

Appendix 3. Fishing gear plans *San Aotea II*

The below is the fishing gear plans for *San Aotea II* as specified in CM 22-06; Annex 22-06/A Par 1.2.1:

Ranges of line lengths and hook numbers from *San Aotea II* records over the past three completed fishing seasons in Subarea 88.1:

	Minimum	Average	Maximum
Line length (m)	1,260	8,592	15,597
Number of hooks	900	6,137	11,141

Description of main gear items:

Item	Description
Backbone	12 mm lead-core internally weighted polypropylene/nylon line at 50 g/m
Grapnels	40 or 50 kg - two or four used per line depending on sea, bottom, and tidal conditions
Weights	About 5 kg - rarely used, tied to the line occasionally when setting in loose sea ice or when turning while setting
Hook type	15 mm straight shank 15/O hooks
Chain	Lengths of heavy chain generally 20 or 40 kg used for additional weighting at the line ends.
Floats	Only surface floats, either inflatable or pressure floats depending on ice conditions
Snoods	45-50 cm blue or white Capron™ snoods spaced at 1400 mm
