This calendar features the times of day of nautical twilight, sunrise and sunset at twelve locations in and around the Southern Ocean, including the Kerguelen Islands, King George Island, Davis Station, Mario Zucchelli Station, McMurdo Station and selected CEMP sites (<https://www.ccamlr.org/node/73031>).

Each plot shows the time of day of morning twilight, dawn ■, sunrise, day ■, sunset, dusk ■, evening twilight and night ■, from 1 January to 31 December 2016. The time of day is plotted in Coordinated Universal Time (UTC). The local time of day may be determined using the UTC offset at the user's location. CCAMLR provides an online nautical twilight calculator (<https://www.ccamlr.org/en/node/84096>) intended for use with CCAMLR's Conservation Measure 25-02 which aims to protect seabirds in the course of longline fishing.
