 - (ii) identify those areas and circumstances where incidental mortality of seabirds that breed and forage in the Convention Area occurs;

- (iii) identify and continue to develop those mitigation measures which would be most effective at reducing or eliminating such mortality and to require such measures to be implemented in the relevant fisheries.
4. Encourages Contracting Parties involved with new and developing RFMOs to request that incidental mortality of seabirds is adequately addressed and mitigated. Appropriate initiatives might include:
 - (i) establishment or expansion of existing observer programs and adoption of appropriate data collection protocols on seabird incidental mortality;
 - (ii) establishment of by-catch working groups that will address incidental mortality issues and make recommendations for practicable and effective mitigation measures, including evaluation of established and innovative technologies and techniques;
 - (iii) evaluations of fishery impacts on the affected seabird populations;
 - (iv) collaborations (e.g. on data exchange) with listed RFMOs.
 5. Encourages Contracting Parties to:
 - (i) implement, as appropriate, measures to reduce or eliminate seabird incidental mortality;
 - (ii) require their flagged vessels to collect and report the data specified in paragraph 1 above;
 - (iii) report to the CCAMLR Secretariat annually on the implementation of such measures, including their effectiveness in reducing seabird incidental mortality.
 6. Requests ad hoc WG-IMAF, at its annual meeting, to collate and analyse reports relating to paragraphs 1, 2 and 5 above and advise the Commission, through the Scientific Committee, on the implementation and effectiveness of this resolution.
 7. Further requests the Secretariat to bring this resolution to the attention of the RFMOs listed in Appendix 1 and seek their cooperation on its implementation.

**REGIONAL FISHERIES MANAGEMENT ORGANISATIONS IDENTIFIED
FOR CONTACT WITH RESPECT TO COLLABORATIONS ON THE MITIGATION
OF BY-CATCH OF SOUTHERN OCEAN SEABIRDS**

Inter-American Tropical Tuna Commission (IATTC)

International Commission for the Conservation of Atlantic Tunas (ICCAT)

South East Atlantic Fisheries Organisation (SEAFO)

Indian Ocean Tuna Commission (IOTC)

Commission for the Conservation of Southern Bluefin Tuna (CCSBT)

Agreement on the Organization of the Permanent Commission on the Exploitation and Conservation of the Marine Resources of the South Pacific, 1952 (CPPS)

Southwest Indian Ocean Fisheries Commission (SWIOFC)

Commission for Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific (WCPFC)

Western Indian Ocean Tuna Organization Convention (WIOTO)

The organization does not have regulatory power.

Southern Indian Ocean Fisheries Agreement (SIOFA)

RESOLUTION 23/XXIII

Safety on board vessels fishing in the Convention Area

Species	all
Area	all
Season	all
Gear	all

The Commission,

Recognising the difficult and dangerous conditions experienced in high-latitude fisheries in the Convention Area,

Further considering the remoteness of those waters and in consequence the difficulties of search and rescue response,

Desiring to ensure that the safety of fishing crews and CCAMLR scientific observers remains a priority concern of all Members,

Urges Members to take particular measures through, *inter alia*, appropriate survival training and the provision and maintenance of appropriate equipment and clothing to promote the safety of all those on board vessels fishing in the Convention Area.

RESOLUTION 25/XXV
Combating illegal, unreported and unregulated fishing in the
Convention Area by the flag vessels of non-Contracting Parties

Species	all
Area	all
Season	all
Gear	all

The Commission,

Concerned about the increasing number of vessels repeatedly fishing in the Convention Area in an illegal, unreported or unregulated (IUU) manner,

Recognising that such fishing is causing potentially irreversible damage to fish stocks and other marine species and preventing the Commission from achieving its objective of conservation of Antarctic marine living resources in the Convention Area,

Concerned that many of these vessels are flagged to non-Contracting Parties that have failed to respond to correspondence from the Commission and diplomatic and other representations by Commission Members, seeking that they cooperate with the Commission,

Acknowledging that many of the above non-Contracting Parties are Parties to the United Nations Convention on the Law of the Sea (UNCLOS),

Desiring to promote recognition that CCAMLR conservation measures constitute relevant standards needed to achieve conservation and rational use of Antarctic marine living resources,

Noting that the International Plan of Action to prevent, deter and eliminate IUU fishing (IPOA-IUU) urges States to ensure that fishing vessels entitled to fly their flag do not engage in or support IUU fishing and requires that a Flag State be in a position to exercise its responsibility to control any vessel it registers and ensure such vessels do not engage in or support IUU fishing,

Determined to pursue diplomatic and other action, in accordance with international law, with non-Contracting Parties that fail to cooperate with CCAMLR, including by failing to direct their flag vessels to cease IUU fishing and failing to take legal and other action against their flag vessels that disobey such directions,

Recognising the value of cooperation and joint diplomatic approaches by CCAMLR Contracting Parties in undertaking such action and exerting influence,

urges all Contracting Parties to individually and collectively, including in other relevant international fora such as the United Nations Food and Agriculture Organization and regional fisheries management organisations, to the extent possible in accordance with their applicable laws and regulations:

1. Pursue diplomatic and other action, in accordance with international law, with non-Contracting Party Flag States, seeking, as appropriate, that they:
 - (i) recognise that CCAMLR conservation measures constitute relevant standards needed to achieve conservation and rational use of Antarctic marine living resources;

- (ii) investigate the activities of vessels fishing under their flag in the Convention Area, in accordance with Article 94 of UNCLOS, and report findings of such investigations to the Commission;
 - (iii) accede to the Convention and cooperate with the Commission and, until such time as they do, direct their flag vessels not to fish in the Convention Area and take legal and other action against those vessels that disobey this directive;
 - (iv) grant permission for boarding and inspection by designated CCAMLR inspectors of their flag vessels suspected of, or found to be, fishing in an IUU manner in the Convention Area.
2. Seek the cooperation of non-Contracting Party Port States when IUU fishing vessels seek to use the ports of non-Contracting Parties, urging them to take the steps in accordance with Conservation Measure 10-07.

RESOLUTION 26/XXVI

International Polar Year/Census of Antarctic Marine Life

The Commission,

Recognising that the International Polar Year is a large scientific program focused on the Arctic and Antarctic from March 2007 to March 2009,

Acknowledging that the International Polar Year involves over 60 States and 200 scientific projects, including the Census of Antarctic Marine Life (CAML),

Noting that CAML will investigate the distribution and abundance of Antarctica's vast marine biodiversity to develop a benchmark for the benefit of humankind,

Recalling the Edinburgh Antarctic Declaration on the International Polar Year from the Antarctic Treaty Consultative Meeting XXIX that gives political support to the International Polar Year,

Further recognising that the Commission, at its Twenty-fifth meeting, urged all Members to contribute to CCAMLR International Polar Year projects,

Noting Article IX of the Convention setting out the Commission's functions, including to 'facilitate research into and comprehensive studies of Antarctic marine living resources and of the Antarctic marine ecosystem',

1. Welcomes the notifications received from Contracting Parties of proposed International Polar Year/Census of Antarctic Marine Life research activities to be undertaken in the CCAMLR Convention Area.
2. Expresses its appreciation to those Contracting Parties who have committed to participate in International Polar Year activities in the CCAMLR Convention Area and to further extend knowledge of the marine living resources in the Antarctic marine ecosystem.
3. Encourages all Contracting Parties to support and where possible contribute to the International Polar Year, including through the Census of Antarctic Marine Life.

RESOLUTION 27/XXVII
Use of a specific tariff classification for Antarctic krill

Species	krill
Area	all
Season	all
Gear	all

The Commission,

Recognising the importance of krill within the Antarctic ecosystem,

Mindful of the continuing increase in krill notifications received by the CCAMLR Secretariat and the potential for krill catch rates in the CAMLR Convention Area to also increase,

Noting the increased demand for krill products on the final destination markets,

Reaffirming the importance of continuing the orderly development of the Antarctic krill fishery to ensure that the expanding fishery remains consistent with the objectives of the Convention,

urges the Contracting Parties,

To introduce into their domestic law, and use accordingly, an appropriate tariff classification in order to improve knowledge of the volume and trade of Antarctic krill.

RESOLUTION 28/XXVII
Ballast water exchange in the Convention Area

Species	all
Area	all
Season	all
Gear	all

The Commission,

Affirming that CCAMLR was established to conserve the marine living resources of the Antarctic marine ecosystem,

Aware of the potential for invasive marine organisms to be transported into or moved between biologically distinct regions within the Convention Area by ships in their ballast water,

Recalling the requirements of Annex II to the Protocol on Environmental Protection to the Antarctic Treaty regarding conservation of Antarctic fauna and flora and in particular of the precautions taken to prevent the introduction of non-native species,

Conscious that the *International Convention for the Control and Management of Ships' Ballast Waters and Sediments*, 2004 (IMO Ballast Water Management Convention), has yet to enter into force, but noting in particular its Article 13, which provides that in order to further the objectives of the Convention, Parties with common interests to protect the environment...in a given geographical area...shall endeavour...to enhance regional cooperation, including through the conclusion of regional agreements consistent with the Ballast Water Management Convention,

Recalling also Resolution 3(2006) adopted by the Antarctic Treaty Consultative Meeting, and Resolution MEPC.163(56) adopted by the International Maritime Organisation, which adopted *Guidelines for Ballast Water Exchange in the Antarctic Treaty Area*,

Desiring to extend the application of the above mentioned guidelines to the whole of the CAMLR Convention Area,

1. Urges all Contracting Parties and non-Contracting Parties cooperating with CCAMLR to take particular measures to apply the existing IMO *Guidelines for Ballast Water Exchange in the Antarctic Treaty Area*, and also the *Guidelines for Ballast Water Exchange in the CAMLR Convention Area north of 60°S*, as set out in the annex to this resolution, as an interim measure to all ships engaged in harvesting and associated activities in the CAMLR Convention Area, before the Ballast Water Management Convention comes into force.
2. Furthermore, urges all Contracting Parties and non-Contracting Parties cooperating with CCAMLR to take action to develop effective treatment for ballast water.

ANNEX

**GUIDELINES FOR BALLAST WATER EXCHANGE IN THE
CAMLR CONVENTION AREA NORTH OF 60°S¹**

1. The application of these Guidelines should apply to those vessels covered by Article 3 of the IMO's International Convention for the Control and Management of Ships' Ballast Water and Sediments (the Ballast Water Management Convention), taking into account the exceptions in Regulation A-3 of the Convention, which are engaged in harvesting and associated activities in the CAMLR Convention Area (as set out in Article II.3 of the Convention). These Guidelines do not replace the requirements of the Ballast Water Management Convention, but supplement the interim Ballast Water Regional Management Plan for Antarctica under Article 13(3), which has been adopted in ATCM Resolution 3(2006) and IMO Resolution MEPC.163(56).
2. If the safety of the ship is in any way jeopardised by a ballast exchange, it shall not take place. Additionally these guidelines shall not apply to the uptake or discharge of ballast water and sediments for ensuring the safety of the ship in emergency situations or saving life at sea in the CAMLR Convention Area.
3. A Ballast Water Management Plan should be prepared for each vessel with ballast tanks entering the Convention Area, specifically taking into account the problems of ballast water exchange in cold environments and in Antarctic conditions.
4. Each vessel entering the Convention Area should keep a record of ballast water operations.
5. Vessels are strongly encouraged to not discharge any ballast water in the Convention Area.

6. For vessels intending to discharge ballast water within the Convention Area, ballast water should first be exchanged before arrival in the Convention Area (preferably north of either the Antarctic Polar Frontal Zone or 60°S, whichever is the furthest north) and at least 200 n miles from the nearest land in water 200 m deep. (If this is not possible for operational reasons then such exchange should be undertaken in waters 50 n miles from the nearest land in waters of 200 m depth.)
7. Only those tanks that will be discharged in the Convention Area would need to undergo ballast water exchange following the procedure in paragraph 6. Ballast Water Exchange of all tanks is encouraged for all vessels that have the potential/capacity to load cargo in the Convention Area, as Antarctic voyages are renowned for their changes to planned routes and activities.
8. If a vessel has taken on ballast water in the Convention Area and is intending to discharge ballast water in Arctic, sub-Arctic, or sub-Antarctic waters, it is recommended that ballast water should be exchanged north of the Antarctic Polar Frontal Zone, and at least 200 n miles from the nearest land in water at least 200 m deep. (If this is not possible for operational reasons then such exchange should be undertaken in waters 50 n miles from the nearest land in waters of 200 m depth).
9. Release of sediments during the cleaning of ballast tanks should not take place in the Convention Area.
10. For vessels that have spent significant time in the Arctic, ballast water sediment should preferably be discharged and tanks cleaned before entering the Convention Area. If this cannot be done then sediment accumulation in ballast tanks should be monitored and sediment should be disposed of in accordance with the ship's Ballast Water Management Plan. If sediments are disposed of at sea, then they should be disposed of in waters greater than 200 n miles from the shoreline in waters 200 m deep.
11. CCAMLR Members are invited to exchange information on invasive marine species or anything that will change the perceived risk associated with ballast waters.

¹ ATCM Resolution 3(2006) and IMO Resolution MEPC.163(56) set out identical practical guidelines for all vessels operating in the Antarctic Treaty Area (i.e. south of 60°S).

**POLICY TO ENHANCE COOPERATION BETWEEN
CCAMLR AND NON-CONTRACTING PARTIES**

POLICY TO ENHANCE COOPERATION BETWEEN CCAMLR AND NON-CONTRACTING PARTIES¹

The Commission, in order to:

- ensure the effectiveness of CCAMLR conservation measures;
- enhance cooperation with non-Contracting Parties, including those implicated in fishing which undermines the effectiveness of those measures (hereafter referred to as illegal, unreported and unregulated fishing (IUU) fishing); and
- eliminate IUU fishing, including that by non-Contracting Parties,

hereby adopts the following policy:

- I. The Executive Secretary is requested to develop a list of non-Contracting Parties implicated in IUU fishing and/or trade either after the adoption of this policy or during the three years prior, which has undermined the effectiveness of CCAMLR conservation measures.
- II. The Chairman of the Commission shall write to the Minister for Foreign Affairs of each non-Contracting Party included in the abovementioned list explaining how IUU fishing undermines the effectiveness of CCAMLR conservation measures. The letter, as appropriate, will:
 - (a) invite and encourage non-Contracting Parties to attend as observers at meetings of the Commission in order to improve their understanding of the work of the Commission and the effects of IUU fishing;
 - (b) encourage non-Contracting Parties to accede to the Convention;
 - (c) inform non-Contracting Parties of the development and implementation of the CCAMLR Catch Documentation Scheme for *Dissostichus* spp. and provide them with a copy of the conservation measure and the explanatory memorandum;
 - (d) encourage non-Contracting Parties to participate in the CCAMLR Catch Documentation Scheme and draw their attention to the consequences for them of not participating;
 - (e) highlight the CDS Fund as a potential mechanism that could provide assistance for projects which would help prevent, deter and eliminate IUU fishing in the Convention Area and encourage non-Contracting Parties to request such assistance from the Commission by contacting the Secretariat with information on the support required for consideration by the Commission at its annual meeting;
 - (f) request non-Contracting Parties to prevent their flag vessels from fishing in the Convention Area in a manner which undermines the effectiveness of measures adopted by CCAMLR to ensure conservation and sustainably managed fisheries;

¹ As adopted at CCAMLR-XVIII and amended at CCAMLR-XXV and CCAMLR-XXVII.

- (g) if their flag vessels are involved in IUU fishing, request non-Contracting Parties to provide information to the CCAMLR Secretariat on their vessels' activities, including catch and effort data;
 - (h) seek the assistance of non-Contracting Parties in investigating the activities of their flag vessels suspected of being involved in IUU fishing, including inspecting such vessels when they next reach port;
 - (i) request non-Contracting Parties to report to the CCAMLR Secretariat on landings and transshipments in their ports in accordance with the format specified in Attachment A; and
 - (j) request non-Contracting Parties to deny landing or transshipments in their ports for fish harvested in CCAMLR waters not taken in compliance with CCAMLR conservation measures and requirements under the Convention.
- III. Parties shall individually and collectively take all appropriate efforts to implement or assist in the implementation of this policy; such efforts may include taking concerted action on joint demarches on non-Contracting Parties to complement correspondence from the Chairman.
- IV. The Commission will annually review the effectiveness of the implementation of this policy.
- V. The Executive Secretary will inform non-Contracting Parties concerned of new conservation measures adopted by CCAMLR after each annual meeting of the Commission.

**SUBMISSION OF INFORMATION BY NON-CONTRACTING PARTIES
ON LANDINGS AND TRANSHIPMENTS OF TOOTHFISH
(*DISSOSTICHUS SPP.*) IN THEIR PORTS**

To the extent possible the required information should be submitted in the following format:

- (i) whether the vessel is a fishing or cargo vessel; if it is a fishing vessel, what type of vessel (trawler/longliner);
- (ii) the name, international call sign and registration number of the vessel;
- (iii) the flag and port of registration;
- (iv) whether an inspection had been conducted by the Port State and, if so, its findings, including information on the fishing licence of the vessel concerned;
- (v) the species of fish involved, including the weight and form of catch, and whether it was landed or transhipped;
- (vi) if a fishing vessel, the location(s) in which it had operated according to the vessel's records and where it reported the catch as having been taken (CCAMLR or non CCAMLR); and
- (vii) the nature of any matters requiring further investigation by the Flag State.

CCAMLR COOPERATION ENHANCEMENT PROGRAM

Objectives

The aim of this Cooperation Enhancement Program is to encourage and build the capacity of non-Contracting Parties to cooperate with CCAMLR. The ultimate desired outcome is more countries working with CCAMLR to combat illegal, unreported and unregulated (IUU) fishing on the water and in their ports.

Cooperation between non-Contracting Parties and CCAMLR may be through:

- exchange of information about IUU fishing with CCAMLR;
- participation in key CCAMLR initiatives, such as the Catch Documentation Scheme for *Dissostichus* spp. (CDS), through implementation of conservation measures;
- acceding to the Convention and/or joining the Commission, as appropriate.

Guiding Principles

The Cooperation Enhancement Program has the following attributes:

- a focus on technical cooperation;
- flexibility to tailor cooperation to meet the needs of both the Commission and the recipient State on a case-by-case basis;
- a partnership model involving the CCAMLR Secretariat, experienced CCAMLR Member(s) as sponsors and the recipient States(s);
- matching of sponsors and recipients based on expertise, historical relationships between States and proximity;
- central repository of information and training material by the CCAMLR Secretariat.

Resourcing

CCAMLR Members and the Secretariat are able to submit proposals for consideration by the Commission under the auspices of the CDS Fund. Proposals will be considered by the Commission at its annual meeting against the provisions established under Conservation Measure 10-05, Annex B. Contracting Parties are encouraged to make contributions into the CDS Fund.

CCAMLR Members can develop their own training materials at any time as required. To encourage consistency and ensure effective use of resources, CCAMLR Members will actively share training materials. This will be facilitated by the Secretariat maintaining a

central repository of relevant materials and information on the CCAMLR website. CCAMLR conservation measures will always form the basis of technical and training cooperation. CCAMLR will fund the development of a package of standing training materials for the CDS that will be available to all Members.

Selecting Countries for Capacity Building

The Commission will agree a priority list of countries that may benefit from technical cooperation and update this list as required. The list will be developed from information submitted by Members, including reports on the activity and movement of IUU fishing vessels and their interactions with non-Contracting Parties.

Inclusion of countries on the list will be guided by the following criteria:

- The country is a key Flag and/or Port State for toothfish, and its cooperation would assist the Commission to better control IUU fishing and trade of fish caught in an IUU manner and/or achieve the objective of the Convention.
- The country is open to change and there is genuine political will to cooperate with CCAMLR and combat IUU fishing, but the country does not do so because it lacks the resources or expertise.
- With some training and technical assistance over time, the country would eventually be able to implement relevant conservation measures on their own.
- The country has appropriate government structures to commit the necessary time and resources to allow it to effectively participate in technical cooperation and is prepared to make a commitment to such cooperation (for example, by nominating a competent authority for implementation of the CDS).

Reporting

CCAMLR Members are encouraged to report on the nature and outcomes of their technical cooperation. This reporting is at the discretion of Members, but could take the form of a Commission circular or a presentation at the Commission meeting.

TEXT OF THE CCAMLR SYSTEM OF INSPECTION

TEXT OF THE CCAMLR SYSTEM OF INSPECTION¹

I. Each Member of the Commission may designate Inspectors referred to in Article XXIV of the Convention.

- (a) Designated Inspectors shall be familiar with the fishing and scientific research activities to be inspected, the provisions of the Convention and measures adopted under it.
- (b) Members shall certify the qualifications of each Inspector they designate.
- (c) Inspectors shall be nationals of the Contracting Party which designates them and, while carrying out inspection activities, shall be subject solely to the jurisdiction of that Contracting Party.
- (d) Inspectors shall be able to communicate in the language of the Flag State of the vessels on which they carry out their activities.
- (e) Inspectors shall be accorded the status of ship's officer while on board such vessels.
- (f) Names of Inspectors shall be communicated to the Secretariat within fourteen days of designation.

II. The Commission shall maintain a register of certified Inspectors designated by Members.

- (a) The Commission shall communicate, each year, the register of Inspectors to each Contracting Party within a month of the last day of the Commission meeting.

III. In order to verify compliance with conservation measures adopted under the Convention, Inspectors designated by Members shall be entitled to board a fishing or fisheries research vessel in the area to which the Convention applies to determine whether the vessel is, or has been, engaged in scientific research, or harvesting, of marine living resources².

- (a) Inspection may be carried out by designated Inspectors from vessels of the Designating Member.
- (b) Ships carrying Inspectors shall carry a special flag or pennant approved by the Commission to indicate that the Inspectors on board are carrying out inspection duties in accordance with this system.
- (c) Such Inspectors may also be placed on board vessels, with the schedule of embarkation and disembarkation of Inspectors subject to arrangements to be concluded between the Designating Member and the Flag State.

¹ As adopted at CCAMLR-VII (paragraph 124) and amended at CCAMLR-XII (paragraphs 6.4 and 6.8), CCAMLR-XIII (paragraph 5.26), CCAMLR-XIV (paragraphs 7.22, 7.26 and 7.28), CCAMLR-XV (paragraph 7.24), CCAMLR-XVI (paragraph 8.14), CCAMLR-XVIII (paragraph 8.25), CCAMLR-XXV (paragraph 12.73) and CCAMLR-XXVI (paragraphs 13.79 to 13.83).

² The System of Inspection applies to flag vessels of all Members of the Commission and Contracting Parties.

IV. Each Contracting Party shall provide to the Secretariat:

- (a) One month before the commencement of the research cruise and in accordance with Conservation Measure 24-01 'The Application of Conservation Measures to Scientific Research', the names of all vessels intending to conduct fishing for research purposes.
- (b) Within seven days of the issuance of each permit or licence in accordance with Conservation Measure 10-02 'Licensing and Inspection Obligations of Contracting Parties with regard to their Flag Vessels Operating in the Convention Area', the following information about licences or permits issued by its authorities to its flag vessels authorising them to fish in the Convention Area:
 - name of the vessel;
 - time periods authorised for fishing (start and end dates);
 - area(s) of fishing;
 - species targeted; and
 - gear used.
- (c) By 31 August, an annual report of steps it has taken to implement the inspection, investigation and sanction provisions of Conservation Measure 10-02 'Licensing and Inspection Obligations of Contracting Parties with regard to their Flag Vessels Operating in the Convention Area'.

- V. (a) Any vessel present in the Convention Area for the purpose of harvesting or conducting scientific research on marine living resources shall, when given the appropriate signal in the International Code of Signals by a ship carrying an Inspector (as signified by flying the flag or pennant referred to above), stop or take other such actions as necessary to facilitate the safe and prompt transfer of the Inspector to the vessel, unless the vessel is actively engaged in harvesting operations, in which case it shall do so as soon as practicable.
- (b) The Master of the vessel shall permit the Inspector, who may be accompanied by appropriate assistants, to board the vessel.

VI. Inspectors shall have the authority to inspect catch, nets and other fishing gear as well as harvesting and scientific research activities, and shall have access to records and reports of catch and location data insofar as necessary to carry out their functions.

- (a) Each Inspector shall carry an identity document issued by the Designating Member in a form approved or provided by the Commission stating that the Inspector has been designated to carry out inspection in accordance with this system.
- (b) On boarding a vessel, an Inspector shall present the document described in paragraph VI(a), above.
- (c) The inspection shall be carried out so that the vessel is subject to the minimum interference and inconvenience. Inquiries shall be limited to the ascertainment of facts in relation to compliance with the Commission measures in effect for the Flag State concerned.

- (d) Inspectors may take photographs and/or video footage as necessary to document any alleged violation of Commission measures in force.
- (e) Inspectors shall affix an identification mark approved by the Commission to any net or other fishing gear which appears to have been used in contravention to conservation measures in effect and shall record this fact in the reports and notification referenced in paragraph VIII, below.
- (f) Inspectors shall be provided appropriate assistance by the Master of the vessel in carrying out their duties, including access as necessary to communications equipment.
- (g) Each Contracting Party, subject to and in accordance with their applicable laws and regulations, including rules governing the admissibility of evidence in domestic courts, shall consider and act on reports from Inspectors of Designating Members under this scheme on the same basis as reports from its own inspectors, and both Contracting Party and designating Member concerned shall cooperate in order to facilitate judicial or other proceedings arising from any such report.

VII. If a vessel refuses to stop or otherwise facilitate transfer of an Inspector, or if the Master or crew of a vessel interferes with the authorised activities of an Inspector, the Inspector involved shall prepare a detailed report, including a full description of all the circumstances and provide the report to the Designating Member to be transmitted in accordance with the relevant provisions of paragraph IX.

- (a) Interference with an Inspector or failure to comply with reasonable requests made by an Inspector in the performance of his duties shall be treated by the Flag State as if the Inspector were an Inspector of that State.
- (b) The Flag State shall report on actions taken under this paragraph in accordance with paragraph XI, below.

VIII. Inspectors shall complete the approved CCAMLR inspection report form.

- (a) The Inspector shall provide a written explanation, on the inspection report form, of any alleged violation of Commission measures in force. The Inspector shall allow the Master of the vessel being inspected to comment, on the inspection report form, about any aspect of the inspection.
- (b) The Inspector shall sign the inspection report form. The Master of the inspected vessel shall be invited to sign the inspection report form to acknowledge receipt of the report.
- (c) Before leaving the vessel that has been inspected, the Inspector shall give the Master of that vessel a copy of the completed inspection form.
- (d) The Inspector shall provide a copy of the completed inspection form along with photographs and video footage to the Designating Member not later than 15 days of his/her arrival to port.

- (e) The Designating Member shall forward a copy of the inspection form not later than 15 days from its reception along with two copies of photographs and video footage to the CCAMLR Executive Secretary who shall forward one copy of this material to the Flag State of the inspected vessel not later than seven days from receipt.
- (f) Fifteen days after the transmission of the completed inspection form to the Flag State, the CCAMLR Executive Secretary shall transmit that form to Members together with comments or observations, if any, received from the Flag State.

IX. Any supplementary reports or information, or any report prepared in accordance with paragraph VII, shall be provided by the Designating Member to the CCAMLR Executive Secretary. The latter shall provide such reports or information to the Flag State, which shall be then afforded the opportunity to comment. The CCAMLR Executive Secretary shall transmit the reports or information to Members within 15 days following their receipt from the Designating Member, and the observations or comments, if any, received from the Flag State.

X. A fishing vessel present in the area of application of the Convention shall be presumed to have been engaged in scientific research, or harvesting, of marine living resources (or to have been commencing such operations) if one or more of the following four indicators have been reported by an inspector, and there is no information to the contrary:

- (a) fishing gear was in use, had recently been in use or was ready to be used, e.g.:
 - nets, lines or pots were in the water;
 - trawl nets and doors rigged;
 - baited hooks, baited pots or traps or thawed bait were ready for use;
 - log indicated recent fishing or fishing commencing;
- (b) fish which occur in the Convention Area were being processed or had recently been processed, e.g.:
 - fresh fish or fish waste were on board;
 - fish were being frozen;
 - from operational or product information;
- (c) fishing gear from the vessel was in the water, e.g.:
 - fishing gear bore the vessel's markings;
 - fishing gear matched that on the vessel;
 - log indicated gear in the water;
- (d) fish (or their products) which occur in the Convention Area were stowed on board.

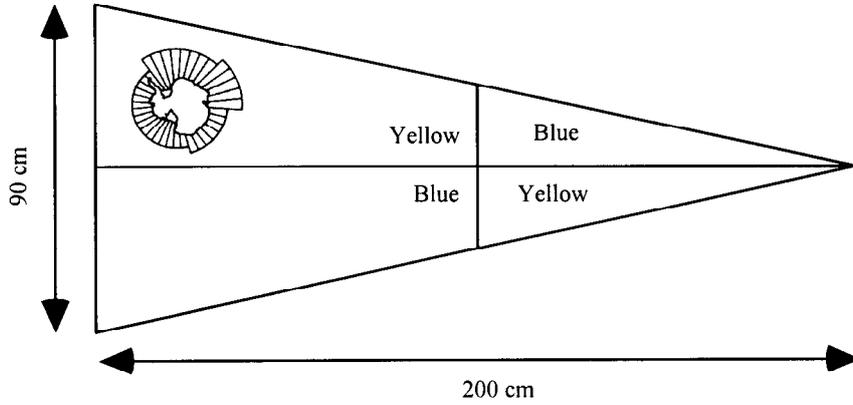

XI. If, as a result of inspection activities carried out in accordance with these provisions, there is evidence of violation of measures adopted under the Convention, the Flag State shall take steps to prosecute and, if necessary, impose sanctions.

XII. The Flag State shall, within fourteen days of the laying of charges or the initiation of proceedings relating to a prosecution, inform the Secretariat of this information, and shall continue thereafter to inform the Secretariat as the prosecution develops or is concluded. In addition, the Flag State shall at least once a year report to the Commission, in writing, about the results of such prosecutions and sanctions imposed. If a prosecution has not been completed, a progress report shall be made. When a prosecution has not been launched, or has been unsuccessful, the report shall contain an explanation.

XIII. Sanctions applied by Flag States in respect to infringements of CCAMLR provisions shall be sufficiently severe as to effectively ensure compliance with CCAMLR conservation measures and to discourage infringements and shall seek to deprive offenders of any economic benefit accruing from their illegal activities.

XIV. The Flag State shall ensure that any of its vessels which have been found to have contravened a CCAMLR conservation measure do not carry out fishing operations within the Convention Area until they have complied with the sanctions imposed.

INSPECTION PENNANT

FISHING GEAR IDENTIFICATION MARK

A standard marker has been approved for identifying fishing gear that has been judged by an Inspector to be contrary to standards set by the Commission. It is in the form of a sealable plastic ribbon with an identifying number stamped into it. The identifying number is to be recorded in the appropriate space in the form for reporting the inspection.

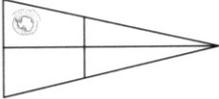

IDENTIFICATION DOCUMENT

Inspectors are required to carry an identity document of the type shown below.

**TEXT OF THE CCAMLR SCHEME OF
INTERNATIONAL SCIENTIFIC OBSERVATION**

TEXT OF THE CCAMLR SCHEME OF INTERNATIONAL SCIENTIFIC OBSERVATION¹

A. Each Member of the Commission may designate observers referred to in Article XXIV of the Convention.

- (a) The Commission will specify activities of scientific observers on board vessels. These activities are described in Annex I and may be modified taking into account advice from the Scientific Committee. Additional scientific activities may be agreed between the Receiving and Designating Member States provided these do not conflict with, or detract from, the activities specified by the Commission.
- (b) The Member wishing to place scientific observers on board a vessel of another Member shall be referred to as the 'Designating Member' and the Member who accepts a scientific observer on board its vessel shall be referred to as the 'Receiving Member'. Scientific observers in this scheme shall be nationals of the Designating Member and shall conduct themselves in accordance with the customs and order existing on the vessel on which they are operating.
- (c) Members shall designate adequately qualified scientific observers who shall be familiar with the harvesting and scientific research activities to be observed, the provisions of the Convention and the measures adopted under it and who are adequately educated and trained to carry out competently the duties of scientific observers as required by the Commission.
- (d) Scientific observers shall be able to communicate in the language of the Flag State of the vessels on which they carry out their activities.
- (e) Scientific observers shall each carry a document issued by the Designating Member in a form approved by the Commission identifying them as CCAMLR scientific observers.
- (f) Scientific Observers shall submit to the Commission through the Designating Member, not later than one month after the completion of the observer trip or after the return of the observer to his/her home country, all observer logbooks and reports of each observation assignment undertaken, using the observation formats approved by the Scientific Committee as they appear in the *Scientific Observers Manual*. The Secretariat shall send a copy of the scientific observer's report to the Receiving Member within 14 days of receipt. The language of the scientific observer's report shall be in one of the Commission's official languages, as agreed upon in the bilateral agreement between the Designating and Receiving Members.

¹ As adopted at CCAMLR-XI (paragraph 6.11) and amended at CCAMLR-XVI (paragraph 8.21) and CCAMLR-XXVII (paragraph 13.68).

- (g) The Designating Member, in consultation with the scientific observer, shall be responsible for providing clarification about data collected, observations made, and incidents that may have occurred during deployment.
- (h) Upon review of the observer's report, the Receiving Member shall advise the Secretariat and the Designating Member of any discrepancies as soon as they are identified. In the event of such notification, the Designating and Receiving Members will make every effort to resolve the issue. If the Designating and Receiving Members notify the Secretariat that they are unable to resolve such issues, the Secretariat will note any unresolved discrepancy.

B. In order to promote the objectives of the Convention, Members agree to take on board their vessels engaged in scientific research or harvesting of marine living resources designated scientific observers, who shall operate in accordance with bilateral arrangements concluded.

Such a bilateral arrangement shall include the following principles:

- (a) The scientific observers shall be given the status of ship's officers. Accommodation and meals for scientific observers on board shall be of a standard commensurate with this status.
- (b) Receiving Members shall ensure that their vessel operators cooperate fully with the scientific observers to enable them to carry out the tasks assigned to them by the Commission. This will include allowing scientific observers access to data, equipment and those operations of the vessel necessary to fulfil their duties as required by the Commission.
- (c) Receiving Members shall ensure that their vessel operators cooperate fully with scientific observers to enable the observers to carry out their data collection duties as specified in the *Scientific Observers Manual* without impediment or influence. Arrangements shall be made for messages to be sent and received on behalf of scientific observers using the vessel's communication equipment and operator. Reasonable costs of such communications shall normally be borne by the Designating Member. After notifying the Master, scientific observers shall be allowed such access as is necessary to undertake observation duties, including the vessel's navigation equipment and personnel to determine the vessel's position, course and speed.
- (d) Receiving Members shall take appropriate action with respect to their vessels to ensure safe working conditions, the protection, security and welfare of scientific observers in the performance of their duties, and to provide them with medical care and safeguard their freedom and dignity in adherence to all pertinent international maritime regulations.
- (e) For transfers at sea, Members shall: (i) ensure that their vessel operators conduct transfers of observers under safe conditions and with the agreement of the observers (ii) conduct the transfer in a manner which maximises the safety of observers and crew during the procedure, and (iii) provide experienced crew members to assist observers during any transfer which is made.

- (f) Arrangements involving the transportation and boarding of scientific observers shall be organised so as to minimise interference with harvesting and research operations.
- (g) Scientific observers shall provide to the relevant masters copies of such records, prepared by the scientific observers, as the masters may wish to retain.
- (h) Designating Members shall ensure that their scientific observers carry insurance satisfactory to the Parties concerned.
- (i) Transportation of scientific observers to and from boarding points shall be the responsibility of the Designating Member.
- (j) Unless otherwise agreed, the equipment, clothing and salary and any related allowances of a scientific observer shall normally be borne by the Designating Member. The vessel of the Receiving Member shall bear the cost of on-board accommodation and meals of the scientific observer.
- (k) The bilateral arrangement shall address such other matters as deemed appropriate by both the Designating and Receiving Members, such as liability and confidentiality.

C. For each observer deployed, the Designating Members shall provide the following information to the Secretariat prior to the deployment of the observer:

- (a) date of signing the arrangement;
- (b) name and flag of the vessel receiving the observer;
- (c) Member designating the observer;
- (d) area of fishing (CCAMLR statistical area, subarea, division);
- (e) type of data to be collected by the observer and submitted to the Secretariat (e.g. by-catch, target species, biological data);
- (f) expected dates of the start and end of the observation program;
- (g) expected date of returning the observer to his/her home country.

D. In order to maintain the objectivity and scientific integrity of the data, Designating Members, Receiving Members, the vessels on which scientific observers are deployed and the scientific observers themselves, shall uphold and promote the following provisions:

- (a) A scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation shall not:
 - (i) contravene the requirements established in the laws and regulations of the Receiving Member or violate general rules of behaviour and safety that

apply to all vessel personnel, provided such rules do not interfere with the duties of the observer under this Scheme, as stipulated in the bilateral arrangement between the Designating and the Receiving Members;

- (ii) inhibit the proper functioning and fishing activities of the vessel;
 - (iii) solicit or accept, directly or indirectly, any gratuity, gift, favour, loan, or anything of monetary value from anyone who conducts fishing or fish processing activities that are regulated by CCAMLR, or who has interests that may be substantially affected by the performance or non-performance of the official duties of scientific observers, with the exception of meals, accommodations, or salary when provided by the vessel;
 - (iv) have been convicted of a serious criminal offense for five years prior to appointment as an observer;
 - (v) engage in any illegal actions or any other activities that would reflect negatively on his/her image as a professional scientist, on other scientific observers, on the integrity of data collection, or on CCAMLR as a whole;
 - (vi) have any financial interest in, or relationship with, any vessel or business harvesting or processing products from a CCAMLR fishery.
- (b) The owner, Master, agent, and crew of a vessel on which a scientific observer is deployed shall not:
- (i) offer a scientific observer, either directly or indirectly, any gratuity, gift, favour, loan, or anything of monetary value, except for meals, accommodations or salary when provided by the vessel;
 - (ii) intimidate, or interfere with the duties of a scientific observer;
 - (iii) interfere with or bias the sampling procedure employed by a scientific observer;
 - (iv) tamper with, destroy, or discard a scientific observer's collected samples, equipment, records, photographic film, papers, or effects without the express consent of the observer;
 - (v) prohibit, impede, threaten, or coerce, an observer from/into collecting samples, making observations, or otherwise performing the observer's duties; or
 - (vi) harass a scientific observer.
- (c) Deployment limitations. Designating Members shall seek, to the extent possible, to avoid having a scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation undertake multiple consecutive trips on the same vessel.

- (d) Confidentiality. Designating Members shall require that a scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation shall not:
 - (i) disclose verbal, written, or other evidence or observations made on-board a vessel, or observations made in a processing facility, including data or commercially sensitive vessel-specific fishing, processing, and marketing information, to any person except to the Secretariat and as provided for in the bilateral arrangement;
 - (ii) take data or observer logbooks from one vessel onto another, except that if an observer is unable to submit data before being redeployed on another vessel, the scientific observer shall take reasonable steps to safeguard the data and observer logbooks.
- E.
 - (a) When the Designating Member receives information regarding actions of the scientific observer that may contravene the provisions of this Scheme, the Designating Member shall take prompt and appropriate action, in accordance with its domestic law. The Designating Member will notify the Receiving Member and the Commission of any appropriate action taken.
 - (b) When the Receiving Member receives information regarding actions of the vessel owner, Master, agent, or crew that may contravene the provisions of this Scheme, the Receiving Member shall take prompt and appropriate action, in accordance with its domestic law. The Receiving Member will notify the Designating Member and the Commission of any appropriate action taken.
- F. Members who have designated scientific observers will take the initiative in implementing assignments identified by the Commission.
- G. The scope of functions and tasks described in Annex I should not be interpreted to suggest in any way the number of required observers which will be accepted on board a vessel.

**FUNCTIONS AND TASKS OF INTERNATIONAL SCIENTIFIC OBSERVERS
ON BOARD VESSELS ENGAGED IN SCIENTIFIC RESEARCH OR
HARVESTING OF MARINE LIVING RESOURCES**

1. The function of scientific observers on board vessels engaged in scientific research or harvesting of marine living resources is to observe and report on the operation of fishing activities in the Convention Area with the objectives and principles of the Convention for the Conservation of Antarctic Marine Living Resources in mind.

2. In fulfilling this function, scientific observers will undertake the following tasks, using the observation formats approved by the Scientific Committee:

- (i) record details of the vessel's operation (e.g. partition of time between searching, fishing, transit etc., and details of hauls);
- (ii) take samples of catches to determine biological characteristics;
- (iii) record biological data by species caught;
- (iv) record by-catches, their quantity and other biological data;
- (v) record entanglement and incidental mortality of birds and mammals;
- (vi) record the procedure by which declared catch weight is measured and collect data relating to the conversion factor between green weight and final product in the event that catch is recorded on the basis of weight of processed product;
- (vii) prepare reports of their observations using the observation formats approved by the Scientific Committee and submit them to CCAMLR through the Designating Member;
- (viii) assist, if requested, the captain of the vessel in the catch recording and reporting procedures;
- (ix) undertake other tasks as may be decided by mutual agreement of the parties involved;
- (x)¹ collect and report factual data on sightings of fishing vessels in the Convention Area, including vessel type identification, position and activity;
- (xi)² collect information on fishing gear loss and garbage disposal by fishing vessels at sea.

¹ Added in accordance with CCAMLR-XVII (paragraph 8.16). The Commission decided to review the effectiveness and the need to continue this activity after a two-year trial period (CCAMLR-XVII, paragraph 8.17).

² Added in accordance with CCAMLR-XVIII (paragraph 8.21).
